This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

Index
v. 38-68

Preface

This 11-year cumulative reference index contains multiple entries covering all technical papers and related discussions published in the TRANSACTIONS of the American Institute of Electrical Engineers from January 1, 1939, to December 31, 1949, inclusive, together with other material as designated for publication in the TRANSACTIONS during that period.

For convenience, this index is divided into two sections:

1. Subjects, arranged alphabetically on pages 1–147, inclusive. Any item published during the 11 years may be located by means of any one of several key words reflecting the subject matter of the item. Furthermore, most papers have been given additional listings under several broad subject divisions.

2. Authors, arranged alphabetically on pages 148–200, inclusive. This section contains the names of all authors and coauthors of technical papers and all published discussions, and gives complete page references to all material from each author as published during the 11 years covered.

Subject Index

A

Abnormal Currents in Distribution Transformers Due to Lightning. Bryant, Newman.....564–8; disc. 1003 1942

Abnormal Overvoltages Caused by Transformer Magnetising Currents in Long Transmission Lines. Peterson, Schroeder.....32–40 1943

Abnormal Voltage Conditions in Three-Phase Systems Produced by Single-Phase Switching. Clarke, Peterson, Light.....329–39; disc. 618 1941

Absorption Characteristics of Large A-C Stator Windings, Insulation Resistance and Dielectric-. Askey, Johnson.....347–51; disc. 458 1945

Absorption Tests in Drying Out Large Generators, Use of Dielectric-. Marcroft.....56–60; disc. 415 1945

Accelerated Flux Reversal in Reactor Cores Operating Above Saturation Density, Peak Voltages Induced by. Specht, Wentz.....254–63 1946

Accelerating Electric Motors Automatically, Two New Methods of. Leitch.....487–93; disc. 655 1941

Acceleration-Oscillogram Method of Motor-Torque Measurement. Atkinson, Downie.....7–9; disc. 473 1942

Acceleration Tests on Large Synchronous Pump Motors, Some. Ager.....416–22; disc. 649 1941

Acceleration With a Vacuum Tube, The Measurement of. Ramberg.....735–40 1947

Accelerometer—Vibrometer for Instrument-Gyroscope Testing, A Tachometer—. Laurenson, Long.....593–6; disc. 960 1945

Accessory Design Utilising New Laboratory Techniques, Cable. Bosworth, Farr.....1268–73; disc. 1273 1949

Accessory Vibration, Aircraft-Engine. Tyler.....1334–49; disc. 1487 1944

Accessory-Vibration Investigations, Aircraft-Electric-. Miller.....1283–90; disc. 1486 1944

Accuracy of Current Transformers, Computation of. Sinks.....663–8; disc. 1252 1940

Accuracy of Selsyn Generator-Control Transformer System, Electrical. Chestnut.....570–6; disc. 1118 1946

Accuracy of Temperature Measurements on Coil Surfaces. Beede, Cain.....586–90; disc. 590 1947

Accuracy of Three-Phase Metering Combinations, Relative. Weller.....925–9; disc. 1336 1941

Accuracy of Watt-Hour Meters on Intermittent Loads, The. Faucett, Keener, Helm...460–4; disc. 1184 1940

Accurate Time Control, Preliminary Consideration of System-Wide Load Divisions by Means of. Curtis, Pickslay.....1562–9; disc. 1569 1948

(Acoustics) An Electroacoustical System. Walker.....35–40; disc. 40 1948

Acoustics and the Quiet Train Ride. Jack.....382–92; disc. 417 1942

Action on Reversing of Thyratron Motor Control, Inverter. Palmer, Leigh.....175–84; disc. 494 1944

Actuator Equipment, Functional Design of Aircraft Electric. Gagnier.....813–15; disc. 1464 1944

Additions to Power Systems, Superposition Methods for Calculating Effects of. Rettig.....396–401; disc. 648 1941

Adequate Electrical Maintenance Essential to Transportation. Clardy.....517–21; disc. 945 1943

Adjustable Brushes, A Study of the 3-Phase Commutator Armature With Six. Franklin.....197–204 1948

Adjustable Frequency Control of High-Speed Induction Motors. Heumann.....719–25 1947

Adjustable Phase-Angle Discrimination, A Distance Relay With. Goldsborough.....835–8; disc. 1471 1944

Adjustable-Speed A-C Brush-Shifting Motor, Impedance Relationships of the. Baumann.....1460–2 1947

Adjustable Speed, Central-Station Auxiliary-Drive Motors for Constant and. Gibson.....746–50; disc. 976 1945

Adjustable-Speed Drive, A Wide-Range. Conrad, Tribken..789–90 1949

Adjustable-Speed Drive for A-C Systems, A New Type of. Conrad, Smith, Ordung:

Part I.....7–10; disc. 385 1943

Part II.....522–5; disc. 932 1943

Adjustable Speed Motors, Limitations in Design of D-C. Opel...1095–8 1949

Adjustable-Speed Wind-Tunnel Drive, Large. Clymer..156–8; disc. 456 1942

Adjusting Radiosonde Recorder, Automatic Range-. Beggs.....602–07 1949

Admittance-Vector Locus, Current-Transformer Performance Based on. Schwager...26–30; disc. 465 1942

Advancements in the Design of Long-Scale Indicating Instruments. Rowell, Millar.....155–60 1947

Advances in Aircraft Tachometer Design, Recent. Ballard, Hall.....646–8; disc. 1421 1944

Advances in Technique of Lightning Measurements. Brownlee..515–19 1949

Advantages of High-Speed Traction Motors. Atwell.....508–10 1943

(AEIC) Guide for Wartime Conductor Temperatures for Power Cables in Service.....606–10; disc. 942 1943

Aeronautical Research, 150,000 Horsepower Applied to. White...833–9 1946

Aeronautics Authority Instrument Landing System at Indianapolis, The Development of the Civil. Jackson, Alford, Byrne, Fischer.....849–58; disc. 1120 1940

Affecting the Range of Radar Sets, Factors. Quarles, Breazeale.....546–8 1946

Aging Characteristics of Dry-Type Transformer Insulation at High Temperature. Stewart, Whitman.....1600–06; disc. 1607 1948

Aging Tests on Class A Insulation, Preliminary Report on Laboratory. (Committee Report).....879–81; disc. 881 1947

(Agricultural) Rural Electrification Engineering and Electroagricultural Engineering. Samuels.....193–7; disc. 459 1943

Aid Design, Fundamentals of Hearing-. Penn.....744–9 1944

Aids for Electromechanical System Development, Laboratory. Newton, White.....315–19; disc. 319 1947

Aids to Quality Control in the Manufacture of Aircraft Generators. Potter.....525–9; disc. 1358 1944

AIEE-ASME Governor Performance Specification, Governors and the. Schwendner, Astley.....1334–6 1949

AIEE-ASME Standard Large 3,000-RPM Turbine Generators, Progress Report on. Mortensen, McClure, Laffoon.....674–5; disc. 675 1948

AIEE Publication Policy Becomes Effective in January 1947, New.....1721–3 1947

Ailments, Diagnosis of Rectifier. Dortort.....1298–1304 1949

Air and of Freon in a Uniform Field at High Pressures, D-C Breakdown Strength of. Trump, Safford, Cloud.....132–5; disc. 676 1941

Air at High Pressure, The Electric Strength of:

Part I. Skilling....161–5; disc. 165 1939

Part II. Skilling & Brenner.....112–15; disc. 677 1941

Air-Blast Circuit Breaker, Field Tests and Performance of a High-Speed 138-Kv. Sporn, Strang.....1–6; disc. 412 1942

Air-Blast Circuit Breaker for High-Voltage Service, A Conserved-Pressure. Rankin, Bennett.....193–7; disc. 673 1941

Air-Blast Circuit Breaker for 138,000-Volt Service, A Three-Cycle 3,500-Megavolt-Ampere. Byrd, Beall.....229–32; disc. 463 1945

Air-Blast Circuit-Breaker Installations in Canada, Some. Haberl, Moore.....859–63; disc. 1073 1942

Air-Blast Circuit Breaker, The Cross-. Prince, Henley, Rankin.....510–17; disc. 1121 1940

Air-Blast Circuit Breakers, Design and Construction of High-Capacity. Strang, Boisseau.....522–7; disc. 1131 1940

Air-Blast Circuit Breakers, Design and Operation of High-Voltage Axial. Leuthold.....869–75; disc. 1073 1942

Air-Blast Circuit Breakers for Metal-Clad Switchgear, Medium-Capacity. Bennett, Wyman.....383–8; disc. 627 1941

Air-Blast Circuit Breakers, Large Indoor Power. Jansson.....1675–8; disc. 1679 1948

Air-Blast Circuit Breakers, Mechanical Simplicity of. Haberl, Jensen.....869–74; disc. 1355 1941

Air Blast, Circuit Interruption by. Edsall, Stubbs..503–09; disc. 1129 1940

Air Blast, Dielectric Recovery by an A-C Arc in an. Browne.....169–76; disc. 507 1946

Air-Blast, Field Tests and Performance of Heavy-Duty High-Speed 138-Kv Circuit Breakers—Oil and. Sporn, St. Clair..401–10; disc. 463 1945

Air-Blast Interrupter for Severe Operating Duty, An Improved Axial. Taylor, Martin.....323–33; disc. 431 1943

Air-Blast Station-Type Circuit Breakers, Field Tests on High-Capacity. Strang, Skeats.....100–04; disc. 409 1942

Air-Blast 220-Kv 2,500-Megavolt-Ampere Reclosing Circuit Breaker, Performance Test of the Allgemeine Elektricitats Gesellschaft Free-Jet. Dovjikov, Diemond.....295–304; disc. 304 1948

Air-Break Switches for Protection of Transformer Stations, Automatic Grounding and. Ricker.....851–6; disc. 856 1949

Air-Break Switches, Service Restoration With Automatic. Reardon.....64–71; disc. 71 1948

Air Breaker, A New High-Capacity. Ludwig, Grissinger.....414–18; disc. 418 1939

Air Breaker, A Vertical-Flow Outdoor Compressed. Ludwig, Baker.....217–22; disc. 672 1941

Air Breaker for 2,500–5,000 Volts, Magnetic "De-ion." Ludwig, Nau. ....518–22; disc. 1125 1940

Air, Calculation of Initial Breakdown Voltages in. Ver Planck...99–104 1941

Air Circuit Breaker, A New 69-Kv Compressed-. Baker, Frisch.... ....363–8; disc. 369 1949

Air Circuit Breaker, An Improved Design of Low-Voltage Panel-Mounted. Sperow, Favre.... ....695–8; disc. 698 1948

Air Circuit Breaker and Its Application on a 132-Kv Power System, A Vertical-Flow Compressed-. Langstaff, Baker.....188–92; disc. 436 1943

Air Circuit Breaker for Central-Station Service, High-Power "De-ion." Dickinson.....421–5; disc. 425 1939

Air Circuit Breaker for 15,000-Volt Services, A Magnetic-Type. Linde, Wyman.....140–4; disc. 453 1944

Air Circuit Breaker for 5,000-Volt Service, "Magne-Blast." Boehne, Linde ....202–08; disc. 208 1940

Air Circuit Breaker for Mercury-Arc-Rectifier Anode Circuits and Its Relation to the Arc-Back Problem, A New Multiple High-Speed. Seaman, Morton.... ....788–96; disc. 1057

Air Circuit Breaker for Steel-Mill Service, A 500,000-Kva 7.5-Kv. Dickinson.....242–5; disc. 450 1944

Air Circuit Breaker for 23-Kv Arc Furnace Duty, A Compressed. Wilcox, Baker.....154–8 1948

Air Circuit Breaker With 250,000-Kva Interrupting Capacity, A New. Dickinson, Nau.... ....197–201; disc. 671 1941

Air Circuit Breakers, Improved Selective Tripping of Low-Voltage. West.....608–10; disc. 1431 1944

Air Circuit Breakers in A-C Railway Service, Compressed-. Wilcox, Harker.....141–5; disc. 419 1945

Air Circuit Breakers in Cascade Arrangement, Protection of Low-Voltage Circuits by. Anderson, Black.....1151–60; disc. 1356 1941

Air Circuit Breakers, Modern Trends of Low-Voltage. Seaman.... ....24–9; disc. 29 1940

Air Circuit Breakers, Selective Tripping of Low-Voltage. Deans.... ....971–6; disc. 976 1947

Air Circuit Breakers up to 500,000 Kva, 15 Kv, Size Reduction and Rating Extension of Magnetic. Dickinson, Frink.....220–3; disc. 510 1946

Air Conditioning, Electrothermal Space Heating and. Krueger.... ....718–22; disc. 1434 1944

Air Conditioning, The Rating and Application of Motors for Refrigeration and. Rutherford.... ....519–23; disc. 523 1939

Air-Cooled Oil-Immersed Power Transformers by Hot-Spot Temperatures, Emergency Overloading of. Montsinger, Ketchum.... ....906–16; disc. 993 1942

Air-Cooled Transformers, Design and Operating Characteristics of Modern Dry-Type. Satterlee.... ....701–04; disc. 1445 1944

Air-Cooled Transformers, Dielectric Strength and Protection of Modern Dry-Type. Bellaschi, Beck.... ....759–63; disc. 997 1945

Air-Core Reactors as Fault Limiting Means on High Interrupting Capacity Controllers, The Use of. Leitch.....469–74; disc. 474 1949

Air Corps Wind Tunnel at Wright Field, Dayton, Ohio, Variable-Speed Drive for United States Army. Dickey, Laffoon, Kilgore.... ....126–30; disc. 456 1942

Air, Determination of Corona Starting Voltages for Nonuniform Fields in. Hutton.....1674–9; disc. 1680 1947

Air Gap for Various Magnetic Materials in Cores of Coils Subject to Superposed Direct Current, Optimum. Legg.....709–12, disc. 969 1945

Air Gap Reactance of Polyphase-Machines, The. Alger, West.... ....1331–43 1947

Air Gaps, Dielectric-Recovery Characteristics of Large. McCann, Clark. ....45–52; disc. 394 1943

Air, Long 60-Cycle Arcs in. Strom.... ....113–18; disc. 504 1946

Air Operating Mechanism for Oil Circuit Breakers, A Compressed-. Cunningham, Hill.... ....695–8; disc. 1019 1942

Air or Conduit, Current Rating of Cables as Affected by Mutual Heating in. (IPCEA Committee Report)...354–65; disc. 424, 1352 1944

Air Powerhouse Breaker, A 2,500,000-Kva Compressed-. Ludwig, Wilcox, Baker.....235–41; disc. 414 1942

Air Switch and a New Concept of Contact Performance, A New Outdoor. Killian.....1382–7; disc. 1387 1948

Air Switch and the Principles Involved in Its Design, A New Outdoor. Graybill, Ferguson.... ....583–6; disc. 953 1945

Air Switches for Line Sectionalizing and Load Transfer, Automatic Control of. Rich, Kirwen.... ....293–9; disc. 299 1947

Air Transportation

A Carbon-Pile Speed Governor. Button.....4–7 1946

A New High-Frequency Capacitor. Allison, Beverly.... ....915–16; disc. 1464 1944

A Study of the Modified Kramer or Asynchronous-Synchronous Cascade Variable-Speed Drive. Liwschitz, Kilgore.....255–60 1942

A Unique Moving-Magnet Ratio Instrument. Sias, Fisk.... ....634–6; disc. 1420 1944

All-Electric Gun Charging. Rohn.. .....1–4 1946

Altitude Rating of Electric Apparatus. Lebenbaum.... ....955–60; disc. 1485 1944

An Electronic Frequency Meter and Speed Regulator. Levin.... ....779–86; disc. 1181 1946

An Interval and Dwell Tester for Bomb-Release Interval Controls. Long.....648–51 1945

Analysis of High-Frequency Ignition Circuits. Robinson.....916–19 1944

Auxiliary-Power-Plant Requirements. O'Neil.....682–4 1944

Characteristics and Applications of Selenium-Rectifier Cells. Harty.. ....624–9; disc. 956 1943

Considerations in Servomechahism Design. Herwald.....871–6 1944

Electric Circuits and the Magnetic Compass. Burt, Beck.....24–6 1944

Electric Equipment Required in a Modern 6-Component Wind Tunnel Model Suspension System. Cox.....1258–66 1947

Electrical Control in Automatic Pilots. Young, Lynch, Boynton. ....939–43; disc. 1500 1944

Electrically Heated Clothing. Wotring.....1304–13 1944

Electrically Operated Gyroscopic Instruments. Konet.....735–8 1944

Electrolytic Corrosion—Methods of Evaluating Insulating Materials Used in Tropical Service. Thompson, Mathes.....295–9; disc. 443 1945

Fundamental Principles of Amplidyne Applications. Crever.... ....603–06; disc. 956 1943

High-Altitude Brush Problem. Ramadanoff, Glass.... ....825–30; disc. 1489 1944

Historical Development of Electric Connectors. Neifing.....925–8 1944

Investigation of Porcelain Insulators at High Altitudes. Fields, Cadwell.....656–60 1946

Large Adjustable-Speed Wind-Tunnel Drive. Clymer.... ....156–8; disc. 456 1942

Magnesyn Remote Indication. Childs.....679–82 1944

Magnetic-Drag Tachometer, The. Ballard.....366–9 1942

150,000 Horsepower Applied to Aeronautical Research. White..833–9 1946

Potential Breakdown of Small Gaps Under Simulated High-Altitude Conditions. DeLerno.... ....109–12; disc. 456 1944

Proposed Circuit for Aircraft Reverse-Current Cutout. Marsolf..1246–8 1948

Resonant-Circuit Constant-Current Regulators. Kevern.... ....807–10; disc. 992 1945

Sensitive Relay Contact Protection Systems. Dallas, McCully.... ....1204–07 1948

Solderless Terminals. Wells, Balsbaugh.....933–8; disc. 1484 1944

Solenoid-Operated Control Valves. Eckel, Wisegarver.....911–14 1944

The Calibration of Ignition Crest Voltmeters. Davis, Warren.... ....99–104; disc. 104 1947

The Electrical Resistivity of Resin-Treated Wood and Laminated Hydrolyzed-Wood and Paper-Base Plastics. Weatherwax, Stamm... ....833–8 1945

The Gyrosyn Compass. Esval.... ....857–60; disc. 1502 1944

The Scientific Basis for the New British System of Cockpit Lighting. Calvert.....869–70 1944

The Testing of Brushes for Life and Performance Under Various Altitude Conditions. Herman.... ....929–33; disc. 1491 1944

Treatment of High-Altitude Brushes by Application of Metallic Halides. Elsey.....576–9 1945

Very High-Frequency Radio-Noise Elimination. Owen.....949–54 1944

Vibration Insulation and Structural Rubber. Connon.....324–9 1945

Air Weather Soundings by Radio, Upper-. Diamond, Hinman, Dunmore, Lapham.....321–8 1940

Airborne Deposits, Insulators to Withstand. Taylor.... ....1436–41; disc. 1441 1948

Airborne Magnetometers for Search and Survey. Felch, Means, Slonczewski, Parratt, Rumbaugh, Tickner.....640–50 1947

Airborne Radar for Navigation and Obstacle Detection. Jensen, Arnett.....307–13; disc. 491 1946

Airborne Radar to Increase Airline Safety, Using. Ayer.....1387–95 1947

Aircraft—a British View, A-C Supplies for Services in Large. Earnshaw, Shearer.....1314–20 1944

Aircraft, A Capacitance-Type Fuel-Measurement System for. Pearson.....1363–8 1947

Aircraft, A D-C Telemeter or D-C Selsyn for. Jewell, Faus...314–17 1942

Aircraft, A Unique Engine-Synchronism Indicator for. Pearson.....650–3 1946

Aircraft, A-C Contactors for. Russell, Charbonneau...613–16; disc. 1364 1944

Aircraft Alternator, A 40-Kva 400-Cycle. Keneipp, Veinott.... ....816–21; disc. 1460 1944

Aircraft Alternator Drives, Governor Requirements for. Boice, Levoy. ....534–40; disc. 947 1945

Aircraft Alternators, Constant-Speed Drives for. Breitwieser.....763–8; disc. 991 1945

Aircraft Alternators Using Electronic Frequency Changers, Parallel Operation of. Bowlus, Nims.....31–8 1947

Aircraft, An Electric Deicing System for. Giloy.....1051–7 1949

Aircraft, An Improved Azimuth Indicating System for. Lynch, Pfuntner.....806–12 1946

Aircraft and Its Application to Fault-Current Calculations, Impedance of 400-Cycle Three-Phase Power Circuits on Large. Chappuis, Olmsted.....1213–20; disc. 1496 1944

Aircraft Applications, A Current-Limiting Fuse for. Powell.....541–5 1945

Aircraft Applications, Solenoid-Operated Hydraulic Valves for. Goepfrich.....866–8 1944

Aircraft, Automatic Temperature Control for. Gund.....730–4 1945

Aircraft, Basic Considerations in Selection of Electric Systems for Large. Boice, Levoy....279–87; disc. 478 1944

Aircraft, Basic Considerations in the Selection of Generators and Batteries for. Cobb, Winters.....889–93; disc. 1494 1944

Aircraft, Basic Design Principles for A-C Electric-Power Systems in Large Military. Chappuis, Olmsted.....12–17; disc. 487 1946

Aircraft, Brief Survey of Power-Supply Developments on British. Carter.....806–07; disc. 1503 1944

Aircraft Cabin-Supercharger Drive, Speed-Control System for an. Godsey, Miner, Walley.....37–40 1945

Aircraft Cable, A-C and D-C Short-Circuit Tests on. Cunningham, Davidson.....961–9; disc. 1359 1944

Aircraft Cable, Current Ratings of. Askew, McClinton.....988–92 1949

Aircraft Cable, Requirements for Low-Voltage. Hedges.....808–10; disc. 1473 1944

Aircraft, Carbon-Pile Voltage Regulators for. Neild.....839–43; disc. 1460 1944

Aircraft Carbon-Pile Voltage Regulators, Fundamentals, and Design Improvements. Austin, Richards.....983–7 1949

Aircraft Circuit Breaker, A 208Y/120-Volt 120-Ampere Three-Pole 400-Cycle Electrically Operated. Titus, Reifschneider.....551–5 1945

Aircraft Circuit Breakers. Kuhn..642–5 1943

Aircraft Contactors. Russell, Charbonneau.....563–6; disc. 980 1943

Aircraft Control Element, A Polarised Relay as an. Johnson, Glassow.....1249–55 1948

Aircraft, Design Relationships for D-C Generators for Use in. Bergman.....613–16; disc. 957 1943

Aircraft Differential-Voltage Cutout, An. Walley....632–4; disc. 1365 1944

Aircraft, Dimensional Studies of Lightweight Motors for. Morrill.....698–701 1944

Aircraft, D-C Arc Interruption for. Quill, Rader....883–8; disc. 1472 1944

Aircraft D-C Generators, An Integrated Control System for. McClinton.....94–8 1947

Aircraft D-C Generators, Steady-State Analysis of. Van Valkenburg, Matthews.....1351–8 1948

Aircraft D-C Power Systems, Control and Protection of. Austin.....741–5; disc. 1170 1946

Aircraft - Electric - Accessory-Vibration Investigations. Miller.....1283–90; disc. 1486 1944

Aircraft Electric Actuator Equipment, Functional Design of. Gagnier.....813–15; disc. 1464 1944

Aircraft Electric Apparatus With Particular Reference to Carbon Brushes, New Test Chambers for. Summers, Settle.....1205–12; disc. 1491 1944

Aircraft, Electric Automatic Pilots for. Halpert, Esval.....861–6; disc. 1501 1944

Aircraft, Electric Connections on. Stebbins, Taylor.....906–11; disc. 1473 1944

Aircraft, Electric Drive for. Crom.....1359–62 1947

Aircraft Electric-Equipment Maintenance, Airline. Petrasek.900–05 1944

Aircraft, Electric Gun Turrets for. Thompson....799–802; disc. 1475 1944

Aircraft Electric Machines, Effect of Altitude on Ventilation and Rating of. Veinott.....84–90; disc. 488 1946

Aircraft Electric-Motor Protection, Principles of. Vaughan.....760–5 1943

Aircraft Electric Motors, One Type of Rotary Magnetic Clutch and Its Associated Brake Used on. Andrews, Shanely..893–5; disc. 1477 1944

Aircraft Electric Motors, Requirements for. Siefkin.....810–13 1944

Aircraft Electric Power Protective Systems. Austin.....1375–82 1947

Aircraft Electric Power-Supply System. Yarmack.....655–8; disc. 953 1943

Aircraft Electric-Power System, Pressure - Arc - Interruption Circuit Breakers for 400-Cycle. Austin.....58–60; disc. 487 1946

Aircraft Electric-Supply Systems, Present D-C. Anderson, Crary, Schultz.....265–72; disc. 484 1944

Aircraft Electric System, A 120-Volt D-C. Cobb..1327–34; disc. 1495 1944

Aircraft Electric Systems as a Function of Altitude, Corona in. Wilson.....189–94; disc. 457 1944

Aircraft Electric Systems, Differential Generator Control Relay for D-C. Crever.....589–93 1944

Aircraft Electric Systems, Higher-Voltage D-C. Berry, Dallas.....843–9; disc. 1497 1944

Aircraft Electric Systems, Instrumentation of 400-Cycle. Corson, Stimson, Soley.....830–5; disc. 1501 1944

Aircraft, Electric-Wiring Installations in British. Horn.....896–900 1944

Aircraft Electrical Horisons. Godsey, Berry, Holliday..821–4; disc. 1503 1944

Aircraft, Electrically Driven Gyroscopes for. Witherow, Hansen...204–08 1944

Aircraft Electricity, Plastics in. Cooper.....1220–6 1944

Aircraft - Engine - Accessory Vibration. Tyler.....1334–49; disc. 1487 1944

Aircraft Engine and Propeller Test-Cell Lighting. Tuck.....1264–70; disc. 1493 1944

Aircraft Engine, Design of an Ignition System for an 18-Cylinder. Harkness.....1321–7; disc. 1467 1944

Aircraft-Engine Ignition Circuits, Electrical Measurements on. Berkey.....49–53 1946

Aircraft-Engine Torque Instruments. Godsey, Langer.....686–90; disc. 1457 1944

Aircraft Engines, The Power-Recovery System of Testing. Cassidy, Moeteller, Wright....240–6; disc. 416 1943

Aircraft Flight Control, Application of Electronics to. Gille, Kutsler.....849–53; disc. 1501 1944

Aircraft, 400-Cycle Inverters for Military. Hayes, Ray.....233–7 1945

Aircraft Fuel Tanks, Totalising Contents of. Macintyre.....663–65; disc. 1419 1944

Aircraft Fuses Must Protect. Lebens.....581–5; disc. 1368 1944

Aircraft Generator Power Center, D-C. Bottemiller.....1267–70 1947

Aircraft Generators, Aids to Quality Control in the Manufacture of. Potter.....525–9; disc. 1358 1944

Aircraft Generators, Analysis and Redesign of a Carbon Pile Voltage Regulator for. Kouwenhoven, Thaler.....1197–1202; disc. 1202 1948

Aircraft Generators, Blast-Tube Cooling for. Veinott.....520–5; disc. 1463 1944

Aircraft Generators, Design Considerations for D-C. Miner.....1234–40; disc. 1459 1944

Aircraft Generators on Load Analysis, Effects of Thermal Characteristics of. Rogers.....819–24 1946

Aircraft Generators, Parallel Operation of Main-Engine-Driven 400-Cycle. Levoy.....811–16; disc. 987 1945

Aircraft Generators, Testing. Keneipp.....105–09 1944

Aircraft Generators, The Application of Voltage Regulators to. Thompson, Crever.....363–5 1942

Aircraft, Governor for Variable-Ratio Transmission Used in Developmental 400-Cycle Electric System for Large. Desch, Garr, Hutton.....194–8 1946

Aircraft, Ground Power for. Blankenbuehler.....1319–22; disc. 1322 1948

Aircraft, Ground Power Supply for Modern. Owen, Murray, Rosenstein.....1296–1303 1947

Aircraft Gyroscopes, Damping Cylinders for. Sias, Wright.....979–85 1944

Aircraft, High-Voltage Ignition Cable Design for. Wermine.....716–19; disc. 993 1943

Aircraft Ignition Cables and Connectors, Simulated-High-Altitude Testing of. Race, Ross.....20–6 1945

Aircraft Illumination. Davies....26–30 1945

Aircraft in Flight, Radio Telemetering for Testing. Frederick....861–70 1946

Aircraft Instrumentation, Influence of Electricity on. Savage.....802–05; disc. 1501 1944

Aircraft Instruments to Meet War Service, Design Considerations in. Savage, Whittenton.....992–8; disc. 1419 1944

Aircraft Insulation, Effect of Altitude on Electric Breakdown and Flashover of. Berberich, Moses, Stiles, Veinott.....345–54; disc. 458 1944

Aircraft Inverter Construction. Button.....598–602 1943

Aircraft Inverters Supplying Large Single-Phase Loads, A Unit for Balancing the Voltages of Three-Phase. Wimpie.....532–3; disc. 1358 1944

Aircraft, Lighting Required for Commercial-Airline. Petrasek.....593–8; disc. 1456 1944

Aircraft, Lightning Stroke Damage to. Hagenguth....1036–44; disc. 1044 1949

Aircraft, Manual Switches for. Millermaster.....596–8 1943

Aircraft Models, Electronic Control of Frequency Converter Sets for Testing. Heumann, Strong.....931–9 1946

Aircraft Motor, A 400-Cycle. Schwandt.....508–12; disc. 948 1945

Aircraft Motors, Design Considerations of 400-Cycle. Sawyer.....877–9; disc. 1464 1944

Aircraft Motors, Inherent Overheating Protection of D-C. Veinott..920–5 1944

Aircraft Motors, Problems in Applying Protectors to Electric. Buell.....1250–8 1944

Aircraft, Paralleling and Regulation of 24–28-Volt D-C Generators in Multiengine. Siegal, DeCourcey.....854–7 1944

Aircraft, Peak Voltages With D-C Arc Interruption for. Phillips, Mitchel.....944–9 1944

Aircraft Position Lights, The Development of. Vitol..796–8; disc. 1493 1944
Aircraft Precipitation-Static Radio Interference. Starr.....363–70 1941
Aircraft, Preferred Practices for Electric Control Devices for. Hottenroth.....197–200; disc. 444 1945
Aircraft Propellers, Development and Application of Electric Heating to Deicing of. Sheets, Sand..1068–72 1949
Aircraft, Radio Noise Elimination in All-Metal. Foulon.....877–91; disc. 994 1943
Aircraft, Radio-Noise Elimination in Military. Weinstein, Howell, Lowe, Winter.....793–5; disc. 1466 1944
Aircraft, Radio-Noise Filters Applied to. Frick, Zimmerman.....590–5; disc. 979 1943
Aircraft-Radio Power Supply, Alternating Versus Direct Current for. Frits, Hooper..1227–33; disc. 1466 1944
Aircraft Reverse-Current Cutout, Proposed Circuit for. Marsolf.....1246–8 1948
Aircraft Signal Systems. Rugge.....3–5; disc. 455 1944
Aircraft, Some Aspects of the Application of Induction Motors to. Braun.....769–72; disc. 1476 1944
Aircraft Storage-Battery Design. Rupp.....773–7; disc. 1381 1944
Aircraft Structures, Electric-Circuit Burning-Clear and Damage Phenomena on. Foust, Hutton.....198–204; disc. 457 1944
Aircraft Systems, Electric-Circuit Fault-Protective Principles as Applied to D-C. Kaufmann.....333–44; disc. 482 1944
Aircraft Systems, Instability in D-C. Bunce, Cunningham, Davidson.....786–91 1945
Aircraft Systems, Selenium Power Rectifiers for A-C. Embry.....596–600 1945
Aircraft Tachometer Design, Recent Advances in. Ballard, Hall.....646–8; disc. 1421 1944
Aircraft, The Amplidyne Generator Applied to Speed-Controlled Electric Gun Turrets for. Zahorsky.....221–5; disc. 436 1945
Aircraft Transformers, Effect of Altitude on Temperature Rise of. Montsinger.....251–2 1945
Aircraft Transformers, Lightweight. Stephens.....1073–8 1949
Aircraft Transformers—Small and Light. Kiltie..899–902; disc. 991 1943
Aircraft Voltage Regulator and Cutout. Jones, Exner, Wright.....334–9 1942
Aircraft Window Deicing, Control and Power Systems for. Mershon.....1400–05 1947
Aircraft Windshields, Electrical Anticing of. McCrumm.....786–91 1946
Aircraft Wire and Cable, Short-Time Current Ratings for. Jones, Scott.....644–8; disc. 1135 1946
Airline Aircraft Electric-Equipment Maintenance. Petrasek...900–05 1944
Airline Aircraft, Lighting Required for Commercial. Petrasek.....593–8; disc. 1456 1944
Airline Safety, Using Airborne Radar to Increase. Ayer.....1387–95 1947
Airplane Alternators, Parallel Operation of. Exner..755–60; disc. 992 1943
Airplane-Engine Ignition Systems, Battery Booster Coils for. Alvino.....672–3; disc. 1381 1944
Airplane-Engine-Testing Power Recovery, Dodge Chicago Plant's Electric-Power-Distribution Scheme With. Bailey....121–3; disc. 484 1945
Airplane Lighting Service, Gaseous-Discharge Lamps for. Beggs.....760–2; disc. 1456 1944
Airplane Main Bus, Protection of the. Exner.....979–82 1949
Airplane, Starter-Generator Control System for a Multijet. Hart.....1316–18 1948
Airplanes, An Induction Generator Used With the All-Electric Automatic Pilot for. Vickers....182–5 1948
Airplanes, Automatic Temperature Control for Transport. Hedges.....1197 1947
Airplanes, Cables Used for Transmitting Electric Energy in. Peters, Phillips, Kronstein, Jealous.....1270–82; disc. 1474 1944
Airplanes, Electric Power for. Clardy..385–8; disc. 388 1940
Airport Runway and Approach Lighting. Kevern.....1396–9 1947
Alarm and Control System for Remote Control of Coaxial Cable Stations, B-1. Hearn, Weber.....622–6 1949
Alcoa Rectifier Installation. Housley, Winograd....1266–74; disc. 1409 1941
All-Electric Gun Charging. Rohn.....1–4 1946
Allgemeine Elektricitats Gesellschaft Free-Jet Air Blast 220-Kv 2,500-Megavolt-Ampere Reclosing Circuit Breaker, Performance Test of the. Dovjikov, Diemond.....295–304; disc. 304 1948
Alloy—An Improved Cable Sheathing, F-3 Lead. Hickernell, Snyder.....563–9; disc. 1136 1946
Alloy, Hiperco—A Magnetic. Stanley, Yensen.....714–18 1947
Alloys on Design Trends of Electrical Instruments, Influence of Improved Magnetic. Wilson, Whittenton.....100–04; disc. 461 1944
A-C Aircraft Systems, Selenium Power Rectifiers for. Embry....596–600 1945
A-C Ammeters and Voltmeters, Frequency Compensated. Whittenton, Wilkinson.....761–4 1946
A-C and D-C Short Circuit Tests on Aircraft Cable. Cunningham, Davidson.....961–9; disc. 1359 1944
A-C and D-C Starters by Means of Fuses and Circuit Breakers, The Degree of Short-Circuit Protection Afforded Small Low-Voltage. Jones.....611–12; disc. 1408 1944
A-C Arc Behavior Near Current Zero by Means of Mathematical Models, A Study of. Browne.....141–50; disc. 150 1948
A-C Arc in an Air Blast, Dielectric Recovery by an. Browne.....169–76; disc. 507 1946
A-C Arc Progresses, The. Holslag.....364–7; disc. 367 1939
A-C Arc Welding, Power Supply for. Welch, Wyer....116–20; disc. 435 1945
A-C Arcs in Flowing Liquids, Photographic Study of. Slepian, Browne.....823–8; disc. 1330 1941
A-C Bridge, Rapid-Recording. Mikelson, Bousman.....628–31; disc. 1232 1940
A-C Brush-Shifting Motor, Impedance Relationships of the Adjustable-Speed. Baumann.....1460–2 1947
A-C Circuits, Arcing Fault Currents in Low-Voltage. Wagner, Fountain.....166–72; disc. 172 1948
A-C Circuits of Grid-Controlled Rectifiers and Inverters, Harmonics in the. Evans, Muller.....861–8; disc. 869 1939
A-C Contactors for Aircraft. Russell, Charbonneau...613–16; disc. 1364 1944
A-C Crane Hoists, A Thrustor Lowering Control System for. Schwarz-Kast.....139–44; disc. 144 1947
A-C Dielectric-Loss and Power-Factor Method for Field Investigation of Electrical Insulation, The. Doble.....934–9; disc. 1348 1941
A-C Electric Distribution Systems, Selective Tripping Arrangements for Protection of Ship's. Cole.....1256–62; disc. 1262 1948
A-C Electric Locomotives on the Pennsylvania Railroad—Protection and Tonnage Rating, Single-Phase. Griffith.....224–8 1942
A-C Electric-Power Systems in Large Military Aircraft, Basic Design Principles for. Chappuis, Olmsted.....12–17; disc. 487 1946
A-C Fields, Use of Bismuth-Bridge Magnetic Fluxmeter for. Smith.....52–5 1939
A-C Generators, A Semiempirical Approach to Voltage Dip—with Suddenly Applied Loads on. Rosenberg.....160–6; disc. 166 1949
A-C Generators, Application and Performance of Electronic Exciters for Large. Langstaff, Vaughan, Lawrence.....246–53; disc. 515 1946
A-C Generators With Suddenly Applied Loads, Regulation of. Harder, Cheek.....310–18; disc. 490 1944
A-C Motor, Theory of the Brush-Shifting. Conrad, Zweig, Clarke:
Part I.....829–34 1941
Part II.....834–36 1941
Part III.....502–06 1942
Part IV.....507–13 1942
A-C Motors and Generators, Transients in. Smith.....61–9 1946
A-C Network Analysis Using Resistance Networks, Method for. Enns.....875–80; disc. 1069 1942
A-C Network Analyser, A New Design for the. Ryder, Boast.....674–80; disc. 1162 1946
A-C Network Analyzer, An Improved. Morgan, Rothe, Winaness.....891–5; disc. 895 1949
A-C Network Calculator, The Modern. Parker.....977–82; disc. 1395 1941
A-C Networks, A New Simple Calculator of Load Flow in. Enns.....786–90; disc. 1000 1943
A-C Pilot-Wire Relay, An Improved. Neher, McConnell...12–17; disc. 638 1941
A-C Potentiometer, A Multiplied-Deflection. Marshall.....77–80; disc. 460 1944
A-C Potentiometer and Its Application to the Non-Destructive Testing of Insulating Equipment, An Automatic. Keinath.....887–90; disc. 890 1939
A-C Power Cable, Semiconducting Shielding for. Merrell.....605–09; disc. 1145 1946
A-C Power-Distribution Systems, Fault Protection on Shipboard. Rickover, Ross....1109–20; disc. 1429 1944
A-C Power Transmission, Economics of Long-Distance. Crary, Johnson.....1092–9; disc. 1099 1947
A-C Power-Transmission Systems, Stability Limitations of Long-Distance. Clarke, Crary.....1051–9; disc. 1299 1941
A-C Power-Transmission Systems, Stability Study of. Holm.....893–905; disc. 1046 1942
A-C Railway Service, Compressed-Air Circuit Breakers in. Wilcox, Harker.....141–5; disc. 419 1945
A-C Resistance and Reactance of Large Conductors, Problems in the Measurement of. Salter.....1390–6; disc. 1396 1948
A-C Resistance of Large Size Conductors in Steel Pipe or Conduit. Wiseman.....1745–52; disc. 1752 1948
A-C Resistance of Segmental Cables in Steel Pipe. Meyerhoff, Eager.....816–29; disc. 829 1949
A-C Secondary Network Systems, Modern Relaying for. Beeman.....237–41; disc. 683 1941

A-C Sheath Currents and Their Effect on Lead-Cable-Sheath Corrosion, Study of. Sherer, Granbois.....264–8; disc. 483 1945

A-C Stator Windings Insulation Resistance and Dielectric-Absorption Characteristics of Large. Askey, Johnson.....347–51; disc. 458 1945

A-C Stator Windings, The Application of Surge Comparison Testing Equipment to Fractional Horsepower. Buchanan.....1356–8 1947

A-C Supplies for Services in Large Aircraft—a British View. Earnshaw, Shearer.....1314–20 1944

A-C Systems, A New Type of Adjustable-Speed Drive for. Conrad, Smith, Ordung:
Part I.....7–10; disc. 385 1943
Part II.....522–5; disc. 932 1943

A-C Systems, Short-Circuit Calculating Procedure for Low-Voltage. Darling.....1121–36; disc. 1294 1941

A-C Systems, Standardized Load-Center Unit Substations for Low-Voltage. Hunter, Page....519–25 1942

A-C Tripping and Reclosing of Line Sectionalising Circuit Breakers. Winegartner, Bonheimer...1357–9 1949

A-C Turbine Generators, Liquid Cooling of. Fechheimer.....553–61; disc. 561 1947

A-C Vibrator Inverter, New Type of D-C to. Kiltie...245–7; disc. 247 1940

A-C Voltmeter, A New Expanded Scale. Millar.....641–3 1949

A-C Watt-Hour Meters at No Load, The Anomalous Behavior of the Moving Systems of Single-Phase. Holtz.....116–21; disc. 121 1940

A-C Wave Form, Its Determination and Standardisation, History of. Bedell.....864–8; disc. 1072 1942

Alternating Currents, An Instrument for the Measurement of Large. Richter.....38–40 1944

Alternating Currents of Multilayer Windings, Effective Resistance to. Bennett, Larson.....1010–17; disc. 1262 1940

Alternating Versus Direct Current for Aircraft-Radio Power Supply. Fritz, Hooper..1227–33; disc. 1466 1944

Alternator, A 40-Kva 400-Cycle Aircraft. Keneipp, Veinott.....816–21; disc. 1460 1944

Alternator Drives, Governor Requirements for Aircraft. Boice, Levoy.....534–40; disc. 947 1945

Alternators, Application of and Operating Experience With Hydrogen-Cooled Synchronous Condensers and. Sporn, Porter.....890–907; disc. 1187 1940

Alternators, Constant-Speed Drives for Aircraft. Breitwieser.....763–8; disc. 991 1945

Alternators, Motor-Driven Exciters for Turbine. Bodine, Crary, Rankin.....290–7; disc. 515 1946

Alternators, Parallel Operation of Airplane. Exner.....755–60; disc. 992 1943

Alternators Using Electronic Frequency Changers, Parallel Operation of Aircraft. Bowlus, Nims.....31–8 1947

Altitude Brush Problem, High-. Ramadanoff, Glass.....825–30; disc. 1489 1944

Altitude Brushes by Application of Metallic Halides, Treatment of High-. Elsey.....576–9 1945

Altitude Conditions, Potential Breakdown of Small Gaps Under Simulated High-. DeLerno.....109–12; disc. 456 1944

Altitude Conditions, The Testing of Brushes for Life and Performance Under Various. Herman.....929–33; disc. 1491 1944

Altitude, Corona in Aircraft Electric Systems as a Function of. Wilson.....189–94; disc. 457 1944

Altitude Flashover and Corona Correction on Small Ceramic Bushings. Pendleton.....1324–30 1947

Altitude in the United States, Variations of Atmospheric Temperature With. Tenney.....230–2; disc. 727 1941

Altitude on Electric Breakdown and Flashover of Aircraft Insulation, Effect of. Berberich, Moses, Stiles, Veinott.....345–54; disc. 458 1944

Altitude on Impulse and 60-Cycle Strength of Electrical Apparatus, Effect of. Bellaschi, Evans.....236–41; disc. 442 1944

Altitude on Temperature Rise of Aircraft Transformers, Effect of. Montsinger.....251–2 1945

Altitude on Ventilation and Rating of Aircraft Electric Machines, Effect of. Veinott.....84–90; disc. 488 1946

Altitude Rating of Electric Apparatus. Lebenbaum....955–60; disc. 1485 1944

Altitudes, A Small High-Voltage Bushing Design for High. Vogel, Hart.....761–4 1949

Altitudes in Colorado, Lightning Investigation at High. Robertson, Lewis, Foust.....201–08; disc. 453 1942

Altitudes, Investigation of Porcelain Insulators at High. Fields, Cadwell.....656–60 1946

Alumina, Reconditioning of Insulating Oils by Activated. Housley.....172–6; disc. 176 1939

Aluminum Anodes, Cathodic Protection of Steel Water Tanks Using. Sudrabin, Mears.....197–200 1947

Aluminum Conductors, Joints and Clamps for. Tebo.....1145–50; disc. 1150 1948

Aluminum-Nickel-Cobalt Brake Magnets for Watt-Hour Meters. Green.....791–6; disc. 796 1939

Aluminum-to-Copper Connections, An Experimental Investigation of the Electrical Performance of Bolted. Bonwitt.....1208–18; disc. 1218 1948

Amalgam-Cathode Materials for Power Tubes. Lyon, Williams.....627–30 1948

Ambient-Temperature Conditions, Application of Apparatus and Conductors Under Various. Hellmund, McAuley.....553–8; disc. 992 1942

Ambient Temperature in Overloading Transformers and Voltage Regulators, Use of Equivalent Annual. Oldacre.....477–80; disc. 916 1943

Ambient Temperatures for Loading Transformers, Equivalent. Sealey.....87–93; disc. 449 1943

America, Radio for Telephone Service in. Romnes.....1060–7 1948

American Gas and Electric Company, Lightning Investigation on 132-Kv Transmission System of the. Gross, Lippert:
Part I.....178–85; disc. 450, 974 1942
Part II.....76–84; disc. 474 1945

American Telegraphy After 100 Years. D'Humy, Howe.....1014–32; disc. 1386 1944

Ammeter, Automatic Printing. LeClair.....93–9; disc. 757 1941

Ammeters and Voltmeters, Frequency Compensated A-C. Whittenton, Wilkinson.....761–4 1946

Ampere Air-Blast Circuit Breaker for 138,000 Volt Service, A Three-Cycle 3,500-Megavolt-. Byrd, Beall.....229–32; disc. 463 1945

Ampere Demand Meter, A New Thermal Volt-. Douglass, Morong.....79–83; disc. 83 1949

Ampere-Demand Meter, A Polyphase Thermal. Petsinger.....167–74 1947

Ampere Load Limits for Copper in Overhead Lines. Kidder, Woodward..148–52; disc. 388 1943

Ampere Method of Designing Capacitor Motors, The Equal-Volt-. Trickey.....990–2; disc. 1399 1941

Ampere Sealed Ignitron, A 400-. Steiner. Price....680–5; disc. 1161 1946

Ampere-Squared-Second Recorder. Rich.....839–42 1941

Amplidyne Applications, Fundamental Principles of. Crever.....603–06; disc. 956 1943

Amplidyne Generator Applied to Speed-Controlled Electric Gun Turrets for Aircraft, The. Zahorsky.....221–5; disc. 426 1945

Amplidyne Generator, Fundamentals of the. Bower.....873–81 1945

Amplidyne Generator, Steady-State Theory of the. Graybeal.....750–6; disc. 1049 1942

Amplidyne Generators, Industrial Applications of. Shoults, Edwards, Crever.....944–9; disc. 1136 1940

Amplidyne Generators, The Design Characteristics of. Fisher.....939–44; disc. 1135 1940

Amplifier—Class A Operation, The Dynamo-electric. Saunders.....1368–73 1949

Amplifier, Direct Coupled Oscillograph. Christian.....1383–6 1947

Amplifier for Bioelectric Recording, A High-Gain D-C. Goldberg...60–4 1940

Amplifier for Power Control, Dynamo-electric. Alexanderson, Edwards, Bowman.....937–9; disc. 1136 1940

Amplifier, Some Fundamentals of a Theory of the Transductor or Magnetic. Lamm.....1078–85 1947

Amplifier Stabilized for Gain and for Zero, Wide-Band D-C. Williams, Amey, McAdam..811–15; disc. 815 1949

Amplifier Stabilized for Zero and Gain, D-C. Williams, Tarpley, Clark...47–57 1948

Amplifier, The Resistance-Coupled. Cowles.....359–65 1945

Amplifier Using Biased Saturable Core Reactors, A Balanced. Kirschbaum, Harder.....273–8 1947

Amplifier-Wattmeter Combination for the Accurate Measurement of Watts and Vars, An. Brown, Cahoon.....593–7; disc. 597 1939

Amplifiers, An Analysis of Rotating. Litman.....1111–17 1949

Amplifiers for Naval Shipboard Applications, Magnetic. Buechler.....1241–5; disc. 1245 1948

Amplifiers, Load-Rating Theory for Multichannel. Holbrook, Dixon.....265–72 1940

Amplifiers, Self-Saturation in Magnetic. Dornhoefer.....835–46; disc. 846 1949

Amplifiers Using Pentode Tubes, Calculation and Design of Resistance-Coupled. Terman, Hewlett, Palmer, Pan.....879–84; disc. 1133 1940

Amplifiers with Feedback, Analytical Determination of Characteristics of Magnetic. VerPlanck, Finzi, Beaumariage.....565–70 1949

Amplitude Characteristics of Telephonic Signals, Devices for Controlling. Norwine.....62–7 1939

Amplitude-Modulation, Frequency-Modulation, and Single-Side-Band Systems for Power-Line Carrier Transmission, A Comparison of the. Cheek.....215–20; disc. 450 1945

Analog Computer, A Large-Scale General-Purpose Electric. Harder, McCann.....664–73 1948

Analog Computer to Nonlinear Mechanics and Servo ec anisms, Application of the California Institute of Technology Electric. McCann, Wilts, Locanthi.....652–60 1949

Analog Computers, Comparison of Long-Time and Short-Time. Paschkis 70–3 1949
Analogs of Linear Vibration Problems, Summary of Transformations Useful in Constructing. Corbett. 661–4 1949
Analogy, Determination of Transient Shaft Torques in Turbine Generators by Means of the Electrical-Mechanical. McCann, Warren, Criner....51–6; disc. 492 1945
Analogy, Dimensionless Analysis of Servomechanisms by Electrical. McCann, Herwald:
Part I....636–9; disc. 1132 1946
Part II....111–18 1947
Analogy Methods Applied to Servomechanism Problems, Electrical. McCann, Herwald, Kirschbaum....91–6; disc. 515 1946
Analogy, Solution of the General Voltage Regulator Problem by Electrical. Harder....815–25; disc. 825 1947
Analogy, The Transient Behavior of the Two-Stage Rototrol Main Exciter Voltage Regulating System as Determined by Electrical. Carleton 59–63 1949
Analysis, A Cathode-Ray Method of Wave. Johnson....1032–6; disc. 1398 1941
Analysis, An Extension of Impact Speed-Drop. Crever....191–6 1947
Analysis and an Optimum Synthesis of Linear Servomechanisms, The. Herr, Gerst....959–70 1947
Analysis and Design of a D-C Selsyn System. Manildi....512–16; disc. 946 1945
Analysis and Equivalent Circuit of a Variable-Ratio Frequency Changer, Tensorial. Kron....1503–06 1947
Analysis and Redesign of a Carbon Pile Voltage Regulator for Aircraft Generators. Kouwenhoven, Thaler....1197–1202; disc. 1202 1948
Analysis by Automatic Oscillographs, Fault Location and Relay Performance. Dupuis, Jacobs....442–6; disc. 1125 1946
Analysis, Effects of Thermal Characteristics of Aircraft Generators on Load. Rogers....819–24 1946
Analysis of Aircraft D-C Generators Steady-State. Van Valkenburg, Matthews....1351–8 1948
Analysis of Arc-Welding Reactors. Wheeler....87–90; disc. 434 1945
Analysis of Bushing-Current-Transformer Performance. Gebelein, Elsi ....541–6; disc. 1137 1940
Analysis of Circuit-Breaker Performance When Switching Large Capacitor Banks, Tests and. Schroeder, Boehne, Butler....821–31; disc. 1020 1942
Analysis of Completely Transposed Multiconductor Transmission Lines, Transient. Pipes....346–51; disc. 621 1941
Analysis of Control Systems, Graphical. Evans....547–51 1948
Analysis of Factors Which Influence the Application, Operation, and Design of Shunt-Capacitor Equipments Switched in Large Banks. Butler....795–800; disc. 1096 1940
Analysis of High-Frequency Ignition Circuits. Robinson....916–19 1944
Analysis of Measurements, Functional. Kinnard....987–95 1946
Analysis of Motor Selection for Brass-Slab Rolling-Mill Service, An. Berkley....185–9; disc. 189 1947
Analysis of Motor Temperature Rise, Complete. Felix, Jungk....578–86; disc. 684 1941
Analysis of Rating Methods for Intermittent Loads. Hellmund....4–7; disc. 1943
Analysis of Rectifier Circuits. Christensen, Willis, Herskind....1048–58 1944
Analysis of Relay Servomechanisms, An. Kahn...1079–87; disc. 1087 1949
Analysis of Results to Research Problems in Magnetic Recording, Application of Experimental Test Procedures and Methods of. Thompson 407–17 1949
Analysis of Rotating Amplifiers, An. Litman....1111–17 1949
Analysis of Servomechanisms by Electrical Analogy, Dimensionless. McCann, Herwald:
Part I....636–9; disc. 1132 1946
Part II....111–18 1947
Analysis of Short-Circuit Oscillograms. Kuyper....151–3; disc. 752 1941
Analysis of Short Circuits for Distribution Systems. Dalziel....757–64; disc. 1048 1942
Analysis of Speed Regulators Under Impact Loads, General. McCann, Osbon, Kirschbaum....1243–52 1947
Analysis of Symmetrical Networks by the Method of Symmetrical Components, Transient. Pipes....457–9; disc. 1107 1940
Analysis of the Application of High-Speed Reclosing Breakers to Transmission Systems. Crary, Kennedy, Woodrow....339–48; disc. 423 1942
Analysis of the Four-Phase System, Symmetrical-Components. Boyajian....48–51; disc. 426 1944
Analysis of Transient and Sustained Voltages in Ground-Fault Neutraliser Systems, An. Farnham, Hunter, Peterson....1257–66; disc. 1394 1941
Analysis of Transient Voltages in Networks. Bellaschi, Palermo....973–81 1940
Analysis of Unsymmetrical Machines. Burian....643–6 1948
Analysis, Rectifier Terminology and Circuit. Willis, Herskind....496–9; disc. 974 1942
Analysis, Regulating Transformers in Power-System. Hobson, Lewis....874–83; disc. 883 1939
Analysis, The General Solution Method of Power Network. Dunstan....631–8; disc. 638 1948
Analysis, The Torques of the Synchronous Tie—A Steady-State. Finzi, McConnell....1147–52 1949
Analysis to Automatic Control Systems, The Application of Lead Networks and Sinusoidal. Schwartz....69–76; disc. 76 1947
Analysis to Determine the Optimum Bussing Arrangements and Transmission Capabilities at Grand Coulee. Hoard, Bills....1259–64; disc. 1478 1944
Analysis Using Resistance Networks, Method for A-C Network. Enns ....875–80; disc. 1069 1942
Analytical Co-ordination Method, Field Tests of Oil Circuit Recloser Substantiate. Auer, Branflick, Woodward, McKinley..801–08; disc. 808 1949
Analytical Determination of Characteristics of Magnetic Amplifiers with Feedback. VerPlanck, Finzi, Beaumariage....565–70 1949
Analytical Methods of Solving Discrete Nonlinear Problems in Electrical Engineering. Keller....1194–1200; disc. 1389 1941
Analytical Treatment for Establishing Load-Cycle Ratings of Ignitrons. Marshall, Arnott..545–8; disc. 1051 1942
Analyzer, A New Design for the A-C Network. Ryder, Boast....674–80; disc. 1162 1946
Analyzer, A New Differential. Kuehni, Peterson....221–8; disc. 429 1944
Analyzer, A New Fourier Coefficient Harmonic. Charp. 644–9; disc. 639 1949
Analyzer, A Telegraph Signal. Erickson....380–4; disc. 384 1948
Analyzer, A Turbine-Governor Performance. Osbon....963–7; disc. 1401 1941
....disc. 393 1942
Analyzer, An Improved A-C Network. Morgan, Rothe, Winaness....891–5; disc. 895 1949
Analyzer for Determination of Circuit Recovery Characteristics, The Recovery-Voltage. Dunlap....958–62; disc. 1391 1941
Analyzer to Determine Plant Loading Schedules, Co-ordination of Fuel Cost and Transmission Loss by Use of the Network. George, Page, Ward....1152–60; disc. 1160 1949
Anesthetized Men, Study of Artificial Respiration on. Kouwenhoven, Hooker, York....1–2; disc. 446 1944
Angle-Regulator Characteristics, Steady-State Stability of Synchronous Machines as Affected by. Concordia....687–90 1948
Anode-Circuit-Breaker Design and Performance Criteria. Boehne, Atwood....337–45; disc. 437 1945
Anode Circuits and Its Relation to the Arc-Back Problem, A New Multiple High-Speed Air Circuit Breaker for Mercury-Arc Rectifier. Seaman, Morton....788–96; disc. 1057 1942
Anodes, Cathodic Protection of Steel Water Tanks Using Aluminum. Sudrabin, Mears....197–200 1947
Anodizing Applications, Automatically Controlled Copper-Oxide Rectifiers for Electroplating and. Buckley....181–4 1947
Anomalous Behavior of the Moving Systems of Single-Phase A-C Watt-Hour Meters at No Load, The. Holts....116–21; disc. 121 1940
Antenna Patterns, An Electromechanical Calculator for Directional-. Smith, Gove....78–83 1943
Antennas, Ultrahigh-Frequency Loop. Alford, Kandoian....843–8 1940
Anti-icing of Aircraft Windshields, Electrical. McCrumm....786–91 1946
Apparatus, A Method for Detecting the Ionization Point on Electrical. Quinn....680–2; disc. 1229 1940
Apparatus, Altitude Rating of Electric. Lebenbaum....955–60; disc. 1485 1944
Apparatus and Conductors Under Various Ambient-Temperature Conditions, Application of. Hellmund, McAuley....553–8; disc. 992 1942
Apparatus and Frequency-Control Possibilities, Short-Wave Diathermy. Gieringer....459–64 1941
Apparatus and Systems, Measurements Pertaining to the Co-ordination of Radio Reception With Power. Foust, Frick....284–91; disc. 455 1943
Apparatus as Affected by Radiation, Temperature Rise of Electrical. Penney....338–42; disc. 342 1940
Apparatus Bushings, A New Line of Oil Filled. Bowers, Johnston....729–32; disc. 733 1948
Apparatus Bushings, Report on. (Committee Report)..266; disc. 695 1941
Apparatus, Effect of Altitude on Impulse and 60-Cycle Strength of Electrical. Bellaschi, Evans....236–41; disc. 442 1944
Apparatus Flashover, Atmospheric Variations and. McAuley....798–803; disc. 1319 1941
Apparatus for Telephone Cables, Recent Improvements in Loading. Hale, Quinland, Ranges....385–92 1948
Apparatus, Gaseous Insulation for High-Voltage. Camilli, Chapman ....1463–9; disc. 1469 1947

Apparatus Life Quality, Statistical Methods in the Development of. Ferrell.....700–03; disc. 998 1945

Apparatus, Lightning Arresters for Distribution. Beck, Forbes.....719–24; disc. 970 1945

Apparatus of Rectangular Cross Section, Formulas for Calculating Temperature Distribution in Transformer Cores and Other Electric. Higgins.....190–4; disc. 493 1945

Apparatus, The Rating of Electrical Machinery and. Hellmund.....499–503; disc. 503 1939

Apparatus With Particular Reference to Carbon Brushes, New Test Chambers for Aircraft Electric. Summers, Settle...1205–12; disc. 1491 1944

Apparent-Impedance Method of Calculating Single-Phase Motor Performance, The. Morrill..1037–40 1941

Appliances, Design Factors Involved in the Design of Domestic Motored. Packer.....500–07; disc. 665 1941

Application and Operation of Automatic Reclosing Equipment on Stub Feeders, Interim Report on. (Committee Report).....536–40; disc. 934 1943

Application and Operation of Circuit Breakers and Switchgear, Interim Report on. (Committee Report).....481–83 1943

Application and Operation of Out-of-Step Protection, Interim Report on. (Committee Report).....567–73 1943

Application and Performance of Electronic Exciters for Large A-C Generators. Langstaff, Vaughan, Lawrence.....246–53; disc. 515 1946

Application Charts, Current-Transformer Output and. Koller.....573–7; disc. 1422 1944

Application, Electric Locomotive. Brandenstein, MacLeod.....1210–15; disc. 1382 1941

Application Engineering on Diesel-Electric Locomotives in Railroad Service. Bevan.....125–31 1949

Application of and Operating Experience With Hydrogen-Cooled Synchronous Condensers and Alternators. Sporn, Porter..890–907; disc. 1187 1940

Application of Apparatus and Conductors Under Various Ambient-Temperature Conditions. Hellmund, McAuley.....553–8; disc. 992 1942

Application of Capacitance Potential Devices. Clem.....1–8; disc. 8 1939

Application of Capacitors for Power-Factor Improvement of Induction Motors. Bloomquist, Boice.....274–8 1945

Application of Carrier to Power Lines. Rives.....835–44; disc. 945 1943

Application of Class B Insulation to Auxiliary-Type D-C Motors in Severe Duty Service, The. Compton.....828–34; disc. 1098 1940

Application of Compandors to Telephone Circuits. Carter, Dickieson, Mitchell.....1079–86 1946

Application of Complex Logarithmic and Geometric Mean Distances, Theory and. Higgins.....12–16 1947

Application of Deceleration Test Methods to the Determination of an Induction-Motor Performance, An. Ager.....72–6 1939

Application of Electric Equipment for Ship-Propeller Milling Machine. Morton, Rutemiller.....205–08; disc. 453 1945

Application of Electric Heating to Deicing of Aircraft Propellers, Development and. Sheets, Sand.....1068–72 1949

Application of Electricity for the Auxiliaries of Railroad Trains, The. Gardner.....34–6; disc. 632 1941

Application of Electronics to Aircraft Flight Control. Gille, Kutsler.....849–53; disc. 1501 1944

Application of Experimental Test Procedures and Methods of Analysis of Results to Research Problems in Magnetic Recording. Thompson.....407–17 1949

Application of Heterodyne Modulation to Wide-Band Frequency-Modulated Television Relays, The. Boothroyd.....1126–30 1947

Application of High-Speed Reclosing Breakers to Transmission Systems, Analysis of the. Crary, Kennedy, Woodrow.....339–48; disc. 423 1942

Application of Ignitrons to Resistance-Welding Control, The. Bivens.....471–8; disc. 655 1941

Application of Lead Networks and Sinusoidal Analysis to Automatic Control Systems, The. Schwartz.....69–76; disc. 76 1947

Application of Light, Progress in the Production and. Powell..1265–76 1940

Application of Lightning Arresters, Testing and. (Committee Report).....68–71 1939

Application of Lightning Protective Devices in Wartime. Gross.....173–5; disc. 441 1943

Application of Lightning Protective Devices in Wartime, Report on. (Committee Report).....586–8; disc. 952 1943

Application of Low Frequency to Industrial Control Problems. Schmitz.....1571–5; disc. 1575 1948

Application of Motors for Refrigeration and Air Conditioning, The Rating and. Rutherford.....519–23; disc. 523 1939

Application of Multifrequency Pulsing in Switching. Dahlbom, Horton, Moody.....392–6 1949

Application of Petersen Coils, The Electrostatic Unbalance of Transmission Lines and its Effect on the. Lyon.....107–12; disc. 112 1939

Application of Precision, Snap-Acting Switches, The Characteristics and. Riche.....1549–54; disc. 1554 1948

Application of Quality Control to Resistance Welding. Hobson, Inglis, McCants.....573–5; disc. 951 1945

Application of Rototrol Regulators, Industrial. Harris.....118–23 1946

Application of Rural Carrier Telephone System. Bartelink, Cook, Cowan, Messmer.....511–18; disc. 517 1947

Application of Series Capacitors to Flash Welders, The. Deffenbaugh.....686–7 1946

Application of 720-Cycle Carrier to Power Distribution Circuits. Woodworth.....903–15; disc. 1003 1943

Application of Silicone Resins to Insulation for Electric Machinery, The. DeKiep, Hill, Moses.....94–8; disc. 460 1945

Application of Storage Batteries to the Control of Switchgear, The. Hoxie.....1561–9; disc. 1569 1947

Application of Supersonic Flaw Detectors, Design and. Erdman..1271–6 1947

Application of Surge Comparison Testing Equipment to Fractional Horsepower A-C Stator Windings, The. Buchanan.....1356–8 1947

Application of Synchronous and Induction Motors to Chippers, The. Baker, Lory.....1070–7 1947

Application of the Betatron to Practical Radiography. Girard, Adams.....241–6; disc. 489 1946

Application of the California Institute of Technology Electric Analog Computer to Nonlinear Mechanics and Servomechanisms. McCann, Wilts, Locanthi.....652–60 1949

Application of the Ohm and Mho Principles to Protective Relays. Warrington.....378–86; disc. 490 1946

Application of the Wheatstone Bridge to High-Speed Train Braking, A Unique. Hines.....360–2 1948

Application of Traction Motors, The. Wynne, Woods.....369–74 1940

Application of Vacuum-Tube Oscillators to Inductive and Dielectric Heating in Industry. Jordan.....831–4 1942

Application of Voltage Regulators to Aircraft Generators, The. Thompson, Crever.....363–5 1942

Application of Western Union Multiplex to Navy Radio, The. Hoover.....1478–82 1947

Application on Power Systems, Feeder Voltage Regulator. Gosinski, Oberholtzer.....1458–61; disc. 1461 1948

Application, Operation, and Design of Shunt-Capacitor Equipments Switched in Large Banks, Analysis of Factors Which Influence the. Butler.....795–800; disc. 1096 1940

Application Ratings of Indoor Power Circuit Breakers. Vikoren.....768–73; disc. 1168 1946

Application, Selsyn Design and. Johnson.....703–08; disc. 960 1945

Application to Intermittent Duty Cycles, A Study of Short-Time Ratings and Their. Hellmund, McAuley.....1050–5; disc. 1221 1940

Applications, A Current-Limiting Fuse for Aircraft. Powell.....541–5 1945

Applications, A 150-Kc Carrier System for Radio Relay. Boughtwood.....577–82 1948

Applications, A New Frequency Relay for Power-System. Carlin, Blackburn.....553–7; disc. 1421 1944

Applications, and Economics, Frequency Changers—Characteristics. Crary, Easley....351–8; disc. 416 1945

Applications, Automatically Controlled Copper-Oxide Rectifiers for Electroplating and Anodizing. Buckley.....181–4 1947

Applications, Classification and Coordination of Short-Time and Intermittent Ratings and. Hellmund.....792–8; disc. 1323 1941

Applications, Frequency Shift Telegraphy-Radio and Wire. Davey, Matte.....479–93; disc. 493 1947

Applications, Magnetic Amplifiers for Naval Shipboard. Buechler.....1241–5; disc. 1245 1948

Applications, Microwave Channels for Power System. (Committee Report).....40–2; disc. 42 1949

Applications of Amplidyne Generators, Industrial. Shoults, Edwards, Crever.....944–9; disc. 1136 1940

Applications of Copper-Oxide Rectifiers. Morris.....103–06 1939

Applications of Negative-Glow Lamps, Some Characteristics and. Ferree.....8–12; disc. 622 1941

Applications of Selenium-Rectifier Cells, Characteristics and. Harty.....624–9; disc. 956 1943

Applications of the Electrodynamic Instrument Mechanism. Corson, Millar.....1131–6 1947

Applications of the Type J Carrier System, Some. Starbird, Mathis.....666–72; disc. 672 1939

Applications of Thin Permalloy Tape in Wide-Band Telephone and Pulse Transformers. Gans.....177–83 1946

Applications, Two Gas Turbines for Power Generation and Other. Howard.....461–5; disc. 465 1949

Approach Lighting, Airport Runway and. Kevern.....1396–9 1947

Approach to Probability Problems in Electrical Engineering, A New. Adler, Miller....630–2; disc. 1118 1946

Approach to Speed and Tie Line Control, Theoretical. Brandt.....24–9; disc. 29 1947

Approach to the Consideration of Power-Distribution-System Costs, A Method of. Falls.....1078–84; disc. 1377 1944

Approach to the Design of High-Voltage Cable Joints, A Theoretical and Practical. Short.....1275–80; disc. 1280 1949

Aqueduct, The Pumping System of the Colorado River. Gaylord.....112–23; disc. 123 1939

Arc—A Valuable Industrial Tool, The Carbon. Kalb.....581–5 1942

Arc-Back Problem, A New Multiple High-Speed Air Circuit Breaker for Mercury-Arc-Rectifier Anode Circuits and Its Relation to the. Seaman, Morton...788–96; disc. 1057 1942

Arc-Back Testing of Graphite. Pakala, Cucullu.....439–42 1947

Arc-Backs in High-Current Mercury-Arc Rectifiers, Phase Occurrence of. Pakala, Batten.....345–7 1940

Arc-Backs in Ignitrons in Series. Slepian, Pakala.....292–4 1941

Arc-Backs in Rectifier Circuits—Artificial Arc-Back Tests. Evans, Maslin.....303–11; disc. 439 1945

Arc Behavior Near Current Zero by Means of Mathematical Models, A Study of A-C. Browne.....141–50; disc. 150 1948

Arc Duration, An Interval Timer for. Quill.....237–40 1945

Arc Extinction, Displacement and Diffusion in Fluid-Flow. Slepian.....162–7; disc. 643 1941

Arc Extinction on a Petersen-Coil System, Factors Affecting. Eaton.....576–81; disc. 581 1939

Arc-Furnace Circuits, A Study of Voltage Transients in. Hodtum, Rice.....556–62; disc. 921 1943

Arc-Furnace Circuits, Voltage Transients in. (Committee Report).....563–8; disc. 1435 1944

Arc-Furnace Control by Regulex Exciters. Montgomery, Bloodworth.....650–4; disc. 980 1943

Arc Furnace Duty, A Compressed Air Circuit Breaker for 23-Kv. Wilcox, Baker.....154–8 1948

Arc-Furnace Loads on Long Transmission Lines. LeClair.....234–9; disc. 239 1940

Arc Furnaces During Wartime, Transmission-Line and System Problems in Supplying Large Electric-. Jones.....197–202; disc. 392 1934

Arc Furnaces, Electronic Regulator for. Reilly, Valentine.....601–04 1944

Arc Furnaces—Performance and Power Supply, Large Electric-. Jones, Stearns.....763–9; disc. 1325 1941

Arc Furnaces, Rotating Regulator for. Geiselman, Levy, Harris.....671–4; disc. 983 1943

Arc in an Air Blast, Dielectric Recovery by an A-C. Browne.....169–76; disc. 507 1946

Arc, Instrumentation for the Evaluation of the Stability of the Welding. Winsor, Schetky, Wyant...525–33 1949

Arc-Interruption Circuit Breakers for 400-Cycle Aircraft Electric-Power System, Pressure. Austin.....58–60; disc. 487 1946

Arc Interruption for Aircraft, D-C. Quill, Rader....883–8; disc. 1472 1944

Arc Interruption for Aircraft, Peak Voltages With. Phillips, Mitchel.....944–9 1944

Arc Interruption, The Geometry of. Current-Zero Phenomena. Boehne:

Part I.....524–32; disc. 675 1941

Part II.....375–87; disc. 447 1944

Arc-Over on Overhead Distribution Lines and Newly Developed Equipment for Protection Against Conductor Burndown From That Cause, Power. Matthews.....596–604; disc. 684 1941

Arc Paths, Deionization Time of High-Voltage Fault. Harrington, Starr.....997–1003; disc. 1003 1949

Arc Power Converters in North America, Mercury. (Committee Report).....1031–59 1948

Arc Progresses, The A-C. Holslag.....364–7; disc. 367 1939

Arc Quenchers, Dethermalising. Hunt, Cole.....720–4; disc. 988 1943

Arc Rectifiers, "Excitron" Mercury-. Marti.....927–31; disc. 1168 1940

Arc Rectifiers for Railroads, Mercury-. Watkins.....84–6; disc. 419 1945

Arc Rectifiers in the Coal-Mining Industry, Mercury-. Renshaw.....242–4; disc. 244 1940

Arc Rectifiers, The Testing of Mercury-. Kellogg, Herskind.....765–73; disc. 960 1943

Arc Rectifiers, Voltage Control of Mercury-. McDonald.563–6; disc. 566 1939

Arc Rupturing Duty, A 230-Kv 3-Cycle Oil Circuit Breaker for Extra-Heavy. Leeds, Cushing.....236–42; disc. 242 1948

Arc Starting Characteristics of D-C Welders With Reference to Electrode Freezing, Investigation of. Tyrner.....97–9; disc. 511 1946

Arc Tubes, Condensation of Mercury in Mercury-. Slepian, Brubaker.381–4 1940

Arc-Welding Generators and Transformers, The Service Factor Rating of. Freeman, Welch..137–41; disc. 726 1941

Arc Welding, Power Supply for A-C. Welch, Wyer....116–20; disc. 435 1945

Arc-Welding Reactors, Analysis of. Wheeler.....87–90; disc. 434 1945

Arc Welding, The Power-Distribution Problem in. Pierce, Smith.....178–84; disc. 435 1945

Arc-Welding Transformers, Capacitor Stabilization of. Blankenbuehler, Lester.....54–5 1946

Arcing Fault Currents in Low-Voltage A-C Circuits. Wagner, Fountain.....166–72; disc. 172 1948

Arcing Faults in Power Systems. Concordia, Peterson..340–6; disc. 614 1941

Arcing Ground Tests on a Normally Ungrounded 13-Kv 3-Phase Bus. Allen, Waldorf..298–306; disc. 498 1946

Arcs in Air, Long 60-Cycle. Strom.....113–18; disc. 504 1946

Arcs in Flowing Liquids, Photographic Study of A-C. Slepian, Browne.....823–8; disc. 1330 1941

Area, Insulation Breakdown as a Function of. Hill, Schmidt.....442–4; disc. 444 1948

Areas of Impulse Spark-Over, Volt-Time. Hagenguth.....803–10; disc. 1312 1941

Armature Connection for a D-C Shunt Motor, Industrial Control–Shunted-. Leland, Rader..617–19; disc. 1410 1944

Armature, Heating of a D-C. Fechheimer.....920–6; disc. 1210 1940

Armature Iron Losses in Series Motors. Chang, Karr.....262–4; disc. 264 1949

Armature With Six Adjustable Brushes, A Study of the 3-Phase Commutator. Franklin.....197–204 1948

Armatures, Rewinding Commutator-Type Traction. Greene, Stafford, Gentilini.....563–9; disc. 943 1945

Armatures, Short Circuits in Synchronous-Machine. Galbraith...1024–9 1941

Army Air Corps Wind Tunnel at Wright Field, Dayton, Ohio, Variable-Speed Drive for United States. Dickey, Laffoon, Kilgore.....126–30; disc. 456 1942

Arrangement of Electrical Equipment in Hydraulic Power Plants, Trends in the Design and. Welchel.....78–82; disc. 82 1939

Arrangements and Protective Practices for Shunt Capacitor Banks, Connection. Clark, Farnham.....1226–30; disc. 1231 1949

Arrangements and Transmission Capabilities at Grand Coulee, An Analysis to Determine the Optimum Bussing. Hoard, Bills.....1259–64; disc. 1478 1944

Arrester Blocks, Statistics as an Aid to Engineering Judgment in the Manufacture of Lightning-. Goffman.....607–10; disc. 966 1945

Arrester Discharges, Field Research on Lightning. McCann, Beck.....625–9; disc. 629 1947

Arrester Performance Characteristics, Distribution-Type Lightning. (Committee Report).....132 1942

Arrester Performance Characteristics, Line-Type Lightning-. (Committee Report).....982–3 1941

Arrester Performance Characteristics, Station-Type. (Committee Report).....347–8 1940

Arresters at Stations, Lightning Currents in. Gross, McMorris.....417–22; disc. 1110 1940

Arresters, Field Investigation of the Characteristics of Lightning Currents Discharged by. Gross, McCann, Beck.....266–71; disc. 461 1942

Arresters for Distribution Apparatus, Lightning. Beck, Forbes.....719–24; disc. 970 1945

Arresters' Impulse Spark-Over Volt-Time Characteristics, Expulsion-Type Lightning. (Committee Report).....520 1948

Arresters, Modern Cathode-Ray Qscillograph for Testing Lightning. Wade, Carpenter, MacCarthy.....549–53; disc. 982 1942

Arresters, Modern Impulse Generators for Testing Lightning. Brownlee.....539–44; disc. 984 1942

Arresters, Testing and Application of Lightning. (Committee Report).....68–71 1939

Arresters, Testing of Distribution. Halperin.....142–8; disc. 148 1940

Arresters, The Protection of Solid Insulation by Lightning. MacCarthy, Carpenter.....912–15; disc. 1349 1941

Arresters—Tidd 500-Kv Test Lines, Transformers and Lightning. Lane, Hodnette, Bellaschi, Beck.....1613–18; disc. 1618 1947

Art in Electrical Machinery—1934–39, Progress of the. (Committee Report).....103–06 1940

Articulated Cars for Test on Rapid Transit Division, Chicago Transit Authority, Three-Compartment. Otis.....416–18 1948

Artificial Arc-Back Tests, Arc-Backs in Rectifier Circuits—. Evans, Maslin.....303–11; disc. 439 1945

Artificial Respiration, A Comparison of the Relative Efficiency of the Schafer and Pole-Top Methods of. Kouwenhoven, Hooker, Langworthy.....41–4; disc. 660 1941

Artificial Respiration on Anesthetized Men, Study of. Kouwenhoven, Hooker, York.....1–2; disc. 446 1944

ASA Transformer Standards, A Discussion of Proposed. Henry.....289 1939

Asbestos and Glass-Fiber Magnet-Wire Insulation. Mathes, Stewart.....290–4 1939

ASME-AIEE Standard Large 3,000-RPM Turbine Generators, Progress Report on. Mortensen, McClure, Laffoon.....674–5; disc. 675 1948

ASME Governor Performance Specification, Governors and the AIEE-. Schwendner, Astley.....1334–6 1949
Aspects of Polyphase Motor Design—The Design and Properties of the Magnetic Circuit, Some. Lloyd, Stone.....812–18; disc. 1151 1946
Aspects of Rectifier Installations, Inductive Co-ordination. (Committee Report).....417–36; disc. 1115 1946
Aspects of Relay Circuits, Sequential. Ritchie.....577–81 1949
Aspects of the Application of Induction Motors to Aircraft, Some. Braun .....769–72; disc. 1476 1944
Asymmetrical Loading of Three-Phase Three-Winding Transformer Banks. Denissov.....27–9; disc. 444 1944
Asymmetrical Stator and Rotor, Equivalent Circuit of the Primitive Rotating Machine With. Kron..... .....17–23; disc. 23 1947
Asymmetrical Stator as a Means of Starting Single-Phase Induction Motors, The. Baum..... .....245–50; disc. 496 1944
Asynchronous and Single-Phase Operation of Synchronous Machines. Rankin.....1092–1102 1946
Asynchronous Machine, Damping and Synchronising Torque of the Double-Fed. Liwschitz.....923–4 1941
Asynchronous-Synchronous Cascade Variable-Speed Drive, A Study of the Modified Kramer or. Liwschitz, Kilgore.....255–60 1942
Atmospheric Temperature With Altitude in the United States, Variations of. Tenney..230-2; disc. 727 1941
Atmospheric Variations and Apparatus Flashover. McAuley..... .....798–803; disc. 1319 1941
Attenuating Transmission Line, The Solution of Transmission-Line Problems in the Case of. Glinski 46–9 1946
Attenuation and Delay Equalizers for Coaxial Lines. Lundry....1174–9 1949
Attenuation for Microwave Measurements, A Standard of. Grantham, Freeman.....329–35 1948
Attenuation of Coaxial Radio-Frequency Cable, The S-Function Method of Measuring. Stewart.. .....616–19, 938–9; disc. 966 1945
Attenuator Materials, Attenuators and Terminations for Microwaves. Teal, Rigterink, Frosch....419–28 1948
Audio Frequencies, Power Circuit Instruments for the Higher Range of. Lunas, MacGahan.....1230–5 1941
Audio Noise of Transformers, The. Sealey.....109–12; disc. 745 1941
Audio Noise Problems on an Electric Power System, Transformer Murray.....740–7; disc. 747 1949
Auto-Blast Interrupter Switch, The. Williams, Harlow..... .....176–81; disc. 437 1943
Automatic Air-Break Switches, Service Restoration With. Reardon..... .....64–71; disc. 71 1948
Automatic A-C Potentiometer and Its Application to the Non-Destructive Testing of Insulating Equipment. Keinath.....887–90; disc. 890 1939
Automatic Boosters for Economical Correction of Voltage on Distribution Circuits, Capacitors and. Olmsted.....491–6; disc. 496 1939
Automatic Circuit Recloser, An Improved. Wallace..255–8; disc. 259 1947
Automatic Control and Switching Equipment for Capacitor Banks and Its Application. Schroeder, Bloomquist....649–54; disc. 1440 1944
Automatic Control of Air Switches for Line Sectionalising and Load Transfer. Rich, Kirwen..... .....293–9; disc. 299 1947
Automatic Control of Hydroelectric Generating Stations. Brown, Derr .....343–55; disc. 355 1947
Automatic Control of Large Synchronous Condensers. Brown..609–16 1946
Automatic Control Systems, The Application of Lead Networks and Sinusoidal Analysis to. Schwartz .....69–76; disc. 76 1947
Automatic Control Systems, The Design of D-C Motors for Use in. Lebenbaum.....1089–94 1949
Automatic Control Systems, The Frequency Response of. Harris..... .....539–46; disc. 1131 1946
Automatic Grounding and Air-Break Switches for Protection of Transformer Stations. Ricker..... .....851–6; disc. 856 1949
Automatic Load Control for Turbine Generators. Crever, Jackson..... .....656–60 1945
Automatic Load Control for Turbine Generators, A New. Ruud, Farnham.....1337–42; disc. 1342 1949
Automatic Operation of Electric Boilers. Eaton.....1061-8; disc. 1068 1947
Automatic Oscillograph With a Memory, An. Zarem..150–4; disc. 514 1946
Automatic Oscillographs, Fault Location and Relay Performance Analysis by. Dupuis, Jacobs..... .....442–6; disc. 1125 1946
Automatic Parallel Operation of Load-Ratio-Control Transformers, A New Control System for. Minneci, Farnham..488–93; disc. 916 1943
Automatic Pilot for Airplanes, An Induction Generator Used With the All-Electric. Vickers.....182–5 1948
Automatic Pilots, Electrical Control in. Young, Lynch, Boynton..... .....939–43; disc. 1500 1944
Automatic Pilots for Aircraft, Electric. Halpert, Esval..861–6; disc. 1501 1944
Automatic Printing Ammeter. LeClair .....93–9; disc. 757 1941
Automatic Range-Adjusting Radiosonde Recorder. Beggs.....602–07 1949
Automatic Reclosing Equipment on Stub Feeders, Interim Report on Application and Operation of. (Committee Report)..... .....536–40; disc. 934 1943
Automatic Regulation of Turbine Generators to Relieve Power-Supply Systems of Steel-Mill Load Swings. Eberhardt, Harrison, Kohn, Darling.....751–8 1945
Automatic Standing-Wave Indicator, An. Allen.....1299–1302 1948
Automatic Stations
A New Time Standard. Warren.... .....137–41; disc. 141 1940
Carrier-Current Losses Measured and Interference Minimized on Boulder-Los Angeles Transmission Lines. Laughlin, Pakala, Reagan..... .....4–9; disc. 9 1940
Carrier Supervisory Control of Pumping Station Over Power Cable. Derr, Keller, Hedke..... .....699–705; disc. 1124 1946
Experience With Oil Circuit Reclosers on REA Systems. Moore, Watkins.....531–5; disc. 934 1943
Interim Report on Characteristics and Performance of Conductors for Supervisory Control and Telemetering. (Committee Report)..854–62 1943
Multichannel Carrier-Current Facilities for a Power Line. Sandstrom, Foster.....71–6; disc. 469 1942
Supervisory Control for New Chicago Subway. Derr, Buck, Stoos..... .....10–16; disc. 457 1945
Synchronizing Transients and Synchronizers for Large Machines. Evans, Gulliksen, Myhre..... .....965–73; disc. 1104 1940
The Combination of Supervisory Control With Other Functions on Power-Line Carrier Channels. Cheek, Derr.....241–6 1945
Automatic Stations, 1930–1941, Bibliography on.....1111–32 1942
Automatic Switching, Extending the Use of Shunt Capacitors by Means of. Cuttino....674–8; disc. 1439 1944
Automatic Switching Schemes for Capacitors. Cuttino.....311–14 1947
Automatic Switching, The Economies of Using Capacitors in Amounts to Require. Butler..322–7; disc. 327 1947
Automatic Telephone Networks, Rural. Ffolliott.....1079–83; disc. 1304 1941
Automatic Telephone Switching Systems, The "Director" for. Smith 611–19 1948
Automatic Temperature Control for Aircraft. Gund.....730–4 1945
Automatic Temperature Control for Transport Airplanes. Hedges..... .....1197 1947
Automatic Ticketing of Telephone Calls. Friend.....81–8; disc. 472 1944
Automatic Train Control on the San Francisco-Oakland Bay Bridge Railway, Signal System, Interlocking Plants, and. Davis....158–64 1940
Automatic Voltage Compensator for Resistance Welding Control. Callender, Phair....701–05; disc. 921 1943
Automatic Voltage Regulator Without Moving Parts Employing Ferroresonance, An. Craig..... .....830–6; disc. 836 1939
Automatic Welding-Machine Starter and Its Relation to Maximum Utilisation of Power and Facilities, The. Porter.....728–30; disc. 996 1943
Automatically Controlled Copper-Oxide Rectifiers for Electroplating and Anodising Applications. Buckley 181–4 1947
Automatically Reclosing Breaker for Co-ordinating Distribution Systems, An. Rawlins, Wallace..... .....1021–4 1941
Automatically, Two New Methods of Accelerating Electric Motors. Leitch.....487–93; disc. 655 1941
Automobile Tire Fabrics, Continuous Processing for. Cassidy, Mosteller.....218–23 1939
Auxiliaries, Electric Drives for Steam-ElectricGenerating-Station. Brownlee, Elsi.....741–5; disc. 976 1945
Auxiliaries of Railroad Trains, The Application of Electricity for the. Gardner.....34–6; disc. 632 1941
Auxiliaries, Protection of Powerhouse. (Committee Report)..... .....746–51; disc. 1115 1946
Auxiliary Circuits of Single-Phase Induction Motors, Design of. Thacker, Gopalakrishna.....1373–9 1949
Auxiliary Controllers for Marine Service, Design of D-C. Schaelchlin 623–9 1946
Auxiliary-Drive Motors for Constant and Adjustable Speed, Central-Station. Gibson..746–50; disc. 976 1945
Auxiliary Drives in Steam-Electric Stations, Power Systems for. McClure, Whittlesey..... .....844–51; disc. 976 1945
Auxiliary Equipment and Systems, Modern Practice in Power-Plant. Muller.....868–72; disc. 976 1945
Auxiliary Impedances in the Single-Phase Operation of Polyphase Induction Motors, The Use of. Ager .....494–9; disc. 660 1941
Auxiliary-Power Equipment, Modern Railway Passenger-Car. MacLeod, Hause.....930–8 1947
Auxiliary-Power-Plant Requirements. O'Neil.....682–4 1944

Auxiliary-Power Supply for Generating Stations. McCallum.....693–5; disc. 976 1945

Auxiliary-Type D-C Motors in Severe Duty Service, The Application of Class B Insulation to. Compton.....828–34; disc. 1098 1940

Axial Air-Blast Circuit Breakers, Design and Operation of High-Voltage. Leuthold..869–75; disc. 1073 1942

Axial Air-Blast Interrupter for Severe Operating Duty, An Improved. Taylor, Martin..323–33; disc. 431 1943

Axis Equivalent Circuits of the Synchronous Machine, The Direct- and Quadrature. Rankin.....861–8 1945

Axis, Saturated Synchronous Machines Under Transient Conditions in the Pole. Rudenberg.....297–306; disc. 444 1942

Azimuth Indicating System for Aircraft, An Improved. Lynch, Pfuntner..806–12 1946

B

B-H Curve Tracer for Magnetic-Recording Wire, A. Long, McMullen.....146–50; disc. 494 1946

B-1 Alarm and Control System for Remote Control of Coaxial Cable Stations. Hearn, Weber.....622–6 1949

Back to Back, Formulas for Calculating the Inductance of Channels Located. Schwantz, Higgins..893–9 1946

Backlash, Instrument Inaccuracies in Feed-Back Control Systems with Particular Reference to. Marcy, Yachter, Zauderer.....778–88 1949

Balance of Multiphase Rectifiers, Harmonics and Load. Evans.....182–7; disc. 400 1943

Balance Telemeter, New Devices Derived From a Torque. Burnham.....307–10 1948

Balanced Amplifier Using Biased Saturable Core Reactors, A. Kirschbaum, Harder.....273–8 1947

Balanced-Current Relay, A New High-Speed. Stewart..553–5; disc. 972 1943

Balanced Fractional-Slot Wave Windings. Liwschitz.....676–8 1948

Balanced Recorder for Flight Testing and Spectroscopy, Electronically. Williams, Clark, Tarpley...205–08 1946

Balancing Capacitance Bridge, A Self-. Foley.....797–801 1947

Balancing the Voltages of Three-Phase Aircraft Inverters Supplying Large Single-Phase Loads, A Unit for. Wimpie.....532–3; disc. 1358 1944

Band Broadcasting, A New 150-Kilowatt Transmitter for Standard. Boerner.....943–51 1948

Band Carrier Systems, A New Crystal Channel Filter for. Willis.....134–8; disc. 490 1946

Band Coupling of Power-Line Carrier Equipment, A Proposal for Broad-. Miller.....1028–30; disc. 1030 1949

Band D-C Amplifier Stabilised for Gain and for Zero, Wide-. Williams, Amey, McAdam..811–15; disc. 815 1949

Band of Governors on Steam Turbine Generators Under System Load Conditions, Determining Incremental Regulation and Dead. Tornquist, Wade.....1343–7 1949

Band Signal Generator, A Broad. Hahn, Ebert, Lynch.....316–20 1948

Band Systems for Power-Line Carrier Transmission, A Comparison of the Amplitude-Modulation, Frequency-Modulation, and Single-Side. Cheek.....215–20; disc. 450 1945

Band Transmission Systems for Animated Line Images, Narrow. Skellett.....124–7 1939

Band-Width Characteristics of Pulse Modulation, Distortion and. Krauss, Ordung.....984–8 1947

Bandwidths, The Distinction Between Effective and Circuit. Kessler.....98–9 1949

Bank, The Temperature Rise of Cables in a Duct. Neher..540–6; disc. 546 1949

Banks—Analysis of Circuit, Open-Delta Transformer. Clem.....292–7; disc. 374 1943

Banks, Analysis of Factors Which Influence the Application, Operation Design of Shunt-Capacitor Equipments Switched in Large. Butler.....795–800; disc. 1096 1940

Banks and Its Application, Automatic Control and Switching Equipment for Capacitor. Schroeder, Bloomquist.....649–54; disc. 1440 1944

Banks, Asymmetrical Loading of Three-Phase Three-Winding Transformer. Denissov.....27–9; disc. 444 1944

Banks, Carrier-Current Differential Protection for Transformer. Cramer.....545–8; disc. 947 1943

Banks, Connection Arrangements and Protective Practices for Shunt Capacitor. Clark, Farnham.....1226–30; disc. 1231 1949

Banks, High-Voltage Fusing of Transformer. Marsh, Dodds.....533–5; disc. 977 1942

Banks, Tests and Analysis of Circuit-Breaker Performance When Switching Large Capacitor. Shroeder, Boehne, Butler..821–31; disc. 1020 1942

Bare Wire, Surge Characteristics of a Buried. Sunde..987–91; disc. 1180 1940

Barker, The Bellingham Hydraulic Log. Haner, Rose.....1068–74 1948

Base-Load Stations, A New Transformer for. Sporn, Putnam.....916–18; disc. 1358 1941

Bases, Federal Housing, and Other Wartime Projects, Estimating Electric Loads for Military-Training. Potts.....246–54; disc. 463 1943

Basic Components, Electric Locomotives With Identical. Brecht, Kerr.....339–43; disc. 343 1948

Basic Concepts of Moving-Magnet-Instrument Rotors. Mendelsohn..529–34; disc. 947 1945

Basic Considerations in Selection of Electric Systems for Large Aircraft. Boice, Levoy....279–87; disc. 478 1944

Basic Considerations in the Selection of Generators and Batteries for Aircraft. Cobb, Winters.....889–93; disc. 1494 1944

Basic Design Principles for A-C Electric-Power Systems in Large Military Aircraft. Chappuis, Olmsted.....12–17; disc. 487 1946

Basic Impulse Insulation Levels. Sporn, Powel....596–8; disc. 1197 1940

Basic Insulation Levels, The Coordination of Electrical Equipment With. Foote, North.....585–9; disc. 1204 1940

Basic Principles of the Varioplex Telegraph. Holcomb.....1102–08 1941

Basic Servomechanism Types, A Comparison of Two. Harris.....83–92; disc. 92 1947

Basic Sciences

'A Construction Theorem for Evaluating Operational Expressions Having a Finite Number of Different Roots. Cromwell.....273–6; disc. 676 1941

A Derivation of Heaviside's Operational Calculus Based on the Generalized Functions of Schwartz. Smith, Alger....939–44; disc. 944 1949

A Five-Figure Table of the Bessel Function $I_n(x)$. Dwight....135–6 1941

A Fractional Termination for Ladder Networks. LePage.....530–6 1946

A Large-Scale General-Purpose Electric Analog Computer. Harder, McCann.....664–73 1948

A Method for Correlating Duty-Cycle Tests on Solenoids. Ryan.....579–81; disc. 945 1943

A Method for Determining the Normal Modes of Foster's Reactance Networks. LePage.....674–8 1943

A New Approach to Probability Problems in Electrical Engineering. Adler, Miller....630–2; disc. 1118 1946

A New Method for Introducing Relaxed Initial Conditions in Transient Problems. Johnson...178–81 1941

A Short Method for Evaluating Determinants and Solving Systems of Linear Equations With Real or Complex Coefficients. Crout.....1235–41 1941

An Experimental Investigation of Subharmonic Currents. McCrumm.....533–40; disc. 722 1941

An Unstable Nonlinear Circuit..273–6 1940

Analysis of Transient Voltages in Networks. Bellaschi, Palermo....973–81 1940

Analytical Methods of Solving Discrete Nonlinear Problems in Electrical Engineering. Keller.....1194–1200; disc. 1389 1941

Attenuator Materials, Attenuators and Terminations for Microwaves. Teal, Rigterink, Frosch....419–28 1948

Bridge Erosion in Electrical Contacts and Its Prevention. Pfann.....1528–33 1948

Calculation of Initial Breakdown Voltages in Air. Ver Planck.....99–104 1941

Current Distribution in a Rectangular Conductor. Daley.....687–90; disc. 690 1939

Determination of Corona Starting Voltages for Nonuniform Fields in Air. Hutton.....1674–9; disc. 1680 1947

Dielectric Strength of Oil with Variations of Pressure and Temperature. Hoover, Hixson.....1047–50 1949

Diffusion of Electric Current into Rods, Tubes, and Flat Surfaces. Miller.....1496–1502 1947

Dimensionless Analysis of Servomechanisms by Electrical Analogy. Herwald, McCann.....636–9; disc. 1132 1946

Diode Rectifying Circuits With Capacitance Filters. Waidelich...1161–7; disc. 1388 1941

D-C Breakdown Strength of Air and of Freon in a Uniform Field at High Pressures. Trump, Safford, Cloud.....132–5; disc. 676 1941

Eddy-Current Resistance of Multilayer Coils. Long.....712–18 1945

Eddy Currents in Disks: Driving and Damping Forces and Torques. Moore.....1–10; disc. 10 1947

Effective Resistance of Isolated Nonmagnetic Rectangular Conductors. Dwight.....549–52 1947

Electric Strength of Air at High Pressure:
Part I. Skilling..161–5; disc. 165 1939
Part II. Skilling, Brenner.....112–15; disc. 677 1941

Electrical Stability of Electrical Insulating Oils Under Limited Oxidation. Balsbaugh, Assaf.....311–22; disc. 397 1943

Energy Flow in Electric Systems—the Vi Energy-Flow Postulate. Slepian.....835–41; disc. 1054 1942

Experimental Determination of the Capacitance of Heavy-Current Busses Comprised of Solid or Tubular Rectangular Conductors. Teasdale, Higgins.....653–9; disc. 659 1948

Ferroinductance as a Variable Electric-Circuit Element. Ryder.....671–8; disc. 962 1945
Formulas and Tables for the Calculation of the Magnetic Field Components of Circular Filaments and Solenoids. Grover....665–75 1949
Formulas for Calculating Short-Circuit Forces Between Channels Located Back to Back. Higgins..710–12 1944
Formulas for Calculating Short-Circuit Forces Between Conductors of Structural Shape. Higgins.659–63 1943
Formulas for Calculating Short-Circuit Stresses for Bus Supports for Rectangular Tubular Conductors. Higgins.....578–80 1942
Formulas for Calculating Temperature Distribution in Transformer Cores and Other Electric Apparatus of Rectangular Cross Section. Higgins.....190–4; disc. 493 1945
Formulas for Calculating the Inductance of Channels Located Back to Back. Schwantz, Higgins.....893–9 1946
Formulas for the Calculation of the Inductance of Linear Conductors of Structural Shape. Higgins....53–8 1943
Formulas for the Four-Terminal Network Parameters of Uniform Ladder Networks. LePage....604–08 1944
Formulas for the Inductance of Coaxial Busses Comprised of Square Tubular Conductors. Messinger, Higgins.....328–36; disc. 501 1946
Formulas for the Inductance of Rectangular Tubular Conductors. Higgins.....1046–50; disc. 1409 1941
Formulas for the Magnetic-Field Strength Near a Cylindrical Coil. Dwight.....327–33; disc. 445 1942
General Theory, and Experimental Confirmation, of the Moving Coil Fluxmeter. Higgins, Robertson....897–907; disc. 907 1949
Generalized Solution for the Critical Conditions of the Ferroresonant Parallel Circuit, The. Thomson..743–6; disc. 746 1939
Generation of Electric Charges by Moving Rubber-Tired Vehicles. Mackeown, Wouk.....207–10; disc. 428 1943
Geometric Mean Distances for Rectangular Conductors. Dwight....536–8 1946
Graphical Analysis of Control Systems. Evans.....547–51 1948
High-Frequency Coaxial-Line Calculations. Race, Larrick...526–30 1942
High-Pressure Gas as a Dielectric. Nonken.....1017–20; disc. 1405 1941
High-Voltage D-C Flashover of Solid Insulators in Compressed Nitrogen. Trump, Andrias.....986–90; disc. 1393 1941
History of A-C Wave Form, Its Determination and Standardization. Bedell.....864–8; disc. 1071 1942
Hystero-Viscosity in Silicone. Malti, Chatterjee.....369–73 1948
Insulation Breakdown as a Function of Area. Hill, Schmidt.....442–4; disc. 444 1948
Inverse Functions of Complex Quantities. Dwight.....850–3 1942
Linear Transformations in Three-Phase Circuits. Pipes.....351–6; disc. 619 1941
Machine Computation of Power Network Performance. Dunstan.....610–20; disc. 621 1947
Measurements of Pre-Breakdown Currents in Dielectrics With a Cathode-Ray Tube. Race.....854–8; disc. 1388 1941
Negative Resistance Effects in Saturable Reactor Circuits. Manley, Peterson.....870–81 1946
Nonharmonic Oscillations as Caused by Magnetic Saturation. Rudenberg.....676–85 1949
On Eddy Currents in a Rotating Disk. Smythe.....681–4 1942
Power Geometry of General Transmission Systems. Altar.....312–17; disc. 493 1945
Proximity Effect Factors for 3-Phase Coaxial Busses Comprised of Square Tubular Conductors. Higgins, Messinger.....1538–9 1948
Reactance and Skin Effect of Concentric Tubular Conductors. Dwight.....513–18; disc. 976 1942
Resistance and Capacitance Relations Between Short Cylindrical Conductors. ReQua.....724–30; disc. 962 1945
Saturated Synchronous Machines Under Transient Conditions in the Pole Axis. Rudenberg. 297–306; disc. 444 1942
Self-Saturation in Magnetic Amplifiers. Dornhoefer.....835–46; disc. 846 1949
Similitude of Critical Conditions in Ferroresonant Circuits. Thomson.....127–30; disc. 130 1939
Skin Effect in Bimetallic Conductors. Teare, Webb.....297–302 1943
Solutions of the Mathieu Equation. Gray, Merwin, Brainerd...429–41 1948
Some Aspects of Inductance When Iron is Present. Rader, Litscher.....133–9; disc. 431 1944
Stabilized Permanent Magnets. Cioffi.....1540–3 1948
Subharmonics in Circuits Containing Iron-Cored Inductors. Part II. Travis.....735–42 1939
(Part I—1938)
Symmetrical-Components Analysis of the Four-Phase System. Boyajian.....48–51; disc. 426 1944
"Terratex"—A Thin Flexible Inorganic Insulation. Walters..123–7 1948
The Computation of Magnetic Field Strength of Round Coils of Small Cross Section. Dwight, Peters.....684–5 1944
The Dielectric Strength of Glass—an Engineering Viewpoint. Shand.....814–18; disc. 1331 1941
The Effect of Initial Conditions on Subharmonic Currents in a Nonlinear Series Circuit. Angello.....526–7 1942
The Electrical Strength of Nitrogen and Freon Under Pressure. Skilling, Brenner.....191–5; disc. 441 1942
The Influence of the Concentration and Mobility of Ions on Dielectric Loss of Insulating Oils. Kang.....403–07; disc. 1132 1946
The Magnetic Properties of Stainless Steels. Stein.....1534–7 1948
The Physics of Electronic Semiconductors. Pearson.....209–14 1947
The Probable Breakdown Voltage of Paper Dielectric Capacitors. Brooks.....1137–44; disc. 1144 1947
The Self-Inductance of a Toroidal Coil Without Iron. Dwight.....805–06; disc. 999 1945
The Space Charge Due to Corona. Smith.....1137–44; disc. 1144 1948
The Use of Business Machines in Determining the Distribution of Load and Reactive Components in Power Line Networks. Jennings, Quinan.....1045–6 1946
The Vector Power Factor of Unbalanced Sinusoidal 3-Phase Circuits. Lamb, Brandt.....507–09 1949
Theory and Application of Complex Logarithmic and Geometric Mean Distances. Higgins.....12–16 1947
Transformation Theory of General Static Polyphase Networks. Pipes.....123–8; disc. 128 1940
Transient Analysis of Completely Transposed Multiconductor Transmission Lines. Pipes.....346–51; disc. 621 1941
Transient Analysis of Symmetrical Networks by the Method of Symmetrical Components. Pipes.....457–9; disc. 1107 1940
Two-Phase Co-ordinates of a Four-Phase Network. Kimbark....7–9 1945
Two-Phase Co-ordinates of a Three-Phase Circuit. Kimbark.....894–904; disc. 904 1939
Values of the Bessel Functions ber x and bei x and Their Derivatives. Dwight.....787–90 1939
Basis for Generator Reserve, Outage Expectancy as a. Seelye...1483–8 1947
Basis for the New British System of Cockpit Lighting, The Scientific. Calvert.....869–70 1944
Basis for the Nondestructive Testing of Insulation, The. Field.....890–5; disc. 1347 1941
Batteries for Aircraft, Basic Considerations in the Selection of Generators and. Cobb, Winters.....889–93; disc. 1494 1944
Batteries in the Transportation Field, Lead Storage. Whitehurst.....303–07; disc. 683 1941
Batteries to the Control of Switchgear, The Application of Storage. Hoxie.....1561–9; disc. 1569 1947
Battery Booster Coils for Airplane-Engine Ignition Systems. Alvino.....672–3; disc. 1381 1944
Battery Charger for Railroad Passenger Cars, The Magnesium-Copper Sulphide Rectifier. Kotterman.....260–5 1939
Battery Design, Aircraft Storage-. Rupp.....773–7; disc. 1381 1944
Bearing Deviation Indicator for Sonar. Schuck, Stedman, Hathaway, Buts.....1285–95 1947
Bearing Practice for Vertical Water Wheel Generators, Modern. Laffoon, Baudry.....363–9; disc. 369 1947
Bearings at the Bonneville Plant of the Corps of Engineers, War Department, The Design and Performance of the Vertical Generator Thrust. Lewis, Gordon..1231–7; disc. 1237 1947
Bearings, Effect of Sapphire-Crystal Orientation on the Wear of Watt-Hour-Meter. Goss.....811–14; disc. 1336 1941
Bearings, Oil Film Thickness Indicator for Journal. Greenough.....589–95; disc. 595 1948
Behavior Factors of Rectifier-Driven D-C Motors. Siegfried.....530–3; disc. 1357 1944
Behavior Near Current Zero by Means of Mathematical Models, A Study of A-C Arc. Browne.....141–50; disc. 150 1948
Behavior of Bundle Conductors, Results of Tests Carried Out at the 500-Kv Experimental Station of Chevilly (France), Especially on Corona. Cahen.....1118–25; disc. 1125 1948
Behavior of Directional Relays, Factors Which Influence the. Graybeal..942–52 1942
Behavior of Point Gaps at 60 Cycles. Lebacqs.....44–8; disc. 651 1941
Behavior of the Moving Systems of Single-Phase A-C Watt-Hour Meters at No Load, The Anomalous. Holtz.....116–21; disc. 121 1940
Behavior of the Two-Stage Rototrol Main Exciter Voltage Regulating System as Determined by Electrical Analogy, The Transient. Carleton.....59–63 1949

Bell System, Telegraphy in the. Duncan, Parker, Pierce.....1032–44; disc. 1386 1944

Bellingham Hydraulic Log Barker, The. Haner, Rose.....1068–74 1948

Beneficiation Plant, Power Distribution and Utilization in a Large Iron Ore. Gettelman.....1726–32 1948

Bessel Function $I_n(x)$, A Five-Figure Table of the. Dwight.....135–6 1941

Bessel Functions ber x and bei x and Their Derivatives, Values of the. Dwight.....787–90 1939

Betatron to Practical Radiography, Application of the. Girard, Adams .....241–6; disc. 489 1946

Biased-Core-Current-Transformer Design Method. Specht.....635–40 1945

Bibliography of Relay Literature (Committee Report):
1940–1943.....705–09 1944
1944–1946.....24–7 1948

Bibliography on Automatic Stations—1931–1941. (Committee Report).....1111–32 1942

Bibliography on Circuit-Interrupting Devices—1928–1940. (Committee Report).....1077–1100 1942

Bibliography on Electrical Safety—1930–1941. (Committee Report).....1101–10 1942

Bimetal, Tapered-Thickness. Elmer.....661–5; disc. 962 1945

Bimetal Type of Thermal Watt-Demand Meter, Theoretical Possibilities in an Internally Heated. Lynch.....764–70; disc. 986 1942

Bimetallic Conductors, Skin Effect in. Teare, Webb.....297–302 1943

Bio-electric Recording, A High-Gain D-C Amplifier for. Goldberg.....60–4 1940

"Black Band" Method of Commutation Observation, The. Schroeder, Aydelott.....446–51; disc. 659 1941

Blast-Tube Cooling for Aircraft Generators. Veinott..520–5; disc. 1463 1944

Blocking and Selective Tripping With Impedance Relays, Out-of-Step. Vaughan, Sawyer.....637–45; disc. 645 1939

Blocks, Statistics as an Aid to Engineering Judgment in the Manufacture of Lightning-Arrester. Goffman.....607–10; disc. 966 1945

Blooming Mills, The Reversing Cycle of Modern. Montgomery, Sellers.....1508–13; disc. 1513 1948

Board of Directors, Reports of the.
.....926–38 1939
.....1313–26 1940
.....1449–63 1941
.....1136–49 1942
.....1007–22 1943
.....1518–31 1944
.....1001–16 1945
.....1197–1216 1946
.....1698–1720 1947
.....1762–83 1948
.....1383–1408 1949

Board, Remote-Control Toll. Sorber, Smith.....696–704; disc. 704 1939

Body Currents, The Measurement of. Schwab.....919–23 1941

Boilers and of Hydro Units, Outage Rates of Steam Turbines and. (Committee Report).....450–6 1949

Boilers, Automatic Operation of Electric. Eaton...1061–8; disc. 1068 1947

Bolometer, Detection of Overheated Transmission Line Joints by Means of a. Leslie, Wait. .....64–8; disc. 68 1949

Bolted Aluminum-to-Copper Connections, An Experimental Investigation of the Electrical Performance of. Bonwitt..1208–18; disc. 1218 1948

Bomb-Release Interval Controls, An Interval and Dwell Tester for. Long.....648–51 1945

Bone Receivers and Throat Microphones, Laboratory Method for Objective Testing of. Greibach.....184–7 1946

Bonneville Plant of the Corps of Engineers, War Department, The Design and Performance of the Vertical Generator Thrust Bearings at the. Lewis, Gordon.....1231–7; disc. 1237 1947

Bonneville Power Administration Transmission System, Matching Electrical Characteristics of McNary Generators and Transformers with. Hoard, Weiner.....1022–5; disc. 1026 1949

Booster Coils for Airplane-Engine Ignition Systems, Battery. Alvino.....672–3; disc. 1381 1944

Boosters for Economical Correction of Voltage on Distribution Circuits, Capacitors and Automatic. Olmsted.....491–6; disc. 496 1939

Boston Edison Company, Modernization of L Street Station Switch House. Corney, Edson.....770–8; disc. 778 1939

Boulder-Chino Transmission Line of the Southern California Edison Company, Ltd., Engineering Features of the 230-Kv. Kroneberg, Hunter. .....982–7; disc. 1176 1940

Boulder Dam
Carrier-Current Equipment. Laughlin.....147–51; disc. 156 1939
Corona Experience on Transmission Line. Cozzens, Peterson.....137–40; disc. 156 1939
General Operation of Transmission Line. Peterson.....131–7; disc. 156 and 911 1939
Insulation and Lightning Protection. Cozzens.....140–6; disc. 156 and 911 1939
Transmission Line Relay Protection. Draper.....151–6; disc. 156 1939

Boulder-Los Angeles Transmission Lines, Carrier-Current Losses Measured and Interference Minimized on. Laughlin, Pakala, Reagan.....4–9; disc. 9 1940

Brake Magnets for Watt-Hour Meters, Aluminum-Nickel-Cobalt. Green. .....791–6; disc. 796 1939

Brake Used on Aircraft Electric Motors, One Type of Rotary Magnetic Clutch and Its Associated. Andrews, Shanely..893–5; disc. 1477 1944

Brakes and Drum Brakes for PCC Cars, Recent Developments in Track. Vouch.....302–04 1947

Brakes for High-Speed Trains With Particular Reference to Their Electrical Features, Electropneumatic. McCune.....137–42 1942

Braking, A Unique Application of the Wheatstone Bridge to High-Speed Train. Hines.....360–2 1948

Braking by Self-Excitation of Squirrel-Cage Motor, Dynamic. Srinivasan, Thomas.....145–8 1947

Braking Control of D-C Series Motors—Calculation of Stability Limit. Heumann, Smith.....454–7; disc. 1130 1946

Braking Control of D-C Series Motors—Experimental Study of Speed-Torque Curves, Dynamic. Heumann.....560–4 1949

Braking for Railroad and Urban Transit Equipment, Electric. Craton, Turner.....489–94; disc. 1170 1940

Braking Magnets for Watt-Hour Meters. Kinnard, Goss.....431–9; disc. 653 1941

Braking of a D-C Shunt Motor and Load, Industrial Control: Dynamic. Leland, Rader.....472–6 1943

Braking of a Single D-C Series Motor, Dynamic. Leitch.....149–54 1947

Braking of Two D-C Series Motors, Dynamic. Leitch.....787–91 1947

Braking Resistors and Control for Diesel-Electric Locomotives. Weiser 229–32 1947

Braking, The Design of New York Subway Motors for Dynamic. Widell. 808–10 1947

Braking With Traction Motors, Dynamic. Riley, Woods.....517–19 1945

Branch Circuits on Power Supplies of 600 Volts and Less, Thermal Coordination of Motors, Control, and Their. Jones....483–7; disc. 975 1942

Brass-Slab Rolling-Mill Service, An Analysis of Motor Selection for. Berkley.....185–9; disc. 189 1947

Breakdown and Consequential Damages, Protection of Industrial Plants Against Insulation. Vaughan.....592–6; disc. 1166 1946

Breakdown and Flashover of Aircraft Insulation, Effect of Altitude on Electric. Berberich, Moses, Stiles, Veinott.....345–54; disc. 458 1944

Breakdown as a Function of Area, Insulation. Hill, Schmidt.....442–4; disc. 444 1948

Breakdown Characteristics for Electrical Gaps in Oil, Surge-Voltage. Sorensen.....78–81; disc. 81 1940

(Breakdown) Measurements of Pre-Breakdown Currents in Dielectrics With a Cathode-Ray Tube. Race. .....854–8; disc. 1388 1941

Breakdown of Small Gaps Under Simulated High-Altitude Conditions, Potential. DeLerno.....109–12; disc. 456 1944

Breakdown Studies in Compressed Gases. Howell..193–204; disc. 204 1939

Breakdown Strength of Air and of Freon in a Uniform Field at High Pressures. Trump, Safford, Cloud.....132–5; disc. 676 1941

Breakdown Strength of Electric-Cable Insulating Papers, The True Dielectric. Cloke, Bates.....1191–5; disc. 1195 1948

Breakdown Tests on Oil-Treated Paper-Insulated Cables, Some Impulse-Voltage. Foust, Scott.....389–91; disc. 391 1940

Breakdown Voltage of Paper Dielectric Capacitors, The Probable. Brooks .....1137–44; disc. 1144 1947

Breakdown Voltages in Air, Calculation of Initial. Ver Planck.....99–104 1941

Breaker, A Fast Circuit. Bohn, Jensen. .....165–8; disc. 405 1942

Breaker, A High-Capacity High-Voltage Three-Cycle Oil Circuit. Byrd, Rietz.....160–3; disc. 463 1945

Breaker, A New High-Capacity Air. Ludwig, Grissinger..414–18; disc. 418 1939

Breaker, A New 69-Kv Compressed-Air Circuit. Baker, Frisch.....363–8; disc. 369 1949

Breaker, A 208Y/120-Volt 120-Ampere Three-Pole 400-Cycle Electrically Operated Aircraft Circuit. Titus, Reifschneider.....551–5 1945

Breaker, A 2,500,000-Kva Compressed-Air Powerhouse. Ludwig, Wilcox, Baker.....235–41; disc. 414 1942

Breaker, A Vertical-Flow Outdoor Compressed-Air. Ludwig, Baker.....217–22; disc. 672 1941

Breaker and Its Application on a 132-Kv Power System, A Vertical-Flow Compressed-Air Circuit. Langstaff, Baker.....188–92; disc. 436 1943

Breaker and Metal-Clad Switchgear Unit, A New 50,000-Kva 5-Kv Oilless Circuit. Dickinson, Hayford.....302–06; disc. 434 1943

Breaker Current Measurements During Reignitions and Recovery, Circuit-. Lewis.....1253–7; disc. 1257 1947

Breaker Design and Performance Criteria, Anode-Circuit-. Boehne, Atwood.....337–45; disc. 437 1945

Breaker, Field Tests and Performance of a High-Speed 138-Kv Air-Blast Circuit. Sporn, Strang.....1–6; disc. 412 1942

Breaker for Central-Station Service, High-Capacity "Hydro-Blast" Circuit. Skeats, Saylor.....111–14; disc. 114 1940

Breaker for Central-Station Service, High-Power "De-ion" Air Circuit. Dickinson.....421–25; disc. 425 1939

Breaker for Co-ordinating Distribution Systems, An Automatically Reclosing. Rawlins, Wallace.....1021–4 1941

Breaker for Extra-Heavy Arc Rupturing Duty, A 230-Kv 3-Cycle Oil Circuit. Leeds, Cushing.....236–42; disc. 242 1948

Breaker for 15,000-Volt Services, A Magnetic-Type Air Circuit. Linde, Wyman.....140–4; disc. 453 1944

Breaker for 5,000-Volt Service, "Magne-Blast" Air Circuit. Boehne, Linde.....202–08; disc. 208 1940

Breaker for High-Voltage Service, A Conserved-Pressure Air-Blast Circuit. Rankin, Bennett.....193–7; disc. 673 1941

Breaker for Mercury-Arc-Rectifier Anode Circuits and Its Relation to the Arc-Back Problem, A New Multiple High-Speed Air Circuit. Seaman, Morton.....788–96; disc. 1057 1942

Breaker for 138,000-Volt Service, A Three-Cycle 3,500-Megavolt-Ampere Air-Blast Circuit. Byrd, Beall.....229–32; disc. 463 1945

Breaker for Steel-Mill Service, A 500,000-Kva 7.5 Kv Air Circuit. Dickinson..242–5; disc. 450 1944

Breaker for 23-Kv Arc Furnace Duty, A Compressed Air Circuit. Wilcox, Baker.....154–8 1948

Breaker for 2,500-5,000 Volts, Magnetic "De-ion" Air. Ludwig, Nau.....518–22; disc. 1125 1940

Breaker, Improved Design of Low-Voltage Panel-Mounted Air Circuit. Sperow, Favre.....695–8; disc. 698 1948

Breaker Installations in Canada, Some Air-Blast Circuit-. Haberl, Moore.....859–63; disc. 1073 1942

Breaker Modernization and Faster Fault Clearing on Single-Phase Electrified Railroad, Circuit. Brown, Travers, Wood.....705–13; disc. 713 1948

Breaker, New Solenoid Mechanism for Magne-Blast. Wyman, Keagy.....268–74; disc. 448 1945

Breaker, Performance Test of the Allgemeine Elektricitats Gesellschaft Free-Jet Air-Blast 220-Kv 2,500 Megavolt-Ampere Reclosing Circuit. Dovjikov, Diemond.....295–304; disc. 304 1948

Breaker Performance, Transient Recovery Voltages and Circuit-. Van Sickle.....804–13; disc. 1014 1942

Breaker Performance When Switching Large Capacitor Banks, Tests and Analysis of Circuit-. Schroeder, Boehne, Butler.821–31; disc. 1020 1942

Breaker Practice in the United States, A Brief Review of Switchgear and Circuit. Hobbs..893–7; disc. 897 1948

Breaker Ratings, Power-Circuit-. Van Sickle.....882–4; disc. 1353 1941

Breaker Testing Station, High-Capacity Circuit-. MacNeill, Batten.....49–53; disc. 406 1942

Breaker, Tests of 230-Kv High-Speed Reclosing Oil Circuit. Schwager.....784–8; disc. 1468 1944

Breaker, The Cross-Air-Blast Circuit, Prince, Henley, Rankin.....510–17; disc. 1121 1940

Breaker With 250,000-Kva Interrupting Capacity, A New Air Circuit. Dickinson, Nau.....197–201; disc. 671 1941

Breakers, A Compressed-Air Operating Mechanism for Oil Circuit. Cunningham, Hill.....695–8; disc. 1019 1942

Breakers, A Manually-Operated Spring Mechanism for Medium Voltage Oilless Circuit. Wyman, Casey.....357–61; disc. 361 1949

Breakers, A Multiorifice Interrupter for High-Voltage Oil Circuit. Ludwig, Leeds.....119–25; disc. 437 1943

Breakers, A New Line of High-Voltage Outdoor Tank-Type Oil Circuit. Skeats, Riets....224–31; disc. 502 1946

Breakers, A Pneumatic Mechanism for Outdoor Oil Circuit. Linde, Riets.....543–6; disc. 1428 1944

Breakers, Aircraft Circuit. Kuhn.....642–5 1943

Breakers, A-C Tripping and Reclosing of Line Sectionalizing Circuit. Winegartner, Bonheimer...1357–9 1949

Breakers, An Improved Overcurrent Tripping Device for Low-Voltage Circuit. Rawlins, Sandin.....1149–53; disc. 1153 1947

Breakers and Switchgear, Interim Report on Application and Operation of Circuit. (Committee Report).....481–3 1943

Breakers and Transformers, Oil-Impregnated - Paper High - Voltage Condenser Bushings for Circuit. Lingal, Cole, Watts.....269–75; disc. 439 1943

Breakers, Application Ratings of Indoor Power Circuit. Vikoren.....768–73; disc. 1168 1946

Breakers, Design and Construction of High-Capacity Air-Blast Circuit. Strang, Boisseau.....522–7; disc. 1131 1940

Breakers, Design and Operation of High-Voltage Axial Air-Blast Circuit. Leuthold.....869–75; disc. 1073 1942

Breakers, Dielectric Strength of Oil for High-Voltage Testing of Oil Circuit. Lingal, Skeats, Braley.....903–06 1941

Breakers, Field Tests of Interrupting Capacity of 138-Kv Oil Circuit. Buchanan, Floyd.....199–204; disc. 503 1946

Breakers, Field Tests on High-Capacity Air-Blast Station-Type Circuit. Strang, Skeats...100–04; disc. 409 1942

Breakers, Field Tests on High-Capacity Station Circuit. Braley.....31–6; disc. 408 1942

Breakers for 400-Cycle Aircraft Electric-Power System, Pressure-Arc-Interruption Circuit. Austin.....58–60; disc. 487 1946

Breakers for Grand Coulee Power Plant, Field Tests for Development of 10,000,000-Kva, 230-Kv Oil Circuit. Killgore, Clagett.....271–83; disc. 283 1948

Breakers for High-Speed Single-Pole Tripping and Reclosing, Relays and. Goldsborough, Hill.....77–81; disc. 429 1942

Breakers for High-Voltage Service, Multiple-Grid. MacNeill, Hill.....427–31; disc. 431 1939

Breakers for Metal-Clad Switchgear, Medium-Capacity Air-Blast Circuit. Bennett, Wyman.....383–8; disc. 627 1941

Breakers for Rapid Reclosing Duty, High-Voltage Oil Circuit. Hill, Leeds.....113–18; disc. 452 1944

Breakers, Improved Selective Tripping of Low-Voltage Air Circuit. West.....608–10; disc. 1431 1944

Breakers in A-C Railway Service, Compressed-Air Circuit. Wilcox, Harker.....141–5; disc. 419 1945

Breakers in Cascade Arrangement, Protection of Low-Voltage Circuits by Air Circuit. Anderson, Black.....1151–60; disc. 1356 1941

Breakers, Insulator Flashover Deionization Times as a Factor in Applying High-Speed Reclosing Circuit. Boisseau, Wyman, Skeats.....1058–66; disc. 1066 1949

Breakers, Large Indoor Power Air-Blast Circuit. Jansson.....1675–8; disc. 1679 1948

Breakers, Mechanical Simplicity of Air-Blast Circuit. Haberl, Jensen.....869–74; disc. 1355 1941

Breakers, Modern Trends of Low-Voltage Air Circuit. Seaman.....24–29; disc. 29 1940

Breakers—Oil and Air-Blast, Field Tests and Performance of Heavy-Duty High-Speed 138-Kv Circuit. Sporn, St. Clair..401–10; disc. 463 1945

Breakers on Field Tests, Unusual Performance of Standard 230-Kv Impulse and Tank-Type Oil Circuit. Riets.....267–70; disc. 270 1948

Breakers, Protection of Large D-C Machines by Means of High-Speed Circuit. Housley, Jensen.....637–40; disc. 1428 1944

Breakers, Selective Tripping of Low-Voltage Air Circuit. Deans.....971–6; disc. 976 1947

Breakers, Switching Overvoltage Hazard Eliminated in High-Voltage Oil Circuit. Hunt, Boehne, Peterson.....98–100; disc. 418 1943

Breakers, The Degree of Short-Circuit Protection Afforded Small Low-Voltage A-C and D-C Starters by Means of Fuses and Circuit. Jones.....611–12; disc. 1408 1944

Breakers, The Development, Design, and Performance of Magnetic-Type Power Circuit. Linde, Wyman.....386–93; disc. 510 1946

Breakers, The Vertical-Flow Interrupter and Its Application to "Oil-Poor" Circuit. Baker.....440–5; disc. 635 1941

Breakers to Transmission Systems, Analysis of the Application of High-Speed Reclosing. Crary, Kennedy, Woodrow.....339–48; disc. 423 1942

Breakers up to 500,000 Kva, 15 Kv, Size Reduction and Rating Extension of Magnetic Air Circuit. Dickinson, Frink.....220–3; disc. 510 1946

Breaking Time, An Instrument for the Determination of Contact Making and. Richter, Elliot.....14–16; disc. 459 1943

Bridge, A Self-Balancing Capacitance. Foley.....797–801 1947

Bridge Erosion in Electrical Contacts and Its Prevention. Pfann.....1528–33 1948

Bridge for Determining the Ratio and Phase Angle of Potential Transformers, A Capacitance. Bousman, Ten Broeck.....541–5; disc. 944 1943

Bridge for Microwave Power Measurements, A Direct Reading D-C. Carlin, Blass.....311–15 1948

Bridge Magnetic Fluxmeter for A-C Fields, Use of Bismuth. Smith.....52–5 1939

Bridge Method for Determining the Motional Characteristics of Permanent-Magnet Movable-Coil Instrument Mechanisms. Gilbert.....411–15 1948

Bridge Network for Dielectric Measurements, Generalized. Balsbaugh, Howell, Dotson..950–6; disc. 1105 1940

Bridge Railway, Signal System, Interlocking Plants, and Automatic Train Control on the San Francisco-Oakland Bay. Davis.158–64 1940

Bridge, Rapid-Recording A-C. Mikelson, Bouskan...628–31; disc. 1232 1940

Bridge, Sensitivity of the Four-Arm. Seletzky, Zurcher.723–8; disc. 728 1939

Bridge to High-Speed Train Braking, A Unique Application of the Wheatstone. Hines.....360–2 1948

Bridges, Electronic Null Detectors for Use With Impedance. Lamson.....535–40 1947

Brief Review of Switchgear and Circuit Breaker Practice in the United States, A. Hobbs. 893–7; disc. 897 1948

Brief Survey of Power-Supply Developments on British Aircraft. Carter.....806–07; disc. 1503 1944

British Aircraft, Brief Survey of Power-Supply Developments on. Carter.....806–07; disc. 1503 1944

British Aircraft, Electric-Wiring Installations in. Horn.....896–900 1944

British System of Cockpit Lighting, The Scientific Basis for the New. Calvert.....869–70 1944

British View, A-C Supplies for Services in Large Aircraft—A. Earnshaw, Shearer.....1314–20 1944

Broad Band Carrier Systems, A New Crystal Channel Filter for. Willis.....134–8; disc. 490 1946

Broad-Band Coupling of Power-Line Carrier Equipment, A Proposal for. Miller.....1028–30; disc. 1030 1949

Broad-Band Signal Generator, A. Hahn, Ebert, Lynch.....316–20 1948

Broadcast Stations, Television Equipment for. Lawrence.....443–52 1947

Broadcast Transmitter, A Push-Button-Tuned 50-Kw. Rockwell, Lepple.....1–3 1941

Broadcasting, A New 150-Kilowatt Transmitter for Standard Band. Boerner.....943–51 1948

Broadcasting in Canada, Radio. Frigon.....896–8; disc. 1357 1941

Broadcasting, Polyphase. Byrne.....347–50 1939

Broken Conductor Effect on Sags in Suspension Spans. Bissiri, Landau.....1181–8 1947

Broken-Delta-Secondary Transformer Circuits, Criteria for Neutral Stability of Wye-Grounded-Primary. Shott, Peterson.....997–1002; disc. 1394 1941

Brush Characteristics by the Dynamotor Method, Dynamic. Herman.....759–63 1947

Brush Disintegration, Some Measures of Electrical-. Coover, Jones.....750–4 1943

Brush Performance, Maintenance of Good. Kalb....819–25; disc. 996 1945

Brush Problem, High-Altitude. Ramadanoff, Glass...825–30; disc. 1489 1944

Brush-Shifting A-C Motor, Theory of the. Conrad, Zweig, Clarke:
Part I.....829–34 1941
Part II.....834–36 1941
Part III.....502–06 1942
Part IV.....507–13 1942

Brush-Shifting Commutator Motor (Schrage Type), The Circle Diagram of the Polyphase. Franklin.....1667–72; disc. 1672 1947

Brush-Shifting Motor, Impedance Relationships of the Adjustable-Speed A-C. Baumann.....1460–2 1947

Brush Wear, Effect of Silicone Vapor on. Marsden, Savage....1186–90 1948

Brushes, A Study of the 3-Phase Commutator Armature With Six Adjustable. Franklin.....197–204 1948

Brushes by Application of Metallic Halides, Treatment of High-Altitude. Elsey.....576–9 1945

Brushes for Life and Performance Under Various Altitude Conditions, The Testing of. Herman.....929–33; disc. 1491 1944

Brushes, New Test Chambers for Aircraft Electric Apparatus With Particular Reference to Carbon. Summers, Settle.....1205–12; disc. 1491 1944

Brushes, Progress Report on AIEE Test Code for Electric. (Committee Report).....1126–8 1949

Buffers by Electrical Means, Testing of Elevator. Kimberly.....53–4 1941

Bulb Mercury-Arc Rectifiers for Traction Service, Glass-. Woolgar.....843–6; disc. 1383 1941

Bundle Conductors, Results of Tests Carried Out at the 500-Kv Experimental Station of Chevilly (France), Especially on Corona Behavior of. Cahen.....1118–25; disc. 1125 1948

Buried Bare Wire, Surge Characteristics of a. Sunde...987–91; disc. 1180 1940

Buried Cables and Pipes, The Temperature Rise of. Neher.....9–17; disc. 17 1949

Burndown From That Cause, Power Arc-Over on Overhead Distribution Lines and Newly Developed Equipment for Protection Against Conductor. Matthews.....596–604; disc. 684 1941

Burning-Clear and Damage Phenomena on Aircraft Structures, Electric-Circuit. Foust, Hutton.....198–204; disc. 457 1944

Burning of Wood Structures by Leakage Currents. Ross..279–84; disc. 285 1947

Burying Telephone Cables, Recent Developments in. Fisher, Smith.....169–74 1942

Bus and Switch Structure, Station "C," Oakland, Pacific Gas and Electric Company, 12-Kv Metal-Enclosed. Benson, Strang..751–5; disc. 1080 1940

Bus, Arcing Ground Tests on a Normally Ungrounded 13-Kv 3-Phase. Allen, Waldorf..298–306; disc. 498 1946

Bus-Bar Electrical Distribution Systems for Industrial Plants, Enclosed. Carlson.....297–302; disc. 700 1941

Bus-Bar Industrial Distribution Systems: an Epitomization of Available Data, The Design of. Higgins.....385–400; disc. 486 1945

Bus Bars for Large Polyphase Currents, Paired-Phase. Fisher, Frank.....71–7; disc. 417 1943

Bus Characteristics, Three-Winding Transformer Ring-. Bills, MacArthur.....848–9; disc. 1066 1942

Bus Designed for High-Capacity Generating Stations, A New Isolated-Phase Metal-Enclosed. Wyman, Shores.....699–703; disc. 703 1948

Bus Differential Protection, New Current Transformer for. Kennedy, Sinks.....1180–7; disc. 1363 1941

Bus-Differential Protection Using Bushing Current Transformers, Instantaneous. Seeley, von Roeschlaub.....1709–18; disc. 1718 1948

Bus for Grand Coulee Power Plant, Development of the 230-Kv Ring. Holmdahl, Killgore.....1369–78; disc. 1378 1948

Bus, 4,370,000-Kva Short-Circuit Tests on Grand Coulee 230-Kv. Clagett, Leeds.....729–35; disc. 1119 1946

Bus Protection. (Committee Report).....206–11; disc. 211 1939

Bus Protection, Considerations in Applying Ratio Differential Relays for. Smith, Sonnemann, Dodds.....243–9; disc. 249 1939

Bus Protection Independent of Current-Transformer Characteristics. Steeb.....859–62; disc. 1365 1941

Bus Protection, Linear Couplers for. Harder, Klemmer, Sonnemann, Wentz.....241–8; disc. 463 1942

Bus, Protection of the Airplane Main. Exner.....979–82 1949

Bus Short-Circuit Protection, D-C Machine Flashover and. Montgomery, Sellers.....1168–73; disc. 1370 1941

Bus Supports for Rectangular Tubular Conductors, Formulas for Calculating Short-Circuit Stresses for. Higgins.....578–80 1942

Bus-Tie Switches, Improving Stability by Rapid Closing of. Kimbark.....61–4; disc. 456 1945

Bus Where No Overhead Facilities Exist?, Can the Trolley Coach Compete Economically With the Gas or Diesel. Gauss.....264–8; disc. 268 1947

Bushing and Associated Insulation Testing by the Power-Factor Method. Baltzly, Schlottere.....308–12; disc. 744 1941

Bushing-Current-Transformer Characteristics, A Simple Method for the Determination of. Moreton.....581–5; disc. 948 1943

Bushing Current Transformer for Metering, Orthomagnetic. Boyajian, Camilli.....137–40; disc. 427 1945

Bushing-Current-Transformer Performance, Analysis of. Gebelein, Elsi.....541–6; disc. 1137 1940

Bushing Current Transformers, Instantaneous Bus-Differential Protection Using. Seeley, von Roeschlaub.....1709–18; disc. 1718 1948

Bushing Design for High Altitudes, A Small High-Voltage. Vogel, Hart.....761–4 1949

Bushing Tests. Brownlee, Wickham.....940–2; disc. 1344 1941

Bushing-Type Current Transformers, Overcurrent Performance of. Woods, Bottonari.....554–60; disc. 1140 1940

Bushings, A New Line of Oil-Filled Apparatus. Bowers, Johnston.....729–32; disc. 733 1948

Bushings Designed to Meet Modern Service, High-Voltage. Brandt, Rorden.....255–60; disc. 696 1941

Bushings, Flashover Characteristics of Transformer Condenser. Cole.....27–32; disc. 32 1939

Bushings for Circuit Breakers and Transformers, Oil-Impregnated-Paper High-Voltage Condenser. Lingal, Cole, Watts.....269–75; disc. 439 1943

Bushings, High Altitude Flashover and Corona Correction on Small Ceramic. Pendleton.....1324–30 1947

Bushings, Improvements in the Construction of Condenser. Peterson.....645–50; disc. 650 1939

Bushings, Proposed Standards for Outdoor. (Committee Report).....590–1; disc. 1207 1940

Bushings, Report on Apparatus. (Committee Report).....266; disc. 695 1941

Business Machines in Determining the Distribution of Load and Reactive Components in Power Line Networks, The Use of. Jennings, Quinan.....1045–6 1946

Busses Comprised of Solid or Tubular Rectangular Conductors, Experimental Determination of the Capacitance of Heavy-Current. Teasdale, Higgins.....653–9; disc. 659 1948

Busses Comprised of Square Tubular Conductors, Formulas for the Inductance of Coaxial. Messinger, Higgins.....328–36; disc. 501 1946

Busses Comprised of Square Tubular Conductors, Proximity Effect Factors for 3-Phase Coaxial. Higgins, Messinger....1538–9 1948

Busses for Generating and Transmission Stations, Ring. Michelson, Galassini....665–9; disc. 1372 1944

Busses, Trolley Coaches Replace. McMillon....403–06 1949

Bussing Arrangements and Transmission Capabilities at Grand Coulee, An Analysis to Determine the Optimum. Hoard, Bills....1259–64; disc. 1478 1944

Button Switching in Telegraph Systems, Push. Blanchard, Blanton....1733–40 1948

C

CAA-MIT Microwave Instrument Landing System, The. Bowles, Barrow, Hall, Lewis, Kerr....859–65; disc. 1120 1940

Cabin-Supercharger Drive, Speed-Control System for an Aircraft. Godsey, Miner, Walley....37–40 1945

Cable Accessory Design Utilising New Laboratory Techniques. Bosworth, Farr...1268–73; disc. 1273 1949

Cable, A-C and D-C Short-Circuit Tests on Aircraft. Cunningham, Davidson....961–9; disc. 1359 1945

Cable and Radiotelegraph Communications, Developments in the Field of. Pratt, Roosevelt....1044–7; disc. 1386 1944

Cable and Wire Spans Using Catenary Formulas, Sag and Tension Calculations for. Nash, Nash....685–92; disc. 984 1945

Cable, Carrier Supervisory Control of Pumping Station Over Power. Derr, Keller, Hedke....699–705; disc. 1124 1946

Cable Carrier System, An Improved. Black, Brooks, Wier, Wilson....741–6; disc. 746 1947

Cable Carrier, Systems, New Test Equipment and Testing Methods for. Tidd, Rosen, Wenk....726–30 1947

Cable Circuits as Used in the Study of Transient Heat Flow, The Accuracy of Measurements in Lumped R-C. Paschkis, Heisler....165–71; disc. 426 1944

Cable Circuits, Impulse Strength of Insulated - Power-. Halperin, Shanklin....1190–7; disc. 1386 1944

Cable Circuits in Philadelphia, 79-Kv Pipe-Type. Kidder, Van Antwerp....550–6; disc. 556 1949

Cable, Current Ratings of Aircraft. Askew, McClinton....988–92 1949

Cable Depthometer, The Submarine-. Nelson....691–5 1939

Cable Design, A New Principle of. Del Mar....206–10; disc. 705 1941

Cable Design for Aircraft, High-Voltage Ignition. Wermine....716–19; disc. 993 1943

Cable for Carrier Current Control Circuit, Polyethylene Insulated Coaxial. Slade, West....1416–18; disc. 1419 1948

Cable for Carrier Current Installation on Power Lines, Line Tuning Equipment Used With Coaxial. Sutton....44–8; disc. 48 1949

Cable for Induction Heating, Low Reactance Flexible. Zucker....848–52 1946

Cable Impregnated with Extra-High-Viscosity Oil, High-Pressure Gas-Filled. Sticher, Doan, Atkinson, Meyerhoff....336–45; disc. 345 1949

Cable Installation at New Orleans, La., 115-Kv High-Pressure Oil-Filled Pipe. Bullard, Pettee, Rhodes....475–84; disc. 484 1948

Cable Installation, Thermal Characteristics of a 120-Kv High-Pressure, Gas-Filled. Sanderson, Sticher, McGrath....487–98; disc. 499 1948

Cable Insulating Papers, The True Dielectric Breakdown Strength of Electric-. Cloke, Bates....1191–5; disc. 1195 1948

Cable Insulation, Impulse Strength of. Davis, Eddy....394–9; disc. 399 1940

Cable—Its Causes and Effects on Cable-Sheath Life, Cyclic Movement of. Schifreen....1121–30; disc. 1388 1944

Cable Joints, A Theoretical and Practical Approach to the Design of High-Voltage. Short....1275–80; disc. 1280 1949

Cable Lines in Los Angeles, New 138-Kv. Mansfield..1240–9; disc. 1479 1944

Cable Lines, Location of Gas Leaks in Pipe-Encased Gas Pressure. Piper....10–21; disc. 21 1948

Cable, Load Ratings of. Halperin:
Part I....535–53; disc. 553 1939
Part II....930–42; disc. 1040 1942

Cable, Low-Gas-Pressure. Shanklin....307–15; disc. 315 and 912 1939

Cable, Low-, Medium-, and High-Pressure Gas-Filled. Shanklin....719–26; disc. 1021 1942

Cable Network, Frequency Division Techniques for a Coaxial. Crane, Dixon, Huber....1451–9 1947

Cable, 120-Kv Compression-Type. Faucett, Komives, Collins, Atkinson....652–7; disc. 1021 1942

Cable, 120-Kv High-Pressure Gas-Filled. Faucett, Komives, Collins, Atkinson....658–65; disc. 1021 1942

Cable, Operation of Low-Pressure Gas-Filled. Hatcher....788–92; disc. 1399 1944

Cable Overhead-Conductor 132-Kv Transmission Line at Carrier Current Frequencies, Loss Measurements Made on Underground-. Cornelius, Storer....597–601 1949

Cable, Picture Transmission by Submarine. Milnor....105–07; disc. 756 1941

Cable—Pipe Line Type, A 138,000-Volt Polyethylene-Sheathed Compression. McCormack, Hatcher, Wyatt, Del Mar, Merrell, Palmer, DeTurk.... 447–65; disc. 465 1948

Cable Plow, The Submarine. Lawton....675–85; disc. 685 1939

Cable Quality, Impulse Strength as a Measure of. Komives....929–34; disc. 1339 1941

Cable, Requirements for Low-Voltage Aircraft. Hedges....808–10; disc. 1473 1944

Cable Research and Experience, Gas-Filled. Shanklin....549–53; disc. 1399 1944

Cable, Semiconducting Shielding for A-C Power. Merrell....605–09; disc. 1145 1946

Cable-Sheath Corrosion, Study of A-C Sheath Currents and Their Effect on Lead-. Sherer, Granbois....264–8; disc. 483 1945

Cable-Sheath Life, Cyclic Movement of Cable—Its Causes and Effects on. Schifreen....1121–30; disc. 1388 1944

Cable Sheathing, A New Technique for Lead. Reinits, Wiseman....165–71; disc. 171 1940

Cable Sheathing, F-3 Lead Alloy—An Improved. Hickernell, Snyder....563–9; disc. 1136 1946

Cable, Short-Time Current Ratings for Aircraft Wire and. Jones, Scott....644–8; disc. 1135 1946

Cable, Solid Type, Pulling Loads on Single- and Multiple-Conductor Impregnated-Paper Lead-Encased. Bellis....138–48; disc. 403 1943

Cable Stations, B-1 Alarm and Control System for Remote Control of Coaxial. Hearn, Weber....622–6 1949

Cable, Statistical Methods as Applied to the Manufacture and Testing of Wire and. Woolfson....752–4; disc. 754 1948

Cable Switching, Resistors for 138-Kv. Sadler, Blakeslee..39–46; disc. 46 1947

Cable Telegraphy, Some Modern Techniques in Ocean. Cramer....494–500; disc. 500 1947

Cable Temperatures by Means of Reduced-Scale Models, Determination of. Gemant, Sticher:
Part I....475–82; disc. 1128 1946
Part II....28–33; disc. 34 1948

Cable, The S-Function Method of Measuring Attenuation of Coaxial Radio-Frequency. Stewart....616–19; disc. 966 1945

Cable, The Type CB Impregnated-Paper. Rosch....1041–50; disc. 1235 1940

Cables and Connectors, Simulated-High-Altitude Testing of Aircraft Ignition. Race, Ross....20–6 1945

Cables and Pipes, The Temperature Rise of Buried. Neher..9–17; disc. 17 1949

Cables as Affected by Mutual Heating in Air or Conduit, Current Rating of. (IPCEA Committee Report)....354–65; disc. 424, 1352 1944

Cables, Corona Discharge on Rubber-Insulated. Paine, Brown....709–14; disc. 1070 1940

Cables, Effective Resistance and Inductance of 3-Conductor Shipyard Power. Summers....1345–50 1948

Cables, Electrolysis and Corrosion of Underground Power-System. Gorman....329–36; disc. 479 1945

Cables, Gas Pressure for Telephone. Giese....471–8 1947

Cables, Heating of Radio-Frequency. Macalpine....283–8 1949

Cables in a Duct Bank, The Temperature Rise of. Neher....540–6; disc. 546 1949

Cables in Canada, Design, Manufacture, and Installation of 120-Kv Oil-Filled. Farnham, Titus....881–9; disc. 1074 1942

Cables in Ducts, An Investigation of the Relationship Between Temperature and Movement of. Nicholson, Brosnan....723–8; disc. 1388 1944

Cables in Service, Guide for Wartime Conductor Temperatures for Power. (Committee Report)....606–10; disc. 942 1943

Cables in Steel Pipe, A-C Resistance of Segmental. Meyerhoff, Eager....816–29; disc. 829 1949

Cables in Steel Pipe or Conduit, Reactance of Large. Del Mar....1409–12; disc. 1412 1948

Cables Installed in Underground Subway Systems, Economical Loading of High-Voltage. Thomas....611–15; disc. 615 1939

Cables, Internal Corona Discharges in Insulated. Greenfield....591–600; disc. 600 1947

Cables, Maximum Safe Operating Temperature for 15-Kv Paper-Insulated. Franklin, Thomas....556–60; disc. 560 1939

Cables, Recent Developments in Burying Telephone. Fisher, Smith....169–74 1942

Cables, Recent Improvements in Loading Apparatus for Telephone. Hale, Quinlan, Ranges....385–92 1948

Cables, Report of Conference on Radio-Frequency....911–41 1945

Cables, Some Impulse-Voltage Breakdown Tests on Oil-Treated Paper-Insulated. Foust, Scott.....389–91; disc. 391 1940

Cables, The Measurement and Investigation of Ionization Level of Rubber Insulated. Graham, Duffy, Foster.....1107–16; disc. 1116 1948

Cables, The Power Rating of Radio-Frequency. Mildner.....289–98; disc. 298 1949

Cables, Transient Temperature Phenomena of 3-Conductor. Wollaston.....1284–95; disc. 1295 1949

Cables Used for Transmitting Electric Energy in Airplanes. Peters, Phillips, Kronstein, Jealous.....1270–82; disc. 1474 1944

Cage Induction Motors, General Theory of Multiple. Chang.....1139–43 1949

Cage Motor, Dynamic Braking by Self-Excitation of Squirrel-. Srinivasan, Thomas.....145–8 1947

Cage Rotor, The "Copperspun" Squirrel. Anderson.....1312–14 1947

Calculated Risk of Operating Capacitors Without Individual Fuses, The. Brooks.....1219–25; disc. 1225 1949

Calculating Effects of Additions to Power Systems, Superposition Methods for. Rettig.....396–401; disc. 648 1941

Calculating Fault Currents on Rural Distribution Systems, Graphical Method of. Linder.....16–19; disc. 446 1945

Calculating Optimum Performance of Semiconductor Rectifiers, A Practical Approach. Wilson.....640–2; disc. 642 1948

Calculating Probability of Generating Capacity Outages. Lyman.....1471–7; disc. 1477 1947

Calculating Procedure for Low-Voltage A-C Systems, Short-Circuit. Darling.....1121–36; disc. 1294 1941

Calculating Single-Phase Motor Performance, The Apparent-Impedance Method of. Morrill..1037–41 1941

Calculating Short-Circuit Forces Between Channels Located Back to Back, Formulas for. Higgins.....710–12 1944

Calculating Short-Circuit Forces Between Conductors of Structural Shape, Formulas for. Higgins.....659–63 1943

Calculating Stability, The Transient-Energy Method of. Magnusson.....747–55; disc. 755 1947

Calculating Temperature Distribution in Transformer Cores and Other Electric Apparatus of Rectangular Cross Section, Formulas for. Higgins.....190–4; disc. 493 1945

Calculating the Inductance of Channels Located Back to Back, Formulas for. Schwantz, Higgins.....893–9 1946

Calculation and Control by Capacitors, System Lower-Harmonic Voltages—Methods of. Feaster, Harder..1060–6; disc. 1310 1941

Calculation and Design of Resistance-Coupled Amplifiers Using Pentode Tubes. Terman, Hewlett, Palmer, Pan.....879–84; disc. 1133 1940

Calculation of Circuit Transient Recovery Voltages, Practical. Adams, Skeats, Van Sickle, Sillers.....771–9; disc. 1017 1942

Calculation of Electrical Transients on Power Systems, Practical. Evans, Witzke.....690–6; disc. 923 1943

Calculation of Fault Currents, Simplified. (Committee Report):
.....1133–35 1942
.....1433–35 1948

Calculation of Induction-Type Frequency Converters, Performance. Latzko.....691–4 1948

Calculation of Initial Breakdown Voltages in Air. Ver Planck...99–104 1941

Calculation of Leakage Reactance of Induction Motors, Some Phases of. Liwschitz, Formhals.....1409–12; disc. 1412 1947

Calculation of Slot Constants. Puchstein.....1315–22; disc. 1322 1947

Calculation of Stability Limit, Dynamic Braking Control of D-C Series Motors. Heumann, Smith.....454–7; disc. 1130 1946

Calculation of the Inductance of Linear Conductors of Structural Shape, Formulas for the. Higgins...53–8 1943

Calculation of the Magnetic Field Components of Circular Filaments and Solenoids, Formulas and Tables for the. Grover.....665–75 1949

Calculation of Unbalanced Magnetic Pull in Synchronous and Induction Motors, The. Robinson.....620–4; disc. 924 1943

Calculation of Unbalanced Voltage Drops in Distribution Circuits With Particular Reference to Multigrounded Neutrals. Bullard, Lowe, Wahlquist.....145–8 1944

Calculation Procedure for Electric-Panel Space Heating, Load-. Raber, Hutchinson.....1085–91; disc. 1432 1944

Calculations for Cable and Wire Spans Using Catenary Formulas, Sag and Tension. Nash, Nash.....685–92; disc. 984 1945

Calculations for Single-Phase Magnets, Shading Coil. Evans.....134–7; disc. 137 1947

Calculations, High-Frequency Coaxial-Line. Race, Larrick.....526–30 1942

Calculations, Ignitor Characteristic and Circuit. Marshall.....1519–24 1947

Calculations, Impedance of 400-Cycle Three-Phase Power Circuits on Large Aircraft and Its Application to Fault-Current. Chappuis, Olmsted.....1213–20; disc. 1496 1944

Calculations on Capacitor Motors, Performance. Trickey..73–6; disc. 662 1941

Calculations on Polyphase Reluctance Motors—Synchronous Motors Without Field Excitation, Performance. Trickey.....191–3 1946

Calculations on Repulsion Motors, Performance. Trickey.67–73; disc. 661 1941

Calculations on Shaded Pole Motors, Performance. Trickey.....1431–8; disc. 1438 1947

Calculations on Tapped-Winding Capacitor Motors, Performance. Trickey.....1–3; disc. 1943

Calculator for Directional-Antenna Patterns, An Electromechanical. Smith, Gove.....78–83 1943

Calculator of Load Flow in A-C Networks, A New Simple. Enns.....786–90; disc. 1000 1943

Calculator, The Modern A-C Network. Parker.....977–82; disc. 1395 1941

Calculus Based on the Generalized Functions of Schwartz, A Derivation of Heaviside's Operational. Smith, Alger....939–44; disc. 944 1949

Calculus, The Rectifier. Goodhue.....687–91; disc. 1073 1940

Calender Train, Co-ordinated Electric Drive for a Ruber. John, Knapp, Mosteller.....128–34; disc. 492 1946

Calibration of Ignition Crest Voltmeters, The. Davis, Warren.....99–104; disc. 104 1947

Calibrations, A Study of Wave Shapes for Radio-Noise-Meter. Frick.....890–901; disc. 969 1945

California Institute of Technology Electric Analog Computer to Nonlinear Mechanics and Servomechanisms, Application of the. McCann, Wilts, Locanthi.....652–60 1949

California—Past, Present, and Future, Mingled Hydro and Steam Power Production in. Markwart.....775–82; disc. 1077 1940

Calorimetric Method for Determining Efficiencies of Electric Machines. Siegfried, Thulin.....530–2 1942

Camera, A Cathode-Ray Oscillograph With Rotating-Drum. Downie..984–6 1941

Canada, Design, Manufacture, and Installation of 120-Kv Oil-Filled Cables in. Farnham, Titus.....881–9; disc. 1074 1942

Canada, Electric Furnace Practice in. Balleny.....917–24 1947

Canada, Radiobroadcasting in. Frigon.....896–8; disc. 1357 1941

Canada, Some Air-Blast Circuit-Breaker Installations in. Haberl, Moore..859–63; disc. 1073 1942

Canadian National Railways Terminal, Montreal, Canada, Electrification and Signaling of the. Gage.....41–4; disc. 417 1945

Capacitance Bridge, A Self-Balancing. Foley.....797–801 1947

Capacitance Bridge for Determining the Ratio and Phase Angle of Potential Transformers, A. Bousman, Ten Broeck.....541–5; disc. 944 1943

Capacitance Filters, Diode Rectifying Circuits With. Waidelich.....1161–7; disc. 1388 1941

Capacitance Fuel Gauges. Clark, Adolphe.....1189–96; disc. 1196 1947

Capacitance of Heavy-Current Busses Comprised of Solid or Tubular Rectangular Conductors, Experimental Determination of the. Teasdale, Higgins.....653–9; disc. 659 1948

Capacitance Potential Devices, Application of. Clem.....1–8; disc. 8 1939

Capacitance Relations Between Short Cylindrical Conductors, Resistance and. ReQua....724–30; disc. 962 1945

Capacitance-Type Fuel-Measurement System for Aircraft, A. Pearson..1363–8 1947

Capacitor, A New High-Frequency. Allison, Beverly....915–16; disc. 1464 1944

Capacitor—An Aid to Electric-Power Service for Pipe Lines, The. Hyde, Marbury.....387–95; disc. 476 1944

Capacitor Banks and Its Application, Automatic Control and Switching Equipment for. Schroeder, Bloomquist.....649–54; disc. 1440 1944

Capacitor Banks, Connection Arrangements and Protective Practices for Shunt. Clark, Farnham.....1226–30; disc. 1231 1949

Capacitor Banks, Tests and Analysis of Circuit-Breaker Performance When Switching Large. Schroeder, Boehne, Butler..821–31; disc. 1020 1942

Capacitor-Compensated Long-Distance Transmission Systems, Self-Excited Oscillations of. Bodine, Concordia, Kron.....41–4; disc. 371 1943

Capacitor-Compensated Transmission System, Characteristics of a 400-Mile 230-Kv Series-. Hoard.....1102–14; disc. 1178 1946

Capacitor-Discharge Resistance Welding, An Improved Electronic Control for. Bichsel, Hughes.....1150–7; disc. 1384 1944

Capacitor Discharge Welding Transformers, Design and Measurement of. Dietz, Stein...154–9; disc. 512 1946

Capacitor Equipments Switched in Large Banks, Analysis of Factors Which Influence the Application, Operation, and Design of Shunt-. Butler.....795–800; disc. 1096 1940

Capacitor for 66-Kv Transmission Line, Design and Protection of 10,000-Kva Series. Johnson, Marbury, Arthur.....363–7; disc. 368 1948

Capacitor Improves Voltage on 66-Kv Line Supplying Large Electric Furnace Load, A 10,000-Kva Series. Jones, Arthur, Stearns, Johnson... 345–51; disc. 351 1948

Capacitor Installation at Newport News. Parrack, Harder... 1165–73; disc. 1378 1944

Capacitor Installation for Single-Phase Railway Service, Shunt. Brown, Witzke... 258–65; disc. 265 1948

Capacitor Motor, Current Loci for the. McFarland... 152–6 1942

Capacitor Motor, The Cross-Field Theory of the. Puchstein, Lloyd... 58–62; disc. 667 1941

Capacitor Motor, The Equivalent Circuit of the. Chang... 631–40 1947

Capacitor Motor, Turn Ratio of the. McFarland... 892–8 1943

Capacitor Motors, A Design Method for. Lloyd, Chang... 651–7; disc. 657 1947

Capacitor Motors, Performance Calculations on. Trickey... 73–6; disc. 662 1941

Capacitor Motors, Performance Calculations on Tapped-Winding. Trickey... 1–3; disc. 1943

Capacitor Motors, The Equal-Volt-Ampere Method of Designing. Trickey... 990–2; disc. 1399 1941

Capacitor Protective Device, New Series. Marbury, Owens... 142–6; disc. 511 1946

Capacitor Relay Timing in Industrial Control. Stansbury, Jochem... 65–9; disc. 69 1940

Capacitor Single-Phase Motor, A Generalised Circle Diagram for a Four-Terminal Network and Its Application to the. Tarboux... 881–9; disc. 943 1945

Capacitor Stabilisation of Arc-Welding Transformers. Blankenbuehler, Lester... 54–5 1946

Capacitor Start Motors, A Design Method for. Chang... 1369–74 1947

Capacitor Substation, Design and Layout of 66-Kv 10,000-Kva Series. Miller... 355–9 1948

Capacitor Units for Emergency Loading of Transformers in Open Delta, Mobile. Wolf, Mattison... 83–6; disc. 373 1943

Capacitors and Automatic Boosters for Economical Correction of Voltage on Distribution Circuits. Olmsted... 491–6; disc. 496 1939

Capacitors and Circuit Performance. Butler... 408–15; disc. 646 1941

Capacitors and Traps for Rural Line Carrier, Coupling. (Committee Report)... 1426–8 1948

Capacitors, Automatic Switching Schemes for. Cuttino... 311–14 1947

Capacitors by Means of Automatic Switching, Extending the Use of Shunt. Cuttino... 674–8; disc. 1439 1944

Capacitors, Characteristics of Chlorinated Impregnants in D-C Paper. Berberich, Fields, Marbury... 1173–9; disc. 1437 1944

Capacitors, Condensers, and System Stability. Butler, Schroeder, Ridgway... 1130–8; disc. 1378 1944

Capacitors for Carrier Telephone Systems, Mica. Christopher, Kater... 670–4; disc. 1116 1946

Capacitors for High-Frequency Induction-Heating Circuits. Clark, Scoville... 791–6; disc. 995 1945

Capacitors for Power-Factor Improvement of Induction Motors, Applications of. Bloomquist, Boice... 274–8 1945

Capacitors for Transmission Circuits, Series. Starr, Evans... 963–73; disc. 1044 1942

Capacitors in Amounts to Require Automatic Switching, The Economies of Using. Butler... 322–7; disc. 327 1947

Capacitors in Long Transmission Lines, Steady-State and Transient-Stability Analysis of Series. Butler, Paul, Schroeder... 58–65; disc. 377 1943

Capacitors, Power-Factor Correction of Resistance-Welding Machines by Series. Levoy... 1002–09; disc. 1102 1940

Capacitors, Report of a Survey on the Performance of Shunt. (Committee Report)... 1200–06; disc. 1206 1949

Capacitors, Report on the Operation and Maintenance of Shunt. (Committee Report)... 1208–18 1949

Capacitors, Secondary Versus Primary. Starr... 228–42; disc. 242 1939

Capacitors, Self-Excitation of Induction Motors With Series. Wagner... 1241–7; disc. 1391 1941

Capacitors, Shunt. (Committee Report)... 222–30; disc. 372 1943

Capacitors, System Lower-Harmonic Voltages—Methods of Calculation and Control by. Feaster, Harder... 1060–6; disc. 1310 1941

Capacitors, The Probable Breakdown Voltage of Paper Dielectric. Brooks... 1137–44; disc. 1144 1947

Capacitors to Flash Welders, The Application of Series. Deffenbaugh... 686–7 1946

Capacitors Without Individual Fuses, The Calculated Risk of Operating. Brooks... 1219–25; disc. 1225 1949

Capacity, A New Air Circuit Breaker With 250,000-Kva Interrupting. Dickinson, Nau... 197–201; disc. 671 1941

Capacity and Interconnections of the Columbia Gas and Electric Corporation, Increased. DeForest... 451–8 1941

Capacity Controllers, The Use of Air-Core Reactors as Fault Limiting Means on High Interrupting. Leitch... 469–74; disc. 474 1949

Capacity Determined by the Probability Method, Generating Reserve. Calabrese... 1439–50 1947

Capacity—5,000,000 Kva, The Next Step in Interrupting. Hill, Leeds... 317–23; disc. 463 1945

Capacity Fuse for Voltages Through 138 Kv, A New High-Interrupting. Fahnoe... 630–5; disc. 937 1943

Capacity High-Voltage Three-Cycle Oil Circuit Breaker, A High-. Byrd, Rietz... 160–3; disc. 463 1945

Capacity Investment, Evaluation of Electric Distribution Losses in Terms of Generating-Station-. Mortara... 1–7; disc. 411 1945

Capacity of 138-Kv Oil Circuit Breakers, Field Tests of Interrupting. Buchanan, Floyd... 199–204; disc. 503 1946

Capacity Outages, Calculating Probability of Generating. Lyman... 1471–7; disc. 1477 1947

Capacity Problems of a Combined Hydro and Steam System, Probability Methods Applied to Generating. Loane, Watchorn... 1645–54; disc. 1654 1947

Capacity, Rectifier. Herskind, Steiner... 667–70 1946

Capacity, The Evolution of Standard Lines of Current Transformers for High Overcurrent. Wentz... 658–62; disc. 1426 1944

Car Equipment for New York City's Subway System, Modern. Cordts... 247–9; disc. 250 1947

Car Operating Results in Pittsburgh, PCC. Clardy... 214–17; disc. 400 1942

Car, Some Recent Developments in the PCC. Cooper... 288–92; disc. 292 1947

Carbon Arc—a Valuable Industrial Tool, The. Kalb... 581–5 1942

Carbon Brushes, New Test Chambers for Aircraft Electric Apparatus With Particular Reference to. Summers, Settle... 1205–12; disc. 1491 1944

Carbon-Pile Speed Governor, A. Button... 4–7 1946

Carbon Pile Voltage Regulator for Aircraft Generators, Analysis and Redesign of a. Kouwenhoven, Thaler... 1197–1202; disc. 1202 1948

Carbon-Pile Voltage Regulators for Aircraft. Neild... 839–43; disc. 1460 1944

Carbon-Pile Voltage Regulators, Fundamentals, and Design Improvements, Aircraft. Austin, Richards... 983–7 1949

Cargo-Winch Control for Use on Victory Ships, Modern. Holt... 623–8; disc. 1411 1944

Carrier Channels for Telemetering. Talmage... 1448–56; disc. 1456 1948

Carrier Channels, Operation of Power Line. Lensner... 888–93; disc. 893 1947

Carrier Channels, Power-Line. Brown... 246–51 1945

Carrier Channels, The Combination of Supervisory Control With Other Functions on Power-Line. Cheek, Derr... 241–6 1945

Carrier, Coupling Capacitors and Traps for Rural Line. (Committee Report)... 1426–8 1948

Carrier-Current Channels, A Faster Telemeter for. Lynch, Thomas, Lunge... 288–94; disc. 294 1948

Carrier Current Control Circuit, Polyethylene Insulated Coaxial Cable for. Slade, West... 1416–18; disc. 1419 1948

Carrier-Current Differential Protection for Transformer Banks. Cramer... 545–8; disc. 947 1943

Carrier-Current Equipment, Field Tests on Power-Line. Miller, Prud'Homme... 824–7; disc. 1177 1946

Carrier-Current Equipment for Telemetering and Load Control, Characteristics of New. Beckwith... 1649–52; disc. 1652 1948

Carrier-Current Facilities for a Power Line, Multichannel. Sandstrom, Foster... 71–6; disc. 469 1942

Carrier Current Frequencies, Loss Measurements Made on Underground-Cable Overhead-Conductor 132-Kv Transmission Line at. Cornelius, Storer... 597–601 1949

Carrier-Current Frequencies, Report on Method of Measurements at. (Committee Report) 1429–32; disc. 1432 1948

Carrier Current, Frequency Modulation for Power-Line. Kenefake... 616–20; disc. 953 1943

Carrier Current Installation on Power Lines, Line Tuning Equipment Used With Coaxial Cable for. Sutton... 44–8; disc. 48 1949

Carrier-Current Losses Measured and Interference Minimised on Boulder-Los Angeles Transmission Lines. Laughlin, Pakala, Reagan... 4–9; disc. 9 1940

(Carrier Current) Microwave Channels for Power System Applications. (Committee Report) 40–2; disc. 42 1949

Carrier Current Relay Channel to Other Uses, Possibilities and Methods of Extending a. Smith, Goldsborough... 23–7; disc. 645 1941

Carrier-Current Relay Schemes, The Functions of Ground Preference in. Leyland, Goldsborough... 97–100; disc. 437 1944

(Carrier Current) Relaying Difficulties Disclosed by Staged-Fault Tests. Morgan, Evans... 73–82 1948

Carrier-Current Relaying, Phase-Comparison. McConnell, Cramer, Seeley.....825–33; disc. 973 1945

Carrier Equipment, A Proposal for Broad-Band Coupling of Power-Line. Miller...1028–30; disc. 1030 1949

Carrier for Relaying and Joint Usage, Power Line. Part I. Hampe, Storer.....864–7; disc. 871 1949

Carrier Relay Protection, A New-Type. Wood, Haberl, Baily.....774–9; disc. 987 1943

Carrier Relaying Scheme, The MHO-. Cordray, Warrington.....228–35; disc. 434 1944

Carrier Relaying System, A New. Halman, Goldsborough, Lensner, Drompp.....568–72; disc. 1423 1944

Carrier Supervisory Control of Pumping Station Over Power Cable. Derr, Keller, Hedke.....699–705; disc. 1124 1946

Carrier System, A Versatile Power-Line-. Lensner, Singel.....129–33; disc. 437 1944

Carrier System, An Improved Cable. Black, Brooks, Wier, Wilson.....741–6; disc. 746 1947

Carrier System, Filters for a 150-Kc. Taylor.....583–8 1948

Carrier System for Power Lines, A New Single-Side-Band. Lenehan.....826–30; disc. 830 1947

Carrier System for Radio Relay Applications, A 150-Kc. Boughtwood.....577–82 1948

Carrier System, Line Problems in the Development of the 12-Channel Open-Wire. Ilgenfritz, Hunter, Whitman.....658–64; disc. 664 1939

Carrier System, Some Applications of the Type J. Starbird, Mathis.....666–72; disc. 672 1939

Carrier System, Stability of Tandem Regulators in the L-1. Kinzer.....1179–86 1949

Carrier Systems, A New Crystal Channel Filter for Broad Band. Willis.....134–8; disc. 490 1946

Carrier Systems, New Test Equipment and Testing Methods for Cable. Tidd, Rosen, Wenk.....726–30 1947

Carrier Telegraph System, Frequency-Modulated. Bramhall, Boughtwood.....36–9 1942

Carrier Telegraph System, High-Speed Voice-Frequency. Bramhall.....873–9; disc. 1132 1940

Carrier Telemetering and Load Control, System Operation Improved With. Walton, Lensner.....1643–7; disc. 1647 1948

Carrier, Telemetering Circuits—Metallic and. Bostwick.....1081–6; disc. 1086 1948

Carrier Telephone System, Application of Rural. Bartelink, Cook, Cowan, Messmer.....511–17; disc. 517 1947

Carrier Telephone System for Open-Wire Lines, A 12-Channel. Kendall, Affel.....351–60; disc. 360 1939

Carrier Telephone System for Rural Service, A. Barstow.....501–07 1947

Carrier Telephone Systems, Copper-Oxide Modulators in. Caruthers.....253–60 1939

Carrier Telephone Systems, Mica Capacitors for. Christopher, Kater.....670–4; disc. 1116 1946

Carrier to Power Distribution Circuits, Application of 720-Cycle. Woodworth.....903–15; disc. 1003 1943

Carrier to Power Lines, Application of. Rives.....835–44; disc. 945 1943

Carrier Transmission, A Comparison of the Amplitude-Modulation, Frequency-Modulation, and Single-Side-Band Systems for Power-Line. Cheek...215–20; disc. 450 1945

Carrying Load, Measuring Transformer Winding Temperatures Continuously With the Transformer. Lockie, Stein..1608–16; disc. 1616 1948

Cars, A Control-System for Modern Multiple-UnitRapid-Transit. Moore.....142–7 1942

Cars for Test on Rapid Transit Division, Chicago Transit Authority, Three-Compartment Articulated. Otis.....416–18 1948

Cars, Motor Control for Latest New York Transit System Subway. Riley.....900–03 1947

Cars, Recent Developments in Track Brakes and Drum Brakes for PCC. Vouch.....302–04 1947

Cars, The Magnesium-Copper Sulphide Rectifier Battery Charger for Railroad Passenger. Kotterman.260–5 1939

Cascade Arrangement, Protection of Low-Voltage Circuits by Air Circuit Breakers in. Anderson, Black.....1151–60; disc. 1356 1941

Cascade Variable-Speed Drive, A Study of the Modified Kramer or Asynchronous-Synchronous. Liwschitz, Kilgore.....255–60 1942

Case, Response Time and Lag of a Thermometer Element Mounted in a Protecting. Goodwin.....665–70; disc. 959 1945

Cast Rotor Testing by Test Stator Method, Die. Trickey.....139–41; disc. 483 1946

Casting of Metals by Electromagnetic Forces, Treatment and. Hoke.....986–92 1944

Catenary Formulas, Sag and Tension Calculations for Cable and Wire Spans Using. Nash, Nash.....685–92; disc. 984 1945

Cathode Gas-Filled Tubes as Circuit Elements, Cold-. Ingram...342–7 1939

Cathode Materials for Power Tubes, Amalgam. Lyon, Williams.627–30 1948

Cathode-Ray Method of Wave Analysis, A. Johnson...1032–6; disc. 1398 1941

Cathode-Ray Oscillograph Applied to Long-Time Switching Transients, The. Dunlap, Rohats.....231–4; disc. 445 1943

Cathode-Ray Oscillograph for Testing Lightning Arresters, Modern. Wade, Carpenter, MacCarthy.....549–53; disc. 982 1942

Cathode-Ray Oscillograph, The Naval Ordnance Laboratory Six-Trace. Edwards.....1220–23 1948

Cathode-Ray Oscillograph With Rotating-Drum Camera, A. Downie.....984–6 1941

Cathode-Ray Oscilloscope, Quantitative Determination of Magnetic Properties by Use of. Zamsky....783–7 1947

Cathode-Ray Sensing Element, A Magnetic Compass With. Kliever, Syrdal.....529–34 1947

Cathode-Ray Spectrograph, The. Feldt, Berkley.....105–10 1947

Cathode-Ray Tube, Measurements of Pre-Breakdown Currents in Dielectrics With a. Race.....854–8; disc. 1388 1941

Cathode Tubes, Current Rating and Life of Cold-. Rockwood.....901–03; disc. 1390 1941

Cathodic Protection of Steel Water Tanks Using Aluminum Anodes. Sudrabin, Mears.....197–200 1947

Cause and Control of Some Types of Switching Surges, The. Schroeder.....696–700; disc. 933 1943

Causes and Effects of Stray Electric Currents in Coal Mines. Harrison.....1759–61 1948

Causes of Corrosion of Fine Copper Wires Carrying a Potential. Stephens, Gehrenbeck.....357–60; disc. 360 1940

Cavities at 10,000 Megacycles, Measurement of High Q. Lange....161–6 1947

Cavity Method for Measuring Dielectric Properties at Ultrahigh Frequencies, A Resonant-. Works, Dakin, Boggs.....1092–8; disc. 1452 1944

Cell, Electrical Characteristics of the Junction in a Simplified Selenium Rectifier. Angello.....175–80 1947

Cell Lighting, Aircraft Engine and Propeller Test-. Tuck.....1264–70; disc. 1493 1944

Cells, Characteristics and Applications of Selenium-Rectifier. Harty.....624–9; disc. 956 1943

Cellulose Insulation, Factors Affecting the Mechanical Deterioration of. Clark.....742–9; disc. 991 1942

Cellulose Insulation, Factors Influencing the Mechanical Strength of. Clark.....778–83; disc. 1321 1941

Cellulose Insulation Impregnated With Semi-conducting Liquids, The Dielectric Properties of. Clark.....55–62; disc. 62 1947

Cellulose Insulation, Temperature Limits Set by Oil and. Hill.....484–7; disc. 487 1939

Center, D-C Aircraft Generator Power. Bottemiller.....1267–70 1947

Central-Station Auxiliary-Drive Motors for Constant and Adjustable Speed. Gibson..746–50; disc. 976 1945

Central-Station Service, High-Capacity "Hydro-Blast" Circuit Breaker for. Skeats, Saylor...111–14; disc. 114 1940

Central-Station Service, High-Power "De-ion" Air Circuit Breaker for. Dickinson.....421–5; disc. 425 1939

Central Utility Power Service Versus Local Plant Generation in Industry. Frampton.....880–3; disc. 884 1948

Centralized Traffic Control for Railroads. Hailes.....1167–73 1949

Ceramic Bushings, High Altitude Flashover and Corona Correction on Small. Pendleton.....1324–30 1947

Ceramic Dielectrics at Elevated Temperatures, The Electrical Performance of. Frey, Jesatko.....911–20; disc. 1126 1946

Ceramics as Influenced by Temperature, Electrical Properties of. Lindsay, Berberich.....734–41; disc. 741 1948

Chambers for Aircraft Electric Apparatus With Particular Reference to Carbon Brushes, New Test. Summers, Settle...1205–12; disc. 1491 1944

Change of Frequency on the System of the Southern California Edison Company. Tice, Kroneberg, Johnson, Enefer, Tugby, Sidway.....809–25; disc. 825 1948

Changer, Design of an Electronic Frequency. Willis, Kuenning, Christensen, Bedford.....1070–8; disc. 1413 1944

Changer, Suddenly Applied Loads Carried by a Variable-Ratio Synchronous-Induction Frequency. Darling, Kaufman.....91–4 1948

Changer, Suddenly Applied Loads on a Variable-Ratio Frequency. Carter, Maginniss, Rothe.....1489–95 1947

Changer, Tensorial Analysis and Equivalent Circuit of a Variable-Ratio Frequency. Kron.....1503–06 1947

Changers—Characteristics, Applications, and Economics, Frequency. Crary, Easley....351–8; disc. 416 1945

Changers, Network Coupling by Means of Static Electronic Frequency. Marti.....495–503; disc. 1163 1940

Changers, Parallel Operation of Aircraft Alternators Using Electronic Frequency. Bowlus, Nims.....31–8 1947

Changing Temperature, The Measurement of Dielectric Loss at High Frequencies and Under. Whitehead, Rueggeberg.....520–4 1949

Channel Carrier Telephone System for Open-Wire Lines, A 12-. Kendall, Affel.....351–60; disc. 360 1939

Channel Filter for Broad Band Carrier Systems, A New Crystal. Willis.. .....134–8; disc. 490 1946

Channel to Other Uses, Possibilities and Methods of Extending a Carrier Current Relay. Smith, Goldsborough.....23–7; disc. 645 1941

Channels, A Faster Telemeter for Carrier-Current. Lynch, Thomas, Lunge.....288–94; disc. 294 1948

Channels for Operation of Supervisory Control Equipment. Derr, Brown 1654–60 1948

Channels for Power System Applications, Microwave. (Committee Report).....40–2; disc. 42 1949

Channels for Telemetering, Carrier. Talmage.....1448–56; disc. 1456 1948

Channels Located Back to Back, Formulas for Calculating Short-Circuit Forces Between. Higgins..710–12 1944

Channels Located Back to Back, Formulas for Calculating the Inductance of. Schwantz, Higgins..... .....893–9 1946

Channels, Operation of Power Line Carrier. Lensner...888–93; disc. 893 1947

Channels, Power-Line Carrier. Brown 246–51 1945

Channels, The Combination of Supervisory Control With Other Functions on Power-Line Carrier. Cheek, Derr.....241–6 1945

Characteristic and Circuit Calculations, Ignitor. Marshall.....1519–24 1947

Characteristics, A Simple Method for the Determination of Bushing-Current-Transformer. Moreton..... .....581–5; disc. 948 1943

Characteristics and Application of Precision, Snap-Acting Switches, The. Riche.....1549–54; disc. 1554 1948

Characteristics and Application to Induction-Heating Problems, Vacuum-Tube Radio-Frequency Generator—. Kinn..... .....1290–1303; disc. 1500 1944

Characteristics and Applications of Negative-Glow Lamps. Ferree... .....8–12; disc. 622 1941

Characteristics and Applications of Selenium-Rectifier Cells. Harty.... .....624–9; disc. 956 1943

Characteristics and Performance of Conductors for Supervisory Control and Telemetering, Interim Report on. (Committee Report).....854–62 1943

Characteristics and Power Requirements of Spinning Frames, The. Untersee:
Part I.....1–4 1940
Part II.....336–8 1940

Characteristics, Applications, and Economics, Frequency Changers—. Crary, Easley....351–8; disc. 416 1945

Characteristics at High Slip, Induction-Motor. Morgan Brown, Schumer .....464–8; disc. 1208 1940

Characteristics, Bus Protection Independent of Current-Transformer. Steeb.....859–62; disc. 1365 1941

Characteristics by the Dynamotor Method, Dynamic Brush. Herman.....759–63 1947

Characteristics, Coincidence-Factor Relationships of Electric-Service-Load. Bary.....623–9 1945

Characteristics, Distribution-Type Lightning-Arrester Performance. (Committee Report).....132 1942

Characteristics, Expulsion-Type Lightning Arresters' Impulse Spark-Over Volt-Time. (Committee Report). 520 1948

Characteristics, Line-Type Lightning-Arrester Performance. (Committee Report).....982–3 1941

Characteristics of a Buried Bare Wire, Surge. Sunde..987–91; disc. 1180 1940

Characteristics of a 400-Mile 230-Kv Series - Capacitor - Compensated Transmission System. Hoard.... .....1102–14; disc. 1178 1946

Characteristics of a 120-Kv High-Pressure, Gas-Filled Cable Installation, Thermal. Sanderson, Sticher, McGrath.....487–99; disc. 499 1948

Characteristics of a Single-Phase Induction Motor, Dynamic. Kurtz.... .....801–06; disc. 1096 1940

Characteristics of Aircraft Generators on Load Analysis, Effects of Thermal. Rogers.....819–24 1946

Characteristics of Amplidyne Generators, The Design. Fisher..... .....939–44; disc. 1135 1940

Characteristics of Chlorinated Impregnants in D-C Paper Capacitors. Berberich, Fields, Marbury..... .....1173–9; disc. 1437 1944

Characteristics of Class A Insulation, Temperature Aging. Smith, Scott .....435–42; disc. 442 1939

Characteristics of Current Transformers During Faults, Transient:
Part I. Concordia, Weygandt, Shott .....280–6; disc. 469 1942
Part II. Concordia and Rothe..... .....731–4 1947

Characteristics of D-C Generators, The Short-Circuit. Frost..... .....394–402; disc. 484 1946

Characteristics of D-C Motors and Generators, Transient. McClinton, Brancato, Panoff.....1100–06 1949

Characteristics of D-C Welders With Reference to Electrode Freeing, Investigation of Arc Starting. Tyrner.....97–9; disc. 511 1946

Characteristics of Distribution Systems, Voltage-Recovery. Witzke..... .....172–80; disc. 180 1949

Characteristics of Driven Grounds, Impulse and 60-Cycle:
Part I. Bellaschi...123–8; disc. 717 1941
Part II. Bellaschi, Armington, and Snowden.....349–63; disc. 446 1942
Part III. Bellaschi & Armington... .....334–45; disc. 396 1943

Characteristics of Dry-Type Transformer Insulation at High Temperature, Aging. Stewart, Whitman .....1600–06; disc. 1607 1948

Characteristics of Electric-Power Systems, Transient Recovery-Voltage. St. Clair, Adams..666–9; disc. 1016 1942

Characteristics of Large Air Gaps, Dielectric-Recovery. McCann, Clark .....45–52; disc. 394 1943

Characteristics of Large A-C Stator Windings, Insulation Resistance and Dielectric-Absorption. Askey, Johnson.....347–51; disc. 458 1945

Characteristics of Lightning Currents Discharged by Arresters, Field Investigation of the. Gross, McCann, Beck.....266–71; disc. 461 1942

Characteristics of Lightning Protective Devices, Performance. (Committee Report).....1330–6 1949

Characteristics of Magnetic Amplifiers with Feedback, Analytical Determination of. Ver Planck, Finzi, Beaumariage.....565–70 1949

Characteristics of McNary Generators and Transformers with Bonneville Power Administration Transmission System, Matching Electrical. Hoard, Weiner..1022–5; disc. 1026 1949

Characteristics of Mica as Used in Conjunction With Class "B" Insulation, Temperature Limits and. Spry.....287–9 1939

Characteristics of Modern Dry-Type Air-Cooled Transformers, Design and Operating. Satterlee..... .....701–04; disc. 1445 1944

Characteristics of New Carrier-Current Equipment for Telemetering and Load Control. Beckwith..... .....1649–52; disc. 1652 1948

Characteristics of Oil-Insulated Transformers, Standards and Insulation. Vogel.....167–71; disc. 431 1945

Characteristics of Permanent-Magnet Movable-Coil Instrument Mechanisms, A Bridge Method for Determining the Motional. Gilbert.411–15 1948

Characteristics of Pulse Modulation, Distortion and Band-Width. Krauss, Ordung.....984–8 1947

Characteristics of Radio-Frequency Cables, Shielding. Fluharty..929–30 1945

Characteristics of Recording Instruments, Frequency Response. Graybeal.....755–66 1948

Characteristics of Resistance Welding Machines, Influence of Magnetic Materials on the Welding. Riley, Smith.....852–60; disc. 1160 1946

Characteristics of Resistance Welding Tools, Electrical. Callender. 393–404 1947

Characteristics of Resistance Welding Transformers. Murray, Jones.... .....726–8; disc. 1152 1946

Characteristics of Restricted Ionisation and Its Relation to Voids in Insulating Materials. Dawes, Humphries.....701–08; disc. 1071 1940

Characteristics of the Junction in a Simplified Selenium Rectifier Cell, Electrical. Angello.....175–80 1947

Characteristics of Two-Phase Servomotors, Operating. Koopman.... .....319–27; disc. 327 1949

Characteristics of Two-Winding Transformers, Surge. Rudenberg..... .....1136–44; disc. 1333 1941

Characteristics, Power-System Voltage-Recovery. Peterson..... .....405–11; disc. 411 1939

Characteristics, Rectifier Transformer. (Committee Report).....1305–11 1949

Characteristics, Station-Type Lightning-Arrester Performance. (Committee Report).....347–8 1940

Characteristics, Steady-State Stability of Synchronous Machines as Affected by Voltage-Regulator. Concordia.....215–20; disc. 489 1944

Characteristics, The Recovery-Voltage Analyzer for Determination of Circuit Recovery. Dunlap..... .....958–62; disc. 1391 1941

Characteristics, Three-Winding Transformer Ring-Bus. Bills, MacArthur .....848–9; disc. 1066 1942

Charge Due to Corona, The Space. Smith.....1137–44; disc. 1144 1948

Charged Dust in Rooms, Electrically. Penney, Hewitt.....278–82 1949

Charges by Moving Rubber-Tired Vehicles, Generation of Electric. Mackeown, Wouk..... .....207–10; disc. 428 1943

Charges, Induction Heating of Long Cylindrical. Storm.....369–77 1946

Charging, All-Electric Gun. Rohn.... .....1–4; disc. 1946

Charging Current at High Voltage, The Interruption of. Leeds, Van Sickle .....373–80; disc. 381 1947

Charging Currents on Transmission Lines as Affecting Ground-Fault Neutralizers, Report on Survey of Unbalanced. (Committee Report) .....1328; disc. 1329 1949

Chart Methods Applied to Frequency Response Curves, Control. Mundel.....424–7 1949

Charts, Current-Transformer Output and Application, Koller..... .....573–7; disc. 1422 1944

Charts, Diesel-Electric Switching-Locomotive Application by Means of Nomographic. Millan, Perkinson 45–7 1944

Chemical Contamination as Causes of Electrical-Insulation Failure. Braithwaite, Moses.....580–3; disc. 945 1945
(Chemical) Electrification of Petroleum Pipe Lines. Hyde.....968–74; disc. 974 1948
(Chemical) Oil Production by Electric Power. Taylor..977–86; disc. 986 1948
Chemical Rate Phenomenon, Electrical Insulation Deterioration Treated as a. Dakin.....113–18; disc. 118 1948
(Chemical) Twenty-Five Years of Copper—Copper Oxide Rectifiers. Grondahl.....403–10 1948
Chesapeake and Ohio Railway Company Steam Turbine-Electric Locomotives, Electric Equipment for. Atwell, Baston.....145–8 1949
Chevilly (France), Especially on Corona Behavior of Bundle Conductors, Results of Tests Carried Out at the 500-Kv Experimntal Station of. Cahen.....1118–25; disc. 1125 1948
Cheyenne Wells, Colo., Rural Radiotelephone Experiment at. Moore, Seyler, Wright.....525–8 1947
Chicago Plant's Electric-Power-Distribution Scheme With Airplane-Engine-Testing Power Recovery, Dodge. Bailey...121–3; disc. 484 1945
Chicago Subway, Electric Facilities and Operating Plan for the First. DeLeuw.....780–7; disc. 980 1942
Chicago Subway, Supervisory Control for New. Derr, Buck, Stoos.....10–16; disc. 457 1945
Chicago Transit Authority, Three-Compartment Articulated Cars for Test on Rapid Transit Division. Otis..416–18 1948
Chicago 12-Kv System, Surges on. Wollaston, Plumley.....260–5; disc. 694 1941
Chippers, The Application of Synchronous and Induction Motors to. Baker, Lory.....1070–7 1947
Chlorinated Impregnants in D-C Paper Capacitors, Characteristics of. Berberich, Fields, Marbury.....1173–9; disc. 1437 1944
Chopped Waves on Transformers, A Study of the Relative Severity of Steep Front Waves and. Vogel...64–6; disc. 66 1947
Chorded or Doubly Shifted Fractional-Slot Lap and Wave Windings, Doubly. Liwschitz.....684–6 1948
Circle Diagram for a Four-Terminal Network and Its Application to the Capacitor Single-Phase Motor, A Generalized. Tarboux.....881–9; disc. 943 1945
Circle Diagram of the Polyphase Brush-Shifting Commutator Motor (Schrage Type), The. Franklin..1667–72; disc. 1672 1947
Circuit, An Unstable Nonlinear. Summers.....273–6 1940
Circuit Analysis, Rectifier Terminology and. Willis, Herskind.....496–9; disc. 974 1942
Circuit Bandwidths, The Distinction Between Effective and. Kessler..98–9 1949
Circuit Breaker, A Fast. Bohn, Jensen.....165–8; disc. 405 1942
Circuit Breaker, A High-Capacity High-Voltage Three-Cycle Oil. Byrd, Rietz.....160–3; disc. 463 1945
Circuit Breaker, A New 69-Kv Compressed-Air. Baker, Frisch.....363–8; disc. 369 1949
Circuit Breaker, A 208Y/120-Volt 120-Ampere Three-Pole 400-Cycle Electrically Operated Aircraft. Titus, Reifschneider.....551–5 1945
Circuit Breaker and Its Application on a 132-Kv Power System, A Vertical-Flow Compressed-Air. Langstaff, Baker.....188–92; disc. 436 1943
Circuit-Breaker and Metal-Clad Switchgear Unit, A New 50,000-Kva 5-Kv Oilless. Dickinson, Hayford.....302–06; disc. 434 1943
Circuit-Breaker Current Measurements During Reignitions and Recovery. Lewis.....1253–7; disc. 1257 1947
Circuit-Breaker Design and Performance Criteria, Anode-. Boehne, Atwood.....337–45; disc. 437 1945
Circuit Breaker, Field Tests and Performance of a High-Speed 138-Kv Air-Blast. Sporn, Strang.....1–6; disc. 412 1942
Circuit Breaker for Central-Station Service, High-Capacity "Hydro-Blast." Skeats, Saylor.....111–14; disc. 114 1940
Circuit Breaker for Central-Station Service, High-Power "De-ion" Air. Dickinson.....421–5; disc. 425 1939
Circuit Breaker for Extra-Heavy Arc Rupturing Duty, A 230-Kv 3-Cycle Oil. Leeds, Cushing.....236–42; disc. 242 1948
Circuit Breaker for 15,000-Volt Services, A Magnetic-Type Air. Linde, Wyman.....140–4; disc. 453 1944
Circuit Breaker for 5,000-Volt Service, "Magne-Blast" Air. Boehne, Linde.....202–08; disc. 208 1940
Circuit Breaker for High-Voltage Service, A Conserved-Pressure Air-Blast. Rankin, Bennett.....193–7; disc. 673 1941
Circuit Breaker for Mercury-Arc-Rectifier Anode Circuits and Its Relation to the Arc-Back Problem, A New Multiple High-Speed Air. Seaman, Morton...788–96; disc. 1057 1942
Circuit Breaker for 138,000-Volt Service, A Three-Cycle 3,500-Megavolt-Ampere Air-Blast. Byrd, Beall.....229–32; disc. 463 1945
Circuit Breaker for Steel-Mill Service, A 500,000-Kva 7.5-Kv Air. Dickinson.....242–5; disc. 450 1944
Circuit Breaker for 23-Kv Arc Furnace Duty, A Compressed Air. Wilcox, Baker.....154–8 1948
Circuit Breaker, Improved Design of Low-Voltage Panel-Mounted. Sperow, Favre.....695–8; disc. 698 1948
Circuit-Breaker Installations in Canada, Some Air-Blast. Haberl, Moore.....859–63; disc. 1073 1942
Circuit Breaker Modernisation and Faster Fault Clearing on Single-Phase Electrified Railroad. Brown, Travers, Wood..705–13; disc. 713 1948
Circuit Breaker, Performance Test of the Allgemeine Elektricitats Gesellschaft Free-Jet Air-Blast 220-Kv 2,500-Megavolt-Ampere Reclosing. Dovjikov, Diemond.....295–304; disc. 304 1948
Circuit-Breaker Performance, Transient Recovery Voltages and. Van Sickle.....804–13; disc. 1014 1942
Circuit-Breaker Performance When Switching Large Capacitor Banks, Tests and Analysis of. Schroeder, Boehne, Butler..821–31; disc. 1020 1942
Circuit Breaker Practice in the United States, A Brief Review of Switchgear. Hobbs....893–7; disc. 897 1948
Circuit-Breaker Ratings, Power-. Van Sickle.....882–4; disc. 1353 1941
Circuit-Breaker Testing Station, High-Capacity. MacNeill, Batten.....49–53; disc. 406 1942
Circuit Breaker, Tests of 230-Kv High-Speed Reclosing Oil. Schwager...784–8; disc. 1468 1944
Circuit Breaker, The Cross-Air-Blast. Prince, Henley, Rankin.....510–17; disc. 1121 1940
Circuit Breaker With 250,000-Kva Interrupting Capacity, A New Air. Dickinson, Nau.197–201; disc. 671 1941
Circuit Breakers, A Compressed-Air Operating Mechanism for Oil. Cunningham, Hill.....695–8; disc. 1019 1942
Circuit Breakers, A Manually-Operated Spring Mechanism for Medium Voltage Oilless. Wyman, Casey..357–61; disc. 361 1949
Circuit Breakers, A Multiorifice Interrupter for High-Voltage Oil. Ludwig, Leeds.....119–25; disc. 437 1943
Circuit Breakers, A New Line of High-Voltage Outdoor Tank-Type Oil. Skeats, Rietz....224–31; disc. 502 1946
Circuit Breakers, A Pneumatic Mechanism for Outdoor Oil. Linde, Rietz.....543–6; disc. 1428 1944
Circuit Breakers, Aircraft. Kuhn.....642–5; disc. 1943
Circuit Breakers, A-C Tripping and Reclosing of Line Sectionalising. Winegartner, Bonheimer...1357–9 1949
Circuit Breakers, An Improved Overcurrent Tripping Device for Low-Voltage. Rawlins, Sandin.....1149–53; disc. 1153 1947
Circuit Breakers and Switchgear, Interim Report on Application and Operation of. (Committee Report).....481–3 1943
Circuit Breakers and Transformers, Oil-Impregnated-Paper High-Voltage Condenser Bushings for. Lingal, Cole, Watts.....269–75; disc. 439 1943
Circuit Breakers, Application Ratings of Indoor Power. Vikoren.....768–73; disc. 1168 1946
Circuit Breakers, Design and Construction of High-Capacity Air-Blast. Strang, Boisseau..522–7; disc. 1131 1940
Circuit Breakers, Design and Operation of High-Voltage Axial Air-Blast. Leuthold.....869–75; disc. 1073 1942
Circuit Breakers, Dielectric Strength of Oil for High-Voltage Testing of Oil. Lingal, Skeats, Braley.....903–06 1941
Circuit Breakers, Field Tests of Interrupting Capacity of 138-Kv Oil. Buchanan, Floyd.....199–204; disc. 503 1946
Circuit Breakers, Field Tests on High-Capacity Air-Blast Station-Type. Strang, Skeats...100–04; disc. 409 1942
Circuit Breakers, Field Tests on High-Capacity Station. Braley.....31–6; disc. 408 1942
Circuit Breakers for 400-Cycle Aircraft Electric-Power System, Pressure-Arc-Interruption. Austin.....58–60; disc. 487 1946
Circuit Breakers for Grand Coulee Power Plant, Field Tests for Development of 10,000,000-Kva, 230-Kv Oil. Killgore, Clagett.....271–83; disc. 283 1948
Circuit Breakers for Metal-Clad Switchgear, Medium-Capacity Air-Blast. Bennett, Wyman.....383–8; disc. 627 1941
Circuit Breakers for Rapid Reclosing Duty, High-Voltage Oil. Hill, Leeds.....113–18; disc. 452 1944
Circuit Breakers, Improved Selective Tripping of Low-Voltage Air. West.....608–10; disc. 1431 1944
Circuit Breakers in A-C Railway Service, Compressed-Air. Wilcox, Harker.....141–5; disc. 419 1945
Circuit Breakers, Insulator Flashover Deionization Times as a Factor in Applying High-Speed Reclosing. Boisseau, Wyman, Skeats.....1058–66; disc. 1066 1949
Circuit Breakers, Large Indoor Power Air-Blast. Jansson.....1675–8; disc. 1679 1948
Circuit Breakers, Mechanical Simplicity of Air-Blast. Haberl, Jensen.....869–74; disc. 1355 1941

Circuit Breakers, Modern Trends of Low-Voltage Air. Seaman.....24–29; disc. 29 1940

Circuit Breakers—Oil and Air-Blast, Field Tests and Performance of Heavy-Duty High-Speed 138-Kv. Sporn, St. Clair.....401–10; disc. 463 1945

Circuit Breakers on Field Tests, Unusual Performance of Standard 230-Kv Impulse and Tank-Type Oil. Riets.....267–70; disc. 270 1948

Circuit Breakers, Protection of Large D-C Machines by Means of High-Speed. Housley, Jensen.....637–40; disc. 1428 1944

Circuit Breakers, Selective Tripping of Low-Voltage Air. Deans.....971–6; disc. 976 1947

Circuit Breakers, Switching Overvoltage Hazard Eliminated in High-Voltage Oil. Hunt, Boehne, Peterson.....98–100; disc. 418 1943

Circuit Breakers, The Degree of Short-Circuit Protection Afforded Small Low-Voltage A-C and D-C Starters by Means of Fuses and. Jones...611–12; disc. 1408 1944

Circuit Breakers, The Development, Design, and Performance of Magnetic-Type Power. Linde, Wyman.386–93; disc. 510 1946

Circuit Breakers, The Vertical-Flow Interrupter and Its Application to "Oil-Poor." Baker.....440–5; disc. 635 1941

Circuit Breakers up to 500,000 Kva, 15 Kv, Size Reduction and Rating Extension of Magnetic Air. Dickinson, Frink.....220–3; disc. 510 1946

Circuit Burning-Clear and Damage Phenomena on Aircraft Structures, Electric-. Foust, Hutton.....198–204; disc. 457 1944

Circuit Calculations, Ignitor Characteristic and. Marshall...1519–24 1947

Circuit Characteristics of D-C Generators, The Short-. Frost.....394–402; disc. 484 1946

Circuit Conditions, Heating of Transformers Under Short-. Montsinger, Halsey.....947–52; disc. 952 1949

Circuit Constant-Current Regulators, Resonant-. Kevern.....807–10; disc. 992 1945

Circuit Currents and Recovery Voltages on Rural Distribution Systems, Short-. Eason, Johnson, Kalb, Peterson.....930–7; disc. 937 1949

Circuit Cushioning of Gas-Filled Grid-Controlled Rectifiers. Edwards, Smith.....640–3; disc. 1131 1946

Circuit Duty, Rectifier-. Herskind.....123–8 1944

Circuit Element, Ferroinductance as a Variable Electric-. Ryder.....671–8; disc. 962 1945

Circuit Elements, Cold-Cathode Gas-Filled Tubes as. Ingram...342–7 1939

Circuit Fault-Protective Principles as Applied to D-C Aircraft Systems, Electric-. Kaufmann.....333–44; disc. 482 1944

Circuit Feed Regulator, A New Grinding. Jones.....1240–2 1947

Circuit for a Five-Winding Transformer, A Useful Equivalent. Aicher.....66–70; disc. 385 1943

Circuit for Aircraft Reverse-Current Cutout, Proposed. Marzolf.....1246–8 1948

Circuit for Resistance Welders, An Electronic Control. Gray, Breyer.361–4; disc. 364 1939

Circuit for Theater Lighting, A Thyratron. Wischmeyer.....1067–72 1941

Circuit Forces Between Conductors of Structural Shape, Formulas for Calculating Short-. Higgins.....659–63 1943

Circuit, Generalized Solution for the Critical Conditions of the Ferroresonant Parallel. Thomson.....743–6; disc. 746 1939

Circuit Impedance of Regulating Transformers, Equivalent. Clem.....871–3; disc. 873 1939

Circuit in the Theory of Polyphase Commutator Motors, A Generalized Equivalent. Coulthard.....423–31 1941

Circuit Instruments for the Higher Range of Audio Frequencies, Power. Lunas, MacGahan.1230–5 1941

Circuit Interrupter, A New 15-Kv Pneumatic. Ludwig, Rawlins, Baker.....528–33; disc. 1123 1940

Circuit Interrupter Using Water, A High-Power Oilless. Leeds.....85–8; disc. 625 1941

Circuit Interrupters, Dielectric Strength of Water in Relation to Use in. Slepian, Denault, Strom.....389–95; disc. 631 1941

Circuit-Interrupting Devices—1928–1940, Bibliography on. (Committee Report).....1077–1100 1942

Circuit Interruption by Air Blast. Edsall, Stubbs..503–09; disc. 1129 1940

Circuit of a Variable-Ratio Frequency Changer, Tensorial Analysis and Equivalent. Kron.....1503–06 1947

Circuit of D-C Motors and Generators, Solid Short. Linville, Ward.....119–23; disc. 123 1949

Circuit of the Capacitor Motor, The Equivalent. Chang.....631–40 1947

Circuit of the Induction Motor, Leakage Reactance of the Squirrel Cage Rotor With Respect to the Stator Harmonics and the Equivalent. Liwschitz.....1407–08 1947

Circuit of the Primitive Rotating Machine With Asymmetrical Stator and Rotor, Equivalent. Kron.....17–23; disc. 23 1947

Circuit, Open-Delta Transformer Banks—Analysis of. Clem.....292–7; disc. 374 1943

Circuit Performance, Capacitors and. Butler.....408–15; disc. 646 1941

Circuit, Polyethylene Insulated Coaxial Cable for Carrier Current Control. Slade, West.....1416–18; disc. 1419 1948

Circuit Recloser, An Improved Automatic. Wallace..255–8; disc. 259 1947

Circuit Recloser Substantiate Analytical Co-ordination Method, Field Tests of Oil. Auer, Branflick, Woodward, McKinley.801–08; disc. 808 1949

Circuit Reclosers on REA Systems, Experience With Oil. Moore, Watkins.....531–5; disc. 934 1943

Circuit Recovery Characteristics, The Recovery-Voltage Analyzer for Determination of. Dunlap.....958–62; disc. 1391 1941

Circuit, Relation Between Electrical and Mechanical Parameters of a Permanent-Magnet Movable-Coil Instrument Having a General Circuit. Goodwin.....374–9 1948

Circuit, Some Aspects of Polyphase Motor Design—The Design and Properties of the Magnetic. Lloyd, Stone.....812–18; disc. 1151 1946

Circuit, The Effect of Initial Conditions on Subharmonic Currents in a Nonlinear Series. Angello..625–7 1942

Circuit to Another Through Transformers, Lightning Surges Transferred From One. Bellaschi.....731–8; disc. 1002 1943

Circuit Transient Recovery Voltages, Practical Calculation of. Adams, Skeats, Van Sickle, Sillers.....771–9; disc. 1017 1942

Circuit, Two-Phase Co-ordinates of a Three-Phase. Kimbark.....894–904; disc. 904 1939

Circuits, A Graphical Analysis of the Voltage and Current Wave Forms of Controlled Rectifier. Chin, Moyer.....501–08 1944

Circuits, A New Electronic Timing Relay for Reducing Outages on Power. Dlouhy.....407–11 1946

(Circuits) A New Method for Introducing Relaxed Initial Conditions in Transient Problems. Johnson.....178–81 1941

Circuits, A Study of Voltage Transients in Arc-Furnace. Hodtum, Rice...556–62; disc. 921 1943

Circuits, Analysis of High-Frequency Ignition. Robinson.....916–19 1944

Circuits, Analysis of Rectifier. Christensen, Willis, Herskind...1048–58 1944

Circuits and Its Effect Upon Relays, Induced Current in Parallel. Bancker.....582–5; disc. 585 1939

Circuits and Misfire Indication Circuits, Ignitor Excitation. Mittag, Schmidt.....575–7; disc. 1061 1942

Circuits and the Magnetic Compass, Electric. Burt, Beck.....24–6 1944

Circuits, Application of Compandors to Telephone. Carter, Dickieson, Mitchell.....1079–86 1946

Circuits, Application of 720-Cycle Carrier to Power Distribution. Woodworth.....903–15; disc. 1003 1943

Circuits, Arcing Fault Currents in Low-Voltage A-C. Wagner, Fountain..166–72; disc. 172 1948

Circuits—Artificial Arc-Back Tests, Arc-Backs in Rectifier. Evans, Maslin.....303–11; disc. 439 1945

Circuits as Used in the Study of Transient Heat Flow, The Accuracy of Measurements in Lumped R-C Cable. Paschkis, Heisler.....165–71; disc. 426 1944

Circuits by Air Circuit Breakers in Cascade Arrangement, Protection of Low-Voltage. Anderson, Black.1151–60; disc. 1356 1941

Circuits, Capacitors and Automatic Boosters for Economical Correction of Voltage on Distribution. Olmsted.....491–6; disc. 496 1939

Circuits, Contact Phenomena in Telephone Switching. Curtis.....360–8; disc. 368 1940

Circuits Containing Iron-Cored Inductors, Subharmonics in. Part II. Travis.....735–42 1939
(Part I—1938)

Circuits, Criteria for Neutral Stability of Wye-Grounded-Primary Broken-Delta - Secondary Transformer. Shott, Peterson.....997–1002; disc. 1394 1941

Circuits During Faults to Ground, Performance of Ground-Relayed Distribution. Gilkeson, Jeanne, Davenport.....40–8; disc. 424 1942

Circuits, Electrical Measurements on Aircraft-Engine Ignition. Berkey..49–53 1946

Circuits, Engineering Requirements for Program Transmission. Cowan, McCurdy, Lattimer.....142–7 1941

Circuits, Fault Voltage Drop and Impedance at Short-Circuit Currents in Low-Voltage. Schurig.....479–87; disc. 654 1941

Circuits for Ignitron Rectifiers, Excitation. Myers, Cox.943–8; disc. 1358 1941

Circuits for Low-Frequency Induction, Co-ordination of Power and Communication. Coleman, Trueblood.403–12; disc. 412 1940

Circuits for Oscillating Systems and the Riemann - Christoffel Curvature Tensor, Equivalent. Kron.....25–32; disc. 372 1943

Circuits for Power-Flow Studies, Equivalent. Ward.....373–80; disc. 380 1949

Circuits for Protective Relaying—Experience and Practice, Pilot-Wire (Committee Report).....210–14; disc. 380 1943

Circuits for Protective Relays, Novel Test. Sonnemann.....1249–54 1949

Circuits for the Hunting of Electrical Machinery, Equivalent. Kron.....290–6; disc. 456 1942

Circuits, Grounding of Instrument Transformer Secondary. (Committee Report).....419–20 1947

Circuits, Impulse Strength of Insulated-Power-Cable. Halperin, Shanklin.....1190–7; disc. 1386 1944

Circuits in Philadelphia, 69-Kv Pipe-Type Cable. Kidder, Van Antwerp.....550–6; disc. 556 1949

Circuits in Servomechanisms, Parallel. Marcy.....521–9; disc. 1128 1946

Circuits in Synchronous-Machine Armatures, Short. Galbraith.....1024–9 1941

Circuits in Telephone Switching, Relay Preference Lockout. Joel.....1720–5; disc. 1725 1948

Circuits, Inductive Co-ordination With Series Sodium Highway Lighting. Kent, Blye.....325–32; disc. 332 1939

Circuits, Insulation Level of Relay and Control. (Committee Report).....1255–7 1949

Circuits, Linear Transformations in Three-Phase. Pipes.....351–6; disc. 619 1941

Circuits—Metallic and Carrier, Telemetering. Bostwick.....1081–6; disc. 1086 1948

Circuits, Negative Resistance Effects in Saturable Reactor. Manley, Peterson.....870–81 1946

Circuits of a Supersonic Reflectoscope, Electronic. DeLano.....128–37 1948

Circuits of Grid-Controlled Rectifiers and Inverters, Harmonics in the A-C. Evans, Muller.....861–8; disc. 869 1939

Circuits of Single-Phase Induction Motors, Design of Auxiliary. Thacker, Gopalakrishna.....1373–9 1949

Circuits of Synchronous and Induction Machines, Steady-State Equivalent. Kron.....175–81 1948

Circuits of the Synchronous Machine, The Direct- and Quadrature-Axis Equivalent. Rankin.....861–8 1945

Circuits of Transformers and Reactors to Switching Surges, Equivalent. Bewley.....797–802 1939

Circuits on Large Aircraft and Its Application to Fault-Current Calculations, Impedance of 400-Cycle Three-Phase Power. Chappuis, Olmsted.....1213–20; disc. 1496 1944

Circuits on Power Supplies of 600 Volts and Less, Thermal Co-ordination of Motors, Control, and Their Branch. Jones.....483–7; disc. 975 1942

Circuits on Self-Propelled Vehicles, Grounding of. Ewing.....48–50; disc. 417 1945

Circuits, Overvoltage Protection of Current-Transformer Secondary Windings and Associated. Kaufmann, Camilli...467–72; disc. 919 1943

Circuits, Protection of Pilot-Wire. Harder, Bostwick.....645–52; disc. 996 1942

Circuits, Relative Expense for Service Restoration With Different Types of Overcurrent Protection for Distribution. Lincks, Craig.....813–21; disc. 980 1942

Circuits, Relative Value of Different Types of Overcurrent Protection for Distribution. Lincks.....19–26; disc. 426 1942

Circuits, Relay "Trees" and Symmetric. Washburn.....582–6 1949

Circuits, Sectionalizing and Internal Transformer Fusing on Rural Power. Watkins.....383–8; disc. 388 1947

Circuits, Sensitive Ground Relay Protection for Complex Distribution. Hunt.....765–8; disc. 1180 1946

Circuits, Sequential Aspects of Relay. Ritchie.....577–81 1949

Circuits, Series Capacitors for Transmission. Starr, Evans.....963–73; disc. 1044 1942

Circuits, Similitude of Critical Conditions in Ferroresonant. Thomson.....127–30; disc. 130 1939

Circuits, Symmetrical Nomenclature of Three-Phase. Brady.....955–7; disc. 1402 1941

Circuits, The Logic of Relay. Keister.....571–6 1949

Circuits, The Vector Power Factor of Unbalanced Sinusoidal 3-Phase. Lamb, Brandt.....507–09 1949

Circuits, Transient Response of Controlled Rectifier. Chin, Walter.....208–14 1945

Circuits, Vario-Losser. Bennett, Doba.....17–22 1941

Circuits, Voltage Stresses in Distribution Transformers Due to Lightning Currents in Low-Voltage. Beardsley, McMorris, Stewart.....1632–5; disc. 1635 1948

Circuits, Voltage Surges in Relay Control. Halman, Harris.....1693–9; disc. 1699 1948

Circuits, Voltage Transients in Arc-Furnace. (Committee Report).....563–8; disc. 1435 1944

Circuits With Capacitance Filters, Diode Rectifying. Waidelich.....1161–7; disc. 1388 1941

Circuits With Particular Reference to Multi-grounded Neutrals, Calculation of Unbalanced Voltage Drops in Distribution. Bullard, Lowe, Wahlquist.....145–8 1944

Circular Filaments and Solenoids, Formulas and Tables for the Calculation of the Magnetic Field Components of. Grover.....665–75 1949

Circulating System, Dielectric Strength of Insulating Liquids in a Continuously. Race.....730–7 1940

Circulation of Cooling Medium, Cooling Power Transformers by Forced. Paluev, Burnham.....215–21; disc. 445 1943

City Transit System, Modern Motors Serve. Clardy, Atwell.....850–4 1941

City Transportation, Trolley Coaches and PCC Street Cars Provide Successful. Clardy.....925–9 1947

Civil Aeronautics Authority Instrument Landing System at Indianapolis, The Development of the. Jackson, Alford, Byrne, Fischer.....849–58; disc. 1120 1940

Clamps for Aluminum Conductors, Joints and. Tebo.....1145–50; disc. 1150 1948

Clamps, Magnetic Heating of Transmission Line. Crabb, Sheadel.....1032–5 1949

Class A Insulation, Preliminary Report on Laboratory Aging Tests on. (Committee Report).....879–81; disc. 881 1947

Class A Operation, The Dynamoelectric Amplifier—. Saunders...1368–73 1949

Class B Insulation to Auxiliary-Type D-C Motors in Severe Duty Service, The Application of. Compton.....828–34; disc. 1098 1940

Class-H Insulation and Silicone Varnish, Motor Tests Evaluate Thermal Endurance of. Grant, Kauppi, Moses, Gibson.....1133–8 1949

Classification and Co-ordination of Short-Time and Intermittent Ratings and Applications. Hellmund.....792–8; disc. 1323 1941

(Clocks) New Time Standard, A. Warren.....137–41; disc. 141 1940

Closing of Bus-Tie Switches, Improving Stability by Rapid. Kimbark.....61–4; disc. 456 1945

Clothing, Electrically Heated. Wotring.....1304–13 1944

Clutch and Its Associated Brake Used on Aircraft Electric Motors, One Type of Rotary Magnetic. Andrews, Shanely.....893–5; disc. 1477 1944

Clutch, The Magnetic Fluid. Rabinow.....1308–15 1948

Coach Distribution System, Trolley. McDonald.....393–402; disc. 402 1948

Coaches Replace Busses, Trolley. McMillon.....403–06 1949

Coal Mines, Causes and Effects of Stray Electric Currents in. Harrison.....1759–61 1948

Coal-Mining Industry, Mercury-Arc Rectifiers in the. Renshaw.....242–4; disc. 244 1940

Coal, Residual Oil, Diesel Oil, and Electricity as Energy Sources for Motive Power Operation in the Pacific Northwest, The Present Competitive Position of. Martin.....1664–9 1948

Coaxial Busses Comprised of Square Tubular Conductors, Formulas for the Inductance of. Messinger, Higgins.....328–36; disc. 501 1946

Coaxial Busses Comprised of Square Tubular Conductors, Proximity Effect Factors for 3-Phase. Higgins, Messinger.....1538–9 1948

Coaxial Cable for Carrier Current Control Circuit, Polyethylene Insulated. Slade, West.....1416–18; disc. 1419 1948

Coaxial Cable for Carrier Current Installation on Power Lines, Line Tuning Equipment Used With. Sutton.....44–8; disc. 48 1949

Coaxial Cable Network, Frequency Division Techniques for a. Crane, Dixon, Huber.....1451–9 1947

Coaxial Cable Stations, B-1 Alarm and Control System for Remote Control of. Hearn, Weber.....622–6 1949

Coaxial-Line Calculations, High-Frequency. Race, Larrick....526–30 1942

Coaxial Lines, Attentuation and Delay Equalizers for. Lundry....1174–9 1949

Coaxial Lines, Equalization of. Gould.....1187–92 1949

Coaxial Radio-Frequency Cable, The S-Function Method of Measuring Attenuation of. Stewart.....616–19, 938–9; disc. 966 1945

Coaxial Systems, Power Supplies for. Spencer.....627–30 1949

Coaxial Systems, Television Terminals for. Morrison.....1193–9 1949

Coaxial Telephone and Television Systems, Progress in. Abraham.1520–7 1948

Cockpit Lighting, The Scientific Basis for the New British System of. Calvert.....869–70 1944

Code for Electric Brushes, Progress Report on AIEE Test. (Committee Report).....1126–8 1949

Code Modulation, Pulse. Black, Edson.....895–9 1947

Code Selector Supervisory System, Space. Forrest, Schirmer.....1312–15; disc. 1315 1949

Codes and Translations. Myers..592–7 1949

Coefficient Harmonic Analyser, A New Fourier. Charp..644–9; disc. 649 1949

Coefficients, A Short Method for Evaluating Determinants and Solving Systems of Linear Equations With Real or Complex. Crout.....1235–41 1941

Coil Calculations for Single-Phase Magnets, Shading. Evans.....134–7; disc. 137 1947

Coil Control for A-C Locomotives With Particular Reference to Resistor Transition, Improvements in Preventive-. Hatch, Ogden...727–32 1942

Coil Fluxmeter, General Theory and Experimental Confirmation of the Moving. Higgins, Robertson.....897–907; disc. 907 1949

Coil, Formulas for the Magnetic-Field Strength Near a Cylindrical. Dwight.....327–33; dis. 445 1942

Coil Instrument Having a General Circuit, Relation Between Electrical and Mechanical Parameters of a Permanent-Magnet Movable. Goodwin.....374–9 1948

Coil Instrument Mechanisms, A Bridge Method for Determining the Motional Characteristics of Permanent-Magnet Movable. Gilbert.....411–15 1948

Coil Power-Factor Meters, Crossed-. Millar.....294–301; disc. 460 1944

Coil Surfaces, Accuracy of Temperature Measurements on. Beede, Cain..586–90; disc. 590 1947

Coil System, Factors Affecting Arc Extinction on a Petersen-Coil. Eaton.....576–80; disc. 581 1939

Coil Windings, Fractional-Slot and Dead-. Malti, Herzog.....782–94; disc. 1079 1940

Coil Without Iron, The Self-Inductance of a Toroidal. Dwight.....805–06; disc. 999 1945

Coils and Windings, Methods of Determining Natural Frequencies in. Bewley, Hagenguth, Jackson.....1145–50; disc. 1361 1941

Coils and Windings, Performance of Traveling Waves in. Rudenberg.....1031–40; disc. 1257 1940

Coils, Compressed Powdered Molybdenum Permalloy for High-Quality Inductance. Legg, Given.....865–72; disc. 1131 1940

Coils, Data on the High-Frequency Resistance of Coils. Witzig...764–9 1947

Coils, Eddy-Current Resistance of Multilayer. Long.....712–18 1945

Coils for Airplane-Engine Ignition Systems, Battery Booster. Alvino.....672–3; disc. 1381 1944

Coils for Cylindrical Magnetic Loads, Design of Induction Heating. Vaughan, Williamson.....887–92; disc. 1165 1946

Coils for Cylindrical Nonmagnetic Loads, Design of Induction-Heating. Vaughan, Williamson.....587–92; disc. 965 1945

Coils, Insulation Temperature Standards for Industrial-Control. Erikson.....546–8; disc. 1408 1944

Coils of Small Cross Section, The Computation of Magnetic Field Strength of Round. Dwight, Peters.....684–5 1944

Coils on Shipboard Magnetic Compasses by Use of Compass-Compensating Coils, Compensation of Effects of Degaussing. Robinson.....1278–81 1948

Coils on 66-Kv System of Metropolitan Edison Company, Operating Experience With Petersen. Rankin, Neidig.....568–73; disc. 573 1939

Coils, Silicone-Resin-Treated Magnet. Moses, Torok..412–16; disc. 1184 1946

Coils Subject to Superposed Direct Current, Optimum Air Gap for Various Magnetic Materials in Cores of. Legg.....709–12; disc. 969 1945

Coils, The Electrostatic Unbalance of Transmission Lines and its Effect on the Application of Petersen Coils. Lynn...107–12; disc. 112 1939

Coincidence-Factor Relationships of Electric-Service-Load Characteristics. Bary.....623–9 1945

Cold-Cathode Gas-Filled Tubes as Circuit Elements. Ingram.....342–7 1939

Cold-Cathode Tubes, Current Rating and Life of. Rockwood.....901–03; disc. 1390 1941

Cold-Rolled Strip Steel, X-Ray Thickness Gauge for. Lundahl...83–90 1948

Cold Strip Reduction Mills, Electric Equipment. Miller.....133–9; disc. 139 1948

Collectors for High-Speed Service, Developments in Current. Langer.....51–4 1947

Colleges of Engineering, Evening Courses at Graduate Levels—a Challenge to. Beach.....88–94; disc. 430 1942

Color, Light, and Structure at Golden Gate Exposition (a 16-page insert) facing page 746..... 1940

Colorado, Lightning Investigation at High Altitudes in. Robertson, Lewis, Foust....201–08; disc. 453 1942

Colorado River Aqueduct, The Pumping System of the. Gaylord.....112–23; disc. 123 1939

Colorado Rockies, Pumping for Power in the. Wilson.....1127–36 1948

Colo., Rural Radiotelephone Experiment at Cheyenne Wells. Moore, Seyler, Wright.....525–8 1947

Columbia Gas and Electric Corporation, Increased Capacity and Interconnections of the. DeForest..451–8 1941

Combination of Probability Curves in Engineering, The. Wilkinson.....953–63 1942

Combination of Supervisory Control With Other Functions on Power-Line Carrier Channels, The. Cheek, Derr.....241–6 1945

Combinations, Relative Accuracy of Three-Phase Metering. Weller...925–9; disc. 1336 1941

Combined Light and Power Systems for Industrial Plants. Beeman.76–83 1946

Commercial-Airline Aircraft, Lighting Required for. Petrasek.....593–8; disc. 1456 1944

Commercial Power Frequencies, An Improved Frequency Meter for. Knudsen.....866–9; disc. 1334 1941

(Commercial) The Heat Pump From the Utility's Point of View. Andrews.....562–4 1948

Committee Reports, AIEE:

Bibliography of Relay Literature:
1940–1943.....705–09 1944
1944–1946.....24–27 1948

Bibliography on Automatic Stations—1930–1941.....1111–32 1942

Bilbiography on Circuit-Interrupting Devices, 1928–1940.....1077–1100 1942

Bibliography on Electrical Safety—1930–1941.....1101–10 1942

Bus Protection....206–11; disc. 211 1939

Correlation of System Overvoltages and System-Grounding Impedance.....17–24; disc. 383 1943

Coupling Capacitors and Traps for Rural Line Carrier.....1426–8 1948

Current- and Potential-Transformer Standardization.....698–706; disc. 998 1942

Distribution-Type Lightning Arrester Performance Characteristics...132 1942

Expulsion-Type Lightning Arresters' Impulse Spark-Over Volt-Time Characteristics.....520 1948

Grounding of Instrument Transformer Secondary Circuits..419–20 1947

Guide for Wartime Conductor Temperatures for Power Cables in Service.....606–10; disc. 942 1943

Guides for Operation of Transformers, Regulators, and Reactors.....797–806; disc. 957 1945

High-Speed-Relaying Experience and Practice.....588–91; disc. 591 1939

Inductive Co-ordination Aspects of Rectifier Installations.....417–36; disc. 1115 1946

Insulation Level of Relay and Control Circuits.....1255–7 1949

Interim Report on Application and Operation of Automatic Reclosing Equipment on Stub Feeders.....536–40; disc. 934 1943

Interim Report on Application and Operation of Circuit Breakers and Switchgear.....481–83 1943

Interim Report on Application and Operation of Out-of-Step Protection.....567–73 1943

Interim Report on Characteristics and Performance of Conductors for Supervisory Control and Telemetering.....854–62 1943

Interim Report on Emergency Overloads on Overhead Conductors.....588–90; disc. 940 1943

Interim Report on Guides for Overloading Transformers and Voltage Regulators.....692–4; disc. 1063 1942

Interim Report on Overloading Current-Limiting Reactors.....611–12; disc. 968 1943

Interim Report on Overloading Distribution Transformers.....516–17; disc. 968 1943

Lightning Performance of 110- to 165-Kv Transmission Lines.....294–304; disc. 304 1939

Lightning Performance of 220-Kv Transmission Lines. Part II.....70–6; disc. 499 1946
(Part I—1934)

Low-Current-Secondary Current Transformers.....649–50 1946

Mercury-Arc Power Converters in North America.....1031–59 1948

Microwave Channels for Power System Applications...40–2; disc. 42 1949

Outage Rates of Steam Turbines and Boilers and of Hydro Units..450–7 1949

Performance Characteristics of Lightning Protective Devices....1330–6 1949

Pilot-Wire Circuits for Protective Relaying—Experience and Practice..210–14; disc. 380 1943

Power Supply for Resistance Welding Machines:
Parts I and II.....306–20 1940
Part III.....185–92 1941

Power System Overvoltages Produced by Faults and Switching Operations.....912–21; disc. 921 1948

Preliminary Report on Laboratory Aging Tests on Class A Insulation.....879–81; disc. 881 1947

Present-Day Grounding Practices on Power Systems. (Committee Report).....1525–48; disc. 1548 1947

Progress in Power Generation:
1933–39.....1277–87 1940
1940–46.....1681–97 1947

Progress of the Art in Electrical Machinery—1934–39.....103–06 1940

Progress Report on AIEE Test Code for Electric Brushes.....1126–8 1949

Proposed Standards for Outdoor Bushings.....590–1; disc. 1207 1940

Protection of Power Transformers Against Lightning Surges.....568–77; disc. 749 1941

Protection of Powerhouse Auxiliaries.....746–51; disc. 1115 1946

Protection of Stations Without High-Voltage Switching.....226–31; disc. 231 1949

Recommendations for High-Voltage Testing.....598–602; disc. 1207 1940

Rectifier Transformer Characteristics.....1305–11 1949

Relay Protection of Power Transformers.....911–15; disc. 915 1947

Report of a Survey on the Performance of Shunt Capacitors.....1200–06; disc. 1206 1949
Report on Apparatus Bushings.....266; disc. 695 1941
Report on Application of Lightning Protective Devices in Wartime....586–8; disc. 952 1943
Report on Method of Measurements at Carrier-Current Frequencies....1429–32; disc. 1432 1948
Report on Survey of Unbalanced Charging Currents on Transmission Lines as Affecting Ground-Fault Neutralizers.....1328; disc. 1329 1949
Report on the Operation and Maintenance of Shunt Capacitors.....1208–18 1949
Shunt Capacitors..222–30; disc. 372 1943
Simplified Calculation of Fault Currents:
Part I.....1133–35 1942
Part II.....1433–35 1948
Station-Type Lightning-Arrester Performance Characteristics....347–8 1940
Stray Load Losses Measured in D-C Motors.....219–23; disc. 223 1949
Survey of Lightning Protective Equipment for Rotating A-C Machines.....516–19; disc. 519 1948
Temperature Rise Values for D-C Machines:
Part I.....206–12; disc. 212 1949
Part II.....1118–23; disc. 1123 1949
Voltage Transients in Arc-Furnace Circuits.....563–8; disc. 1435 1944
(**Committee** Report, IPCEA) Current Rating of Cables as Affected by Mutual Heating in Air or Conduit.....354–65; disc. 424, 1352 1944
Committees and Officers, AIEE:
1941–42.....1464–8 1941
1942–43.....1150–4 1942
1943–44.....1023–9 1943
1944–45.....1532–7 1944
1945–46.....1017–21 1945
1946–47.....1217–28 1946
1947–48.....1724–37 1947
1948–49.....1784–98 1948
1949–50.....1409–28 1949
Communication
A B-H Curve Tracer for Magnetic-Recording Wire. Long, McMullen.....146–50; disc. 494 1946
A Carrier Telephone System for Rural Service. Barstow...501–07 1947
A Decade of Progress in the Use of Electron Tubes:
Part I. In the Field of Communication. Ingram.....543–9 1940
Part II. Other Than Communication Field. White.....650–4 1940
A Frequency Modulation Telegraph Terminal Without Relays. Cusack, Michon..1165–70; disc. 1170 1947
A Method for Designing Pulse Transformers. Kirschbaum, Warren...971–8 1949
A Multichannel Microwave Radio Relay System. Black, Beyer, Grieser, Polkinghorn.....798–806 1946
A New Crystal Channel Filter for Broad Band Carrier Systems. Willis.....134–8; disc. 490 1946
A New Instrument for Recording Transient Phenomena. Begun...175–7; disc. 418 1942
A New Microwave Television System. Wentz, Smith.....465–70 1947
A New 150-Kilowatt Transmitter for Standard Band Broadcasting. Boerner.....943–51 1948
A New Wire Recorder Head Design. Long.....216–20; disc. 495 1946
A 150-Kc Carrier System for Radio Relay Applications. Boughtwood.....577–82 1948
A Push-Button-Tuned 50-Kw Broadcast Transmitter. Rockwell, Lepple.....1–3 1941
A Short-Cut Method of Estimating Telephone-Influence Factor of Power Systems With Rectifier Load. Frick.....91–6 1944
A 60-Cycle Hysteresis Loop Tracer for Small Samples of Low-Permeability Material. Wiegand, Hansen.....119–31; disc. 131 1947
A Telegraph Signal Analyzer. Erickson.....380–4; disc. 384 1948
A Time Division Multiplexing System. Boothroyd, Creamer...92–7 1949
A Tunable Rejection Filter. Taylor.....263–7; disc. 490 1946
A Turn-In-Gap Erase Head for Magnetic Recorders Providing Intense High-Frequency Fields. Wiegand, Zenner.....507–10 1948
A 12-Channel Carrier Telephone System for Open-Wire Lines. Kendall, Affel.....351–60; disc. 360 1939
Air-Borne Magnetometers for Search and Survey. Felch, Means, Slonczewski, Parratt, Rumbaugh, Tickner.....640–50 1947
Air-borne Radar for Navigation and Obstacle Detection. Jensen, Arnett.....307–13; disc. 491 1946
Aircraft Precipitation-Static Radio Interference. Starr.....363–70 1941
American Telegraphy After 100 Years. D'Humy, Howe.....1014–32; disc. 1386 1944
An Electroacoustical System. Walker.....35–40; disc. 40 1948
An Electromechanical Calculator for Directional-Antenna Patterns. Smith, Gove.....78–83 1943
An Electron Microscope for Practical Laboratory Service. Zworykin, Hillier, Vance.....157–62 1941
An Electronic Regenerative Repeater for Teletypewriter Signals. Hearn.....904–11 1947
An Improved Cable Carrier System. Black, Brooks, Wier, Wilson.....741–6; disc. 746 1947
An Optical Radar for Surveying. Hansen.....660–3 1948
Application of Compandors to Telephone Circuits. Carter, Dickieson, Mitchell.....1079–86 1946
Application of Experimental Test Procedures and Methods of Analysis of Results to Research Problems in Magnetic Recording. Thompson.....407–17 1949
Application of Multifrequency Pulsing in Switching. Dahlbom, Horton, Moody.....392–6 1949
Application of Rural Carrier Telephone System. Bartelink, Cook, Cowan, Messmer.....511–17; disc. 517 1947
Applications of Thin Permalloy Tape in Wide-Band Telephone and Pulse Transformers. Ganz.....177–82 1946
Attenuation and Delay Equalizers for Coaxial Lines. Lundry....1174–9 1949
Attenuator Materials, Attenuators and Terminations for Microwaves. Teal, Rigterink, Frosch....419–28 1948
Automatic Ticketing of Telephone Calls. Friend.....81–8; disc. 472 1944
B-1 Alarm and Control System for Remote Control of Coaxial Cable Stations. Hearn, Weber....622–6 1949
Basic Principles of the Varioplex Telegraph. Holcomb.....1102–08 1941
Bearing Deviation Indicator for Sonar. Schuck, Stedman, Hathaway, Buts.....1285–95 1947
Calculation and Design of Resistance-Coupled Amplifiers Using Pentode Tubes. Terman, Hewlett, Palmer, Pan.....879–84; disc. 1133 1940
Centralized Traffic Control for Railroads. Hailes.....1167–73 1949
Codes and Translations. Myers.....592–7 1949
Combination of Probability Curves in Engineering, The. Wilkinson.....953–63 1942
Compressed Powdered Molybdenum Permalloy for High-Quality Inductance Coils. Legg, Given.....865–72; disc. 1131 1940
Considerations on Facsimile Transmission Speed. Burkhard.....418–23; disc. 423 1949
Contact Phenomena in Telephone Switching Circuits. Curtis.....360–8; disc. 368 1940
Control Chart Methods Applied to Frequency Response Curves. Mundel.....424–7 1949
Control of Inductive Interference to Telegraph Systems. Milnor.....469–74; disc. 1134 1940
Copper-Oxide Modulators in Carrier Telephone Systems. Caruthers...253–60 1939
Counting with Relays. Frost.....587–91 1949
Crossbar Dial Telephone Switching System. Scudder, Reynolds.....179–92 1939
Crossbar Toll Switching System. Abraham, Busch, Shipley.....302–09; disc. 473 1944
Crystal Filters Using Ethylene Diamine Tartrate in Place of Quartz. Willis.....552–6 1948
Design and Performance of Ethylene Diamine Tartrate Crystal Units. Griffin, Pennell.....557–61 1948
Development of the Civil Aeronautics Authority Instrument Landing System at Indianapolis. Jackson, Alford, Byrne, Fischer.....849–58; disc. 1120 1940
Devices for Controlling Amplitude Characteristics of Telephonic Signals. Norwine.....62–7 1939
Distortion and Band-Width Characteristics of Pulse Modulation. Krauss, Ordung.....984–8 1947
Distortion in a Pulse Count Modulation System. Clavier, Panter, Grieg.....989–1005; disc. 1005 1947
Effect of Radio Frequencies of a Power System on Radio-Receiving Systems. Aggers, Pakala, Stickel.....169–72; disc. 459 1943
Electromagnetic Horn Design. Chu, Barrow.....333–8 1939
Electronic Regeneration of Teleprinter Signals. Wilder.....34–40 1946
Engineering Requirements for Program Transmission Circuits. Cowan, McCurdy, Lattimer..142–7 1941
Equalization of Coaxial Lines. Gould.....1187–92 1949
Facsimile Transmission for Pickup and Delivery of Telegrams. Ridings.....1293–8 1948
Factors Affecting the Range of Radar Sets. Quarles, Breazeale...546–8 1946
FCC Diathermy Design for Low Harmonic Radiation and Good Frequency Stability. Chapin, Roberts, Mobley.....42–6; disc. 46 1948
Filters for a 150-Kc Carrier System. Taylor.....583–8 1948
Frequency Division Techniques for a Coaxial Cable Network. Crane, Dixon, Huber.....1451–9 1947
Frequency-Modulated Carrier Telegraph System. Bramhall, Boughtwood.....36–9 1942
Frequency Modulation. Everitt.....613–25 1940
Frequency Modulation Receiver Design Trends. Young....1514–19 1948
Frequency Shift Telegraphy—Radio and Wire Applications. Davey, Matte.....479–93; disc. 493 1947
Fundamentals of Hearing-Aid Design. Penn.....744–9 1944

Gas Pressure for Telephone Cables. Giese....471–8 1947
Growing Crystals of Ethylene Diamine Tartrate. Walker, Kohman ....565–70; disc. 570 1948
Harmonics and Load Balance of Multiphase Rectifiers. Evans.... ....182–7; disc. 400 1943
Harmonics in the A-C Circuits of Grid-Controlled Rectifiers and Inverters. Evans, Muller.... ....861–8; disc. 869 1939
High-Speed Voice-Frequency Carrier Telegraph System. Bramhall.... ....873–9; disc. 1132 1940
High-Voltage D-C Point Discharges. Starr....356–62 1941
Hollow Pipes of Relatively Small Dimensions. Barrow, Schaevitz.... ....119–22 1941
Inductive Co-ordination of REA Distribution Systems and Telephone Systems. Plucknett, Smith, Taylor....586–95; disc. 723 1941
Inductive Co-ordination With Series Sodium Highway Lighting Circuits. Kent, Blye.....325–32; disc. 322 1939
Inertia Throat Microphones. Greibach, Pacent....187–91 1946
Instruments and Methods of Measuring Radio Noise. Aggers, Foster, Young.....178–87; disc. 187 1940
Joint Use of Pole Lines for Rural Power and Telephone Services. Campbell, Hill, Moore, Schols.... ....519–24; disc. 524 1947
Judging Mica Quality Electrically. Coutlee....735–41 1945
Laboratory Method for Objective Testing of Bone Receivers and Throat Microphones. Greibach.. ....184–7 1946
Line Problems in the Development of the 12-Channel Open-Wire Carrier System. Ilgenfritz, Hunter, Whitman....658–64; disc. 664 1939
Load-Rating Theory for Multichannel Amplifiers. Holbrook, Dixon 265–72 1940
Magnetic Recording Tapes. Camras 503–06 1948
Marine Radar for Peacetime Use. Lynn, Winn....271–3 1946
Measurements Pertaining to the Coordination of Radio Reception With Power Apparatus and System. Foust, Frick....284–91; disc. 455 1943
Methods of Controlling Radio Interference. Aggers..193–9; disc. 199 1940
Mica Capacitors for Carrier Telephone Systems. Christopher, Kater....670–4; disc. 1116 1946
Military Teletypewriter Systems of World War II. Singer..1398–1408 1948
Mobile Radio. Bailey.... ....923–31; disc. 932 1948
Narrow-Band Transmission System for Animated Line Images. Skellett....124–7 1939
New Test Equipment and Testing Methods for Cable Carrier Systems. Tidd, Rosen, Wenk....726–30 1947
Optimum Air Gap for Various Magnetic Materials in Cores of Coils Subject to Superposed Direct Current. Legg.....709–12; disc. 969 1945
Phonograph Reproducer Design. Bachman....159–62 1946
Picture Transmission by Submarine Cable. Milnor..105–08; disc. 756 1941
Poles and Pole Treatment. Colley.. ....685–91 1942
Polyphase Broadcasting. Byrne.... ....347–50 1939
Postwar Television Receiver Design. Pugsley....453–8 1947
Power Supplies for Coaxial Systems. Spencer....627–30 1949
Power Supplies for Microwave Relay Systems. Ward....631–6 1949
Progress in Coaxial Telephone and Television Systems. Abraham.... ....1520–7 1948
Properties and Uses of Thermistors—Thermally Sensitive Resistors. Becker, Green, Pearson....711–25 1946
Pulse Code Modulation. Black, Edson....895–9 1947
Pulse Echo Measurements on Telephone and Television Facilities. Abraham, Lebert, Maggio, Schott ....541–8; disc. 548 1947
Push Button Switching in Telegraph Systems. Blanchard, Blanton.... ....1733–40 1948
Radar Systems Considerations. Quarles....209–15 1946
Radio for Telephone Service in America. Romnes....1060–7 1948
Radio-Frequency High-Voltage Phenomena. Alford, Pickles.... ....129–36; disc. 136 1940
Radio Influence from High-Voltage Corona. Slemon.... ....198–204; disc. 204 1949
Radio-Noise Influence of 230-Kv Lines. Rorden..677–81; disc. 682 1947
Radio Telemetering for Testing Aircraft in Flight. Frederick..861–70 1946
Radiobroadcasting in Canada. Frigon.....896–8; disc. 1357 1941
Recent Developments in Burying Telephone Cables. Fisher, Smith 169–74 1942
Recent Developments in Telegraph Switching. d'Humy, Browne.... ....71–8 1940
Recent Improvements in Loading Apparatus for Telephone Cables. Hale, Quinlan, Ranges.....385–92 1948
Relay Preference Lockout Circuits in Telephone Switching. Joel.. ....1720–5; disc. 1725 1948
Relay "Trees" and Symmetric Circuits. Washburn.....582–6 1949
Remote-Control Toll Board. Sorber, Smith.....696–704; disc. 704 1939
Role of the Ionosphere in Radio Wave Propagation, The. Dellinger..... ....803–22 1933
Rubber Insulators for Pole Lines. Wheeler, Markley.....195–7 1949
Rural Automatic Telephone Networks. Ffolliott.... ....1079–83; disc. 1304 1941
Rural Radiotelephone Experiment at Cheyenne Wells, Colo. Moore, Seyler, Wright.....525–8 1947
Sequential Aspects of Relay Circuits. Ritchie....577–81 1949
Shoran Precision Radar. Seeley.... ....232–40 1946
Signal and Noise Levels in Magnetic Tape Recording. Wooldridge.... ....343–52; disc. 495 1946
Some Applications of the Type J Carrier System. Starbird, Mathis.... ....666–72; disc. 672 1939
Some Modern Techniques in Ocean Cable Telegraphy. Cramer..... ....494–500; disc. 500 1947
Stability of Tandem Regulators in the L-1 Carrier System. Kinzer..... ....1179–86 1949
Study of Wave Shapes for Radio-Noise-Meter Calibrations, A. Frick ....890–901; disc. 969 1945
Subcenter Switching Systems for Teleprinter Tie Lines. Currie..... ....635–41; disc. 1943
Submarine-Cable Depthometer, The. Nelson....691–5 1939
Submarine Detection by Sonar. Keller....1217–30 1947
Techniques and Facilities for Microwave Radar Testing. Green, Fisher, Ferguson.....274–90 1946
Telegraphy in the Bell System, Duncan, Parker, Pierce..... ....1032–44; disc. 1386 1944
Television Equipment for Broadcast Stations. Lawrence.....443–52 1947
Television Network Facilities. Abraham, Romnes....459–64 1947
Televsion Receiving Systems. Sinnett....1544–8 1948
Television Terminals for Coaxial Systems. Morrison.....1193–9 1949
Television Transmission Over Wire Lines. Strieby, Wents..... ....1090–6; disc. 1311 1941
The Application of Heterodyne Modulation to Wide-Band Frequency-Modulated Television Relays. Boothroyd.....1126–30 1947
The Application of Western Union Multiplex to Navy Radio. Hoover 1478–82 1947
The CAA-MIT Microwave Instrument Landing System. Bowles, Barrow, Hall, Lewis, Kerr..... ....859–65; disc. 1120 1940
The "Director" for Automatic Telephone Switching Systems. Smith 611–19 1948
The Distinction Between Effective and Circuit Bandwidths. Kessler 98–9 1949
The Logic of Relay Circuits. Keister 571–6 1949
The Measurement of Body Currents. Schwab....919–23 1941
The Resistance-Coupled Amplifier. Cowles....359–65 1945
The S-Function Method of Measuring Attenuation of Coaxial Radio-Frequency Cable. Stewart..... ....616–19; disc. 966 1945
The Solution of Transmission-Line Problems in the Case of Attenuating Transmission Line. Glinski.. ....46–9 1946
The Stromberg-Carlson XY Dial Telephone System. Reed...432–8 1947
The Submarine Cable Plow. Lawton ....675–85; disc. 685 1939
The Tapered Transmission Line. Milnor....345–6 1945
The Varioplex—A New Development in Telegraphy. Shute.....181–4 1941
Transmission Rating of Telephone Systems. Codd..694–8; disc. 1123 1946
Ultrahigh-Frequency Loop Antennas. Alford, Kandoian.....843–8 1940
Upper-Air Weather Soundings by Radio. Diamond, Hinman, Dunmore, Lapham....321–8 1940
Vario-Losser Circuits. Bennett, Doba 17–22 1941
Vibrating Reed Selective Signaling System for Mobile Telephone Use. Pruden, Hoth.....387–91 1949
Vibrating Reed Selectors for Mobile Radio Systems. Keller, Bostwick 383–6 1949
Wave Shape of 30- and 60-Phase Rectifier Groups. Marti, Taylor..... ....218–24; disc. 224 1940
Western Union Teletape Facsimile. Pollard....511–15 1948
Wide-Band Square-Wave Generator, A. Bartelink....371–6 1941
Communication Circuits for Low-Frequency Induction, Co-ordination of Power and. Coleman, Trueblood ....403–12; disc. 412 1940
Communication Equipment for Land-Mobile Services Operating on Frequencies Between 152–174 Megacycles, Design of Mobile Radio. Beers, Harris, Zappacosta..1232–9 1949
Communication Facilities of the U. S. Forest Service. Simson....971–6 1941
Communication, Modulation in. Cowan....792–6 1947
Communication Relay System, A Microwave. Boothroyd, Churchill.637–41 1949
Communication System, TVA Coordinated. Talmage..... ....1022–34; disc. 1034 1947

Communication, Train. Grondahl, Bossart....493–500 1943
Communications, Developments in the Field of Cable and Radiotelegraph. Pratt, Roosevelt....1044–7; disc. 1386 1944
Communications, Systems Development of Military. Putnam....757–61; disc. 1160 1946
Commutating Reactors for Rectifiers, Nonlinear. Schmidt....654–6 1946
Commutation Observation, The "Black Band" Method of. Schroeder, Aydelott....446–51; disc. 659 1941
Commutation of D-C Machines and Its Effects on Radio Influence Voltage Generation. Motter....491–5; disc. 495 1949
Commutation, Oscillographing. Baldwin....100–05; disc. 105 1949
Commutation with an Indicating Instrument, Measuring. Lundy....1380–2 1949
Commutator Armature With Six Adjustable Brushes, A Study of the 3-Phase. Franklin....197–204 1948
Commutator Motor (Schrage Type), The Circle Diagram of the Polyphase Brush-Shifting. Franklin....1667–72; disc. 1672 1947
Commutator Motors, A Generalized Equivalent Circuit in the Theory of Polyphase. Coulthard....423–31 1941
Commutator Regulator for Speed Control, The Polyphase. Conrad, Brooks, Fellers...321–8; disc. 484 1946
Commutator Surface Film Conditions on Commutation, Effects of. Lynn, Elsey....106–112; disc. 112 1949
Commutator-Type Traction Armatures, Rewinding. Greene, Stafford, Gentilini....563–9; disc. 943 1945
Compandors to Telephone Circuits, Application of. Carter, Dickieson, Mitchell....1079–86 1946
Comparative Operating Results of Steam, Diesel-Electric, and Electric Motive Power on the Great Northern Railway Electrification. Gaynor....231–4; disc. 234 1948
Comparative Performance Records—Steel and Wood Transmission Lines. Booker...686–9; disc. 689 1949
Comparison Carrier-Current Relaying, Phase-. McConnell, Cramer, Seeley....825–33; disc. 973 1945
Comparison of Long-Time and Short-Time Analog Computers, Paschkis....70–3 1949
Comparison of Railway Motive Power for Operations in the Pacific Northwest. Martin.1054–65; disc. 1189 1946
Comparison of Steady-State and Transient Performance of Servomechanisms. Chestnut, Mayer..765–77 1949
Comparison of the Amplitude-Modulation, Frequency-Modulation, and Single-Side-Band Systems for Power-Line Carrier Transmission, A. Cheek....215–20; disc. 450 1945
Comparison of the Relative Efficiency of the Schafer and Pole-Top Methods of Artificial Respiration, A. Kouwenhoven, Hooker, Langworthy....41–4; disc. 660 1941
Comparison of Two Basic Servomechanism Types, A. Harris....83–92; disc. 92 1947
Comparison Testing Equipment to Fractional Horsepower A-C Stator Windings, The Application of Surge. Buchanan....1356–8 1947
Comparison Testing, Winding-Fault Detection and Location by Surge-. Moses, Harter...499–503; disc. 945 1945
Compartment Articulated Cars for Test on Rapid Transit Division, Chicago Transit Authority, Three. Otis....416–18 1948
Compass, Electric Circuits and the Magnetic. Burt, Beck....24–6 1944
Compass, The Gyrosyn. Esval....857–60; disc. 1502 1944
Compass With Cathode-Ray Sensing Element, A Magnetic. Kliever, Syrdal....529–34 1947
Compasses by Use of Compass-Compensating Coils, Compensation of Effects of Degaussing Coils on Shipboard Magnetic. Robinson....1278–81 1948
Compensated A-C Ammeters and Voltmeters, Frequency. Whittenton, Wilkinson....761–4 1946
Compensated Transmission System, Characteristics of a 400-Mile 230-Kv Series-Capacitor-. Hoard....1102–14; disc. 1178 1946
Compensation of Effects of Degaussing Coils on Shipboard Magnetic Compasses by Use of Compass-Compensating Coils. Robinson...1278–81 1948
Compensator, A New Voltage-Regulating Relay Plus Line-Drop. Carlin....63–6; disc. 481 1942
Compensator for Resistance Welding Control, Automatic Voltage. Callender, Phair....701–05; disc. 921 1943
Compensators, Metering With Transformer-Loss. Schleicher....851–61; disc. 861 1947
Competitive Position of Coal, Residual Oil, Diesel Oil, and Electricity as Energy Sources for Motive Power Operation in the Pacific Northwest, The Present. Martin....1664–9 1948
Complete Analysis of Motor Temperature Rise. Felix, Jungk....578–86; disc. 684 1941
Complex Coefficients, A Short Method for Evaluating Determinants and Solving Systems of Linear Equations With Real or. Crout.1235–41 1941
Complex Distribution Circuits, Sensitive Ground Relay Protection for. Hunt....765–8; disc. 1180 1946
Complex Logarithmic and Geometric Mean Distances, Theory and Application of. Higgins....12–16 1947
Complex Quantities, Inverse Functions of. Dwight....850–3 1942
Components Analysis of the Four-Phase System, Symmetrical-. Boyajian....48–51; disc. 426 1944
Components and Systems, Graphical Determination of Transfer Function Loci for Servomechanism. Thomas, Easton..307–14; disc. 314 1949
Components as Applied to the Single-Phase Induction Motor, Symmetrical. Suhr....651–6; disc. 958 1945
Components, Electric Locomotives With Identical Basic. Brecht, Kerr....339–43; disc. 343 1948
Components in Power Line Networks, The Use of Business Machines in Determining the Distribution of Load and Reactive. Jennings, Quinan....1045–6 1946
Components, Losses in Radio-Frequency-Cable. Ragan....927 1945
Components of Circular Filaments and Solenoids, Formulas and Tables for the Calculation of the Magnetic Field. Grover....665–75 1949
Components, Transient Analysis of Symmetrical Networks by the Method of Symmetrical. Pipes....457–9; disc. 1107 1940
Components Using Ladder Networks, An Extension of the Method of Symmetrical. Lyon....1025–30; disc. 1263 1940
Compounds for Insulating Electric Machines, Organo-Silicon. Kauppi, Moses....90–3; disc. 457 1945
Compressed-Air Breaker, A Vertical-Flow Outdoor. Ludwig, Baker....217–22; disc. 672 1941
Compressed-Air Circuit Breaker, A New 69-Kv. Baker, Frisch....363–8; disc. 369 *1949
Compressed-Air Circuit Breaker and Its Application on a 132-Kv Power System, A Vertical-Flow. Langstaff, Baker....188–92; disc. 436 1943
Compressed Air Circuit Breaker for 23-Kv Arc Furnace Duty, A. Wilcox, Baker....154–8 1948
Compressed-Air Circuit Breakers in A-C Railway Service. Wilcox, Harker....141–5; disc. 419 1945
Compressed-Air Operating Mechanism for Oil Circuit Breakers, A. Cunningham, Hill...695–8; disc. 1019 1942
Compressed-Air Powerhouse Breaker, A 2,500,000-Kva. Ludwig, Wilcox, Baker....235–41; disc. 414 1942
Compressed-Gas Power Transformers, High-Voltage. Hobart....690–2; disc. 1448 1944
Compressed Gases, Breakdown Studies in. Howell....193–204; disc. 204 1939
Compressed Nitrogen, High-Voltage D-C Flashover of Solid Insulators in. Trump, Andrias....986–90; disc. 1393 1941
Compressed Powdered Molybdenum Permalloy for High-Quality Inductance Coils. Legg, Given....865–72; disc. 1131 1940
Compression Cable—Pipe Line Type, A 138,000-Volt Polyethylene-Sheathed. McCormack, Hatcher, Wyatt, Del Mar, Merrell, Palmer, DeTurk....447–65; disc. 465 1948
Compression-Type Cable, 120-Kv. Faucett, Komives, Collins, Atkinson....652–7; disc. 1021 1942
Computation of Accuracy of Current Transformers. Sinks....663–8; disc. 1252 1940
Computation of Magnetic Field Strength of Round Coils of Small, Cross Section, The. Dwight Peters....684–5 1944
Computation of Power Network Performance, Machine. Dunstan....610–20; disc. 621 1947
Computer, A Large-Scale General-Purpose Electric Analog. Harder, McCann....664–73 1948
Computer to Nonlinear Mechanics and Servomechanisms, Application of the California Institute of Technology Electric Analog. McCann, Wilts, Locanthi....652–60 1949
Computers, Comparison of Long-Time and Short-Time Analog. Paschkis....70–3 1949
(Computing Devices) An Improved A-C Network Analyzer. Morgan, Rothe, Winsness....891–5; disc. 895 1949
(Computing Devices) Summary of Transformations Useful in Constructing Analogs of Linear Vibration Problems. Corbett....661–4 1949
Computing Thermal Transients, Simplified Graphical Method of. Narbutovskih....78–81; disc. 82 1947
Concentration and Mobility of Ions on Dielectric Loss of Insulating Oils, The Influence of the. Kang....403–07; disc. 1132 1946
Concentric Tubular Conductors, Reactance and Skin Effect of. Dwight....513–18; disc. 976 1942
Concept of Contact Performance, A New Outdoor Air Switch and a New. Killian....1382–7; disc. 1387 1948
Concepts of Moving-Magnet-Instrument Rotors, Basic. Mendelsohn....529–34; disc. 947 1945
Concepts, Single-Phase Motor Theory—a Correlation of the Cross-Field and Revolving-Field. Button....507–12; disc. 664 1941

Condensation of Mercury in Mercury-Arc Tubes. Slepian, Brubaker... .....381–4 1940

Condenser Bushings, Flashover Characteristics of Transformer. Cole.. .....27–32; disc. 32 1939

Condenser Bushings for Circuit Breakers and Transformers, Oil-Impregnated-Paper High-Voltage. Lingal, Cole, Watts..269–75; disc. 439 1943

Condenser Bushings, Improvements in the Construction of. Peterson.... .....646–50; disc. 650 1939

Condensers and Alternators, Application of and Operating Experience With Hydrogen-Cooled Synchronous. Sporn, Porter..... .....890–907; disc. 1187 1940

Condensers and Generators, The Development of Modern Excitation Systems for Synchronous. Porter, Kinghorn.....1020–7; disc. 1156 1946

Condensers, and System Stability, Capacitors. Butler, Schroeder, Ridgway.....1130–8; disc. 1378 1944

Condensers, Automatic Control of Large Synchronous. Brown.....609–16 1946

Condensers for System Voltage Regulation, The Use of Multiwinding Transformers With Synchronous. St. Clair.....212–17; disc. 217 1940

Condensing Steam Turbine-Generators, Speed Governing Design Considerations for Multivalve. Barnett.... .....1557–61; disc. 1561 1948

Conditions, Application of Apparatus and Conductors Under Various Ambient-Temperature. Hellmund, McAuley.....553–8; disc. 992 1942

Conditions Controlling the Economic Selection of Prime Movers. Skrotzki....1099–1108; disc. 1360 1944

Conditions, Determining Incremental Regulation and Dead Band of Governors on Steam Turbine Generators Under System Load. Tornquist, Wade.....1343–7 1949

Conditions During Operation of Hydroelectric Units, Some Oscillographic Methods of Investigating Mechanical and Hydraulic. Engvall..993–6 1949

Conditions, Fundamental Theory of Inherent-Overheating Protection Under Running Overload. Veinott, Schaefer.....266–70; disc. 270 1949

Conditions, Heating of Transformers Under Short-Circuit. Montsinger, Halsey.....947–52; disc. 952 1949

Conditions in Ferroresonant Circuits, Similtude of Critical. Thomson .....127–30; disc. 130 1939

Conditions in Three-Phase Systems Produced by Single-Phase Switching, Abnormal Voltage. Clarke, Peterson, Light..329–39; disc. 618 1941

Conditions of the Ferroresonant Parallel Circuit, The Generalized Solution for the Critical. Thomson..... .....743–6; disc. 746 1939

Conditions on Commutation, Effects of Commutator Surface Film. Lynn, Elsey.....106–12; disc. 112 1949

Conditions on Subharmonic Currents in a Nonlinear Series Circuit, The Effect of Initial. Angello...625–7 1942

Conditions, Operation of Rectifiers Under Unbalanced. Christensen, Morack.....628–31 1944

Conditions, Potential Breakdown of Small Gaps Under Simulated High-Altitude. DeLerno..... .....109–12; disc. 456 1944

Conditions, The Testing of Brushes for Life and Performance Under Various Altitude. Herman..... .....929–33; disc. 1491 1944

Conditions, Thermal Protection of Transformers Under Overload. Montsinger, Camilli..... .....160–4; disc. 444 1944

Conductor Burndown From That Cause, Power Arc-Over on Overhead Distribution Lines and Newly Developed Equipment for Protection Against. Matthews..... .....596–604; disc. 684 1941

Conductor Cables, Transient Temperature Phenomena of 3-. Wollaston. .....1284–95; disc. 1295 1949

Conductor, Current Distribution in a Rectangular. Daley..... .....687–90; disc. 690 1939

Conductor Economics, Distribution Transformer and Secondary. Brady .....483–6; disc. 486 1949

Conductor Effect on Sags in Suspension Spans, Broken. Bissiri, Landau.. .....1181–8 1947

Conductor, Hy-Therm Copper—An Improved Overhead-Line. Hickernell, Jones, Snyder..... .....22–7; disc. 27 1949

Conductor Impregnated-Paper Lead-Encased Cable, Solid Type, Pulling Loads on Single- and Multiple-. Bellis.....138–48; disc. 403 1943

Conductor 132-Kv Transmission Line at Carrier Current Frequencies, Loss Measurements Made on Underground-Cable Overhead-. Cornelius, Storer.....597–601 1949

Conductor Sag on Transmission-Line Shielding, The Influence of Towers and. Sorensen, McMaster..... .....159–65; disc. 448 1942

Conductor Shipyard Power Cables, Effective Resistance and Inductance of 3-. Summers.....1345–50 1948

Conductor Size According to Cost of Resistance Loss, Formulas for. Dwight.....22–5; disc. 497 1946

Conductor Temperatures for Power Cables in Service, Guide for Wartime. (Committee Report)..... .....606–10; disc. 942 1943

Conductor Vibration, Measurement and Control of. Tebo..... .....1188–93; disc. 1380 1941

Conductor Vibration—Theory of Torsional Dampers. Speight..... .....907–11; disc. 1376 1941

(Conductors) A 138,000-Volt Polyethylene-Sheathed Compression Cable—Pipe Line Type. McCormack, Hatcher, Wyatt, Del Mar, Merrell, Palmer, DeTurk..... .....447–65; disc. 465 1948

Conductors and a Method for Studying Them, Galloping. Tornquist, Becker.....1154–61; disc. 1161 1947

Conductors by Magnetic Induction—Longitudinal Flux, Heating of Nonmagnetic Electric. Baker...273–8 1944

Conductors, Co-ordination of Insulation and Spacing of Transmission Line. Lewis....690–4; disc. 1142 1946

Conductors, Effective Resistance of Isolated Nonmagnetic Rectangular. Dwight.....549–52 1947

Conductors, Experimental Determination of the Capacitance of Heavy-Current Busses Comprised of Solid or Tubular Rectangular Conductors. Teasdale, Higgins..... .....653–9; disc. 659 1948

Conductors for Supervisory Control and Telemetering, Interim Report on Characteristics and Performance of. (Committee Report).....854–62 1943

Conductors, Formulas for Calculating Short-Circuit Stresses for Bus Supports for Rectangular Tubular. Higgins.....578–80 1942

Conductors, Formulas for the Inductance of Coaxial Busses Comprised of Square Tubular. Messinger, Higgins.....328–36; disc. 501 1946

Conductors, Formulas for the Inductance of Rectangular Tubular. Higgins.....1046–50; disc. 1409 1941

Conductors, Geometric Mean Distances for Rectangular. Dwight...536–8 1946

Conductors in Steel Pipe or Conduit, A-C Resistance of Large Size. Wiseman.....1745–52; disc. 1752 1948

Conductors, Interim Report on Emergency Overloads on Overhead. (Committee Report)..... .....588–90; disc. 940 1943

Conductors, Joints and Clamps for Aluminum. Tebo.1145–50; disc. 1150 1948

Conductors of Structural Shape, Formulas for Calculating Short-Circuit Forces Between. Higgins..659–63 1943

Conductors of Structural Shape, Formulas for the Calculation of the Inductance of Linear. Higgins... .....53–8 1943

(Conductors) 115-Kv High-Pressure Oil-Filled Pipe Cable Installation at New Orleans, La. Bullard, Pettee, Rhodes..475–84; disc. 484 1948

Conductors, Problems in the Measurement of A-C Resistance and Reactance of Large. Salter..... .....1390–6; disc. 1396 1948

Conductors, Proximity Effect Factors for 3-Phase Coaxial Busses Comprised of Square Tubular. Higgins, Messinger.....1538–9 1948

Conductors, Reactance and Skin Effect of Concentric Tubular. Dwight.. .....513–18; disc. 976 1942

Conductors, Relative Surface Voltage Gradients of Grouped. Temoshok. .....1583–9; disc. 1589 1948

Conductors, Resistance and Capacitance Relations Between Short Cylindrical. ReQua....724–30; disc. 962 1945

Conductors, Results of Tests Carried Out at the 500-Kv Experimental Station of Chevilly (France), Especially on Corona Behavior of Bundle. Cahen..... .....1118–25; disc. 1125 1948

Conductors, Safe Ratings for Overhead Line. Olmsted..845–53; disc. 938 1943

Conductors, Skin Effect in Bimetallic. Teare, Webb.....297–302 1943

Conductors, The Effect of Corona on Coupling Factors Between Ground Wires and Phase. McCann..... .....818–26; disc. 940 1943

(Conductors) Thermal Characteristics of a 120-Kv High-Pressure, Gas-Filled Cable Installation. Sanderson, Sticher, McGrath..... .....487–98; disc. 499 1948

Conductors Under Various Ambient-Temperature Conditions, Application of Apparatus and. Hellmund, McAuley.....553–8; disc. 992 1942

Conduit, A-C Resistance of Large Size Conductors in Steel Pipe or. Wiseman.....1745–52; disc. 1752 1948

Conduit, Current Rating of Cables as Affected by Mutual Heating in Air or. (IPCEA Committee Report) .....354–65; disc. 424, 1352 1944

Conduit, Reactance of Large Cables in Steel Pipe or. Del Mar..... .....1409–12; disc. 1412 1948

Conference on Radio-Frequency Cables, Report of.....911–41 1945

Confirmation of the Moving Coil Fluxmeter, General Theory and Experimental. Higgins, Robertson..... .....897–907; disc. 907 1949

Connection Arrangements and Protective Practices for Shunt Capacitor Banks. Clark, Farnham..... .....1226–30; disc. 1231 1949

Connections, An Experimental Investigation of the Electrical Performance of Bolted Aluminum-to-Copper. Bonwitt..1208–18; disc. 1218 1948

Connections on Aircraft, Electric. Stebbins, Taylor...906–11; disc. 1473 1944

Connectors, Historical Development of Electric. Neifing.....925–8 1944

Connectors, Simulated-High-Altitude Testing of Aircraft Ignition Cables and. Race, Ross....20–6 1945

Conservation in Induction-Motor Manufacture, Critical-Material. Hobart....549–52; disc. 927 1943

Conserved-Pressure Air-Blast Circuit Breaker for High-Voltage Service, A. Rankin, Bennett....193–7; disc. 673 1941

Consideration of Power-Distribution-System Costs, A Method of Approach to the. Falls....1078–84; disc. 1377 1944

Consideration of System-Wide Load Divisions by Means of Accurate Time Control, Preliminary. Curtis, Pickslay....1562–9; disc. 1569 1948

Considerations for D-C Aircraft Generators, Design. Miner....1234–40; disc. 1459 1944

Considerations for Multivalve Condensing Steam Turbine-Generators, Speed Governing Design. Barnett....1557–61; disc. 1561 1948

Considerations in Aircraft Instruments to Meet War Service, Design. Savage, Whittenton. 992–8; disc. 1419 1944

Considerations in Applying Ratio Differential Relays for Bus Protection. Smith, Sonnemann, Dodds....243–9; disc. 249 1939

Considerations in Radio-Frequency-Cable Design, General. Wents....925–6 1945

Considerations in Servomechanism Design. Herwald....871–6 1944

Considerations in the Selection of Generators and Batteries for Aircraft, Basic. Cobb, Winters....889–93; disc. 1494 1944

Considerations of 400-Cycle Aircraft Motors, Design. Sawyer....877–9; disc. 1464 1944

Considerations on Facsimile Transmission Speed. Burkhard....418–23; disc. 423 1949

Considerations On High-Voltage Lines and Design Features of Tidd 500-Kv Test Lines, Corona. Wagner, Wagner, Peterson, Gross....1583–90; disc. 1590 1947

Consolidated Edison Company of New York, Inc., Modernization of Switch-House Design. de Bellis....752–60; disc. 778 1939

Consolidated Edison Company of New York, Inc., Provisions for Reenergising the Electric System of the. Milne, Otten....579–85; disc. 1155 1940

Constant-Current Motor Systems, Electronic. Livingston. 425–30; disc. 430 1947

Constant-Current Regulators, Resonant-Circuit. Kevern....807–10; disc. 992 1945

Constant-Current Regulators, Resonant-Type. Miner....822–8; disc. 828 1939

Constant-Frequency Generator, A Variable-Speed. Roys, Nader, Spotts....1413–17; disc. 1417 1947

Constant-Speed Drives for Aircraft Alternators. Breitwieser....763–8; disc. 991 1945

Constants at Low Speeds, Rotating Electric Machine Time. Concordia....882–7 1946

Constants, Calculation of Slot. Puchstein....1315–22; disc. 1322 1947

Constants of 270-Mile 154-Kv Transmission Line, Measured Electrical. Streifus, Roadhouse, Gow....538–42; disc. 1351 1944

Construction, Aircraft Inverter. Button....598–602 1943

Construction Features, Powerton-Crawford 220-Kv Line—Design and. Oldacre, Wollaston....1108–20; disc. 1297 1941

Construction of Condenser Bushings, Improvements in the. Peterson....646–50; disc. 650 1939

Construction of High-Capacity Air-Blast Circuit Breakers, Design and. Strang, Boisseau..522–7; disc. 1131 1940

Construction Theorem for Evaluating Operational Expressions Having a Finite Number of Different Roots, A. Cromwell....273–6; disc. 676 1941

Consumers Power Company 140-Kv System, Study of Driven Rods and Counterpoise Wires in High-Resistance Soil on. Hemstreet, Lewis, Foust....628–34; disc. 1000 1942

Contact Making and Breaking Time, An Instrument for the Determination of. Richter, Elliot....14–16; disc. 459 1943

Contact Performance, A New Outdoor Air Switch and a New Concept of. Killian....1382–7; disc. 1387 1948

Contact Phenomena in Telephone Switching Circuits. Curtis....360–8; disc. 368 1940

Contact Protection Systems, Sensitive Relay. Dallas, McCully....1204–07 1948

Contact Resistance in Spot Welding, Measurement and Effect of. Wyant....26–33; disc. 513 1946

Contactors, Aircraft. Russell, Charbonneau....563–6; disc. 980 1943

Contactors for Aircraft, A-C. Russell, Charbonneau...613–16; disc 1364 1944

Contacts and Its Prevention, Bridge Erosion in Electrical. Pfann....1528–33 1948

Contacts, The Vibration of Electric, Russell, Keilien...153–5; disc. 478 1944

Contaminants on Electrical Insulation, Methods for Determining the Effects of. Mathes, Sieffert, Walker, Lindsey....113–18; disc. 118 1949

Contaminated Insulators in Fog, Performance of Dust-. Cozzens, Blakeslee....1686–91; disc. 1691 1948

Contamination as Causes of Electrical-Insulation Failure, Chemical. Braithwaite, Moses....580–3; disc. 945 1945

Contamination, Flashovers of Suspension Insulators Due to. Adler, Wickham, Oldacre....1680–3; disc. 1683 1948

Contamination, Insulator Surface. Frey....1420–4; disc. 1424 1948

Contamination, Pole Fires Due to Insulator. Wickham, Adler, Oldacre....1741–4 1948

Continuous Load-Frequency Control for Interconnected Power Systems. Dimond, Lunge. 1483–8; disc. 1488 1948

Continuous Processing for Automobile Tire Fabrics. Cassidy, Mosteller....218–23 1939

Contracts, Power Supply for Railroad Electrification and Fundamentals of Power. Hill..560–2; disc. 1159 1940

Control, A New Mercury Rheostatic Element for Regulation and. Oplinger....846–9; disc. 1386 1941

Control, and Cooling of Ignitron Tubes, Excitation. Herskind, Remscheid....623–5 1946

Control and Power Systems for Aircraft Window Deicing. Mershon....1400–05 1947

Control and Protection of Aircraft D-C Power Systems. Austin....741–5; disc. 1170 1946

Control and Switching Equipment for Capacitor Banks and Its Application, Automatic. Schroeder, Bloomquist....649–54; disc. 1440 1944

Control and Telemetering, Interim Report on Characteristics and Performance of Conductors for Supervisory. (Committee Report)....854–62 1943

Control, and Their Branch Circuits on Power Supplies of 600 Volts and Less, Thermal Co-ordination of Motors. Jones...483–7; disc. 975 1942

Control, Application of Electronics to Aircraft Flight. Gille, Kutsler....849–53; disc. 1501 1944

Control, Automatic Voltage Compensator for Resistance Welding. Callender, Phair....701–05; disc. 921 1943

Control by Capacitors, System Lower-Harmonic Voltages—Methods of Calculation and. Feaster, Harder....1060–6; disc. 1310 1941

Control by Regulex Exciters, Arc-Furnace. Montgomery, Bloodworth....650–4; disc. 980 1943

Control, Capacitor Relay Timing in Industrial. Stansbury, Jochem....65–9; disc. 69 1940

Control, Characteristics of New Carrier-Current Equipment for Telemetering and Load. Beckwith....1649–52; disc. 1652 1948

Control Chart Methods Applied to Frequency Response Curves. Mundel....424–7 1949

Control Circuit for Resistance Welders, An Electronic. Gray, Breyer....361–4; disc. 364 1939

Control Circuit, Polyethylene Insulated Coaxial Cable for Carrier Current. Slade, West...1416–18; disc. 1419 1948

Control Circuits, Insulation Level of Relay and. (Committee Report)....1255–7 1949

Control Circuits, Voltage Surges in Relay. Halman, Harris....1693–9; disc. 1699 1948

Control Coils, Insulation Temperature Standards for Industrial-. Erikson....546–8; disc. 1408 1944

Control Devices for Aircraft, Preferred Practices for Electric. Hottenroth....197–200; disc. 444 1945

Control: Dynamic Braking of a D-C Shunt Motor and Load, Industrial. Leland, Rader....472–6 1943

Control, Dynamic Lowering D-C Hoist. Pettit....1576–80; disc. 1581 1948

Control, Dynamoelectric Amplifier for Power. Alexanderson, Edwards, Bowman....937–9; disc. 1136 1940

Control Element, A Polarized Relay as an Aircraft. Johnson, Glassow....1249–55 1948

Control Equipment, Channels for Operation of Supervisory. Derr, Brown....1654–60 1948

Control for Aircraft, Automatic Temperature. Gund....730–4 1945

Control for A-C Locomotives With Particular Reference to Resistor Transition, Improvements in Preventive-Coil. Hatch, Ogden....727–32 1942

Control for an Electronic Power Converter, Switchgear and. Gittings, Bateman....585–8; disc. 1413 1944

Control for Capacitor-Discharge Resistance Welding, An Improved Electronic. Bichsel, Hughes....1150–7; disc. 1384 1944

Control for Diesel-Electric Locomotives, Braking Resistors and. Weiser....229–32 1947

Control for Interconnected Power Systems, Continuous Load-Frequency. Dimond, Lunge. 1483–8; disc. 1488 1948

Control for Latest New York Transit System Subway Cars, Motor. Riley....900–03 1947

Control for Multicolor Printing, Electronic Register. Cockrell....617–22; disc. 1117 1946

Control for New Chicago Subway, Supervisory. Derr, Buck, Stoos....10–16; disc. 457 1945

Control for Railroads, Centralized Traffic. Hailes....1167–73 1949

Control for Shovels and Draglines, Evolution of Ward-Leonard. Stevens 1491–7 1948
Control for Steam Boilers on Diesel-Electric and Straight Electric Locomotives, Electric. Burgess.... ....604–06; disc. 980 1942
Control for the World's Most Modern Steel Mill, Supervisory. Garrett, Reagan....259–64; disc. 1944
Control for Transport Airplanes, Automatic Temperature. Hedges..1197 1947
Control for Turbine Generators, A New Automatic Load. Ruud, Farnham ....1337–42; disc. 1342 1949
Control for Turbine Generators, Automatic Load. Crever, Jackson.... ....656–60 1945
Control for Use on Victory Ships, Modern Cargo-Winch. Holt.... ....623–8; disc. 1411 1944
Control for World's Largest Induction Motor, Precision Speed. Longwell, Reagan....634–8; disc. 1050 1942
Control, Functionalised Resistance Welding. Stadum, Large, Hartwig 414–18 1947
Control: Heating of Shunt-Motor Starting Resistors, Industrial. Leland, Rader....695–9; disc. 961 1945
Control in a Large Interconnection, Methods of System. Wild.... ....232–6; disc. 737 1941
Control in Automatic Pilots, Electrical. Young, Lynch, Boynton.... ....939–43; disc. 1500 1944
Control in the Manufacture of Aircraft Generators, Aids to Quality. Potter....525–9; disc. 1358 1944
Control, Inverter Action on Reversing of Thyratron Motor. Palmer, Leigh ....175–84; disc. 494 1944
Control of Air Switches for Line Sectionalising and Load Transfer, Automatic. Rich, Kirwen.... ....293–9; disc. 299 1947
Control of Conductor Vibration, Measurement and. Tebo.... ....1188–93; disc. 1380 1941
Control of D-C Motors, Electronic. Puchlowski....870–7; disc. 985 1943
Control of D-C Series Motors—Calculation of Stability Limit, Dynamic Braking. Heumann, Smith.... ....454–7; disc. 1130 1946
Control of D-C Series Motors—Experimental Study of Speed-Torque Curves, Dynamic Braking. Heumann....560–4 1949
Control of Electrical-Insulating Varnishes. Gibson, Braithwaite.520–4 1945
Control of Frequency Converter Sets for Testing Aircraft Models, Electronic. Heumann, Strong...931–9 1946
Control of High-Speed Induction Motors, Adjustable Frequency. Heumann....719–25 1947
Control of Hydroelectric Generating Stations, Automatic. Brown, Derr ....343–55; disc. 355 1947
Control of Inductive Interference to Telegraph Systems. Milnor.... ....469–74; disc. 1134 1940
Control of Large Synchronous Condensers, Automatic. Brown...609–16 1946
Control of Load, Frequency, and Time of Interconnected Systems. Duff ....778–86; disc. 999 1945
Control of Load Swings, Frequency. McCormack, Lombard.... ....623–4; disc. 1043 1942
Control of Mercury-Arc Rectifiers, Voltage. McDonald.... ....563–6; disc. 566 1939
Control of Prime-Mover Speed Governors, Supplementary. Crary, McClure....209–14; dis. 395 1942
Control of Pumping Station Over Power Cable, Carrier Supervisory. Derr, Keller, Hedke..699–705; disc. 1124 1946
Control of Slip-Ring Motors by Means of Unbalanced Primary Voltages. Schmits....1103–1112; disc. 1112 1947
Control of Some Types of Switching Surges, The Cause and. Schroeder ....696–700; disc. 933 1943
Control of Switchgear, The Application of Storage Batteries to the. Hoxie ....1561–9; disc. 1569 1947
Control of System Interconnections, Phase-Angle. Pierce, Hamilton... ....83–91; disc. 91 1939
Control of System Loads, Emergency. Comly, Kelley, McCormack, Phillips, Schroeder..1474–81; disc. 1482 1948
Control of the Switching Surge Voltages Produced by the Current-Limiting Power Fuse. Williams, Schuck... ....214–17; disc. 678 1941
Control of 30,000-Kva Hydroelectric Plant, Supervisory. Bohner, Maness 337–42 1946
Control of Thyratron Rectifiers, The Shunt Tube. Potter....421–4 1947
Control of Tie-Line Power Swings. Concordia, Shott, Weygandt.... ....306–14; disc. 395 1942
Control of Wound Rotor Induction Motors, The Liquid Rheostat for Speed. McFarland, Alvares.... ....603–09; disc. 609 1948
Control on the San Francisco-Oakland Bay Bridge Railway, Signal System, Interlocking Plants, and Automatic Train. Davis.... ....158–64 1940
Control, Preliminary Consideration of System-Wide Load Divisions by Means of Accurate Time. Curtis, Pickalay....1562–9; disc. 1569 1948
Control Problems, Application of Low Frequency to Industrial. Schmits ....1571–5; disc. 1575 1948
Control Problems, Diesel-Electric Synchronous Motor Ship Drives—Propulsion. Frisch....660–6 1946
Control, Radar Technique in an Industrial. Cockrell....269–72 1947
Control—Shunted-Armature Connection for a D-C Shunt Motor, Industrial. Leland, Rader.... ....617–19; disc. 1410 1944
Control, Simplified Precision Resistance-Welder. Roby..528–32; disc. 532 1939
Control System, A New 2-Signal Synchronous Supervisory. Derr.... ....857–63; disc. 863 1949
Control System for a Multijet Airplane, Starter-Generator. Hart.... ....1316–18 1948
Control System for Aircraft D-C Generators, An Integrated. McClinton 94–8 1947
Control System for A-C Crane Hoists, A Thrustor Lowering. Schwarz-Kast ....139–44; disc. 144 1947
Control System for an Aircraft Cabin-Supercharger Drive, Speed-. Godsey, Miner, Walley....37–40 1945
Control System for Automatic Parallel Operation of Load-Ratio-Control Transformers, A New. Minecci, Farnham....488–93; disc. 916 1943
Control System for Modern Multiple-Unit Rapid-Transit Cars. Moore 142–7 1942
Control System for Remote Control of Coaxial Cable Stations, B-1 Alarm and. Hearn, Weber....622–6 1949
Control System for Wind Tunnel Drives, A. Heidenreich.... ....1637–43; disc. 1643 1947
Control, System Operation Improved With Carrier Telemetering and Load. Walton, Lensner.... ....1643–7; disc. 1647 1948
Control Systems, Developments in Diesel-Electric Traction-Generator Excitation. Brancke, Adams.... ....223–8; disc. 228 1947
Control Systems for Diesel-Electric Locomotives. Developments in. Henshaw....233–41 1947
Control Systems, Graphical Analysis of. Evans....547–51 1948
Control Systems, The Application of Lead Networks and Sinusoidal Analysis to Automatic. Schwarts ....69–76; disc. 76 1947
Control Systems, The Design of D-C Motors for Use in Automatic. Lebenbaum....1089–94 1949
Control Systems, The Frequency Response of Automatic. Harris.... ....539–46; disc. 1131 1946
Control Systems with Particular Reference to Backlash, Instrument Inaccuracies in Feed-Back. Marcy, Yachter, Zauderer....778–88 1949
Control, The Application of Ignitrons to Resistance-Welding. Bivens... ....471–8; disc. 655 1941
Control, The Polyphase Commutator Regulator for Speed. Conrad, Brooks, Fellers...321–8; disc. 484 1946
Control, Theoretical Approach to Speed and Tie Line. Brandt.... ....24–9; disc. 29 1947
Control, Theory and Design of NEMA Resistors for Motor Starting and Speed. Armstrong....277–81 1940
Control, Thyratron Motor. Moyer, Palmer....706–12; disc. 962 1943
Control to Resistance Welding, Application of Quality. Hobson, Inglis, McCants....573–5; disc. 951 1945
Control Toll Board, Remote-. Sorber, Smith....696–704; disc. 704 1939
Control Transformer System, Electrical Accuracy of Selsyn Generator. Chestnut....570–6; disc. 1118 1946
Control Transformers Operating in Parallel and Networks, Operation of Load Ratio. Starr.... ....1274–80; disc. 1407 1941
Control Valves, Solenoid-Operated. Eckel, Wisegarver....911–14 1944
Control, Variable-Unbalanced-Voltage. Wickerham....98–102; disc. 449 1945
Control With Other Functions on Power-Line Carrier Channels, The Combination of Supervisory. Cheek, Derr....241–6 1945
Control Without Feeder Voltage Regulators, Power System Voltage. Smeloff....1462–4; disc. 1465 1948
Controllable Reactors, Universal Curves for D-C. Johnson, Merrell, Alley ....31–7; disc. 37 1949
Controlled Copper-Oxide Rectifiers for Electroplating and Anodising Applications, Automatically. Buckley....181–4 1947
Controlled Dry-Disk Rectifier, Electronically. Rosenstein, Barnett ....21–3; disc. 474 1944
Controlled Excitation for Suddenly Applied Loads, Synchronous Motors, With. Boice, Caldwell, Halberg.. ....113–19; disc. 416 1943
Controlled Industrial Tube, The Permatron—A Magnetically. Overbeck ....224–8; disc. 228 1939
Controlled Position Regulator for Propeller Milling Machine, Tracer-. Hanna, Osbon, Hartley.... ....201–05; disc. 452 1945
Controlled Reactors with Resistive Load, Some Fundamentals of D-C. Storm....188–94; disc. 194 1949
Controlled Rectification With Inductive and Generative Loads, Voltage and Current Relations for. Puchlowski ....255–60; disc. 442 1945
Controlled Rectifier Circuits, Transient Response of. Chin, Walter.208–14 1945
Controlled Rectifiers and Inverters, Harmonics in the A-C Circuits of Grid-. Evans, Muller.... ....861–8; disc. 869 1939

Controlled Temperature and Insulation Protection in the Operation of Power Transformers. Satterlee, Reed....753–8; disc. 759 1949

Controllers for Marine Service, Design of D-C Auxiliary. Schaelchlin....623–9 1946

Controllers, Improvements in Rolling Mill Preset Screw-Down. Leitch, Schurr....58–63 1948

Controllers, The Use of Air-Core Reactors as Fault Limiting Means on High Interrupting Capacity. Leitch....469–74; disc. 474 1949

Controlling Amplitude Characteristics of Telephonic Signals, Devices for. Norwine....62–7 1939

Controlling Quality, Statistical Tools for. Manuele, Goffman....524–8; disc. 949 1945

Controlling Radio Interference, Methods of. Aggers....193–9; disc. 199 1940

Controlling the Economic Selection of Prime Movers, Conditions. Skrotzki....1099–1108; disc. 1360 1944

Controls, An Interval and Dwell Tester for Bomb-Release Interval. Long....648–51 1945

Convenient Method for Determining Generator Reserve, A. Seelye....1317–20 1949

Conversion and Transmission Costs, Railroad Electrification Energy. Kimball, Holm..219–26; disc. 227 1948

Converter for Exchange of Power, The Electronic. Cramer, Morton, Darling....1059–69; disc. 1413 1944

Converter for Induction Heating of Metals, Mercury-Arc Frequency. Durand, Rice....1592–9 1948

Converter for Telemetering and Totalising, A Thermal. Downing....879–84; disc. 884 1949

Converter, History and Development of the Electronic Power, Alexanderson, Phillipi..654–7; disc. 1413 1944

Converter Sets for Testing Aircraft Models, Electronic Control of Frequency. Heumann, Strong..931–9 1946

Converter, Switchgear and Control for an Electronic Power. Gittings, Bateman....585–8; disc. 1413 1944

Converters in North America, Mercury Arc Power. (Committee Report)....1031–59 1948

Converters, Pentode Ignitrons for Electronic Power. Steiner, Zehner, Zuvers....693–7; disc. 1413 1944

Converters, Performance Calculation of Induction-Type Frequency. Latzko....691–4 1948

Cooled Oil-Insulated Transformers, Hot-Spot Winding Temperatures in Self-. Vogel, Narbutovskih....133–6; disc. 418 1942

Cooled Steel-Tank Rectifier Corrosion Problem, The Water-. Remscheid....173–8; disc. 753 1941

Cooling for Aircraft Generators, Blast-Tube. Veinott..520–5; disc. 1463 1944

Cooling of A-C Turbine Generators, Liquid. Fechheimer....553–61; disc. 561 1947

Cooling of Ignitron Tubes, Excitation, Control, and. Herskind, Remscheid....632–5 1946

Cooling Power Transformers by Forced Circulation of Cooling Medium. Paluev, Burnham....215–21; disc. 445 1943

Co-ordinated Communication System, TVA. Talmage.1022–34; disc. 1034 1947

Co-ordinated Electric Drive for a Rubber Calender Train. John, Knapp, Mosteller....128–34; disc. 492 1946

Co-ordinates of a Four-Phase Network, Two-Phase. Kimbark....7–9 1945

Co-ordinates of a Three-Phase Circuit, Two-Phase. Kimbark....894–904; disc. 904 1939

Co-ordinating Distribution Systems, An Automaticaly Reclosing Breaker for. Rawlins, Wallace....1021–4 1941

Co-ordination Aspects of Rectifier Installations, Inductive. (Committee Report)....417–36; disc. 1115 1946

Co-ordination Method, Field Tests of Oil Circuit Recloser Substantiate Analytical. Auer, Branflick, Woodward, McKinley....801–08; disc. 808 1949

Co-ordination of Electrical Equipment With Basic Insulation Levels, The. Foote, North....585–9; disc. 1204 1940

Co-ordination of Fuel Cost and Transmission Loss by Use of the Network Analyzer to Determine Plant Loading Schedules. George, Page, Ward....1152–60; disc. 1160 1949

Co-ordination of Insulation and Spacing of Transmission Line Conductors. Lewis....690–4; disc. 1142 1946

Co-ordination of Mathematics and Physics With Electrical-Engineering Subjects. Morgan....42–3; disc. 43 1939

Co-ordination of Mathematics and Physics With Electrical-Engineering Subjects, The. Curry....36–7; disc. 43 1939

Co-ordination of Motors, Control, and Their Branch Circuits on Power Supplies of 600 Volts and Less. Thermal. Jones..483–7; disc. 975 1942

Co-ordination of Oil Insulated Transformers, Extremes in the Insulation. Vogel....965–8; disc. 968 1949

Co-ordination of Physics With Electrical Engineering. Bryant....35–6; disc. 43 1939

Co-ordination of Power and Communication Circuits for Low-Frequency Induction. Coleman, Trueblood..403–12; disc. 412 1940

Co-ordination of Radio Reception With Power Apparatus and Systems, Measurements Pertaining to the. Foust, Frick....284–91; disc. 455 1943

Co-ordination of REA Distribution Systems and Telephone Systems, Inductive. Plucknett, Smith, Taylor....586–95; disc. 723 1941

Co-ordination of Short-Time and Intermittent Ratings and Applications. Classification and. Hellmund....792–8; disc. 1323 1941

Co-ordination With Series Sodium Highway Lighting Circuits, Inductive. Kent, Blye....325–32; disc. 332 1939

Copper—An Improved Overhead-Line Conductor, Hy-Therm. Hickernell, Jones, Snyder..22–7; disc. 27 1949

Copper Connections, An Experimental Investigation of the Electrical Performance of Bolted Aluminum-to-. Bonwitt....1208–18; disc. 1218 1948

Copper—Copper Oxide Rectifiers, Twenty-Five Years of. Grondahl....403–10 1948

Copper in Overhead Lines, Ampere Load Limits for. Kidder, Woodward....148–52; disc. 388 1943

Copper Mines, Electrification of Large Open-Pit. Birch..30–8; disc. 433 1944

Copper Mining, Utilization of Electric Power in Open-Pit. French, Speight....956–66; disc. 966 1948

Copper-Oxide Modulators In Carrier Telephone Systems. Caruthers....253–60 1939

Copper-Oxide Rectifier in Electrochemical Work, The. Smith....739–44; disc. 1438 1944

Copper-Oxide Rectifiers, Applications of. Morris....103–06 1939

Copper-Oxide Rectifiers for Electroplating and Anodizing Applications, Automatically Controlled. Buckley....181–4 1947

Copper-Oxide Rectifiers, Higher Voltage. Smith....220–2 1947

Copper Sulphide Rectifier Battery Charger for Railroad Passenger Cars, The Magnesium-. Kotterman....260–5 1939

Copper Temperature, Loading Transformers by. Putman, Dann....504–09; disc. 510 1939

Copper Wires Carrying a Potential, Causes of Corrosion of Fine. Stephens, Gehrenbeck....357–60; disc. 360 1940

"Copperspun" Squirrel Cage Rotor, The. Anderson....1312–14 1947

Core-Current-Transformer· Design Method, Biased—. Specht....635–40 1945

Core Form Upon the Iron Losses of Transformers, Influence of the. Stein....95–103; disc. 103 1948

Core Reactors, A Balanced Amplifier Using Biased Saturable. Kirschbaum, Harder....273–8 1947

Cores and Other Electric Apparatus of Rectangular Cross Section, Formulas for Calculating Temperature Distribution in Transformer. Higgins....190–4; disc. 493 1945

Cores, Interlaminar Eddy Current Loss in Laminated. Beiler, Schmidt....872–7; disc. 877 1947

Cores of Coils Subject to Superposed Direct Current, Optimum Air Gap for Various Magnetic Materials in. Legg....709–12; disc. 969 1945

Cores Operating Above Saturation Density, Peak Voltages Induced by Accelerated Flux Reversal in Reactor. Specht, Wentz....254–63 1946

Cores, Wound and Dummy-Rotor Methods of Quality Control and Trouble Shooting of Induction-Motor Windings and. Trickey....842–4; disc. 998 1945

Cornell Variable Density Wind Tunnel, Electric Equipment for. Clymer, de Ferranti....554–63 1946

Corona Behavior of Bundle Conductors, Results of Tests Carried Out at the 500-Kv Experimental Station of Chevilly (France), Especially on. Cahen....1118–25; disc. 1125 1948

Corona Considerations on High-Voltage Lines and Design Features of Tidd 500-Kv Test Lines. Wagner, Wagner, Peterson, Gross....1583–90; disc. 1590 1947

Corona Correction on Small Ceramic Bushings, High Altitude Flashover and. Pendleton....1324–30 1947

Corona Discharge on Liquid Dielectrics, Effect of. Sticher, Thomas....709–19; disc. 719 1939

Corona Discharge on Rubber-Insulated Cables. Paine, Brown....709–14; disc. 1070 1940

Corona Discharges in Insulated Cables, Internal. Greenfield....591–600; disc. 600 1947

Corona in Aircraft Electric Systems as a Function of Altitude. Wilson....189–94; disc. 457 1944

Corona-Initiation Measurements on Polyethylene and Rubber Cables. Depackh....939–40 1945

Corona on Coupling Factors Between Ground Wires and Phase Conductors, The Effect of. McCann....818–26; disc. 940 1943

Corona, Radio Influence from High-Voltage. Slemon....198–204; disc. 204 1949

Corona Starting Voltages for Non-uniform Fields in Air, Determination of. Hutton....1674–9; disc. 1680 1947

Corona, The Space Charge Due to. Smith....1137–44; disc. 1144 1948

Corona Voltmeter, A. Widmer..940–1 1945

Corps of Engineers, War Department, The Design and Performance of the Vertical Generator Thrust Bearings at the Bonneville Plant of the. Lewis, Gordon.....1231–7; disc. 1237 1947
Correction for Saturation. McFarland.....233–5 1942
Correction of Resistance-Welding Machines by Series Capacitors, Power-Factor. Levoy. 1002–09; disc. 1102 1940
Correction of Voltage on Distribution Circuits, Capacitors and Automatic Boosters for Economical. Olmsted.....491–6; disc. 496 1939
Correction on Small Ceramic Bushings, High Altitude Flashover and Corona. Pendleton.....1324–30 1947
Correlating Duty-Cycle Tests on Solenoids, A Method for. Ryan.....579–81; disc. 945 1943
Correlation of System Overvoltages and System-Grounding Impedance. (Committee Report).....17–24; disc. 383 1943
Corrosion—Methods of Evaluating Insulating Materials Used in Tropical Service, Electrolytic. Thompson, Mathes.....295–9; disc. 443 1945
Corrosion of Fine Copper Wires Carrying a Potential, Causes of. Stephens, Gehrenbeck.....357–60; disc. 360 1940
Corrosion of Underground Power-System Cables, Electrolysis and. Gorman.....329–36; disc. 479 1945
Corrosion Problem, The Water-Cooled Steel-Tank Rectifier. Remscheid.....173–8; disc. 753 1941
Corrosion, Study of A-C Sheath Currents and Their Effect on Lead-Cable-Sheath. Sherer, Granbois.....264–8; disc. 483 1945
Corrosiveness of Soil Waters, Galvanic. Phelps, Kahn.....156–9; disc. 482 1945
Cost and Transmission Loss by Use of the Network Analyzer to Determine Plant Loading Schedules, Coordination of Fuel. George, Page, Ward.....1152–60; disc. 1160 1949
Cost of Resistance Loss, Formulas for Conductor Size According to. Dwight.....22–5; disc. 497 1946
Cost Studies of 69- to 230-Kv Underground Power-Transmission Systems and Tie Lines. Holm..852–60 1945
Costs, A Method of Approach to the Consideration of Power-Distribution-System. Falls.....1078–84; disc. 1377 1944
Costs, Power, and the Contribution of Existing Transmission Networks Towards Cost Reduction of Power for Electrification of Main Line Railroads with Moderate Traffic. Evans.....596–8; disc. 599 1948
Costs, Railroad Electrification Energy Conversion and Transmission. Kimball, Holm..219–26; disc. 227 1948
Costs Retarding Railroad Electrification, Are the Overhead Distribution? Birch....243–55; disc. 255 1948
Costs Study of 69- to 345-Kv Overhead Power-Transmission Systems. Holm.....406–22 1944
Cotton Industry in the South, Electrification of the. Bobe.....201–08; disc. 208 1947
Coulomb Friction on the Performance of Servomechanisms, The Effect of. McCann, Lindvall, Wilts....540–6 1948
Counterpoise for Transmission-Line Lightning Protection, Practical Design of. Hansson, Waldorf.....599–603; disc. 1010 1942
Counterpoise Wires in High-Resistance Soil on Consumers Power Company 140-Kv System, Study of Driven Rods and. Hemstreet, Lewis, Foust.....628–34; disc. 1000 1942
Counting with Relays. Frost...587–91 1949
Coupled Amplifier, The Resistance-. Cowles.....359–65 1945
Coupled Amplifiers Using Pentode Tubes, Calculation and Design of Resistance-. Terman, Hewlett, Palmer, Pan...879–84; disc. 1133 1940
Coupled Oscillograph Amplifier, Direct. Christian.....1383–6 1947
Couplers for Bus Protection, Linear. Harder, Klemmer, Sonnemann, Wents.....241–8; disc. 463 1942
Coupling by Means of Static Electronic Frequency Changers, Network. Marti.....495–503; disc. 1163 1940
Coupling Capacitors and Traps for Rural Line Carrier. (Committee Report).....1476–8 1948
Coupling Factors Between Ground Wires and Phase Conductors, The Effect of Corona on. McCann.....818–26; disc. 940 1943
Coupling Method, A Simplified Double-Film Klydonograph With an Improved. Waghorne.....1114–16; disc. 1116 1947
Coupling of Power-Line Carrier Equipment, A Proposal for Broad-Band. Miller.....1028–30; disc. 1030 1949
Couplings, Electric. Lory, Kilgore, Baudry.....423–8; disc. 1212 1940
Course in Industry in High-Frequency Engineering, A New Postgraduate. Stevenson, Ramo..374–8; disc. 378 1940
Courses at Graduate Levels—A Challenge to Colleges of Engineering, Evening. Beach..88–94; disc. 430 1942
Courses to Develop Facility in the Use of Mathematics and Physics in the Solution of Engineering Problems. Teare.....40–1; disc. 43 1939
Crane Hoists, A Thrustor Lowering Control System for A-C. Schwarz-Kast.....139–44; disc. 144 1947
Cranes, A New Electric Hoist Drive for. Whiting.....59–64 1944
Crawford 220-kv Line—Design and Construction Features, Powerton-. Oldacre, Wollaston.....1108–20; disc. 1297 1941
Crawford 220-kv Line-System Operating Features and Terminal Design, Powerton-. Wulfing, LeClair.....1084–9; disc. 1304 1941
Crest Voltmeters, The Calibration of Ignition. Davis, Warren.....99–104; disc. 104 1947
Criteria, Anode-Circuit-Breaker Design and Performance. Boehne, Atwood.....337–45; disc. 437 1945
Criteria for Current-Limiting Power Fuses, Performance:
Part I. Schuck..1028–34; disc. 1191 1946
Part II. Boehne..1034–45; disc. 1191 1946
Criteria for Neutral Stability of Wye-Grounded-Primary Broken-Delta-Secondary Transformer Circuits. Shott, Peterson.....997–1002; disc. 1394 1941
Criteria of D-C Interrupters, Performance. Boehne, Jang.....1172–80; disc. 1180 1947
Critical Conditions in Ferroresonant Circuits, Similitude of. Thomson.....127–30; disc. 130 1939
Critical Conditions of the Ferroresonant Parallel Circuit, The Generalized Solution for the. Thomson.....743–6; disc. 746 1939
Critical-Material Conservation in Induction-Motor Manufacture. Hobart.....549–52; disc. 927 1943
Cross-Air-Blast Circuit Breaker, The. Prince, Henley, Rankin.....510–17; disc. 1121 1940
Cross-Field and Revolving-Field Concepts, Single-Phase Motor Theory—a Correlation of the. Button.....507–12; disc. 664 1941
Cross-Field Theory of the Capacitor Motor, The. Puchstein, Lloyd.....58–62; disc. 667 1941
Cross Section, Formulas for Calculating Temperature Distribution in Transformer Cores and Other Electric Apparatus of Rectangular. Higgins.....190–4; disc. 493 1945
Crossarms, The Preservative Treatment of Various Species for Poles and. MacLean.....549–54 1946
Crossbar Dial Telephone Switching System. Studder, Reynolds.....179–192 1939
Crossbar Toll Switching System. Abraham, Busch, Shipley.....302–09; disc. 473 1944
Crossed-Coil Power-Factor Meters. Millar.....294–301; disc. 460 1944
Crystal Channel Filter for Broad Band Carrier Systems, A New. Willis.....134–8; disc. 490 1946
Crystal Filters Using Ethylene Diamine Tartrate in Place of Quarts. Willis.....552–6 1948
Crystal Orientation on the Wear of Watt-Hour-Meter Bearings, Effect of Sapphire-. Goss.....811–14; disc. 1336 1941
Crystal Units, Design and Performance of Ethylene Diamine Tartrate. Griffin, Pennell.....557–61 1948
Crystals of Ethylene Diamine Tartrate, Growing. Walker, Kohman.....565–70; disc. 570 1948
Cultural Training of the Engineer. Boyajian.....6–9; disc. 478 1944
Cumulative and Differential Series Fields in the Parallel Operation of D-C Motors, Use of. Kimball.....1098–1100 1949
Current- and Potential-Transformer Standardisation. (Committee Report).....698–706; disc. 998 1942
Current and Torque of D-C Machines on Short Circuit. Linville.....956–65; disc. 1144 1946
Current at High Voltage, The Interruption of Charging. Leeds, Van Sickle.....373–80; disc. 381 1947
Current Channels, A Faster Telemeter for Carrier. Lynch, Thomas, Lunge.....288–94; disc. 294 1948
Current Collectors for High-Speed Service, Developments in. Langer.....51–4 1947
Current Control Circuit, Polyethylene Insulated Coaxial Cable for Carrier. Slade, West...1416–18; disc. 1419 1948
Current Cutout, Proposed Circuit for Aircraft Reverse-. Marsolf. 1246–8 1948
Current Differential Protection for Transformer Banks, Carrier-. Cramer.....545–8; disc. 947 1943
Current Distribution in a Rectangular Conductor. Daley. 687–90; disc. 690 1939
Current Equipment, Field Tests on Power-Line Carrier-. Miller, Prud'Homme.....824–7; disc. 1177 1946
Current Equipment for Telemetering and Load Control, Characteristics of New Carrier-. Beckwith.....1649–52; disc. 1652 1948
Current Facilities for a Power Line, Multichannel Carrier. Sandstrom, Foster.....71–6; disc. 469 1942
Current Flow to Ground Faults, The Effects of Mutual Induction Between Parallel Transmission Lines on. Holbeck, Lants.....712–15; disc. 1002 1943
Current Frequencies, Loss Measurements Made on Underground-Cable Overhead-Conductor 132-Kv Transmission Line at Carrier. Cornelius, Storer.....597–601 1949
Current Frequencies, Report on Method of Measurements at Carrier-. (Committee Report).....1429–32; disc. 1432 1948

Current, Frequency Modulation for Power-Line Carrier. Kenefake.... 616–20; disc. 953 1943
Current in Parallel Circuits and Its Effect Upon Relays, Induced. Bancker.....582–5; disc. 585 1939
Current Installation on Power Lines, Line Tuning Equipment Used With Coaxial Cable for Carrier. Sutton. .....44–8; disc. 48 1949
Current into Rods, Tubes, and Flat Surfaces, Diffusion of Electric. Miller.....1496–1502 1947
Current-Limiting Fuse, A New. Rawlins, Strom, Graybill..... .....77–80; disc. 657 1941
Current-Limiting Fuse for Aircraft Applications, A. Powel.....541–5 1945
Current-Limiting Power Fuse, A New Three-Element. Rawlins, Fahnoe. .....156–9; disc. 451 1944
Current-Limiting Power Fuse, Control of the Switching Surge Voltages Produced by the. Williams, Schuck.....214–17; disc. 678 1941
Current-Limiting Power Fuse, The. Prince, Williams..... .....11–14; disc. 15 1939
Current-Limiting Power Fuses, Performance Criteria for:
Part I. Schuck..1028–34; disc. 1191 1946
Part II. Boehne..1034–45; disc. 1191 1946
Current-Limiting Reactors, Interim Report on Overloading. (Committee Report)..611–12; disc. 968 1943
Current Loci for the Capacitor Motor. McFarland.....152–6 1942
Current Loss in Laminated Cores, Interlaminar Eddy. Beiler, Schmidt... .....872–7; disc. 877 1947
Current Measurements During Reignitions and Recovery, Circuit-Breaker. Lewis..... .....1253–7; disc. 1257 1947
Current Measuring Device, Fault-. Lants.....839–43 1946
Current Mercury-Arc Rectifiers, Phase Occurrence of Arc-Backs in High-. Pakala, Batten.....345–7 1940
Current Motor Systems, Electronic Constant-. Livingston..... .....425–30; disc. 430 1947
Current Rating and Life of Cold-Cathode Tubes. Rockwood..... .....901–03; disc. 1390 1941
Current Rating of Cables as Affected by Mutual Heating in Air or Conduit. (IPCEA Committee Report)..... .....354–65; disc. 424, 1352 1944
Current Ratings for Aircraft Wire and Cable, Short-Time. Jones, Scott. .....644–8; disc. 1135 1946
Current Ratings of Aircraft Cable. Askew, McClinton.....988–92 1949
Current Ratings of Electronic Devices for Intermittent Service. Hellmund.....569–73 1942
Current Regulators, Resonant-Type Constant-. Miner..... .....822–8; disc. 828 1939
Current Relations for Controlled Rectification With Inductive and Generative Loads, Voltage and. Puchlowski.....255–60; disc. 442 1945
Current Relay, A New High-Speed Balanced-. Stewart..... .....553–5; disc. 972 1943
Current Relay Channel to Other Uses, Possibilities and Methods of Extending a Carrier. Smith, Goldsborough.....23–7; disc. 645 1941
Current Resistance of Multilayer Coils, Eddy-. Long.....712–18 1945
Current-Restrained Relays for Transformer Differential Protection, Harmonic-. Hayward..... .....377–82; disc. 622 1941
Current-Secondary Current Transformers, Low-. (Committee Report).....649–50 1946
Current, The Measurement of Spot-Welding. Hess, Wyant, Muller... .....349–53; disc. 353 1940
Current-Transformer Characteristics, A Simple Method for the Determination of Bushing-. Moreton..... .....581–5; disc. 948 1943
Current-Transformer Characteristics, Bus Protection Independent of. Steeb.....859–62; disc. 1365 1941
Current-Transformer Design Method, Biased-Core-. Specht.....635–40 1945
Current-Transformer Design, New Developments in. Camilli..... .....835–42; disc. 1099 1940
Current-Transformer Errors, A Proposed Method for the Determination of. Camilli, Ten Broeck.. .....547–50; disc. 1138 1940
Current-Transformer Errors by the Secondary-Voltage Method, Field Determination of. Goodale, Holbeck.....879–82; disc. 1468 1944
Current Transformer for Bus Differential Protection, New. Kennedy, Sinks.....1180–7; disc. 1363 1941
Current Transformer for Metering, Orthomagnetic Bushing. Boyajian, Camilli....137–40; disc. 427 1945
Current-Transformer Output and Application Charts. Koller..... .....573–7; disc. 1422 1944
Current - Transformer Performance, Analysis of Bushing-. Gebelein, Elzi.....541–6; disc. 1137 1940
Current-Transformer Performance Based on Admittance-Vector Locus. Schwager.....26–30; disc. 465 1942
Current-Transformer Residual Magnetism on Balanced-Current or Differential Relays, The Effect of. Seeley.....164–9; disc. 384 1943
Current-Transformer Secondary Windings and Associated Circuits, Overvoltage Protection of. Kaufmann, Camilli.....467–72; disc. 919 1943
Current Transformers, A Simple Method for Determination of Ratio Error and Phase Angle in. Wentz. .....949–54; disc. 1369 1941
Current Transformers and Relays for High-Speed Differential Protection, With Particular Reference to Offset Transient Currents. Wentz, Sonnemann.....481–8; disc. 1144 1940
Current Transformers, Computation of Accuracy of. Sinks..... .....663–8; disc. 1252 1940
Current Transformers During Faults, Transient Characteristics of:
Part I. Concordia, Weygandt, and Shott.....280–5; disc. 469 1942
Part II. Concordia and Rothe..731–4 1947
Current Transformers for High Overcurrent Capacity, The Evolution of Standard Lines of. Wentz..... .....658–62; disc. 1426 1944
Current Transformers, Instantaneous Bus-Differential Protection Using Bushing. Seeley, von Roeschlaub. .....1709–18; disc. 1718 1948
Current Transformers, Overcurrent Performance of Bushing-Type. Woods, Bottonari.....554–60; disc. 1140 1940
Current, Transient Voltage Rise in Transformers Due to Interruption of Exciting. Srinivasan, Vogel... .....1632–6 1947
Current Wave Forms of Controlled Rectifier Circuits, A Graphical Analysis of the Voltage and. Chin, Moyer.....501–08 1944
Current Zero by Means of Mathematical Models, A Study of A-C Arc Behavior Near. Browne..... .....141–50; disc. 150 1948
Current-Zero Phenomena, The Geometry of Arc Interruption. Boehne: Part I.....524–32 1941
Part II.....375–87; disc. 448 1944
Currents, An Experimental Investigation of Subharmonic. McCrumm. .....533–40; disc. 722 1941
Currents, An Instrument for the Measurement of Large Alternating. Richter.....38–40 1944
Currents and Influence on System Operation, Transformer Magnetizing Inrush. Blume, Camilli, Farnham, Peterson...366–75; disc. 423 1944
Currents and Recovery Voltages on Rural Distribution Systems, Short-Circuit. Eason, Johnson, Kalb, Peterson.....930–7; disc. 937 1949
Currents and Their Effect on Lead-Cable-Sheath Corrosion, Study of A-C Sheath. Sherer, Granbois.... .....264–8; disc. 483 1945
Currents, Burning of Wood Structures by Leakage. Ross..... .....279–84; disc. 285 1947
Currents, Dangerous Electric. Dalziel. .....579–85; disc. 1123 1946
Currents Determined Easily on D-C Board, System Voltages and Fault. Asbury.....184–8; disc. 439 1944
Currents Discharged by Arresters, Field Investigation of the Characteristics of Lightning. Gross, McCann, Beck.....266–71; disc. 461 1942
Currents, Effect of Frequency on Let-Go. Dalziel, Ogden, Abbott..... .....745–50; disc. 998 1943
Currents, Effect of Wave Form on Let-Go. Dalziel..739–44; disc. 998 1943
Currents in a Nonlinear Series Circuit, The Effect of Initial Conditions on Subharmonic. Angello.....625–7 1942
Currents in a Rotating Disk, On Eddy. Smythe.....681–4 1942
Currents in Arresters at Stations, Lightning. Gross, McMorris..... .....417–22; disc. 1110 1940
Currents in Coal Mines, Causes and Effects of Stray Electric. Harrison. 1759–61 1948
Currents in Dielectrics With a Cathode-Ray Tube, Measurements of Pre-Breakdown. Race..... .....854–8; disc. 1388 1941
Currents in Direct Strokes, The Measurement of Lightning. McCann.....1157–64; disc. 1370 1944
Currents in Disks: Driving and Damping Forces and Torques, Eddy. Moore.....1–10; disc. 10 1947
Currents in Distribution Transformers Due to Lightning, Abnormal. Bryant, Newman..... .....564–8; disc. 1003 1942
Currents in Long Transmission Lines, Abnormal Overvoltages Caused by Transformer Magnetizing. Peterson, Schroeder.....32–40; disc. 1943
Currents in Low-Voltage A-C Circuits, Arcing Fault. Wagner, Fountain.. .....166–72; disc. 172 1948
Currents in Low-Voltage Circuits, Fault Voltage Drop and Impedance at Short-Circuit. Schurig..... .....479–87; disc. 654 1941
Currents in Low-Voltage Circuits, Voltage Stresses in Distribution Transformers Due to Lightning. Beardsley, McMorris, Stewart.... .....1632–5; disc. 1635 1948
Currents in Squirrel-Cage Induction Motors, Rotor-Bar. Gault..... .....784–91; disc. 1327 1941
Currents, New Instruments for Recording Lightning. Wagner, McCann.....1061–8; disc. 1253 1940
Currents of Multilayer Windings, Effective Resistance to Alternating. Bennett, Larson..... .....1010–17; disc. 1262 1940
Currents on Rural Distribution Systems, Graphical Method of Calculating Fault. Linder..... .....16–19; disc. 446 1945

Currents on Transmission Lines as Affecting Ground-Fault Neutralizers, Report on Survey of Unbalanced Charging. (Committee Report).....1328; disc. 1329 1949
Currents, Paired-Phase Bus Bars for Large Polyphase. Fisher, Frank.....71–7; disc. 417 1943
Currents, Rectifier Fault:
Part I. Herskind & Kellogg.....145–50; disc. 441 1945
Part II. Herskind, Schmidt, & Rettig.....243–51; disc. 252 1949
Currents, Simplified Calculation of Fault. (Committee Report):
Part I.....1133–35 1942
Part II.....1433–35 1948
Currents, System Short-Circuit. Hanna, Travers, Wagner, Woodrow, Skeats.....877–81; disc. 1351 1941
Currents, The Measurement of Body. Schwab.....919–23 1941
Currents, The Measurement of Large Varying. Johnson.....8–11; disc. 513 1946
Currents With Parallel Transformers Affect Differential Relaying, Prolonged Inrush. Hayward.....1096–1101; disc. 1305 1941
Curvature Tensor, Equivalent Circuits for Oscillating Systems and the Riemann-Christoffel. Kron.....25–32; disc. 372 1943
Curve Tracer for Magnetic-Recording Wire, A B-H. Long, McMullen.....146–50; disc. 494 1946
Curves, Control Chart Methods Applied to Frequency Response. Mundel.....424–7 1949
Curves, Dynamic Braking Control of D-C Series Motors—Experimental Study of Speed-Torque. Heumann.....560–4 1949
Curves for D-C Controllable Reactors, Universal. Johnson, Merrell, Alley.....31–7; disc. 37 1949
Curves in Engineering, The Combination of Probability. Wilkinson.....953–63 1942
Curves, Synthetic or Equivalent Load. Hamilton.....369–81 1942
Curves, The Summation of Load. Hamilton.....729–35; disc. 1361 1944
Cushioning of Gas-Filled Grid-Controlled Rectifiers, Circuit. Edwards, Smith....640–3; disc. 1131 1946
Cutout, Aircraft Voltage Regulator and. Jones, Exner, Wright.....334–9 1942
Cutout, An Aircraft Differential-Voltage. Walley.....632–4; disc. 1365 1944
Cutout, Proposed Circuit for Aircraft Reverse-Current. Marsolf.1246–8 1948
Cycle of Modern Blooming Mills, The Reversing. Montgomery, Sellers.....1508–13; disc. 1513 1948
Cycle Out-of-Step Relay Equipment, One Slip. Morris.....1246–8 1949
Cycle Tests on Solenoids, A Method for Correlating Duty-. Ryan.....579–81; disc. 945 1943
Cycles, A Precision Electrothermic Voltmeter for Measurements Between 20 and 20,000. Hermach.....1224–7 1948
Cycles, A Study of Short-Time Ratings and Their Application to Intermittent Duty. Hellmund, McAuley.....1050–5; disc. 1221 1940
Cycles and Motor Rating, Duty. Hildebrand.....478–83; disc. 483 1939
Cycles, Behavior of Point Gaps at 60. Lebacqz.....44–8; disc. 651 1941
Cyclic Movement of Cable—Its Causes and Effects on Cable-Sheath Life. Schifreen.....1121–30; disc. 1388 1944
Cylinders for Aircraft Gyroscopes, Damping. Sias, Wright...979–85 1944
Cylindrical Charges, Induction Heating of Long. Storm.....369–77 1946
Cylindrical Coil, Formulas for the Magnetic-Field Strength Near a. Dwight.....327–33; disc. 445 1942
Cylindrical Conductors, Resistance and Capacitance Relations Between Short. ReQua..724–30; disc. 962 1945
Cylindrical Magnetic Loads, Design of Induction Heating Coils for. Vaughan, Williamson.....887–92; disc. 1165 1946
Cylindrical Nonmagnetic Loads, Design of Induction-Heating Coils for. Vaughan, Williamson.....587–92; disc. 965 1945

D

Damage Phenomena on Aircraft Structures, Electric-Circuit Burning-Clear and. Foust, Hutton.....198–204; disc. 457 1944
Damage to Aircraft, Lightning Stroke. Hagenguth....1036–44; disc. 1044 1949
Damages, Protection of Industrial Plants Against Insulation Breakdown and Consequential. Vaughan.....592–6; disc. 1166 1946
Damper Stabilized Instrument Servomechanisms. Hall.....299–306; disc. 306 1949
Damper Windings at Wilson Dam, Generator. George, Bessesen.....166–71; disc. 171 1939
Dampers, Conductor Vibration—Theory of Torsional. Speight.....907–11; disc. 1376 1941
Damping and Synchronizing Torque of the Double-Fed Asynchronous Machine. Liwschits.....923–4 1941
Damping and Synchronizing Torques of Power Selsyns. Concordia, Kron.....366–71; disc. 490 1945
Damping Cylinders for Aircraft Gyroscopes. Sias, Wright.....979–85 1944
Damping Effect of D-C Marine Propulsion Motors on Vibrations Produced in Drive Shafts by Large Propellers. Litman.....31–7 1945
Damping Forces and Torques, Eddy Currents in Disks: Driving and. Moore.....1–10; disc. 10 1947
Damping in Synchronous Machines, Positive and Negative. Liwschits.....210–13 1941
Damping of Electrical Machinery, Negative. Concordia, Carter.....116–19; disc. 752 1941
Dangerous Electric Currents. Dalziel.....579–85; disc. 1123 1946
Data on the High-Frequency Resistance of Coils. Witzig.....764–9 1947
Data, Prediction of Ultimate Temperature Rise from Early Heat Run. Ryan.....1164–6 1949
Data, The Design of Bus-Bar Industrial Distribution Systems: an Epitomization of Available. Higgins.....385–400; disc. 486 1945
Dead Band of Governors on Steam Turbine Generators Under System Load Conditions, Determining Incremental Regulation and. Tornquist, Wade.....1343–7 1949
Dead-Coil Windings, Fractional-Slot and. Malti, Herzog.....782–94; disc. 1079 1940
Dead Points in Squirrel-Cage Motors. Graham.....637–42 1940
Decade of Progress in the Use of Electronic Tubes, A.:
Part I. In the Field of Communication. Ingram.....543–9 1940
Part II. Other than Communication Field. White.....650–4 1940
Deceleration Test Methods to the Determination of Induction-Motor Performance, An Application of. Ager.....72–6 1939
Deflection A-C Potentiometer, A Multiplied-. Marshall.....77–80; disc. 460 1944
Deformation on Turbogenerators, Prevention of Rotor-Winding. Noest.....514–19; disc. 1353 1944
Degaussing Coils on Shipboard Magnetic Compasses by Use of Compass-Compensating Coils, Compensation of Effects of. Robinson.....1278–81 1948
Degaussing Installations for Protection Against Magnetic Mines, Shipboard. Michel..1270–5; disc. 1275 1948
Degree of Short-Circuit Protection Afforded Small Low-Voltage A-C and D-C Starters by Means of Fuses and Circuit Breakers, The. Jones.....611–12; disc. 1408 1944
Deicing, Control and Power Systems for Aircraft Window. Mershon.....1400–05 1947
Deicing of Aircraft Propellers, Development and Application of Electric Heating to. Sheets, Sand.....1068–72 1949
Deicing System for Aircraft, An Electric. Giloy.....1051–7 1949
"De-ion" Air Breaker for 2,500–5,000 Volts, Magnetic. Ludwig, Nau.....518–22; disc. 1125 1940
"De-ion" Air Circuit Breaker for Central-Station Service, High-Power. Dickinson.....421–25; disc. 425 1939
Deionization Time of High-Voltage Fault-Arc Paths. Harrington, Starr.....997–1003; disc. 1003 1949
Deionization Times as a Factor in Applying High-Speed Reclosing Circuit Breakers, Insulator Flashover. Boisseau, Wyman, Skeats.....1058–66; disc. 1066 1949
Deionization Times of Thyratron Tubes, A Method for the Measurement of the Ionization and. Birnbaum.....209–14 1948
Delay Equalisers for Coaxial Lines, Attenuation and. Lundry.....1174–9 1949
Delivery of Telegrams, Facsimile Transmission for Pickup and. Ridings.....1293–8 1948
Delta, Mobile Capacitor Units for Emergency Loading of Transformers in Open. Wolf, Mattison.....83–6; disc. 373 1943
Delta-Secondary Transformer Circuits, Criteria for Neutral Stability of Wye-Grounded-Primary Broken-. Shott, Peterson.....997–1002; disc. 1394 1941
Delta Transformer Banks—Analysis of Circuit, Open-. Clem.....292–7; disc. 374 1943
Demagnetizing Forces, The Output and Optimum Design of Permanent Magnets Subjected to. Hornfeck, Edgar .....1017–24; disc. 1256 1940
Demand, Measurement of Maximum. Lincoln.....57–62; disc. 472 1942
Demand Meter, A New Thermal Volt-Ampere. Douglass, Morong.....79–83; disc. 83 1949
Demand Meter, A Polyphase Thermal Ampere-. Petzinger.....167–74 1947
Demand-Meter Testing Techniques, Thermal-. Lynch, Douglass.....124–8; disc. 514 1946
Demand-Meter Time Periods. Lincoln, Sprole.....729–33; disc. 733 1939
Demand Meters, Heat Flow Ratio as a Design Parameter in Thermal. Nelson.....885–90; disc. 890 1949
Density, Peak Voltages Induced by Accelerated Flux Reversal in Reactor Cores Operating Above Saturation. Specht, Wents....254–63 1946
Deposits, Insulators to Withstand Air-Borne. Taylor.....1436–41; disc. 1441 1948

Depth of Sea Water, An Instrument for Recording Continuously the Salinity, Temperature, and. Jacobson....714–22 1948

Depthometer, The Submarine-Cable Nelson....691–5 1939

Derivation of Heaviside's Operational Calculus Based on the Generalised Functions of Schwartz, A. Smith, Alger....939–44; disc. 944 1949

(Derivatives) A New Method for Introducing Relaxed Initial Conditions in Transient Problems. Johnson....178–81 1941

Design, A New Outdoor Air Switch and the Principles Involved in Its. Graybill, Ferguson....583–6; disc. 953 1945

Design, A New Principle of Cable. Del Mar....206–10; disc. 705 1941

Design, A New Wire Recorder Head. Long....216–20; disc. 495 1946

Design and Application of Supersonic Flaw Detectors. Erdman..1271–6 1947

Design and Application, Selsyn. Johnson....703–08; disc. 960 1945

Design and Arrangement of Electrical Equipment in Hydraulic Power Plants, Trends in the. Welchel....78–82; disc. 86 1939

Design and Construction Features, Powerton-Crawford 220-Kv Line—. Oldacre, Wollaston....1108–20; disc. 1297 1941

Design and Construction of High-Capacity Air-Blast Circuit Breakers. Strang, Boisseau....522–7; disc. 1131 1940

Design and Experience with 4-Kv Primary Network Systems in the Washington Area. Lank....712–16; disc. 716 1949

Design and Layout of 66-Kv 10,000-Kva Series Capacitor Substation. Miller....355–9 1948

Design and Measurements of Capacitor Discharge Welding Transformers. Diets, Stein....154–9; disc. 512 1946

Design and Operating Characteristics of Modern Dry-Type Air-Cooled Transformers. Satterlee....701–04; disc. 1445 1944

Design and Operation of a Metropolitan Electrical System From the Viewpoint of Possible Major Shutdowns, The. Dean....575–9; disc. 1150 1940

Design and Operation of High-Voltage Axial Air-Blast Circuit Breakers. Leuthold....869–75; disc. 1073 1942

Design and Operation of the Plantation Pipe Line, Electrical Features of. Hyde, Britton..638–44; disc. 1051 1942

Design and Performance Based on Direct Lightning Strokes, Transmission Line. Harder, Clayton....439–46; disc. 447 1949

Design and Performance Criteria, Anode-Circuit-Breaker. Boehne, Atwood....337–45; disc. 437 1945

Design and Performance of Ethylene Diamine Tartrate Crystal Units. Griffin, Pennell....557–61 1948

Design, and Performance of Magnetic-Type Power Circuit Breakers, The Development. Linde, Wyman....386–93; disc. 510 1946

Design and Protection of 10,000-Kva Series Capacitor for 66-Kv Transmission Line. Johnson, Marbury, Arthur....363–7; disc. 368 1948

Design and Performance of the Vertical Generator Thrust Bearings at the Bonneville Plant of the Corps of Engineers, War Department, The. Lewis, Gordon....1231–7; disc. 1237 1947

Design and Ventilation, Transformer Manholes and Vaults: Porter....534–9 1949

Design Characteristics of Amplidyne Generators, The. Fisher....939–44; disc. 1135 1940

Design Considerations for D-C Aircraft Generators. Miner....1234–40; disc. 1459 1944

Design Considerations for Multivalve Condensing Steam Turbine-Generators, Speed Governing. Barnett....1557–61; disc. 1561 1948

Design Considerations in Aircraft Instruments to Meet War Service. Savage, Whittenton....992–8; disc. 1419 1944

Design, Considerations in Servomechanism. Herwald....871–6 1944

Design Considerations of 400-Cycle Aircraft Motors. Sawyer....877–9; disc. 1464 1944

Design Considerations of High-Frequency Twin-Conductor Cable. Greenfield....932–3 1945

Design, Consolidated Edison Co. of New York, Inc., Modernization of Switch-House. de Bellis....752–60; disc. 778 1939

Design Factors Involved in the Design of Domestic Motored Appliances. Packer....500–07; disc. 665 1941

Design Features of Generators for Diesel-Electric Switcher Locomotives. Atwell....41–5; disc. 433 1944

Design Features—Steam-Electric Generating Station P of the Pacific Gas and Electric Company, Electrical. Benson....1013–20; disc. 1020 1949

Design for Aircraft, High-Voltage Ignition Cable. Wermine....716–19; disc. 993 1943

Design for High Altitudes, A Small High-Voltage Bushing. Vogel, Hart....761–4 1949

Design for Low Harmonic Radiation and Good Frequency Stability, FCC Diathermy. Chapin, Roberts, Mobley....42–6; disc. 46 1948

Design for the A-C Network Analyzer, A New. Ryder, Boast....674–80; disc. 1162 1946

Design Fundamentals of Potheads 69,000 Volts and Below. Nicholas....1263–7; disc. 1267 1949

Design, General Considerations in Radio-Frequency-Cable. Wents...925–6 1945

Design, High-Voltage Power-Transformer. Mallett:
Part I....526–31; disc. 966 1943
Part II....1086–91; disc. 1091 1947

Design Improvements, Aircraft Carbon-Pile Voltage Regulators, Fundamentals, and. Austin, Richards....983–7 1949

Design Information, A Method of Selecting Inherent Overheat Protectors Based Upon Motor. Vaughan....1023–9; disc. 1030 1948

Design, Manufacture, and Installation of 120-Kv Oil-Filled Cables in Canada. Farnham, Titus....881–9; disc. 1074 1942

Design Method, Biased-Core-Current-Transformer. Specht....635–40 1945

Design Method for Capacitor Motors, A. Lloyd, Chang....651–7; disc. 657 1947

Design Method for Capacitor Start Motors, A. Chang....1369–74 1947

Design Method for D-C Machines, A. Beers, Karr....172–5; disc. 497 1944

Design, Modern Trends in Hydraulic Turbine. Rheingans....1075–80 1948

Design, Modernization of Switch-House. Strang, Hanna....747–51; disc. 778 1939

Design, New Developments in Current-Transformer. Camilli....835–42; disc. 1099 1940

Design, New Developments in Potential-Transformer. Camilli....483–7; disc. 920 1943

Design of a D-C Selsyn System, Analysis and. Manildi....512–16; disc. 946 1945

Design of Aircraft Electric Actuator Equipment, Functional. Gagnier....813–15; disc. 1464 1944

Design of an Electronic Frequency Changer. Willis, Kuenning, Christensen, Bedford..1070–8; disc. 1413 1944

Design of an Ignition System for an 18-Cylinder Aircraft Engine. Harkness....1321–7; disc. 1467 1944

Design of Auxiliary Circuits of Single-Phase Induction Motors. Thacker, Gopalakrishna....1373–9 1949

Design of Bus-Bar Industrial Distribution Systems: an Epitomization of Available Data. Higgins....385–400; disc. 486 1945

Design of Counterpoise for Transmission-Line Lightning Protection, Practical. Hansson, Waldorf....599–603; disc. 1010 1942

Design of D-C Adjustable Speed Motors, Limitations in. Opel..1095–8 1949

Design of D-C Auxiliary Controllers for Marine Service. Schaelchlin....623–9 1946

Design of D-C Magnets, Factors Affecting the. Rader..307–10; disc. 387 1943

Design of D-C Motors for Use in Automatic Control Systems, The. Lebenbaum....1089–94 1949

Design of Electrical Equipment for Large Diesel-Electric Locomotives, Progress in. Smith....130–1; disc. 404 1942

Design of High-Speed Turbogenerators, Some Factors in the Mechanical. Mortensen, Ryan...51–6; disc. 56 1940

Design of High-Voltage Cable Joints, A Theoretical and Practical Approach to the. Short....1275–80; disc. 1280 1949

Design of Induction Heating Coils for Cylindrical Magnetic Loads. Vaughan, Williamson....887–92; disc. 1165 1946

Design of Induction-Heating Coils for Cylindrical Nonmagnetic Loads. Vaughan, Williamson....587–92; disc. 965 1945

Design of Long-Scale Indicating Instruments. Corson, Rowell, Hoare....318–27; disc. 476 1942

Design of Long-Scale Indicating Instruments, Advancements in the. Rowell, Millar....155–60 1947

Design of Low-Voltage Panel-Mounted Air Circuit Breaker, An Improved. Sperow, Favre....695–8; disc. 698 1948

Design of Low-Voltage-Welding Power Distribution, The. Adams, Fetcher, Johnson....1180–90; disc. 1382 1944

Design of Mobile Radio Communication Equipment for Land-Mobile Services Operating on Frequencies Between 152–174 Megacycles. Beers, Harris, Zappacosta....1232–9 1949

Design of New York Subway Motors for Dynamic Braking, The. Widell....808–10 1947

Design of Permanent Magnets Subjected to Demagnetising Forces, The Output and Optimum. Hornfeck, Edgar...1017–24; disc. 1256 1940

Design of Resistance-Coupled Amplifiers Using Pentode Tubes, Calculation and. Terman, Hewlett, Palmer, Pan...879–84; disc. 1133 1940

Design of Sealed Ignitron Rectifiers for Three-Wire Service. Morack....103–07 1945

Design of Shunt-Capacitor Equipments Switched in Large Banks, Analysis of Factors Which Influence the Application, Operation, and. Butler....795–800; disc. 1096 1940

Design of Starting Windings for Split-Phase Motors. Lloyd, Karr..9–13 1944

Design of Systems for Load Growth, The Effect of Kilovar Supply on the. Shcroeder, Butler, Meyers.. .....69–77; disc. 492 1944
Design of Traction Motors, Twenty-Five Years' Progress in the. Baldwin.....132–7 1949
Design of Variac Transformers. Karplus.....508–13 1944
Design Parameter in Thermal Demand Meters, Heat Flow Ratio as a. Nelson.....885–90; disc. 890 1949
Design, Phonograph Reproducer. Bachman.....159–62 1946
Design, Postwar Television Receiver. Pugsley.....453–8 1947
Design Principles for A-C Electric-Power Systems in Large Military Aircraft, Basic. Chappuis, Olmsted.....12–17; disc. 487 1946
Design Relationships for D-C Generators for Use in Aircraft. Bergman.....613–16; disc. 957 1943
Design, Tennessee Valley Authority Hydroelectric Stations—Electrical. Hopkins.....1281–93; disc. 1408 1941
Design, Tennessee Valley Authority Hydroelectric Stations—Electrical and Mechanical. Hopkins, Petersen.....920–31; disc. 1132 1946
Design—the Design and Properties of the Magnetic Circuit, Some Aspects of Polyphase Motor. Lloyd, Stone.....812–18; disc. 1151 1946
Design Trends, Frequency Modulation Receiver. Young.....1514–19 1948
Design Trends of Electrical Instruments, Influence of Improved Magnetic Alloys on. Wilson, Whitenton.....100–04; disc. 461 1944
Design Utilising New Laboratory Techniques, Cable Accessory. Bosworth, Farr...1268–73; disc. 1273 1949
Designing Capacitor Motors, The Equal-Volt-Ampere Method of. Trickey.....990–2; disc. 1399 1941
Designing Pulse Transformers, A Method for. Kirschbaum, Warren. 971–8 1949
Designs Require Special Features to Insure Radio Quietness, Some Insulator. Miller...62–6; disc. 657 1941
Detecting Relay, A New Single-Phase-to-Ground Fault-. Sonnemann.... .....677–80; disc. 995 1942
Detecting the Ionisation Point on Electrical Apparatus, A Method for. Quinn.....680–2; disc. 1229 1940
Detection, Air-borne Radar for Navigation and Obstacle. Jensen, Arnett. .....307–13; disc. 491 1946
Detection and Location by Surge-Comparison Testing, Winding-Fault. Moses, Harter..... .....499–503; disc. 945 1945
Detection by Sonar, Submarine. Keller. 1217–30 1947
Detection Methods as Applied to Distribution Transformers, Impulse-Failure-. Stewart, Holcomb..... .....640–44; disc. 956 1945
Detection Methods, Experience with Transformer Impulse Failure. Aicher.....1621–7; disc. 1627 1948
Detection of Initial Failure in High-Voltage Insulation, The. Whitehead, Shaw.....267–72; disc. 761 1941
Detection of Overheated Transmission Line Joints by Means of a Bolometer. Leslie, Wait..64–8; disc. 68 1949
Detector Relay Protection, Typical Transformer Faults and Gas. Madill.....1052–8; disc. 1058 1948
Detectors, Design and Application of Supersonic Flaw. Erdman..1271–6 1947
Detectors for Measurements, Primary. Lynch, Corson.....843–53 1948
Detectors for Use With Impedance Bridges, Electronic Null. Lamson. 535–40 1947
Deterioration of Cellulose Insulation, Factors Affecting the Mechanical. Clark.....742–9; disc. 991 1942
Deterioration Treated as a Chemical Rate Phenomenon, Electrical Insulation. Dakin.113–18; disc. 118 1948
Determinants and Solving Systems of Linear-Equations With Real or Complex Coefficients, A Short Method for Evaluating. Crout.... .....1235–41 1941
Determination and Standardization, History of A-C Wave Form, Its. Bedell.....864–8; disc. 1071 1942
Determination of Cable Temperatures by Means of Reduced-Scale Models. Gemant, Sticher:
Part I.....475–82; disc. 1128 1946
Part II.....28–33; disc. 34 1948
Determination of Characteristics of Magnetic Amplifiers with Feedback, Analytical. VerPlanck, Finzi, Beaumariage.....565–70 1949
Determination of Corona Starting Voltages for Nonuniform Fields in Air. Hutton...1674–9; disc. 1680 1947
Determination of Current-Transformer Errors, A Proposed Method for the. Camilli, Ten Broeck..... .....547–50; disc. 1138 1940
Determination of Current-Transformer Errors by the Secondary-Voltage Method, Field. Goodale, Holbeck. .....879–82; disc. 1468 1944
Determination of Magnetic Properties by Use of Cathode-Ray Oscilloscope, Quantitative. Zamsky..... .....783–7 1947
Determination of Magnitude and Phase Angle of Electrical Quantities, The. Walker.....837–9; disc. 1333 1941
Determination of Ratio Error and Phase Angle, in Current Transformers, A Simple Method for. Wents.....949–54; disc. 1369 1941
Determination of Short-Circuit Torques in Turbine Genera ors by Test. Whitney, Criner.885–9; disc. 1195 1940
Determination of Temperature Rise of Induction Motors. Summers..... .....459–67; disc. 472 1939
Determination of the Capacitance of Heavy-Current Busses Comprised of Solid or Tubular Rectangular Conductors, Experimental. Teasdale, Higgins.....653–9; disc. 659 1948
Determination of Transfer Function Loci for Servomechanism Components and Systems, Graphical. Thomas, Easton.307–14; disc. 314 1949
Determination of Transient Shaft Torques in Turbine Generators by Means of the Electrical-Mechanical Analogy. McCann, Warren, Criner. .....51–6; disc. 492 1945
Determining Generator Reserve, A Convenient Method for. Seelye.. .....1317–20 1949
Determining Incremental Regulation and Dead Band of Governors on Steam Turbine Generators Under System Load Conditions. Tornquist, Wade.....1343–7 1949
Determining Natural Frequencies in Coils and Windings, Methods of. Bewley, Hagenguth, Jackson..... .....1145–50; disc. 1361 1941
Determining the Effects of Contaminants on Electrical Insulation, Methods for. Mathes, Sieffert, Walker, Lindsey.113–18; disc. 118 1949
Determining the Normal Modes of Foster's Reactance Networks, A Method for. LePage.....674–8 1943
Dethermalizing Arc Quenchers. Hunt, Cole.....720–4; disc. 988 1943
Development and Application of Electric Heating to Deicing of Aircraft Propellers. Sheets, Sand..1068–72 1949
Development and Manufacture, Statistical Methods Applied to Insulator. Taylor.....495–9; disc. 952 1945
Development, Design, and Performance of Magnetic-Type Power Circuit Breakers, The. Linde, Wyman.... .....386–93; disc. 510 1946
Development for Service to Hanford Plutonium Plant, Power System. Hoard, Curtin.....773–8 1946
Development in Lightning Protection of Stations. Whitehead..... .....898–900; disc. 1372 1941
Development in Mexico, Power. Urquidi, Del Busto, Lozano...841–2 1948
Development in Quebec, Hydroelectric Power. Lawton.....1006–21 1947
Development, Laboratory Aids for Electromechanical System. Newton, White.....315–19; disc. 319 1947
Development of a Metropolitan Electric System, Planning the. Waring... .....1467–72; disc. 1472 1948
Development of Aircraft Position Lights, The. Vitol..... .....796–8; disc. 1493 1944
Development of Apparatus Life Quality, Statistical Methods in the. Ferrell. .....700–03; disc. 998 1945
Development of Electric Connectors, Historical. Neifing.....925–8 1944
Development of Excitron-Type Rectifier. Winograd..... .....969–78; disc. 1454 1944
Development of Military Communications, Systems. Putnam..... .....757–61; disc. 1160 1946
Development of Modern Excitation Systems for Synchronous Condensers and Generators, The. Porter, Kinghorn..... .....1020–7; disc. 1156 1946
Development of 10,000,000-Kva 230-Kv Oil Circuit Breakers for Grand Coulee Power Plant, Field Tests for. Killgore, Clagett..... .....271–83; disc. 283 1948
Development of the Civil Aeronautics Authority Instrument Landing System at Indianapolis, The. Jackson, Alford, Byrne, Fischer... .....849–58; disc. 1120 1940
Development of the Electronic Power Converter, History and. Alexanderson, Phillipi..... .....654–7; disc. 1413 1944
Development of the Glow-Switch. Hays.....223–6; disc. 723 1941
Development of the Transmission System From the Grand Coulee Power Plant. Hoard, Helwith..... .....1095–1100; disc. 1100 1948
Development of the 12-Channel Open-Wire Carrier System, Line Problems in the. Ilgenfritz, Hunter, Whitman.....658–64; disc. 664 1939
Development of the 230-Kv Ring Bus for Grand Coulee Power Plant. Holmdahl, Killgore..... .....1369–78; disc. 1378 1948
Development of Trolley-Coach Overhead Reflected in Higher Service Standards, Progress in. Birch.... .....185–91 1942
Development, The Grand Coulee Power. Denton.....899–910; disc. 911 1948
Developments, Electronic Relay. Loving.....233–40; disc. 240 1949
Developments in Burying Telephone Cables, Recent. Fisher, Smith... .....169–74 1942
Developments in Connection With Hot-Line Insulator Washing, Tests and. Hill.....1203–16 1947
Developments in Control Systems for Diesel-Electric Locomotives. Henshaw.....233–41 1947
Developments in Current Collectors for High-Speed Service. Langer... .....51–4 1947

Developments in Current-Transformer Design, New. Camilli.....835–42; disc. 1099 1940

Developments in Generator Voltage Regulation, Recent. Hanna, Oplinger, Valentine..838–44; disc. 844 1939

Developments in Impulse-Voltage Testing, Some Recent. Foust, Rohats.....257–62; disc. 262 1940

Developments in Light Sources, Recent. Millar.....1505–17 1944

Developments in Potential-Transformer Design, New. Camilli.....483–7; disc. 920 1943

Developments in Speed Regulation, Recent. Hanna, Oplinger, Mikina.....692–700 1940

Developments in the Field of Cable and Radiotelegraph Communications. Pratt, Roosevelt.....1044–7; disc. 1386 1944

Developments in the PCC Car, Some Recent. Cooper..288–92; disc. 292 1947

Developments in the Pulp and Paper Industry, Electrical. Baker.....827–34; disc. 834 1948

Developments in Track Brakes and Drum Brakes for PCC Cars, Recent. Vouch.....302–04 1947

Developments on British Aircraft, Brief Survey of Power-Supply. Carter.....806–07; disc. 1503 1944

Deviation Indicator for Sonar, Bearing. Schuck, Stedman, Hathaway, Buts.....1285–95 1947

Device, Fault-Current Measuring. Lants.....839–43 1946

Device for Low-Voltage Circuit Breakers, An Improved Overcurrent Tripping. Rawlins, Sandin.....1149–53; disc. 1153 1947

(Devices) A New Fourier Coefficient Harmonic Analyzer. Charp.....644–9; disc. 649 1949

Devices and Suggested Material for a Standard, Rating of Potential. Clem, Langguth.....676–80; disc. 1217 1940

(Devices) Comparison of Long-Time and Short-Time Analog Computers. Paschkis.....70–3 1949

Devices Derived From a Torque Balance Telemeter, New. Burnham.....307–10 1948

Devices, Dynamic Measurements on Electromagnetic. Norton...151–6 1945

Devices for Aircraft, Preferred Practices for Electric Control. Hottenroth.....197–200; disc. 444 1945

Devices for Controlling Amplitude Characteristics of Telephonic Signals. Norwine.....62–7 1939

Devices for Intermittent Service, Current Ratings of Electronic. Hellmund.....569–73 1942

Devices on Diesel-Electric Locomotives, Speed-Responsive. Johansson.....336–8 1948

Devices, Performance Characteristics of Lightning Protective. (Committee Report).....1330–6 1949

Devices, Some Practical Measuring. Hunt.....765–8 1940

Diagnosis of Rectifier Ailments. Dortort.....1298–1304 1949

Diagram for a Four-Terminal Network and Its Application to the Capacitor Single-Phase Motor, A Generalized Circle. Tarboux.....881–9; disc. 943 1945

Diagram of the Polyphase Brush-Shifting Commutator Motor (Schrage Type), The Circle. Franklin.....1667–72; disc. 1672 1947

Diagrams, New Transmission-Line. Schwager, Wang.....610–15; disc. 955 1945

Dial Telephone Switching System, Crossbar. Scudder, Reynolds.....179–192 1939

Dial Telephone System, The Stromberg-Carlson XY. Reed.....432–8 1947

Diamine Tartrate Crystal Units, Design and Performance of Ethylene. Griffin, Pennell.....557–61 1948

Diamine Tartrate, Growing Crystals of Ethylene. Walker, Kohman.....565–70; disc. 570 1948

Diamine Tartrate in Place of Quarts, Crystal Filters Using Ethylene. Willis.....552–6 1948

Diathermy Apparatus and Frequency-Control Possibilities, Short-Wave. Gieringer.....459–64 1941

Diathermy Design for Low Harmonic Radiation and Good Frequency Stability, FCC. Chapin, Roberts, Mobley.....42–6; disc. 46 1948

Die Cast Rotor Testing by Test Stator Method. Trickey.....139–41; disc. 483 1946

Die-Cast Rotors for Induction Motors. Packer.....253–60; disc. 260 1949

Dielectric-Absorption Characteristics of Large A-C Stator Windings, Insulation Resistance and. Askey, Johnson.....347–51; disc. 458 1945

Dielectric-Absorption Tests in Drying Out Large Generators, Use of. Marcroft.....56–60; disc. 415 1945

Dielectric Breakdown Strength of Electric-Cable Insulating Papers, The True. Cloke, Bates.....1191–5; disc. 1195 1948

Dielectric Capacitors, The Probable Breakdown Voltage of Paper. Brooks.....1137–44; disc. 1144 1947

(Dielectric) Electrical Properties of Ceramics as Influenced by Temperature. Lindsay, Berberich.....734–41; disc. 741 1948

(Dielectric Heating) Capacitors for High-Frequency Induction-Heating Circuits. Clark, Scoville.....791–6; disc. 995 1945

Dielectric Heating in Industry, Application of Vacuum-Tube Oscillators to Inductive and. Jordan..831–4 1942

Dielectric Heating, Induction and. Scott.....885–92; disc. 892 1948

Dielectric Heating—The Measurement of Loss Under Rising Temperature. Whitehead.....947–9 1947

Dielectric Heating, The Role of Frequency in Industrial. Scott.....558–62 1945

Dielectric, High-Pressure Gas As a. Nonken.....1017–20; disc. 1405 1941

Dielectric Liquids, Water Solution in High-Voltage. Clark.....433–41; disc. 1192 1940

Dielectric-Loss and Power-Factor Method for Field Investigation of Electrical Insulation, The A-C. Doble.....934–9; disc. 1348 1941

Dielectric Loss at High Frequencies and Under Changing Temperature, The Measurement of. Whitehead, Ruggeberg.....520–4 1949

Dielectric Loss of Insulating Oils, The Influence of the Concentration and Mobility of Ions on. Kang.....403–07; disc. 1132 1946

Dielectric Measurements, Generalised Bridge Network for. Balsbaugh, Howell, Dotson..950–6; disc. 1105 1940

Dielectric Properties at Ultrahigh Frequencies, A Resonant-Cavity Method for Measuring. Works, Dakin, Boggs....1092–8; disc. 1452 1944

Dielectric Properties of Cellulose Insulation Impregnated With Semiconducting Liquids, The. Clark.....55–62; disc. 62 1947

Dielectric Recovery by an A-C Arc in an Air Blast. Browne.....169–76; disc. 507 1946

Dielectric-Recovery Characteristics of Large Air Gaps. McCann, Clark.....45–52; disc. 394 1943

Dielectric Strength and Life of Impregnated-Paper Insulation, The. Whitehead:

Part I.....715–20; disc. 1085 1940

Part II.....660–3; disc. 1233 1940

Part III.....618–22; disc. 1039 1942

Part IV. Whitehead and Kopper.....171–7; disc. 477, 942 1945

Dielectric Strength and Protection of Modern Dry-Type Air-Cooled Transformers. Bellaschi, Beck.....759–63; disc. 997 1945

Dielectric Strength of Glass—An Engineering Viewpoint, The. Shand.....814–18; disc. 1331 1941

Dielectric Strength of Insulating Liquids in a Continuously Circulating System. Race.....730–7 1940

Dielectric Strength of Oil for High-Voltage Testing of Oil Circuit Breakers. Lingal, Skeats, Braley.....903–06 1941

Dielectric Strength of Oil with Variations of Pressure and Temperature. Hoover, Hixson.....1047–50 1949

Dielectric Strength of Polyethylene. Del Mar.....918–19 1945

Dielectric Strength of Porcelain. Bellaschi, Manning...651–6; disc. 656 1939

Dielectric Strength of Station and Line Insulation to Switching Surges. Bellaschi, Rademacher.....1047–54; disc. 1173 1946

Dielectric Strength of Water in Relation to Use in Circuit Interrupters. Slepian, Denault, Strom.....389–95; disc. 631 1941

Dielectrics at Elevated Temperatures, The Electrical Performance of Ceramic. Frey, Jesatko.....911–20; disc. 1126 1946

Dielectrics, Effect of Corona Discharge on Liquid. Sticher, Thomas.....709–19; disc. 719 1939

Dielectrics With a Cathode-Ray Tube, Measurements of Pre-Breakdown Currents in. Race.....854–8; disc. 1388 1941

Diesel Bus Where No Overhead Facilities Exist?, Can the Trolley Coach Compete Economically With the Gas or. Gauss.....264–8; disc. 268 1947

Diesel-Electric, and Electric Motive Power on the Great Northern Railway Electrification, Comparative Operating Results of Steam. Gaynor.....231–4; disc. 234 1948

Diesel-Electric and Straight Electric Locomotives, Electric Control for Steam Boilers on. Burgess.....604–06; disc. 980 1942

Diesel-Electric Drilling Rig Equipment. Rhea.....447–53 1946

(Diesel-Electric) Keep Them Rolling. Teker.....107–12 1943

Diesel-Electric Locomotive for the Seaboard Air Line Railway, A 3,000 Horsepower. Staples, Weybrew, Atwell.....215–19 1947

Diesel-Electric Locomotives, A Power Plant Regulating System for. Lewis.....242–6; disc. 246 1947

Diesel-Electric Locomotives, Braking Resistors and Control for. Weiser.....229–32 1947

Diesel-Electric Locomotives, Developments in Control Systems for. Henshaw.....233–41 1947

Diesel-Electric Locomotives in Railroad Service, Application Engineering on. Bevan.....125–31 1949

Diesel-Electric Locomotives, Modern Electrical Equipment for Industrial. Greer....229–32; disc. 400 1942

Diesel-Electric Locomotives, Progress in Design of Electrical Equipment for Large. Smith....130–1; disc. 404 1942

Diesel-Electric Locomotives, Short Time Ratings of. Campbell, Woods.....1661–3 1948

Diesel-Electric Locomotives, Speed-Responsive Devices on. Johansson....336–8 1948
Diesel-Electric Rig for Deep-Well Drilling, Performance of. Clark, Moore....497–506 1949
Diesel-Electric Switcher Locomotives, Design Features of Generators for. Atwell....41–5; disc. 433 1944
Diesel-Electric Switching-Locomotive Application by Means of Nomographic Charts. Millan, Perkinson....45–7 1944
Diesel-Electric Switching Locomotives, Industrial Plants Prefer. Woods....697–700 1949
Diesel-Electric Synchronous Motor Ship Drives—Propulsion Control Problems. Frisch....660–6 1946
Diesel-Electric Traction-Generator Excitation Control Systems, Developments in. Brancke, Adams....223–8; disc. 228 1947
Diesel Engine, Investigation of Starting Requirements of a 660-Horsepower Locomotive. Davidson, Lamborn....31–4; disc. 632 1941
Diesel Oil, and Electricity as Energy Sources for Motive Power Operation in the Pacific Northwest, The Present Competitive Position of Coal, Residual Oil. Martin....1664–9 1948
Differential Analyzer, A New. Kuehni, Peterson....221–8; disc. 429 1944
Differential Generator Control Relay for D-C Aircraft Electric Systems. Crever....589–93 1944
Differential Leakage of a Fractional-Slot Winding. Liwschitz..314–20 1946
Differential Leakage of the Different Patterns of a Fractional Slot Winding. Liwschits....1129–31; disc. 1131 1949
Differential Leakage With Respect to the Fundamental Wave and to the Harmonics. Liwschits...1139–50 1944
Differential Protection, A Practical Discussion of Problems in Transformer. Shill....854–8; disc. 1067 1942
Differential Protection for Transformer Banks, Carrier-Current. Cramer....545–8; disc. 947 1943
Differential Protection, Harmonic-Current-Restrained Relays for Transformer. Hayward. 377–82; disc. 622 1941
Differential Protection, New Current Transformer for Bus. Kennedy, Sinks....1180–7; disc. 1363 1941
Differential Protection Using Bushing Current Transformers, Instantaneous Bus-. Seeley, von Roeschlaub....1709–18; disc. 1718 1948
Differential Protection, With Particular Reference to Offset Transient Currents, Current Transformers and Relays for High-Speed. Wents, Sonnemann....481–8; disc. 1144 1940
Differential Relay, A New Generator. McConnell....11–13; disc. 381 1943
Differential Relay for Generator Protection, A High-Speed. Sonnemann....608–12; disc. 1250 1940
Differential Relaying, Prolonged Inrush Currents With Parallel Transformers Affect. Hayward....1096–1101; disc. 1305 1941
Differential Relays, The Effect of Current-Transformer Residual Magnetism on Balanced-Current or. Seeley....164–9; disc. 384 1943
Differential Series Fields in the Parallel Operation of D-C Motors, Use of Cumulative and. Kimball....1098–1100 1949
Differential-Voltage Cutout, An Aircraft. Walley...632–4; disc. 1365 1944
Difficulties Disclosed by Staged-Fault Tests, Relaying. Morgan, Evans....73–82 1948
Diffusion in Fluid-Flow Arc Extinction, Displacement and. Slepian....162–7; disc. 643 1941
Diffusion of Electric Current into Rods, Tubes, and Flat Surfaces. Miller....1496–1502 1947
Dimensional Studies of Lightweight Motors for Aircraft. Morrill..698–701 1944
Dimensionless Analysis of Servomechanisms by Electrical Analogy. Herwald, McCann:
Part I....636–9; disc. 1132 1946
Part II....111–18 1947
Dimensions, Hollow Pipes of Relatively Small. Barrow, Schaevitz..119–22 1941
Diode Rectifying Circuits With Capacitance Filters. Waidelich....1161–7; disc. 1388 1941
Dip—with Suddenly Applied Loads on A-C Generators, A Semiempirical Approach to Voltage. Rosenberg....160–6; disc. 166 1949
Direct-Acting Generator Voltage Regulator, The. Boice, Crary, Kron, Thompson....149–56; disc. 156 1940
Direct- and Quadrature-Axis Equivalent Circuits of the Synchronous Machine, The. Rankin....861–8 1945
Direct Coupled Oscillograph Amplifier. Christian....1383–6 1947
Direct Current, A New Measuring Instrument for. Faus, Corson....683–6; disc. 1073 1940
Direct Current, A New Moving-Magnet Instrument for. Faus, Macintyre....586–8; disc. 987 1942
D-C Adjustable Speed Motors, Limitations in Design of. Opel...1095–8 1949
D-C Aircraft Electric-Supply Systems, Present. Anderson, Crary, Schults....265–72; disc. 484 1944
D-C Aircraft Electric System, A 120-Volt. Cobb..1327–34; disc. 1495 1944
D-C Aircraft Electric Systems, Differential Generator Control Relay for. Crever....589–93 1944
D-C Aircraft Electric Systems, Higher-Voltage. Berry, Dallas....843–9; disc. 1497 1944
D-C Aircraft Generator Power Center, Bottemiller....1267–70 1947
D-C Aircraft Generators, Design Considerations for. Miner....1234–40; disc. 1459 1944
D-C Aircraft Motors, Inherent Overheating Protection of. Veinott....920–5 1944
D-C Aircraft Systems, Electric-Circuit Fault-Protective Principles as Applied to. Kaufmann....333–44; disc. 482 1944
D-C Amplifier for Bioelectric Recording, A High-Gain. Goldberg..60–4 1940
D-C Amplifier Stabilized for Gain and for Zero, Wide-Band. Williams, Amey, McAdam....811–15; disc. 815 1949
D-C Amplifier Stabilized for Zero and Gain. Williams, Tarpley, Clark....47–57 1948
D-C Arc Interruption for Aircraft. Quill, Rader....883–8; disc. 1472 1944
D-C Arc Interruption for Aircraft, Peak Voltages With. Phillips, Mitchel....944–9 1944
D-C Armature, Heating of a. Fechheimer....920–6; disc. 1210 1940
D-C Auxiliary Controllers for Marine Service, Design of. Schaelchlin....623–9 1946
D-C Board, System Voltages and Fault Currents Determined Easily on. Asbury....184–8; disc. 439 1944
D-C Breakdown Strength of Air and of Freon in a Uniform Field at High Pressures. Trump, Safford, Cloud....132–5; disc. 676 1941
D-C Bridge for Microwave Power Measurements, A Direct Reading. Carlin, Blass....311–15 1948
D-C Controllable Reactors, Universal Curves for. Johnson, Merrell, Alley....31–7; disc. 37 1949
D-C Controlled Reactors with Resistive Load, Some Fundamentals of. Storm....188–94; disc. 194 1949
D-C Flashover of Solid Insulators in Compressed Nitrogen, High-Voltage. Trump, Andrias....986–90; disc. 1393 1941
Direct Current for Aircraft-Radio Power Supply, Alternating Versus. Frits, Hooper....1227–33; disc. 1466 1944
D-C Generators, An Integrated Control System for Aircraft. McClinton....94–8 1947
D-C Generators for Use in Aircraft, Design Relationships for. Bergman....613–16; disc. 957 1943
D-C Generators in Multiengine Aircraft, Paralleling and Regulation of 24-28-Volt. Siegal, DeCourcey....854–7 1944
D-C Generators, Steady-State Analysis of Aircraft. Van Valkenburg, Matthews....1351–8 1948
D-C Generators, The Short-Circuit Characteristics of. Frost....394–402; disc. 484 1946
D-C Hoist Control, Dynamic Lowering. Pettit....1576–80; disc. 1581 1948
D-C Interrupters, Performance Criteria of. Boehne, Jang....1172–80; disc. 1180 1947
D-C Machine Flashover and Bus Short-Circuit Protection. Montgomery, Sellers....1168–73; disc. 1370 1941
D-C Machine Performance, The Eccentric Pole Face—A Means to Better. Baker....1107–10 1949
D-C Machines, A Design Method for. Beers, Karr....172–5; disc. 497 1944
D-C Machines and Its Effects on Radio Influence Voltage Generation, Commutation of. Motter....491–5; disc. 495 1949
D-C Machines by Means of High-Speed Circuit Breakers, Protection of Large. Housley, Jensen....637–40; disc. 1428 1944
D-C Machines, Factors Affecting Insulation Resistance of Large. Johnson, Weil....705–10; disc. 1194 1946
D-C Machines on Short Circuit, Current and Torque of. Linville....956–65; disc. 1144 1946
D-C Machines, Temperature Limits and Measurements for Rating of. Compton....780–5 1943
D-C Machines, Temperature Rise Values for. (Committee Report):
Part I....206–12; disc. 212 1949
Part II....1118–23; disc. 1123 1949
D-C Magnets, Factors Affecting the Design of. Rader....307–10; disc. 387 1943
D-C Marine Propulsion Motors on Vibrations Produced in Drive Shafts by Large Propellers, Damping Effect of. Litman....31–7 1945
D-C Measurements on Electrical Insulating Oils, Low-Voltage. Oncley, Hollibaugh....625–8; disc. 1227 1940
D-C Motor Drive, Theory of Rectifier—. Vedder, Puchlowski....863–70; disc. 960 1943
D-C Motors and Generators, Solid Short Circuit of. Linville, Ward....119–23; disc. 123 1949
D-C Motors and Generators, Transient Characteristics of. McClinton, Brancato, Panoff....1100–06 1949
D-C Motors, Behavior Factors of Rectifier-Deiven. Siegfried....530–3; disc. 1357 1944
D-C Motors, Electronic Control of. Puchlowski....870–7; disc. 985 1943
D-C Motors for Use in Automatic Control Systems, The Design of. Lebenbaum....1089–94 1949

D-C Motors from Controlled Rectifiers, Operation of Large. Schmidt, Smith....679–83 1948
D-C Motors in Severe Duty Service, The Application of Class B Insulation to Auxiliary-Type. Compton....828–34; disc. 1098 1940
D-C Motors, Stray Load Losses Measured in. (Committee Report)....219–23; disc. 223 1949
D-C Motors, Use of Cumulative and Differential Series Fields in the Parallel Operation of. Kimball....1098–1100 1949
Direct Current, Optimum Air Gap for Various Magnetic Materials in Cores of Coils Subject to Superposed. Legg....709–12; disc. 969 1945
D-C Paper Capacitors, Characteristics of Chlorinated Impregnants in. Berberich, Fields, Marbury....1173–9; disc. 1437 1944
D-C Point Discharges, High-Voltage. Starr....356–62 1941
D-C Power Systems, Control and Protection of Aircraft. Austin....741–5; disc. 1170 1946
D-C Selsyn System, Analysis and Design of a. Manildi....512–16; disc. 946 1945
D-C Series Motor, Dynamic Braking of a Single. Leitch....149–54 1947
D-C Series Motors—Calculation of Stability Limit, Dynamic Braking Control of. Heumann, Smith....454–7; disc. 1130 1946
D-C Series Motors, Dynamic Braking of Two. Leitch....787–91 1947
D-C Series Motors—Experimental Study of Speed-Torque Curves, Dynamic Braking Control of. Heumann....560–4 1949
D-C Shunt Motor and Load, Industrial Control: Dynamic Braking of a. Leland, Rader....472–6 1943
D-C Shunt Motor, Industrial Control-Shunted-Armature Connection for a. Leland, Rader....617–19; disc. 1410 1944
D-C Telemeter or D-C Selsyn for Aircraft, A. Jewell, Faus....314–17 1942
D-C Testing of Generators in the Field, Progress Report of. Davis, Leftwich....14–18; disc. 470 1942
D-C Testing of Rubber-Insulated Wire, High Voltage. Eddy, Fenn....576–8; disc. 1126 1946
D-C to A-C Vibrator Inverter, New Type of. Kiltie..245–7; disc. 247 1940
D-C Wattmeter of the Shunted Type, An Improved Type of. MacGahan....4–7; disc. 633 1941
D-C Welders With Reference to Electrode Freezing, Investigation of Arc Starting Characteristics of. Tyrner....97–9; disc. 511 1946
Direct Lightning Strokes, Transmission Line Design and Performance Based on. Harder, Clayton....439–46; disc. 447 1949
Direct Reading D-C Bridge for Microwave Power Measurements, A. Carlin, Blass....311–15 1948
Direct Strokes, The Measurement of Lightning Currents in. McCann....1157–64; disc. 1370 1944
Directional-Antenna Patterns, An Electromechanical Calculator for. Smith, Gove....78–83 1943
Directional-Overcurrent Relay, A New One-Cycle. Morris....725–7; disc. 989 1943
Directional Relay, An Improved Polyphase. Hoard...246–8; disc. 681 1941
Directional Relays, Factors Which Influence the Behavior of. Graybeal....942–52 1942
"Director" for Automatic Telephone Switching Systems, The. Smith....611–19 1948
Discharge Lamps for Airplane Lighting Service, Gaseous-. Beggs....760–2; disc. 1456 1944
Discharge on Liquid Dielectrics, Effect of Corona. Sticher, Thomas....709–19; disc. 719 1939
Discharge on Rubber-Insulated Cables, Corona. Paine, Brown....709–14; disc. 1070 1940
Discharge Resistance Welding, An Improved Electronic Control for Capacitor-. Bichsel, Hughes....1150–7; disc. 1384 1944
Discharge Welding Transformers, Design and Measurements of Capacitor. Diets, Stein....154–9; disc. 512 1946
Discharges, Field Research on Lightning Arrester. McCann, Beck....625–9; disc. 629 1947
Discharges, High-Voltage D-C Point. Starr....356–62 1941
Discharges in Insulated Cables, Internal Corona. Greenfield....591–600; disc. 600 1947
Discrimination, A Distance Relay With Adjustable Phase-Angle, Goldsborough....835–8; disc. 1471 1944
Discussion of Problems in Transformer Differential Protection, A Practical. Shill....854–8; disc. 1067 1942
Discussion of Proposed ASA Transformer Standards, A. Henry..289 1939
Disintegration, Some Measures of Electrical-Brush. Coover, Jones....750–4 1943
Disks: Driving and Damping Forces and Torques, Eddy Currents in. Moore....1–10; disc. 10 1947
Displacement and Diffusion in Fluid-Flow Arc Extinction. Slepian....162–7; disc. 643 1941
Distance Energy Transmission, Economics of Long. Pierce, George..1089–94; disc. 1094 1948
Distance Ground Relay, A New. Goldsborough..1442–6; disc. 1446 1948
Distance Ground Relays, Operating Experience With. Wolfe....458–62; disc. 1185 1946
Distance Relay, A New Reactance. Dewey, McGlynn....743–6; disc. 746 1948
Distance Relay Protection for Subtransmission Lines Made Economical. Audlin, Warrington....574–8; disc. 976 1943
Distance Relay, The Mho. Hutchinson....353–60 1946
Distance Relay With Adjustable Phase-Angle Discrimination, A. Goldsborough....835–8; disc. 1471 1944
Distance Relaying on 3-Phase Systems, Fundamental Basis for. Lewis, Tippett....694–708; disc. 708 1947
Distance Relays During Faults and Power Swings, Graphical Method for Estimating the Performance of. Warrington....608–20; disc. 620 1949
Distances for Rectangular Conductors, Geometric Mean. Dwight....536–8 1946
Distances, Theory and Application of Complex Logarithmic and Geometric Mean. Higgins....12–16 1947
Distinction Between Effective and Circuit Bandwidths, The. Kessler....98–9 1949
Distortion and Band-Width Characteristics of Pulse Modulation. Krauss, Ordung....984–8 1947
Distortion in a Pulse Count Modulation System. Clavier, Panter, Grieg....989–1005; disc. 1005 1947
Distribution
A New Principle of Cable Design. Del Mar....206–10; disc. 705 1941
A Practical Discussion of Problems in Transformer Differential Protection. Shill....854–8; disc. 1067 1942
A Short-Cut Method of Estimating Telephone-Influence Factor of Power Systems With Rectifier Load. Frick....91–6 1944
An Investigation of the Relationship Between Temperature and Movement of Cables in Ducts. Nicholson, Brosnan....723–8; disc. 1388 1944
Analysis of Factors Which Influence the Application, Operation, and Design of Shunt-Capacitor Equipments Switched in Large Banks. Butler....795–800; disc. 1096 1940
Arc-Furnace Loads on Long Transmission Lines. LeClair....234–9; disc. 239 1940
Arcing Faults in Power Systems. Concordia, Peterson....340–6; disc. 614 1941
Corona Discharge on Rubber-Insulated Cables. Paine, Brown....709–14; disc. 1070 1940
Current Rating of Cables as Affected by Mutual Heating in Air or Conduit. (IPCEA Committee Report)....354–65; disc. 424, 1352 1944
Cyclic Movement of Cable—Its Causes and Effects on Cable-Sheath Life. Schifreen....1121–30; disc. 1388 1944
Design, Manufacture, and Installation of 120-Kv Oil-Filled Cables in Canada. Farnham, Titus....881–9; disc. 1074 1942
Determination of Cable Temperatures by Means of Reduced-Scale Models. Gemant, Sticher....475–82; disc. 1128 1946
Dielectric Strength of Porcelain. Bellaschi, Manning....651–6; disc. 656 1939
Economical Loading of High-Voltage Cables Installed in Underground Subway Systems. Thomas....611–15; disc. 615 1939
Effect of Lightning on Thin Metal Surfaces. McEachron, Hagenguth....559–64; disc. 1013 1942
Electrical Stability of Electrical Insulating Oils Under Limited Oxidation. Balsbaugh, Assaf....311–22; disc. 397 1943
Electrolysis and Corrosion of Underground Power-System Cables. Gorman....329–36; disc. 479 1945
Equivalent Circuits of Transformers and Reactors to Switching Surges. Bewley....797–802 1939
F-3 Lead Alloy—An Improved Cable Sheathing. Hickernell, Snyder....563–9; disc. 1136 1946
Facilities for the Supply of Kilowatts and Kilovars. Sels, Seely....249–55; disc. 402 1942
Field Investigations of Lightning. Wagner, McCann, Beck....1222–30; disc. 1381 1941
Field Tests on High-Capacity Air-Blast Station-Type Circuit Breakers. Strang, Skeats....100–04; disc. 409 1942
Galloping Conductors and a Method for Studying Them. Tornquist, Becker....1154–61; disc. 1161 1947
Galvanic Corrosiveness of Soil Waters. Phelps, Kahn....156–9; disc. 482 1945
Gas-Filled-Cable Research and Experience. Shanklin....549–53; disc. 1399 1944
Guide for Wartime Conductor Temperatures for Power Cables in Service. (Committee Report)....606–10; disc. 942 1943
Guides for Operation of Transformers, Regulators, and Reactors. (Committee Report)..797–806; disc. 957 1945
Harmonics and Load Balance of Multiphase Rectifiers. Evans....182–7; disc. 400 1943

Impulse Strength as a Measure of Cable Quality. Komives.....929–34; disc. 1339 1941

Impulse Strength of Cable Insulation. Davis, Eddy.....394–9; disc. 399 1940

Impulse Strength of Insulated-Power-Cable Circuits. Halperin, Shanklin.....1190–7; disc. 1386 1944

Inductive Co-ordination With Series Sodium Highway Lighting Circuits. Kent, Blye.....325–32; disc. 332 1939

Internal Corona Discharges in Insulated Cables. Greenfield.....591–600; disc. 600 1947

Kilowatts, Kilovars, and System Investments. Butler. 133–7; disc. 368 1943

Lightning Investigation on Transmission Lines. Lewis, Foust:
Part VII.....227–32; disc. 233 1940
Part VIII.....107–15; disc. 474 1945
(Part I—1930; Part II—1931; Part III—1933; Part IV—1934; Part V—1935; Part VI—1937)

Lightning Performance of 110- to 165-Kv Transmission Lines. (Committee Report)..294–304; disc. 304 1939

Lightning Strokes in Field and Laboratory. Part III. Bellaschi.....1248–56; disc. 1392 1941
(Part I—1935; Part II—1937)

Load Ratings of Cable. Halperin:
Part I.....535–53; disc. 553 1939
Part II.....930–42; disc. 1040 1942

Location of Gas Leaks in Pipe-Encased Gas Pressure Cable Lines. Piper.....10–21; disc. 21 1948

Low-Gas-Pressure Cable. Shanklin.....307–15; disc. 315 and 912 1939

Low-, Medium-, and High-Pressure Gas-Filled Cable. Shanklin.....719–26; disc. 1021 1942

Maximum Safe Operating Temperature for 15-Kv Paper-Insulated Cables. Franklin, Thomas.....556–60; disc. 560 1939

Metering Power on the Low-Voltage Side. Petsinger, Lenehan.....159–63; disc. 406 1943

Method for A-C Network Analysis Using Resistance Networks. Enns.....875–80; disc. 1069 1942

Methods of Controlling Radio Interference. Aggers..193–9; disc. 199 1940

Mobile Capacitor Units for Emergency Loading of Transformers in Open Delta. Wolf, Mattison.....83–6; disc. 373 1943

New 138-Kv Cable Lines in Los Angeles. Mansfield.....1240–9; disc. 1479 1944

New Technique for Lead Cable Sheathing, A. Reinits, Wiseman.....165–71; disc. 171 1940

Notes on Emergency Ratings. Kidder.....599–607; disc. 607 1939

Oil Stresses in Impregnated-Paper Insulation. Whitehead.....555–7; disc. 955 1945

120-Kv Compression-Type Cable. Faucett, Komives, Collins, Atkinson.....652–7; disc. 1021 1942

120-Kv High-Pressure Gas-Filled Cable. Faucett, Komives, Collins, Atkinson.....658–65; disc. 1021 1942

Operation of Low-Pressure Gas-Filled Cable. Hatcher.....788–92; disc. 1399 1944

Photographic Study of Lightning. Hagenguth.....577–83; disc. 583 1947

Power-System Voltage-Recovery Characteristics. Peterson.....405–11; disc. 411 1939

Pulling Loads on Single- and Multiple-Conductor Impregnated-Paper Lead-Encased Cable, Solid Type. Bellis...138–48; disc. 403 1943

Rationalization of Transmission-System Insulation Strength. Part III. Sporn, Gross....591–5; disc. 1201 1940
(Part I—1928; Part II—1930)

Recent Improvements in Loading Apparatus for Telephone Cables. Hale, Quinlan, Ranges.....385–92 1948

Resistors for 138-Kv Cable Switching. Sadler, Blakeslee...39–46; disc. 46 1947

Sag and Tension Calculations for Cable and Wire Spans Using Catenary Formulas. Nash, Nash.....685–92; disc. 984 1945

Secondary Versus Primary Capacitors. Starr.....228–42; disc. 242 1939

Semiconducting Shielding for A-C Power Cable. Merrell.....605–09; disc. 1145 1946

Shunt Capacitors. (Committee Report).....222–30; disc. 372 1943

Some Impulse-Voltage Breakdown Tests on Oil-Treated Paper-Insulated Cables. Foust, Scott.....389–91; disc. 391 1940

Some Insulator Designs Require Special Features to Insure Radio Quietness. Miller.....62–6; disc. 657 1941

Study of A-C Sheath Currents and Their Effect on Lead-Cable-Sheath Corrosion. Sherer, Granbois.....264–8; disc. 483 1945

Superposition Methods for Calculating Effects of Additions to Power Systems. Rettig.....396–401; disc. 648 1941

Surges on Chicago 12-Kv System. Wollaston, Plumley.....260–5; disc. 694 1941

Symmetrical Nomenclature of Three-Phase Circuits. Brady.....955–7; disc. 1402 1941

Temperature and Electric Stress in Impregnated-Paper Insulation. Whitehead, MacWilliams.....10–13; disc. 458 1942

The Detection of Initial Failure in High-Voltage Insulation. Whitehead, Shaw.....267–72; disc. 761 1941

The Dielectric Strength and Life of Impregnated-Paper Insulation. Whitehead:
Part I.....715–20; disc. 1085 1940
Part II.....660–3; disc. 1233 1940
Part III.....618–22; disc. 1039 1942
Part IV. Whitehead and Kopper.....171–7; disc. 477, 942 1945

The Effect of Kilovar Supply on the Design of Systems for Load Growth. Schroeder, Butler, Meyers.....69–77; disc. 492 1944

The Effect of Overexciting Transformers on System Voltage Wave Shapes and Power Factor. Butler, Pope.....49–53; disc. 656 1941

The Electric Strength of Air at High Pressure. Skilling.....161–5; disc. 165 1939

The Pumping System of the Colorado River Aqueduct. Gaylord.....112–23; disc. 123 1939

The Type CB Impregnated-Paper Cable. Rosch..1041–50; disc. 1235 1940

The Use of Multiwinding Transformers With Synchronous Condensers for System Voltage Regulation. St. Clair.....212–17; disc. 217 1940

Three-Winding Transformer Ring-Bus Characteristics. Bills, MacArthur.....848–9; disc. 1066 1942

Distribution and Utilization in a Large Iron Ore Beneficiation Plant, Power. Gettelman.....1726–32 1948

Distribution Apparatus, Lightning Arresters for. Beck, Forbes.....719–24; disc. 970 1945

Distribution Arresters, Testing of. Halperin.....142–8; disc. 148 1940

Distribution Circuits, Application of 720-Cycle Carrier to Power. Woodworth....903–15; disc. 1003 1943

Distribution Circuits, Capacitors and Automatic Boosters for Economical Correction of Voltage on. Olmsted.....491–6; disc. 496 1939

Distribution Circuits During Faults to Ground, Performance of Ground-Relayed. Gilkeson, Jeanne, Davenport.....40–8; disc. 424 1942

Distribution Circuits, Relative Expense for Service Restoration With Different Types of Overcurrent Protection for. Lincks, Craig.....813–21; disc. 980 1942

Distribution Circuits, Relative Value of Different Types of Overcurrent Protection for. Lincks.....19–26; disc. 426 1942

Distribution Circuits, Sensitive Ground Relay Protection for Complex. Hunt.....765–8; disc. 1180 1946

Distribution Circuits With Particular Reference to Multigrounded Neutrals, Calculation of Unbalanced Voltage Drops in. Bullard, Lowe, Wahlquist.....145–8 1944

Distribution Costs Retarding Railroad Electrification, Are the Overhead? Birch.....243–55; disc. 255 1948

Distribution Factors and Pitch Factors of the Harmonics of a Fractional-Slot Winding. Liwschits.....664–6; disc. 926 1943

Distribution Feeders, Sensitive Ground Protection for Radial. Hunt, Vivian.....84–7; disc. 87 1940

Distribution Feeders, Sensitive Ground Protection for Transmission Lines and. Gross.....968–71 1941

Distribution Ideas as Applied in a Large War Plant, Modern Electric-Power-. Kaufann, Kieb.....279–87; disc. 488 1945

Distribution in Rectangular Conductor, Current. Daley.....687–90; disc. 690 1939

Distribution in Textile Plants, Power. McConnell.....659–62 1947

Distribution in Transformer Cores and Other Electric Apparatus of Rectangular Cross Section, Formulas for Calculating Temperature. Higgins.....190–4; disc. 493 1945

Distribution Lines and Newly Developed Equipment for Protection Against Conductor Burndown From That Cause, Power Arc-Over on Overhead. Matthews.....596–604; disc. 684 1941

Distribution Losses in Terms of Generating-Station-Capacity Investment, Evaluation of Electric. Mortara.....1–7; disc. 411 1945

Distribution of Lightning Flashes to Transmission Lines, The Frequency of Occurrence and the. Golde.....902–10; disc. 982 1945

Distribution of Load and Reactive Components in Power Line Networks, The Use of Business Machines in Determining the. Jennings, Quinan.....1045–6 1946

Distribution Power Supply, When the Welding Load Outgrows the. Clark, Stearns....645–8; disc. 964 1945

Distribution Problem in Arc Welding, The Power-. Pierce, Smith.....178–84; disc. 435 1945

Distribution Scheme With Airplane-Engine-Testing Power Recovery, Dodge Chicago Plant's Electric-Power-. Bailey..121–3; disc. 484 1945

Distribution Substations and Wartime Necessities. Poage, Reid.....117–22; disc. 432 1942

Distribution Substations in Wartime, Power Supply to. St. Clair.....112–17; disc. 432 1942

Distribution-System Costs, A Method of Approach to the Consideration of Power-. Falls.....1078–84; disc. 1377 1944

Distribution System for War-Time Plant Expansion, A. McKeever..862–5; disc. 1385 1941

Distribution System, Lightning Investigation on a Rural. MacCarthy, Stann, Edge, McKinley.....428–37; disc. 437 1949
Distribution System, Operation of a Ground-Fault Neutralizer on a Regulated. Tomlinson, Hunt....1321–6; disc. 1326 1949
Distribution System, Overcurrent Investigation on a Rural. Lincks, Edge, McKinley, Leh..915–27; disc. 927 1949
Distribution System. Trolley Coach. McDonald.....393–402; disc. 402 1948
Distribution Systems, An Automatically Reclosing Breaker for Co-ordinating. Rawlins, Wallace....1021–4 1941
Distribution Systems: an Epitomisation of Available Data, The Design on Bus-Bar Industrial. Higgins...385–400; disc. 486 1945
Distribution Systems, Analysis of Short Circuits for. Dalziel.....757–64; disc. 1048 1942
Distribution Systems and Telephone Systems, Inductive Co-ordination of REA. Plucknett, Smith, Taylor.....586–95; disc. 723 1941
Distribution Systems, Fault Protection on Shipboard A-C Power-. Rickover, Ross....1109–20; disc. 1429 1944
Distribution Systems for Industrial Plants, Enclosed Bus-Bar Electrical. Carlson..297–302; disc. 700 1941
Distribution Systems, Fusing Practices on. Parsons, Wallace:
Part I.....89–91; disc. 467 1944
Part II.....598–600; disc. 1429 1944
Distribution Systems, Graphical Method of Calculating Fault Currents on Rural. Linder...16–19; disc. 446 1945
Distribution Systems, Improved Fault Protection for Rural. Van Ryan.....261–3 1945
Distribution Systems in Wartime, Electric-Power. Sporn.....105–07; disc. 432 1942
Distribution Systems in Wartime, Overhead. Cole.....123–6; disc. 432 1942
Distribution Systems in Wartime, Underground. Gaty.....107–12; disc. 432 1942
Distribution Systems, Lightning and Lightning Protection on. Bergvall, Beck.....442–9; disc. 1112 1940
Distribution Systems, Selective Tripping Arrangements for Protection of Ship's A-C Electric. Cole.....1256–62; disc. 1262 1948
Distribution Systems, Short-Circuit Currents and Recovery Voltages on Rural. Eason, Johnson, Kalb, Peterson.....930–7; disc. 937 1949
Distribution Systems, The Frequencies of Natural Power Oscillations in Interconnected Generating and. Rudenberg.....791–803 1943
Distribution Systems, The Fundamentals of Industrial. Beeman, Kaufmann.....272–9; disc. 477 1942
Distribution Systems, Trends and Practices in Modern Industrial Power. Bloomquist.....872–9; disc. 879 1948
Distribution Systems, Voltage-Recovery Characteristics of. Witzke.....172–80; disc. 180 1949
Distribution, The Design of Low-Voltage-Welding Power. Adams, Fetcher, Johnson..1180–90; disc. 1382 1944
Distribution Transformer and Secondary Conductor Economics. Brady.....483–6; disc. 486 1949
Distribution Transformers Due to Lightning, Abnormal Currents in. Bryant, Newman.....564–8; disc. 1003 1942
Distribution Transformers Due to Lightning Currents in Low-Voltage Circuits Voltage Stresses in. Beardsley, McMorris, Stewart.....1632–5; disc. 1635 1948
Distribution Transformers, Impulse-Failure-Detection Methods as Applied to. Stewart, Holcomb.....640–44; disc. 956 1945
Distribution Transformers, Interim Report on Overloading. (Committee Report).....516–17; disc. 968 1943
Distribution-Type Lightning-Arrester Performance Characteristics. (Committee Report).....132 1942
Distribution Voltages, Rural. Edmunds, Roloson.....1324–6; disc. 3126 1948
Disturbances Produced by Lightning, Field. McCann, Morgan.....345–57; disc. 427 1943
Division Multiplexing System, A Time. Boothroyd, Creamer.....92–7 1949
Division Techniques for a Coaxial Cable Network, Frequency. Crane, Dixon, Huber.....1451–9 1947
Divisions by Means of Accurate Time Control, Preliminary Consideration of System-Wide Load. Curtis, Pickslay.....1562–9; disc. 1569 1948
Dodge Chicago Plant's Electric-Power-Distribution Scheme With Airplane-Engine-Testing Power Recovery. Bailey..121–3; disc. 484 1945
Domestic and Commercial Applications
Coincidence-Factor Relationships of Electric-Service-Load Characteristics. Bary.....623–9 1945
Electrothermal Space Heating and Air Conditioning. Krueger.....718–22; disc. 1434 1944
Estimating Electric Loads for Military-Training Bases, Federal Housing, and Other Wartime Projects. Potts.....246–54; disc. 463 1943
Load-Calculation Procedure for Electric-Panel Space Heating. Raber, Hutchinson...1085–91; disc. 1432 1944
Possibilities of Heat Pumps for Heating Homes. Berry.....619–22; disc. 1433 1944
Rural Electrification Engineering and Electroagricultural Engineering. Samuels.....193–7; disc. 459 1943
Specific Engineering Problems in Rural Electrification and Electroagriculture. Samuels.....1065–73; disc. 1182 1946
The Vibration of Electric Contacts. Russell, Keilien...153–5; disc. 478 1944
Utilization Voltages. Seelye.....147–51; disc. 430 1942
Domestic Motored Appliances, Design Factors Involved in the Design of. Packer.....500–07; disc. 665 1941
(Domestic) The Characteristics and Application of Precision, Snap-Acting Switches. Riche.....1549–54; disc. 1554 1948
(Domestic) The Heat Pump From the Utility's Point of View. Andrews.....562–4 1948
(Domestic) The Heat Pump—Its Significance as a Potential Residential Electric Load. Bary.....1–8 1949
Double-Break Oil- or Gas-Blast Power Fuse, A. Hill....402–07; disc. 646 1941
Double-Fed Asynchronous Machine, Damping and Synchronising Torque of the. Liwschitz...923–4 1941
Double-Film Klydonograph With An Improved Coupling Method, A Simplified. Waghorne.....1114–16; disc. 1116 1947
Double-Reduction Traction Motor, Modern. Greer.....471–4 1946
Doubly-Chorded or Doubly Shifted Fractional-Slot Lap and Wave Windings. Liwschitz.....684–6 1948
Doubly Fed Machine, The. Concordia, Crary, Kron.....286–9 1942
Drag Tachometer, The Magnetic-Ballard.....366–9 1942
Draglines, Electric Equipment for Power Shovels and. Schwedes, Stoetzel.....1498–1506; disc. 1507 1948
Draglines, Evolution of Ward-Leonard Control for Shovels and. Stevens.....1491–7 1948
Drilling, Performance of Diesel-Electric Rig for Deep-Well. Clark, Moore.....497–506 1949
Drilling Rig Equipment, Modern Diesel-Electric. Rhea.....447–53 1946
Drilling Rigs, Variable-Voltage Equipment for Rotary. Lamberger.....248–55; disc. 255 1940
Drive, A Study of the Modified Kramer or Asynchronous-Synchronous Cascade Variable-. Liwschitz, Kilgore.....255–60 1942
Drive, A Wide-Range Adjustable-Speed. Conrad, Tribken.....789–90 1949
Drive, Electronic Speed Regulators for Sectional Paper Machine. Baker, Kovalsky.....1636–42 1948
Drive for a Resonant Fatigue Machine, Self-Excited Electromagnetic. Willson.....1073–8 1946
Drive for a Rubber Calender Train, Coordinated Electric. John, Knapp, Mosteller.....128–34; disc. 492 1946
Drive for Aircraft, Electric. Crom....1359–62 1947
Drive for A-C Systems, A New Type of Adjustable-Speed. Conrad, Smith, Ordung:
Part I.....7–10; disc. 385 1943
Part II.....522–5; disc. 932 1943
Drive for Cranes, A New Electric Hoist. Whiting.....59–64 1944
Drive for United States Army Air Corps Wind Tunnel at Wright Field, Dayton, Ohio, Variable-Speed. Dickey, Laffoon, Kilgore..126–30; disc. 456 1942
Drive for Windup Reels, An Electronic. Puchlowski....585–91; disc. 1155 1946
Drive, Large Adjustable-Speed Wind-Tunnel. Clymer..156–8; disc. 456 1942
Drive Shafts by Large Propellers, Damping Effect of D-C Marine Propulsion Motors on Vibrations Produced in. Litman.....31–7 1945
Drive, Speed-Control System for an Aircraft Cabin-Supercharger. Godsey, Miner, Walley.....37–40 1945
Drive, Theory of Rectifier—D-C Motor. Vedder, Puchlowski.....863–70; disc. 960 1943
Driven Exciters for Turbine Alternators, Motor-. Bodine, Crary, Rankin.....290–7; disc. 515 1946
Driven Grounds, Impulse and 60-Cycle Characteristics of:
Part I. Bellaschi..123–8; disc. 717 1941
Part II. Bellaschi, Armington and Snowden.....349–63; disc. 446 1942
Part III. Bellaschi and Armington.....334–45; disc. 396 1943
Driven Gyroscopes for Aircraft, Electrically. Witherow, Hansen.....204–08 1944
Driven Rods and Counterpoise Wires in High-Resistance Soil on Consumers Power Company 140-Kv System, Study of. Hemstreet, Lewis, Foust.....628–34; disc. 1000 1942
Drives, A Control System for Wind Tunnel. Heidenreich.....1637–43; disc. 1643 1947
Drives for Looms, Selection of Electric. Demartini, Lukens.....349–56 1949
Drives for Supercalenders in Paper Mills, Electric. Smith.....338–41; disc. 341 1939
Drives for Textile Finishing Ranges, Electric. Moore, Uhl.....684–94 1947
Drives for Wide Speed Ranges, Electrical. Caldwell, Formhals.....54–6 1942
Drives, Governor Requirements for Aircraft Alternator. Boice, Levoy...534–40; disc. 947 1945
Drives in Steam-Electric Stations, Power Systems for Auxiliary. McClure, Whittlesey.....844–51; disc. 976 1945

Drives—Propulsion Control Problems, Diesel-Electric Synchronous Motor Ship. Frisch....660–6 1946

Drives, Rotating Stability Regulators for Synchronous Motor. Schaelchlin....884–7; disc. 887 1947

Drives, Turbine-Electric Textile-Range. Richardson....57–60 1940

Driving and Damping Forces and Torques, Eddy Currents in Disks. Moore....1–10: disc. 10 1947

Drop in the Welder Throat Loaded With Ferromagnetic Materials, The Voltage. Stein....356–62 1947

Drop Produced by Resistance Welders, Line. Longini..619–23; disc. 963 1945

Drops in Distribution Circuits With Particular Reference to Multi-grounded Neutrals, Calculation of Unbalanced Voltage. Bullard, Lowe, Wahlquist....145–8 1944

Drum Brakes for PCC Cars, Recent Developments in Track Brakes and. Vouch....302–04 1947

Drum Camera, A Cathode-Ray Oscillograph With Rotating-. Downie....984–6 1941

Dry-Disk Rectifier, Electronically Controlled. Rosenstein, Barnett....21–3; disc. 474 1944

Dry-Type Air-Cooled Transformers, Design and Operating Characteristics of Modern. Satterlee....701–04; disc. 1445 1944

Dry-Type Transformer Insulation at High Temperature, Aging Characteristics of. Stewart, Whitman....1600–06; disc. 1607 1948

Dry-Type Transformer Windings, Hot-Spot Temperatures in. Stewart, Whitman...763–8; disc. 1445 1944

Duct Bank, The Temperature Rise of Cables in a. Neher....540–6; disc. 546 1949

Ducts, An Investigation of the Relationship Between Temperature and Movement of Cables in. Nicholson, Brosnan....723–8; disc. 1388 1944

Dummy-Rotor Methods of Quality Control and Trouble Shooting of Induction-Motor Windings and Cores, Wound and. Trickey....842–4; disc. 998 1945

Duquesne Light Company System, Primary Networks on the. Holben, Lange....704–09; disc. 709 1949

Duration, An Interval Timer for Arc. Quill....237–40 1945

Dust-Contaminated Insulators in Fog, Performance of. Cossens, Blakeslee....1686–91; disc. 1691 1948

Dust in Rooms, Electrically Charged. Penney, Hewitt....278–82 1949

Duty, A Compressed Air Circuit Breaker for 23-Kv Arc Furnace. Wilcox, Baker....154–8 1948

Duty, A 230-Kv 3-Cycle Oil Circuit Breaker for Extra-Heavy Arc Rupturing. Leeds, Cushing....236–42; disc. 242 1948

Duty-Cycle Tests on Solenoids, A Method for Correlating. Ryan....579–81; disc. 945 1943

Duty Cycles, A Study of Short-Time Ratings and Their Application to Intermittent. Hellmund, McAuley....1050–5; disc. 1221 1940

Duty Cycles and Motor Rating. Hildebrand....478–83; disc. 483 1939

Duty, High-Voltage Oil Circuit Breakers for Rapid Reclosing. Hill, Leeds....113–18; disc. 452 1944

Duty, Rectifier-Circuit. Herskind....123–8 1944

Dwell Tester for Bomb-Release Interval Controls, An Interval and. Long....648–51 1945

Dynamic Braking by Self-Excitation of Squirrel-Cage Motor. Srinivasan, Thomas....145–8 1947

Dynamic Braking Control of D-C Series Motors—Calculation of Stability Limit. Heumann, Smith....454–7; disc. 1130 1946

Dynamic Braking Control of D-C Series Motors—Experimental Study of Speed-Torque Curves. Heumann....560–4 1949

Dynamic Braking of a D-C Shunt Motor and Load, Industrial Control. Leland, Rader....472–6 1943

Dynamic Braking of a Single D-C Series Motor. Leitch....149–54 1947

Dynamic Braking of Two D-C Series Motors. Leitch....787–91 1947

Dynamic Braking, The Design of New York Subway Motors for. Widell....808–10 1947

Dynamic Braking With Traction Motors. Riley, Woods....517–19 1945

Dynamic Brush Characteristics by the Dynamotor Method. Herman....759–63 1947

Dynamic Characteristics of a Single-Phase Induction Motor. Kurtz....801–06; disc. 1096 1940

Dynamic Lowering D-C Hoist Control. Pettit....1576–80; disc. 1581 1948

Dynamic Measurements on Electromagnetic Devices. Norton..151–6 1945

Dynamic Pressures, An Electrical Engine Indicator for Measuring Static and. Martin, Grinstead, Frawley....513–23; disc. 725 1941

Dynamoelectric Amplifier—Class A Operation, The. Saunders...1368–73 1949

Dynamoelectric Amplifier for Power Control. Alexanderson, Edwards, Bowman....937–9; disc. 1136 1940

Dynamometer for Small Motor Measurements, A High Precision. Duff....1344–8; disc. 1348 1947

Dynamotor Method, Dynamic Brush Characteristics by the. Herman....759–63 1947

E

Eccentric Pole Face—A Means to Better D-C Machine Performance, The. Baker....1107–10 1949

Echo Measurements on Telephone and Television Facilities, Pulse. Abraham, Lebert, Maggio, Schott....541–8; disc. 548 1947

Echo-Ranging Type Fault Locator for High-Voltage Lines, The "Linascope"—An. Leslie, Kidd....1162–6; disc. 1166 1948

Economic Aspects of Radio-Frequency Heating, Some. Duryee....105–12 1948

Economic Loading of a Transformer System. Levine, Smith....733–8; disc. 738 1949

Economic Selection of Prime Movers, Conditions Controlling the. Skrotzki....1099–1108; disc. 1360 1944

Economic Supply of Energy in Hydroelectric Systems, Factors in the. Frampton, Floyd....1117–24; disc. 1124 1947

Economical Fractional Horsepower Ratings, The Hysteresis Motor—Advances Which Permit. Roters....1419–30; disc. 1430 1947

Economical Loading of High-Voltage Cables Installed in Underground Subway Systems. Thomas....611–15; disc. 615 1939

Economically With the Gas or Diesel Bus Where No Overhead Facilities Exist?, Can the Trolley Coach Compete. Gauss..264–8; disc. 268 1947

Economics, Distribution Transformer and Secondary Conductor. Brady....483–6; disc. 486 1949

Economics, Frequency Changers—Characteristics, Applications, and. Crary, Easley....351–8; disc. 416 1945

Economics of Long-Distance A-C Power Transmission. Crary, Johnson....1092–9; disc. 1099 1947

Economics of Long-Distance Energy Transmission. Pierce, George....1089–94; disc. 1094 1948

Economics of Trolley-Coach Operation. Woods....578–81; disc. 1451 1944

Economies of Using Capacitors in Amounts to Require Automatic Switching, the. Butler....322–7; disc. 327 1947

Eddy Current Loss in Laminated Cores, Interlaminar. Beiler, Schmidt....872–7; disc. 877 1947

Eddy-Current Resistance of Multilayer Coils. Long....712–18 1945

Eddy Currents in a Rotating Disk, On. Smythe....681–4 1942

Eddy Currents in Disks: Driving and Damping Forces and Torques. Moore....,1–10; dis. 10 1947

Edison Company, Operating Experience With Petersen Coils on 66-Kv System of Metropolitan. Rankin, Neidig....568–73; disc. 573 1939

Education

A New Postgraduate Course in Industry in High-Frequency Engineering. Stevenson, Ramo....374–8; disc. 378 1940

Co-ordination of Mathematics and Physics With Electrical-Engineering Subjects. Morgan....42–3; disc. 43 1939

Co-ordination of Physics With Electrical Engineering. Bryant....35–6; disc. 43 1939

Courses to Develop Facility in the Use of Mathematics and Physics in the Solution of Engineering Problems. Teare....40-1; disc. 43 1939

Cultural Training of the Engineer. Boyajian....6–9; disc. 478 1944

Evening Courses at Graduate Levels—a Challenge to Colleges of Engineering. Beach..88–94; disc. 430 1942

Mathematics and Physics in Engineering. Malti...38–40; disc. 43 1939

Teaching Electricity and Magnetism. Hessler....828–33 1946

The Co-ordination of Mathematics and Physics With Electrical-Engineering Subjects. Curry....36–7; disc. 43 1939

(EEI-NEMA Subcommittee Report) Recommendations for High-Voltage Testing...598–602; disc. 1207 1940

(EEI Subject Committee Report) Field Testing of Generator Insulation....1003–11; disc. 1314 1941

Effect in Bimetallic Conductors, Skin. Teare, Webb....297–302 1943

Effect of Altitude on Electric Breakdown and Flashover of Aircraft Insulation. Berberich, Moses, Stiles, Veinott...345–54; disc. 458 1944

Effect of Altitude on Impulse and 60-Cycle Strength of Electrical Apparatus. Bellaschi, Evans....236–41; disc. 442 1944

Effect of Altitude on Temperature Rise of Aircraft Transformers. Montsinger....251–2 1945

Effect of Altitude on Ventilation and Rating of Aircraft Electric Machines. Veinott..84–90; disc. 488 1946

Effect of Contact Resistance in Spot Welding, Measurement and. Wyant....26–33; disc. 513 1946

Effect of Corona Discharge on Liquid Dielectrics. Sticher, Thomas....709–19; disc. 719 1939

Effect of Corona on Coupling Factors Between Ground Wires and Phase Conductors, The. McCann....818–26; disc. 940 1943

Effect of Coulomb Friction on the Performance of Servomechanisms, The. McCann, Lindvall, Wilts....540–6 1948

Effect of Current-Transformer Residual Magnetism on Balanced-Current or Differential Relays, The. Seeley. .....164–9; disc. 384 1943

Effect of Frequency on Let-Go Currents. Dalziel, Ogden, Abbott..... .....745–50; disc. 998 1943

Effect of Intial Conditions on Subharmonic Currents in a Nonlinear Series Circuit, The. Angello..... .....625–7 1942

Effect of Kilovar Supply on the Design of Systems for Load Growth, The. Schroeder, Butler, Meyers..... .....69–77; disc. 492 1944

Effect of Leakage Reactance, Saturation. Chang, Lloyd.....1144–7 1949

Effect of Lightning on Thin Metal Surfaces. McEachron, Hagenguth. .....559–64; disc. 1013 1942

Effect of Load Factor on Operation of Power Transformers by Temperature. Montsinger..... .....632–6; disc. 1224 1940

Effect of Overexciting Transformers on System Voltage Wave Shapes and Power Factor, The. Butler, Pope. .....49–53; disc. 656 1941

Effect of Prime-Mover Speed Governor Characteristics on Power-System Frequency Variations and Tie-Line Power Swings. Concordia, Crary, Parker.....559–67; disc. 733 1941

Effect of Radio Frequencies of a Power System on Radio-Receiving Systems. Aggers, Pakala, Stickel.... .....169–72; disc. 459 1943

Effect of Restriking on Recovery Voltage. Concordia, Skeats..... .....371–5; disc. 375 1939

Effect of Sapphire-Crystal Orientation on the Wear of Watt-Hour-Meter Bearings. Goss..... .....811–14; disc. 1336 1941

Effect of Wave Form on Let-Go Currents. Dalziel..739–44; disc. 998 1943

Effect of Weather on the System Load, The. Dryar..1006–13; disc. 1364 1944

Effective and Circuit Bandwidths, The Distinction Between. Kessler.... .....98–9 1949

Effective Resistance and Inductance of 3-Conductor Shipyard Power Cables. Summers.....1345–50 1948

Effective Resistance of Isolated Nonmagnetic Rectangular Conductors. Dwight.....549–52 1947

Effective Resistance to Alternating Currents of Multilayer Windings. Bennett, Larson..... .....1010–17; disc. 1262 1940

Effects in a Resistance-Type Thermometer, Heat-Flow. Millar...678–85 1945

Effects in Saturable Reactor Circuits, Negative Resistance. Manley, Peterson.....870–81 1946

Effects of Commutator Surface Film Conditions on Commutation. Lynn, Elsey.....106–12; disc. 112 1949

Effects of Contaminants on Electrical Insulation, Methods for Determining the. Mathes, Sieffert, Walker, Lindsey.....113–18; disc. 118 1949

Effects of Mutual Induction Between Parallel Transmission Lines on Current Flow to Ground Faults, The. Holbeck, Lants..... .....712–15; disc. 1002 1943

Effects of Silicone Vapor on Brush Wear. Marsden, Savage.....1186–90 1948

Effects of Stray Electric Currents in Coal Mines, Causes and. Harrison.....1759–61 1948

Effects of Temperature on Mechanical Performance of Rotating Electrical Machinery. Lynn..... .....514–7; disc. 517 1939

Effects of Thermal Characteristics of Aircraft Generators on Load Analysis. Rogers.....819–24 1946

Efficiencies of Electric Machines, Calorimetric Method for Determining. Siegfried, Thulin...530–2 1942

Efficiency of the Schafer and Pole-Top Methods of Artificial Respiration, A Comparison of the Relative. Kouwenhoven, Hooker, Langworthy.....41–4; disc. 660 1941

Eight-Year Investigation of Lightning Currents and Preventive Lightning Protection on a Transmission System, An. Hansson, Waldorf..... .....251–8; disc. 463, 1350 1944

18-Cylinder Aircraft Engine, Design of an Ignition System for an. Harkness.....1321–7; disc. 1467 1944

Electric-Accessory-Vibration Investigations, Aircraft-. Miller..... .....1283–90; disc. 1486 1944

Electric Actuator Equipment, Functional Design of Aircraft. Gagnier. .....813–15; disc. 1464 1944

Electric Aircraft Motors, Problems in Applying Protectors to. Buell... .....1250–8 1944

Electric Analog Computer, A Large-Scale General-Purpose. Harder, McCann.....664–73 1948

Electric Analog Computer to Nonlinear Mechanics and Servomechanisms, Application of the California Institute of Technology. McCann, Wilts, Locanthi.....652–60 1949

Electric Apparatus, Altitude Rating of. Lebenbaum....955–60; disc. 1485 1944

Electric Apparatus With Particular Reference to Carbon Brushes, New Test Chambers for Aircraft. Summers, Settle...1205–12; disc. 1491 1944

Electric-Arc Furnaces During Wartime, Transmission-Line and System Problems in Supplying Large. Jones.....197–202; disc. 392 1943

Electric-Arc Furnaces—Performance and Power Supply, Large. Jones, Stearns.....763–9; disc. 1325 1941

Electric Automatic Pilot for Airplanes, An Induction Generator Used With the. Vickers.....182–5 1948

Electric Automatic Pilots for Aircraft. Halpert, Esval..861–6; disc. 1501 1944

Electric Boilers, Automatic Operation of. Eaton.....1061–8; disc. 1069 1947

Electric Braking for Railroad and Urban Transit Equipment. Craton, Turner....489–94; disc. 1170 1940

Electric Brushes, Progress Report on AIEE Test Code for. (Committee Report).....1126–8 1949

Electric-Cable Insulating Papers, The True Dielectric Breakdown Strength of. Cloke, Bates..... .....1191–5; disc. 1195 1948

Electric Charges by Moving Rubber-Tired Vehicles, Generation of. Mackeown, Wouk..... .....207–10; disc. 428 1943

Electric-Circuit Burning-Clear and Damage Phenomena on Aircraft Structures. Foust, Hutton..... .....198–204; disc. 457 1944

Electric-Circuit Element, Ferroinductance as a Variable. Ryder..... .....671–8; disc. 962 1945

Electric-Circuit Fault-Protective Principles as Applied to D-C Aircraft Systems. Kaufmann..... .....333–44; disc. 482 1944

Electric Circuits and the Magnetic Compass. Burt, Beck.....24–6 1944

Electric Conductors by Magnetic Induction—Longitudinal Flux, Heating of Nonmagnetic. Baker..273–8 1944

Electric Connection on Aircraft. Stebbins, Taylor....906–11; disc. 1473 1944

Electric Connectors, Historical Development of. Neifing.....925–8 1944

Electric Contacts, The Vibration of. Russell, Keilien..... .....153–5; disc. 478 1944

Electric Control Devices for Aircraft, Preferred Practices for. Hottenroth.....197–200; disc. 444 1945

Electric Control for Steam Boilers on Diesel-Electric and Straight Electric Locomotives. Burgess..... .....604–06; disc. 980 1942

Electric Couplings. Lory, Kilgore, Baudry.....423–8; disc. 1212 1940

Electric Current into Rods, Tubes, and Flat Surfaces, Diffusion of. Miller. 1496–1502 1947

Electric Currents, Dangerous. Dalziel. .....579–85; disc. 1123 1946

Electric Currents in Coal Mines, Causes and Effects of Stray. Harrison.... .....1759–61 1948

Electric Deicing System for Aircraft, An. Giloy.....1051–7 1949

Electric Distribution Losses in Terms of Generating-Station-Capacity Investment, Evaluation of. Mortara. .....1–7; disc. 411 1945

Electric Distribution Systems, Selective Tripping Arrangements for Protection of Ship's A-C. Cole..... .....1256–62; disc. 1262 1948

Electric Drilling Rig Equipment, Modern Diesel. Rhea.....447–53 1946

Electric Drive for a Rubber Calender Train, Co-ordinated. John, Knapp, Mosteller.....128–34; disc. 492 1946

Electric Drive for Aircraft. Crom.... .....1359–62 1947

Electric Drives for Looms, Selection of. Demartini, Lukens.....349–56 1949

Electric Drives for Steam-Electric Generating-Station Auxiliaries. Brownlee, Elsi....741–5; disc. 976 1945

Electric Drives for Supercalenders in Paper Mills. Smith..... .....338–41; disc. 341 1939

Electric Drives for Textile Finishing Ranges. Moore, Uhl.....684–94 1947

Electric Energy in Airplanes, Cables Used for Transmitting. Peters, Phillips, Kronstein, Jealous..... .....1270–82; disc. 1474 1944

Electric Equipment for Chesapeake and Ohio Railway Company Steam Turbine-Electric Locomotives. Atwell, Baston.....145–8 1949

Electric Equipment for Cold Strip Reduction Mills. Miller..... .....133–9; disc. 139 1948

Electric Equipment for Cornell Variable Density Wind Tunnel. Clymer, de Ferranti.....554–63 1946

Electric Equipment for Large Electrochemical Installations. Rhea, Zielinski.....733–41; disc. 1062 1942

Electric Equipment for Power Shovels and Draglines. Schwedes, Stoetzel. .....1498–1506; disc. 1507 1948

Electric Equipment for Ship-Propeller Milling Machine, Application of. Morton, Rutemiller..... .....205–08; disc. 453 1945

Electric Equipment for the War Emergency Pipe-Line Projects. Thomas, Taylor, Wolfe.....396–405 1944

Electric Equipment for 2-for-1 Twister. Gwaltney, Burnham.....811–4 1947

Electric-Equipment Maintenance, Airline Aircraft. Petrasek....900–05 1944

Electric Equipment, Moisture Equilibrium Between Gas Space and Fibrous Materials in Enclosed. Piper.....791–7; disc. 1152 1946

Electric Equipment Required in a Modern 6-Component Wind-Tunnel Model Suspension System. Cox.....1258–66 1947

Electric Facilities and Operating Plan for the First Chicago Subway. DeLeuw.....780–7; disc. 980 1942

Electric Furnace Load, A 10,000-Kva Series Capacitor Improves Voltage on 66-Kv Line Supplying Large. Jones, Arthur, Stearns, Johnson... .....345–51; disc. 351 1948
Electric Furnace Practice in Canada. Balleny.....917–24 1947
Electric Gun Charging, All. Rohn.... .....1–4 1946
Electric Gun Turrets for Aircraft. Thompson....799–802; disc. 1475 1944
Electric Gun Turrets for Aircraft, The Amplidyne Generator Applied to Speed-Controlled. Zahorsky..... .....221–5; disc. 436 1945
Electric Heating
FCC Diathermy Design for Low Harmonic Radiation and Good Frequency Stability. Chapin, Roberts, Mobley...42–6; disc. 46 1948
Mercury-Arc Frequency Converter for Induction Heating of Metals. Durand, Rice.....1592–9 1948
Some Economic Aspects of Radio-Frequency Heating. Duryee..... .....105–12 1948
The Measurement of Dielectric Loss at High Frequencies and Under Changing Temperature. Whitehead, Rueggeberg.....520–4 1949
Electric Heating to Deicing of Aircraft Propellers, Development and Application of. Sheets, Sand..... .....1068–72 1949
Electric Hoist Drive for Cranes, A New. Whiting.....59–64 1944
Electric Load, The Heat Pump—Its Significance as a Potential Residential. Bary.....1–8 1949
Electric Loadings, Transmission-Line. Crary.....1198–1204; disc. 1373 1944
Electric Loads for Military-Training Bases, Federal Housing, and Other Wartime Projects, Estimating. Potts.....246–54; disc. 463 1943
Electric Locomotive Application. Brandenstein, MacLeod..... .....1210–15; disc. 1382 1941
Electric Locomotives, A Power Plant Regulating System for Diesel-. Lewis.....242–6; disc. 246 1947
Electric Locomotives in Open-Pit Mine Haulage, Modern. Borland, Riley. .....52–8; disc. 433 1944
Electric Locomotives in Railroad Service Application Engineering on Diesel-. Bevan.....125–31 1949
Electric Locomotives, Short Time Ratings of Diesel-. Campbell, Woods.....1661–3 1948
Electric Locomotives, Speed-Responsive Devices on. Johansson.....336–8 1948
Electric Locomotives, Study of the Performance of the 3,600-Horsepower New Haven. Konn, Craton. .....212–16; disc. 217 1939
Electric Locomotives With Identical Basic Components. Brecht, Kerr. .....339–43; disc. 343 1948
Electric Machine Time Constants at Low Speeds, Rotating. Concordia. 882–7 1946
Electric Machines, Calorimetric Method for Determining Efficiencies of. Siegfried, Thulin.....530–2 1942
Electric Machines, Effect of Altitude on Ventilation and Rating of Aircraft. Veinott.....84–90; disc. 488 1946
Electric Machines, Organo-Silicon Compounds for Insulating. Kauppi, Moses.....90–3; disc. 457 1945
Electric Motive Power, The Renaissance of. Candee.....138–44 1949
Electric Motor, Origin of the. Michalowicz.....1288–92 1948
Electric-Motor Protection, Principles of Aircraft. Vaughan.....760–5 1943
Electric Motors Automatically, Two New Methods of Accelerating. Leitch.....487–93; disc. 655 1941
Electric Motors, One Type of Rotary Magnetic Clutch and Its Associated Brake Used on Aircraft. Andrews, Shanely.....893–5; disc. 1477 1944
Electric Motors, Requirements for Aircraft. Siefkin.....810–13 1944
Electric-Panel Space Heating, Load-Calculation Procedure for. Raber, Hutchinson...1085–91; disc. 1432 1944
Electric Power at Extra High Voltages, Transmission of. Sporn, Monteith. .....1571–7; disc. 1577 1947
Electric-Power-Distribution Ideas as Applied in a Large War Plant, Modern. Kaufmann, Kieb..... .....279–87; disc. 488 1945
Electric-Power-Distribution Scheme With Airplane-Engine-Testing Power Recovery, Dodge Chicago Plant's. Bailey..121–3; disc. 484 1945
Electric-Power Distribution Systems in Wartime. Sporn..... .....105–07; disc. 432 1942
Electric Power Equipment, Silicone Insulation as Applied to Naval. Walker.....977–80; disc. 980 1947
Electric Power for Airplanes. Clardy.. .....385–8; disc. 388 1940
Electric Power in a Steel Plant. Graham.....816–18; disc. 994 1945
Electric Power in Open-Pit Copper Mining, Utilisation of. French, Speight.....956–66; disc. 966 1948
Electric Power, Oil Production by. Taylor.....977–86; disc. 986 1948
Electric Power Protective Systems, Aircraft. Austin.....1375–82 1947
Electric-Power Service for Pipe Lines, The Capacitor—an Aid to. Hyde, Marbury.....387–95; disc. 476 1944
Electric Power-Supply System, Aircraft. Yarmack..655–8; disc. 953 1943
Electric-Power System, Pressure-Arc-Interruption Circuit Breakers for 400-Cycle Aircraft. Austin..... .....58–60; disc. 487 1946
Electric Power System, Transformer Audio Noise Problems on an. Murray.....740–7; disc. 747 1949
Electric-Power Systems in Large Military Aircraft, Basic Design Principles for A-C. Chappuis, Olmsted.....12–17; disc. 487 1946
Electric-Power Systems, Transient Recovery-Voltage Characteristics of. St. Clair, Adams.666–9; disc. 1016 1942
Electric Power Systems With Improved Instruments, Testing Governor Performance on. Allen, Hess..... .....329–39; disc. 339 1947
Electric Propulsion in Naval Surface Vessels. Jucarone..... .....1329–39; disc. 1340 1948
Electric Resistance Heating, Industrial. Hynes.....1359–61 1948
Electric Rig for Deep-Well Drilling, Performance of Diesel-. Clark, Moore.....497–506 1949
Electric Service by Means of High-Speed Switching and Utilisation of Stored Energy, Factors Contributing to Improving. Logan, Miles.....1012–16; disc. 1408 1941
Electric-Service-Load Characteristics, Coincidence-Factor Relationships of. Bary.....623–9 1945
Electric Shock. Dalziel, Lagen, Thurston.....1073–8; disc. 1295 1941
Electric Strength of Air at High Pressure, The:
Part I. Skilling....161–5; disc. 165 1939
Part II. Skilling and Brenner..... .....112–15; disc. 677 1941
Electric Stress in Impregnated-Paper Insulation, Temperature and. Whitehead, MacWilliams..... .....10–13; disc. 458 1942
Electric-Supply Systems, Present D-C Aircraft. Anderson, Crary, Schults .....265–72; disc. 484 1944
Electric Synchronous Motor Ship Drives—Propulsion Control Problems, Diesel-. Frisch.....660–6 1946
Electric System, A 120-Volt D-C Aircraft. Cobb..1327–34; disc. 1495 1944
Electric System for Large Aircraft, Governor for Variable-Ratio Transmission Used in Developmental 400-Cycle. Desch, Garr, Hutton.. .....194–8 1946
Electric System of the Consolidated Edison Co. of New York, Inc., Provisions for Re-energising the. Milne, Otten...579–85; disc. 1155 1940
Electric System, Planning the Development of a Metropolitan. Waring. .....1467–72; disc. 1472 1948
Electric Systems as a Function of Altitude, Corona in Aircraft. Wilson. .....189–94; disc. 457 1944
Electric Systems, Differential Generator Control Relay for D-C Aircraft. Crever.....589–93 1944
Electric Systems for Large Aircraft, Basic Considerations in Selection of. Boice, Levoy..... .....279–87; disc. 478 1944
Electric Systems, Higher-Voltage D-C Aircraft. Berry, Dallas..... .....843–9; disc. 1497 1944
Electric Systems, Instrumentation of 400-Cycle Aircraft. Corson, Stimson, Soley.....830–5; disc. 1501 1944
Electric-Systems—the Vi Energy-Flow Postulate, Energy Flow in. Slepian. .....835–41; disc. 1054 1942
Electric Tachometers, Precision Testing of. Princi.....504–08; disc. 946 1945
Electric Textile-Range Drives, Turbine-. Richardson.....57–60 1940
Electric Welding
Analysis of Arc-Welding Reactors. Wheeler.....87–90; disc. 434 1945
Electrical Characteristics of Resistance Welding Tools. Callender. 393–404 1947
Functionalized Resistance Welding Control. Stadum, Large, Hartwig. 414–18 1947
Line Drop Produced by Resistance Welders. Longini.619–23; disc. 963 1945
Power-Factor Correction of Resistance-Welding Machines by Series Capacitors. Levoy..... .....1002–09; disc. 1102 1940
Power Supply for A-C Arc Welding. Welch, Wyer....116–20; disc. 435 1945
Power Supply for Resistance Welding Machines. (Committee Report): Parts I and II.....306–20 1940 Part III.....185–92 1941
Power Supply for Single-Phase Resistance Welders. Wright..... .....705–07; disc. 707 1939
Predetermination of Temperatures in Resistance Welds. Johnson..... .....845–53; disc. 853 1939
Rating of Electric Equipment Under Intermittent Load. Zucker..... .....778–83; disc. 1381 1944
Resistance of the Spot Weld. Ciganek.....997–1002 1940
Simplified Precision Resistance-Welder Control. Roby..... .....528–32; disc. 532 1939
The A-C Arc Progresses. Holslag... .....364–7; disc. 367 1939
The Application of Series Capacitors to Flash Welders. Deffenbaugh... .....686–9 1946
The Power-Distribution Problem in Arc Welding. Pierce, Smith..... .....178–84; disc. 435 1945
The Voltage Drop in the Welder Throat Loaded With Ferromagnetic Materials. Stein.....356–62 1947
Voltage Changes Caused by Resistance Welding Loads. Johnson, Peterson, Rhoades..... .....664–73; disc. 674 1947

When the Welding Load Outgrows the Distribution Power Supply. Clark, Stearns....645–8; disc. 964 1945
Electric Windings, Insulation Testing of. Foust, Rohats.....203–06; disc. 454 1943
Electric-Wiring Installations in British Aircraft. Horn.....896–900 1944
Electrical Accuracy of Selsyn Generator-Control Transformer System. Chestnut.....570–6; disc. 1118 1946
Electrical Analogy, Dimensionless Analysis of Servomechanisms by. Herwald, McCann:
Part I.....636–9; disc. 1132 1946
Part II.....111–18 1947
Electrical Analogy Methods Applied to Servomechanism Problems. McCann, Herwald, Kirschbaum.....91–6; disc. 515 1946
Electrical Analogy, Solution of the General Voltage Regulator Problem by. Harder.....815–25; disc. 825 1947
Electrical Analogy, The Transient Behavior of the Two-Stage Rototrol Main Exciter Voltage Regulating System as Determined by. Carleton.....59–63 1949
Electrical and Hydraulic Testing of Hydroelectric Units, Technique of. Floyd, Traill.....163–9; disc. 493 1946
Electrical and Mechanical Design, Tennessee Valley Authority Hydroelectric Stations—. Hopkins, Petersen.....920–31; disc. 1132 1946
Electrical and Mechanical Parameters of a Permanent-Magnet Movable-Coil Instrument Having a General Circuit, Relation Between. Goodwin.....374–9 1948
Electrical and Mechanical Testing of Radio-Frequency Cables at the Naval Research Laboratory, Methods of. Miller.....934–5 1945
Electrical Anti-Icing of Aircraft Windshields. McCrumm.....786–91 1946
Electrical Apparatus, A Method for Detecting the Ionization Point on. Quinn.....680–2; disc. 1229 1940
Electrical Apparatus, Effect of Altitude on Impulse and 60-Cycle Strength of. Bellaschi, Evans.....236–41; disc. 442 1944
Electrical-Brush Disintegration, Some Measures of. Coover, Jones. 750–4 1943
Electrical Characteristics of McNary Generators and Transformers with Bonneville Power Administration Transmission System, Matching. Hoard, Weiner. 1022–5; disc. 1026 1949
Electrical Characteristics of Resistance Welding Tools. Callender.....393–404 1947
Electrical Characteristics of the Junction in a Simplified Selenium Rectifier Cell. Angello.....175–80 1947
Electrical Constants of 270-Mile 154-Kv Transmission Line, Measured. Streifus, Roadhouse, Gow.....538–42; disc. 1351 1944
Electrical Contacts and Its Prevention, Bridge Erosion in. Pfann. 1528–33 1948
Electrical Control in Automatic Pilots. Young, Lynch, Boynton.....939–43; disc. 1500 1944
Electrical Design Features—Steam-Electric Generating Station P of the Pacific Gas and Electric Company. Benson.....1013–20; disc. 1020 1949
Electrical Design, Tennessee Valley Authority Hydroelectric Stations. Hopkins.....1281–93; disc. 1408 1941
Electrical Developments in the Pulp and Paper Industry. Baker.....827–34; disc. 834 1948
Electrical Drives for Wide Speed Ranges. Caldwell, Formhals.....54–6 1942
Electrical Engine Indicator for Measuring Static and Dynamic Pressures, An. Martin, Grinstead, Frawley.....513–23; disc. 725 1941
Electrical Engineering, A New Approach to Probability Problems in. Adler, Miller....630–2; disc. 1118 1946
Electrical Engineering, Analytical Methods of Solving Discrete Nonlinear Problems in. Keller.....1194–1200; disc. 1389 1941
Electrical Engineering and the Petroleum Refiner. Weeks, Giesecke, Lathrop.....106–09; disc. 109 1940
Electrical Engineering in the Field of Transportation, Unsolved Problems of. Noertker...992–6; disc. 1173 1940
Electrical Equipment for Industrial Diesel-Electric Locomotives, Modern. Greer.....229–32; disc. 400 1942
Electrical Equipment for Large Diesel-Electric Locomotives, Progress in Design of. Smith 130–1; disc. 404 1942
Electrical Equipment in Hydraulic Power Plants, Trends in the Design and Arrangement of. Welchel.....78–82; disc. 82 1939
Electrical Equipment of the Union Pacific Steam-Electric Locomotive. Hanna, Tritle..756–64; disc. 1082 1940
Electrical Equipment on Machine Tools. Graves....18–22; disc. 22 1940
Electrical Equipment on Shipboard, Ventilation of Rotating. Harrison.....1263–9; disc. 1269 1948
Electrical Equipment Used in Reflection - Seismograph Prospecting. Nash, Palmer...855–60; disc. 860 1939
Electrical Equipment With Basic Insulation Levels, The Co-ordination of. Foote, North.....585–9; disc. 1204 1940
Electrical Features Electropneumatic Brakes for High-Speed Trains With Particular Reference to Their. McCune.....137–42 1942
Electrical Features of Design and Operation of the Plantation Pipe Line. Hyde, Britton.....638–44; disc. 1051 1942
Electrical Gaps in Oil, Surge-Voltage Breakdown Characteristics for. Sorensen.....78–81; disc. 81 1940
Electrical Governor, An. Morgan.....80–4 1941
Electrical Horizons, Aircraft. Godsey, Berry, Holliday..821–4; disc. 1503 1944
Electrical Instrument in Magnetic Fields, Performance of Portable. Peterson.....1228–31; disc. 1231 1948
Electrical Insulating Oils, Low-Voltage D-C Measurements on. Oncley, Hollibaugh.....625–8; disc. 1227 1940
Electrical-Insulating Varnishes, Control of. Gibson, Braithwaite....520–4 1945
Electrical Insulation Deterioration Treated as a Chemical Rate Phenomenon. Dakin.....113–18; disc. 118 1948
Electrical-Insulation Failure, Chemical Contamination as Causes of. Braithwaite, Moses.....580–3; disc. 945 1945
Electrical Insulation Methods for Determining the Effects of Contaminants on. Mathes, Sieffert, Walker, Lindsey. 113–18; disc. 118 1949
Electrical Machinery
A Design Method for Capacitor Motors. Lloyd, Chang.....651–7; disc. 657 1947
A Design Method for D-C Machines. Beers, Karr.....172–5; disc. 497 1944
A Discussion of Proposed ASA Transformer Standards. Henry.....289 1939
A Generalized Circle Diagram for a Four-Terminal Network and Its Application to the Capacitor Single-Phase Motor. Tarboux.....881–9; disc. 943 1945
A Generalized Equivalent Circuit in the Theory of Polyphase Commutator Motors. Coulthard. 423–31 1941
A Graphical Analysis of the Voltage and Current Wave Forms of Controlled Rectifier Circuits. Chin, Moyer.....501–08 1944
A High Precision Dynamometer for Small Motor Measurements. Duff.....1344–8; disc. 1348 1947
A New Control System for Automatic Parallel Operation of Load-Ratio-Control Transformers. Minneci, Farnham...488–93; disc. 916 1943
A New Transformer for Base-Load Stations. Sporn, Putman.....916–18; disc. 1358 1941
A New Type of Adjustable Speed Drive for A-C Systems. Conrad, Smith, Ordung:
Part I.....7–10; disc. 385 1943
Part II.....522–5; disc. 932 1943
A Portable Instrument for Measuring Insulation Resistance at High Voltage. Atkinson, Taylor.....164–7; disc. 428 1945
A Study of Short-Time Ratings and Their Application to Intermittent Duty Cycles. Hellmund, McAuley.....1050–5; disc. 1221 1940
A Study of Sound Levels of Transformers. Fahnoe.....277–83; disc. 748 1941
A Study of the Modified Kramer or Asynchronous-Synchronous Cascade Variable-Speed Drive. Liwschits, Kilgore.....255–60 1942
A Study of the Relative Severity of Steep Front Waves and Chopped Waves on Transformers. Vogel.....64–6; disc. 66 1947
A Useful Equivalent Circuit for a Five-Winding Transformer. Aicher.....66–70; disc. 385 1943
A Variable-Speed Constant-Frequency Generator. Roys, Nader, Spotts.....1414–17; disc. 1417 1947
Accuracy of Temperature Measurements on Coil Surfaces. Beede, Cain.....586–90; disc. 590 1947
Alcoa Rectifier Installation. Housley, Winograd.....1266–74; disc. 1409 1941
An Application of Deceleration Test Methods to the Determination of Induction-Motor Performance. Ager.....72–6 1939
An Automatic Voltage Regulator Without Moving Parts Employing Ferroresonance. Craig.....830–6; disc. 836 1939
An Extension of the Method of Symmetrical Components Using Ladder Networks. Lyon.....1025–30; disc. 1263 1940
Analysis of Rating Methods for Intermittent Loads. Hellmund....4–7 1943
Analysis of Short-Circuit Oscillograms. Kuyper..151–3; disc. 752 1941
Apparent-Impedance Method of Calculating Single-Phase Motor Performance, The. Morrill..1037–41 1941
Application of and Operating Experience With Hydrogen-Cooled Synchronous Condensers and Alternators. Sporn, Porter.....890–907; disc. 1187 1940
Application of Apparatus and Conductors Under Various Ambient-Temperature Conditions. Hellmund, McAuley..553–8; disc. 992 1942
Application of Class B Insulation to Auxiliary-Type D-C Motors in Severe Duty Service, The. Compton.....828–34; disc. 1098 1940
Asbestos and Glass-Fiber Magnet-Wire Insulation. Mathes, Stewart.....290–4 1934
Asymmetrical Loading of Three-Phase Three-Winding Transformer Banks. Denissov..27–9; disc. 444 1944

Behavior Factors of Rectifier-Driven D-C Motors. Siegfried.....530–3; disc. 1357 1944

Control of Electrical-Insulating Varnishes. Gibson, Braithwaite. 520–4 1945

Correction for Saturation. McFarland.....233–5 1942

Cooling Power Transformers by Forced Circulation of Cooling Medium. Paluev, Burnham.....215–21; disc. 445 1943

Critical-Material Conservation in Induction - Motor Manufacture. Hobart.....549–52; disc. 927 1943

Cross-Field Theory of the Capacitor Motor. Puchstein, Lloyd.....58–62; disc. 667 1941

Current and Torque of D-C Machines on Short Circuit. Linville.....956–65; disc. 1144 1946

Current Loci for the Capacitor Motor. McFarland.....152–6 1942

Damping and Synchronizing Torque of the Double-Fed Asynchronous Machine. Liwschitz.....923–4 1941

Damping and Synchronizing Torques of Power Selsyns. Concordia, Kron.....366–71; disc. 490 1945

Dead Points in Squirrel-Cage Motors. Graham.....637–42 1940

Design and Operating Characteristics of Modern Dry-Type Air-Cooled Transformers. Satterlee.....701–04; disc. 1445 1944

Design of Starting Windings for Split-Phase Motors. Lloyd, Karr..9–13 1944

Design of Variac Transformers. Karplus.....508–13 1944

Determination of Short-Circuit Torques in Turbine Generators by Test. Whitney, Criner.....885–9; disc. 1195 1940

Determination of Temperature Rise of Induction Motors. Summers.....459–67; disc. 472 1939

Die Cast Rotor Testing by Test Stator Method. Trickey.....139–41; disc. 483 1946

Dielectric Strength and Protection of Modern Dry-Type Air-Cooled Transformers. Bellaschi, Beck.....759–63; disc. 997 1945

Dielectric Strength of Station and Line Insulation to Switching Surges. Bellaschi, Rademacher.....1047–54; disc. 1173 1946

Differential Leakage of a Fractional-Slot Winding. Liwschitz..314–20 1946

Differential Leakage With Respect to the Fundamental Wave and to the Harmonics. Liwschitz. 1139–50 1945

Direct-Acting Generator Voltage Regulator, The. Boice, Crary, Kron, Thompson.....149–56; disc. 156 1940

Distribution Factors and Pitch Factors of the Harmonics of a Fractional-Slot Winding. Liwschitz.....664–6; disc. 926 1943

Duty Cycles and Motor Rating. Hildebrand.....478–83; disc. 483 1939

Dynamic Brush Characteristics by the Dynamotor Method. Herman.....759–63 1947

Dynamic Characteristics of a Single-Phase Induction Motor. Kurtz.....801–06; disc. 1096 1940

Effect of Load Factor on Operation of Power Transformers by Temperature. Montsinger.....632–6; disc. 1224 1940

Effective Resistance to Alternating Currents of Multilayer Windings. Bennett, Larson.....1010–17; disc. 1262 1940

Electric Couplings. Lory, Kilgore, Baudry.....243–8; disc. 1212 1940

Electromechanical Transient Performance of Induction Motors. Weygandt. Charp.....1000–09; disc. 1167 1946

Emergency Overloading of Air-Cooled Oil-Immersed Power Transformers by Hot-Spot Temperatures. Montsinger, Ketchum.....906–916; disc. 993 1942

Emergency Overloads for Oil-Insulated Transformers. Vogel, Sloat.....669–73; disc. 988 1942

Equal-Volt-Ampere Method of Designing Capacitor Motors, The. Trickey.....990–2; disc. 1399 1941

Equivalent Ambient Temperatures for Loading Transformers. Sealey.....87–93; disc. 449 1943

Equivalent Circuit Impedance of Regulating Transformers. Clem.....871–3; disc. 873 1939

Equivalent Circuit of the Primitive Rotating Machine With Asymmetrical Stator and Rotor. Kron.....17–23; disc. 23 1947

Excitation Circuits for Ignitron Rectifiers. Myers, Cox.....943–8; disc. 1358 1941

Factors Affecting Insulation Resistance of Large D-C Machines. Johnson, Weil.....705–10; disc. 1194 1946

Factors Affecting the Design of D-C Magnets. Rader.....307–10; disc. 387 1943

Factors Affecting the Mechanical Deterioration of Cellulose Insulation. Clark.....742–9; disc. 991 1942

Fiber Glass—An Inorganic Insulation. Atkinson..277–82; disc. 283 1939

Field Harmonics in Induction Motors. Liwschitz.....797–803 1942

Flashover Characteristics of Transformer Condenser Bushings. Cole.....27–32; disc. 32 1939

Fractional-Slot and Dead-Coil Windings. Malti, Herzog.....782–94; disc. 1079 1940

Fundamentals of the Amplidyne Generator. Bower.....873–81 1945

Generator Damper Windings at Wilson Dam. George, Bessesen.....166–71; disc. 171 1939

Guides for Operation of Transformers, Regulators, and Reactors. (Committee Report).....797–806; disc. 957 1945

Harmonic Theory of Noise in Induction Motors. Morrill.....474–80; disc. 1148 1940

Heating of a D-C Armature. Fechheimer.....920–6; disc. 1210 1940

High-Voltage Compressed-Gas Power Transformers. Hobart.....690–2; disc. 1448 1944

High-Voltage Power-Transformer Design. Mallett...526–31; disc. 966 1943

Hiperco-A Magnetic Alloy. Stanley, Yensen.....714–8 1947

Hot-Spot Temperatures in Dry-Type Transformer Windings. Stewart, Whitman.....763–8; disc. 1445 1944

Hot-Spot Winding Temperatures in Self-Cooled Oil-Insulated Transformers. Vogel, Narbutovskih.....133–6; disc. 418 1942

Hydrogen-Cooled Turbine Generator, The. Snell.....35–45; disc. 45 1940

Hydrogen-Cooled Turbine Generators. Ross, Sterrett.....11–16; disc. 16 1940

Impulse-Failure-Detection Methods as Applied to Distribution Transformers. Stewart, Holcomb.....640–44; disc. 956 1945

Induction-Motor Characteristics at High Slip. Morgan, Brown, Schumer.....464–8; disc. 1208 1940

Industrial Control: Dynamic Braking of a D-C Shunt Motor and Load. Leland, Rader.....472–6 1943

Industrial Control: Heating of Shunt-Motor Starting Resistors. Leland, Rader....695–9; disc. 961 1945

Industrial Control—Shunted-Armature Connection for a D-C Shunt Motor. Leland, Rader.....617–19; disc. 1410 1944

Inherent Errors in the Determination of Synchronous-Machine Reactances by Test. Concordia, Maginniss.....288–94; disc. 491 1945

Insulation Resistance and Dielectric-Absorption Characteristics of Large A-C Stator Windings. Askey, Johnson.....347–51; disc. 458 1945

Insulation Temperature Standards for Industrial-Control Coils. Erikson.....546–8; disc. 1408 1944

Interim Report on Guides for Overloading Transformers and Voltage Regulators. (Committee Report).....692–4; disc. 1063 9142

Interim Report on Overloading Current-Limiting Reactors. (Committee Report)..611–12; disc. 968 1943

Interim Report on Overloading Distribution Transformers. (Committee Report)..516–17; disc. 968 1943

Interlaminar Eddy Current Loss in Laminated Cores. Beiler, Schmidt.....872–7; disc. 877 1947

Interlamination Resistance. Barton.....670–2 1944

Inverter Action on Reversing of Thyratron Motor Control. Palmer, Leigh.....175–84; disc. 494 1944

Investigation of Hot-Spot Temperatures in Fractional-Horsepower Motors. Hirsch, Munier, Schmidt, Wightman, Himebrook, Lloyd, Coffman, Potter.128–36; disc. 421 1945

Investigation of Hot-Spot Temperatures in Integral-Horsepower Motors. Hildebrand, Cain, Phillips, Hough, Rosswog, Potter.....124–8; disc. 421 1945

Large Adjustable-Speed Wind-Tunnel Drive. Clymer...156–8; disc. 456 1942

Liquid Cooling of A-C Turbine Generators. Fechheimer.....553–61; disc. 561 1947

Loading Transformers by Copper Temperature. Putman, Dann.....504–09; disc. 510 1939

Maintenance of Good Brush Performance. Kalb.....819–25; disc. 996 1945

Measurement of Stray-Load Loss in Induction Motors. Ware.....194–7; disc. 433 1945

Measurement of Temperature in General-Purpose Squirrel-Cage Induction Motors. Potter.....468–72; disc. 472 1939

Measurement of the Subtransient Impedances of Synchronous Machines. Tracy, Tice. 70–6; disc. 429 1945

Methods of Determining Natural Frequencies in Coils and Windings Bewley, Hagenguth, Jackson.....1145–50; disc. 1361 1941

Mobile Capacitor Units for Emergency Loading of Transformers in Open Delta. Wolf, Mattison.....83–6; disc. 373 1943

Modern Cargo-Winch Control for Use on Victory Ships. Holt.....623–8; disc. 1141 1944

Motor Insulation, Heat, and Moisture. McAuley.....707–12 1942

New Developments in Potential-Transformer Design. Camilli.....483–7; disc. 920 1943

New NEMA Fractional-Horsepower Motor Standards; Their Effect on Refrigeration and Pump Applications. Potter.....508–10 1947

Oil-Impregnated-Paper High-Voltage Condenser Bushings for Circuit Breakers and Transformers. Lingal, Cole, Watts..269–75; disc. 439 1943

150,000 Horsepower Applied to Aeronautical Research. White...833–9 1946

Open-Delta Transformer Banks—Analysis of Circuit. Clem.....292–7; disc. 374 1943

Operation of Nonsalient-Pole Type Generators Supplying a Rectifier Load. Ross, Batchelor.....667–70; disc. 959 1943

Oscillations of a High-Voltage Secondary Winding. Boyajian.....1010–20 1946

Overloading of Transformers—Cases Not Covered by the General Rules. Sealey, Hodtum. 149–53; disc. 443 1944

Per-Unit Impedances of Synchronous Machines. Rankin:
Part I.....569–73 1945
Part II.....839–41 1945

Performance Calculations on Capacitor Motors. Trickey.....73–6; disc. 662 1941

Performance Calculations on Polyphase Reluctance Motors—Synchronous Motors Without Field Excitation. Trickey.....191–3 1946

Performance Calculations on Repulsion Motors. Trickey.....67–73; disc. 661 1941

Performance Calculations on Tapped-Winding Capacitor Motors. Trickey.....1–3 1943

Performance of Traveling Waves in Coils and Windings. Rudenberg..1031–40; disc. 401257 19

Pole-Face Loss in Solid-Rotor Turbine Generators. Kuyper.....827–34; disc. 925 1943

Positive and Negative Damping in Synchronous Machines. Liwschits.....210–13 1941

Power-Factor Testing of Transformer Insulation. Hodtum.....28–30; disc. 647 1941

Precision Speed Control for World's Largest Induction Motor. Longwell, Reagan....634–8; disc. 1050 1941

Preliminary Report on Laboratory Aging Tests on Class A Insulation. (Committee Report).....879–81; disc. 881 1947

Prevention of Rotor-Winding Deformation on Turbogenerators. Noest.....514–19; disc. 1353 1944

Progress in Impulse Testing of Transformers. Hagenguth.....999–1005; disc. 1440 1944

Progress Report of D-C Testing of Generators in the Field. Davis, Leftwich.....14–18; disc. 470 1942

Protection of Power Transformers Against Lightning Surges. (Committee Report)..568–77; disc. 749 1941

Quadrature Synchronous Reactance of Salient-Pole Synchronous Machines, The. Shepherd, Kilbourne.....684–9; disc. 926 1943

Rating and Application of Motors for Refrigeration and Air Conditioning. Rutherford.....519–23; disc. 523 1939

Rating of General-Purpose Induction Motors. Alger, Johnson.....445–56; disc. 456 1939

Rating of High-Temperature Induction Motors. Alger, Jones.....300–02; disc. 458 1945

Rating of Power Transformers as Determined by the War Emergency. Salsbury, Phillips.....255–60; disc. 452 1943

Recent Developments in Generator Voltage Regulation. Hanna, Oplinger, Valentine. 838–44; disc. 844 1939

Recent Developments in Speed Regulation. Hanna, Oplinger, Mikina.....692–700 1940

Reconditioning of Insulating Oils by Activated Alumina. Housley.....172–6; disc. 176 1939

Rectifier Terminology and Circuit Analysis. Willis, Herskind.....496–9; disc. 974 1942

Reference Values for Temperature, Pressure, and Humidity. Bellaschi, McAuley.....669–75; disc. 1227 1940

Report on Apparatus Bushings. (Committee Report).....266; disc. 695 1941

Resonant-Circuit Constant-Current Regulators. Kevern.....807–10; disc. 992 1945

Resonant-Type Constant-Current Regulators. Miner.....822–8; disc. 828 1939

Reverse-Rotation Test for the Determination of Stray Load Loss in Induction Machines. Morgan, Brown, Schumer.....319–22; disc. 322 1939

Rotor-Bar Currents in Squirrel-Cage Induction Motors. Gault.....784–91; disc. 1327 1941

Self-Excitation of Induction Motors. Wagner.....47–51 1939

Self-Excitation of Induction Motors With Series Capacitors. Wagner.....1241–7; disc. 1391 1941

Selsyn Design and Application. Johnson.....703–08; disc. 960 1945

Short-Circuit Requirements for Transformers. Garin.....710–3 1947

Short Circuits in Synchronous-Machine Armatures. Galbraith..1024–9 1941

Shutdown Versus Hot-Spot Temperatures in Polyphase Induction Motors. Potter, Frohardt.....56–8; disc. 483 1946

Silicone Insulation as Applied to Naval Electric Power Equipment. Walker.....977–80; disc. 980 1947

Simplified Graphical Method of Computing Thermal Transients. Narbutovskih.....78–81; disc. 82 1947

Single-Phase Induction-Motor Performance Calculation. Himebrook.....55–8; disc. 666 1941

Single-Phase Motor Theory—a Correlation of the Cross-Field and Revolving-Field Concepts. Button..507–12; disc. 664 1941

Some Acceleration Tests on Large Synchronous Pump Motors. Ager.....416–22; disc. 649 1941

Some Aspects of Electric-Motor Design — Polyphase-Induction-Motor Design to Meet Fixed Specifications. Lloyd....14–20; disc. 498 1944

Some Aspects of Polyphase Motor Design—The Design and Properties of the Magnetic Circuit. Lloyd, Stone...812–18; disc. 1151 1946

Some Factors in the Mechanical Design of High-Speed Turbogenerators. Mortensen, Ryan.....51–6; disc. 56 1940

Some Measures of Electrical-Brush Disintegration. Coover, Jones....750–4 1943

Some Problems in the Standardization of Temperature Ratings of Fractional - Horsepower Motors. Veinott.....1055–61; disc. 1218 1940

Special Problems of Two-Pole Turbine Generators. Laffoon, Rose...30–3; disc. 33 1940

Standards and Insulation Characteristics of Oil-Insulated Transformers. Vogel. 167–71; disc. 431 1945

Starting Performance of Salient-Pole Synchronous Motors. Liwschits...913–19; disc. 1215 1940

Starting Windings for Single-Phase Induction Motors. Veinott.....288–94; disc. 499 1944

Static Power Limits of Synchronous Machines. Dalziel.....93–101; disc. 101 1939

Static Voltage Regulator for Rototrol Exciter. Harder, Valentine.....601–06 1945

Steady-State Theory of the Amplidyne Generator. Graybeal.....750–6; disc. 1049 1942

Substation-Transformer Emergency Overloading Practice. Clark.....126–32; disc. 453 1943

Suppression of Magnetic Vibration and Noise of Two-Pole Turbine Generators. Penniman, Taylor....283–8; disc. 745 1941

Surge Characteristics of Two-Winding Transformers. Rudenberg.....1136–44; disc. 1333 1941

Symmetrical Components as Applied to the Single-Phase Induction Motor. Suhr....651–6; disc. 958 1945

Synchronous Motors With Controlled Excitation for Suddenly Applied Loads. Boice, Caldwell, Halberg..113–19; disc. 416 1943

Synchronous Starting of Generator and Motor. Concordia, Crary, Kilbourne, Weygandt.....629–34; disc. 956 1945

Tapered-Thickness Bimetal. Elmer.....661–5; disc. 962 1945

Temperature Aging Characteristics of Class A Insulation. Smith, Scott..435–42; disc. 442 1939

Temperature-Aging Tests on Class-A-Insulated Fractional-Horsepower Motor Stators. Scott, Thompson.....499–501; disc. 977 1942

Temperature Limits and Characteristics of Mica as Used in Conjunction With Class "B" Insulation. Spry.....287–9 1939

Temperature Limits and Measurements for Rating of D-C Machines. Compton.....780–5 1943

Temperature Limits for Short-Time Overloads for Oil-Insulated Neutral Grounding Reactors and Transformers. Part II. Montsinger, Clem.....966–73; disc. 1155 (Part I by V. M. Montsinger—1938) 1946

Temperature Limits Set by Oil and Cellulose Insulation. Hill.....484–7; disc. 487 1939

Temperature Rise of Electrical Apparatus as Affected by Radiation. Penney.....338–42; disc. 342 1940

Temperature Rise of Water-Cooled Power Transformers. Meador.....18–21 1946

Temperature Survey of the United States. Smith, Tenney.....769–75; disc. 1090 1940

The Asymmetrical Stator as a Means of Starting Single-Phase Induction Motors. Baum..245–50; disc. 496 1944

The Audio Noise of Transformers. Sealey.....109–12; disc. 745 1941

The Basis for the Nondestructive Testing of Insulation. Field.....890–5; disc. 1347 1941

The "Black Band" Method of Commutation Observation. Schroeder, Aydelott.....446–51; disc. 659 1941

The Calculation of Unbalanced Magnetic Pull in Synchronous and Induction Motors. Robinson.....620–24; disc. 924 1943

The "Copperspun" Squirrel Cage Rotor. Anderson.....1312–14 1947

The Degree of Short-Circuit Protection Afforded Small Low-Voltage A-C and D-C Starters by Means of Fuses and Circuit Breakers. Jones.....611–12; disc. 1408 1944

The Design and Performance of the Vertical Generator Thrust Bearings at the Bonneville Plant of the Corps of Engineers, War Department. Lewis, Gordon..1231–7; disc. 1237 1947

The Dielectric Properties of Cellulose Insulation Impregnated With Semiconducting Liquids. Clark.....55–62; disc. 62 1947

The Doubly Fed Machine. Concordia, Crary, Kron.....286–9 1942
The Equivalent Circuit of the Capacitor Motor. Chang.....631–40 1947
The Evolution of Standard Lines of Current Transformers for High Overcurrent Capacity. Wents.....658–62; disc. 1426 1944
The Horsepower Output of Polyphase Motors. Robinson.....770–5 1947
The Hysteresis Motor—Advances Which Permit Economical Fractional Horsepower Ratings. Roters.....1419–30; disc. 1430 1947
The Inherent Overheating Protection of Single-Phase Motors. Potter.....993–6; disc. 1400 1941
The Magnetomotive Force of 2-Layer Windings of Rotating Machines. Stein.....756–8 1947
The Multistage Rototrol. Liwschits.....564–8 1947
The Polyphase Commutator Regulator for Speed Control. Conrad, Brooks, Fellers...321–8; disc. 484 1946
The Rectifier Calculus. Goodhue.....687–91; disc. 1073 1940
The Short-Circuit Characteristics of D-C Generators. Frost.....394–402; disc. 484 1946
The Transient-Energy Method of Calculating Stability. Magnusson.....747–55; disc. 755 1947
The Use of Auxiliary Impedances in the Single-Phase Operation of Polyphase Induction Motors. Ager.....494–9; disc. 660 1941
Theory of Hysteresis-Motor Torque. Teare.....907–12; disc. 1208 1940
Theory of the Brush-Shifting A-C Motor. Conrad, Zweig, Clarke:
Part I.....829–34 1941
Part II.....834–36 1941
Part III.....502–06 1942
Part IV.....507–13 1942
Thermal Protection of Transformers Under Overload Conditions. Montsinger, Camilli....160–4; disc. 444 1944
Transformer Magnetising Inrush Currents and Influence on System Operation. Blume, Camilli, Farnham, Peterson..366–75; disc. 423 1944
Transient Electrical Torques of Turbine Generators During Short Circuits and Synchronising. Kirschbaum.....65–70; disc. 492 1945
Transient Overspeeding of Induction Motors. Ager.....1030–2 1941
Transient Performance of Induction Motors. Maginniss, Schults.....641–6; disc. 1458 1944
Transient Starting Torques in Induction Motors. Wahl, Kilgore.....603–07; disc. 1263 1940
Transient Torques in Squirrel-Cage Induction Motors, With Special Reference to Plugging. Gilfillan, Kaplan.....1200–09; disc. 1363 1941
Transients in A-C Motors and Generators. Smith.....61–9 1946
Turn Ratio of the Capacitor Motor. McFarland.....892–8 1943
Typical Transformer Faults and Gas Detector Relay Protection. Madill.....1052–8; disc. 1058 1947
Use of Equivalent Annual Ambient Temperature in Overloading Transformers and Voltage Regulators. Oldacre.....477–80; disc. 916 1943
Variable-Speed Drive for United States Army Air Corps Wind Tunnel at Wright Field, Dayton, Ohio. Dickey, Laffoon, Kilgore.....126–30; disc. 456 1942
Variable-Unbalanced-Voltage Control. Wickerham.....98–102; disc. 449 1945
Water-Cooled Steel-Tank Rectifier Corrosion Problem, The. Remscheid.....173–8; disc. 753 1941
Water Solution in High-Voltage Dielectric Liquids. Clark.....433–41; disc. 1192 1940
Winding-Fault Detection and Location by Surge-Comparison Testing. Moses, Harter..499–503; disc. 945 1945
Wound and Dummy Rotor Methods of Quality Control and Trouble Shooting of Induction-Motor Windings and Cores. Trickey.....842–4; disc. 998 1945
Electrical Machinery and Apparatus, The Rating of. Hellmund.....499–503; disc. 503 1939
Electrical Machinery, Effects of Temperature on Mechanical Performance of Rotating. Lynn.....514–7; disc. 517 1939
Electrical Machinery, Equivalent Circuits for the Hunting of. Kron.....290–6; disc. 456 1942
Electrical Machinery, Negative Damping of. Concordia, Carter.....116–19; disc. 752 1941
Electrical Machinery—1934–39, Progress of the Art in. (Committee Report).....103–06 1940
Electrical Machinery, The Application of Silicone Resins to Insulation for. DeKiep, Hill, Moses.....94–8; disc. 460 1945
Electrical Machinery, The Nature of Vibration in. Graybeal.....712–18; disc. 1458 1944
Electrical Maintenance Essential to Transportation, Adequate. Clardy.....517–21; disc. 945 1943
Electrical Means, Stress Measurement by. Kern, Williams.....100–07 1946
Electrical Measurements on Aircraft-Engine Ignition Circuits. Berkey.....49–53 1946
Electrical-Mechanical Analogy, Determination of Transient Shaft Torques in Turbine Generators by Means of the. McCann, Warren, Criner.....51–6; disc. 492 1945
Electrical Performance of Bolted Aluminum-to-Copper Connections, An Experimental Investigation of the. Bonwitt.....1208–18; disc. 1218 1948
Electrical Performance of Ceramic Dielectrics at Elevated Temperatures, The. Frey, Jesatko.....911–20; disc. 1126 1946
Electrical Progress in the Textile Industry. Snyder....863–70; disc. 870 1948
Electrical Properties of Ceramics as Influenced by Temperature. Lindsay, Berberich...734–41; disc. 741 1948
Electrical Quantities, The Determination of Magnitude and Phase Angle of. Walker.....837–9; disc. 1333 1941
Electrical Resistivity of Resin-Treated Wood and Laminated Hydrolyzed-Wood and Paper-Base Plastics. Weatherwax, Stamm.....833–8 1945
Electrical Safety—1930–1941, Bibliography on. (Committee Report).....1101–10 1942
Electrical Stability of Electrical Insulating Oils Under Limited Oxidation. Balsbaugh, Assaf.....311–22; disc. 397 1943
Electrical Strength of Nitrogen and Freon Under Pressure, The. Skilling, Brenner.....191–5; disc. 441 1942
Electrical System From the Viewpoint of Possible Major Shutdowns, The Design and Operation of a Metropolitan. Dean..575–9; disc. 1150 1940
Electrical Tests Over a Range of Frequencies. Fleming.....935–7 1945
Electrical Torques of Turbine Generators During Short Circuits and Synchronising, Transient. Kirschbaum.....65–70; disc. 492 1945
Electrical Transients on Power Systems, Practical Calculation of. Evans, Witzke.....690–6; disc. 923 1943
Electrical Utility Industry During World War II, The German. Noest.....1037–47; disc. 1047 1947
Electrically Charged Dust in Rooms. Penney, Hewitt.....278–82 1949
Electrically Driven Gyroscopes for Aircraft. Witherow, Hansen.....204–08 1944
Electrically Heated Clothing. Wotring.....1304–13 1944
Electrically Operated Aircraft Circuit Breaker, A 208Y/120-Volt 120-Ampere-Three-Pole 400-Cycle, Titus Reifschneider.....551–5 1945
Electrically Operated Gyroscopic Instruments. Konet.....735–8 1944
Electricity and Magnetism, Teaching. Hessler.....828–33 1946
Electricity for the Auxiliaries of Railroad Trains, The Application of. Gardner.....34–6; disc. 632 1941
Electricity in Hospital Operating Rooms, Hazards of Static. Williams.....1146–7; disc. 1147 1947
Electricity in Land Transportation, The Increasing Uses for. Kerr..775–81 1948
Electricity on Aircraft Instrumentation, Influence of. Savage.....802–05; disc. 1501 1944
Electricity, Plastics in Aircraft. Cooper.....1220–6 1944
Electrification and Fundamentals of Power Contracts, Power Supply for Railroad. Hill..560–2; disc. 1159 1940
Electrification and Signaling of the Canadian National Railways Terminal, Montreal, Canada. Gage.....41–4; disc. 417 1945
Electrification, Are the Overhead Distribution Costs Retarding Railroad? Birch....243–55; disc. 255 1948
Electrification, Comparative Operating Results of Steam, Diesel-Electric, and Electric Motive Power on the Great Northern Railway. Gaynor.....231–4; disc. 234 1948
Electrification Energy Conversion and Transmission Costs. Railroad. Kimball, Holm..219–26; disc. 227 1948
Electrification Engineering and Electro-agricultural Engineering, Rural. Samuels.....193–7; disc. 459 1943
Electrification of American Steel Industry, Trends in. Umansky..784–95 1948
Electrification of an Ore Haulage System. Corfield.....1155–61 1948
Electrification of Large Open-Pit Copper Mines. Birch.....30–8; disc. 433 1944
Electrification of Main Line Railroads with Moderate Traffic, Power Costs and the Contribution of Existing Transmission Networks Towards Cost Reduction of Power. Evans.....596–8; disc. 599 1948
Electrification of Petroleum Pipe Lines. Hyde.....968–74; disc. 974 1948
Electrification of the Cotton Industry in the South. Bobe.....201–08; disc. 208 1947
Electrification—Relay Protection of Power Supply System, Pennsylvania Railroad New York-Washington-Harrisburg. Harder.....266–73; disc. 273 1939
Electrification, The Sorocabana Railway. Muylaert..804–18; disc. 919 1943
Electrified Railroads, Sleet Problems on. Brown.....589–93; disc. 978 1942
Electroacoustical System, An. Walker.....35–40; disc. 40 1948
Electroagricultural Engineering, Rural Electrification Engineering and. Samuels.....193–7; disc. 459 1943
Electroagriculture, Specific Engineering Problems in Rural Electrification and. Samuels.....1065–73; disc. 1182 1946
Electrochemical Installations, Electric Equipment for Large. Rhea, Zielinski.....733–41; disc. 1062 1942

Electrochemical Installations, Maintenance of Rectifiers on Electrochemical. Housley, Hughes.....436–41; disc. 1115 1946

(Electrochemical) Twenty-Five Years of Copper—Copper Oxide Rectifiers. Grondahl.....403–10 1948

Electrochemical Work, The Copper-Oxide Rectifier in. Smith.....739–44; disc. 1438 1944

Electrochemistry

Arc-Furnace Control by Regulex Exciters. Montgomery, Bloodworth.....650–4; disc. 980 1943

Automatically Controlled Copper-Oxide Rectifiers for Electroplating and Anodizing Applications. Buckley.....181–4 1947

Cathodic Protection of Steel Water Tanks Using Aluminum Anodes. Sudrabin, Mears.....197–200 1947

Characteristics of Chlorinated Impregnants in D-C Paper Capacitors. Berberich, Fields, Marbury.....1173–9; disc. 1437 1944

Causes of Corrosion of Fine Copper Wires Carrying a Potential. Stephens, Gehrenbeck.....357–60; disc. 360 1940

Electrical Characteristics of the Junction in a Simplified Selenium Rectifier Cell. Angello....175–80 1947

Electronic Regulator for Arc Furnaces. Reilly, Valentine...601–04 1944

Higher Voltage Copper-Oxide Rectifiers. Smith.....220–2 1947

Induction Heating—Selection of Frequency. Stansel.....755–9; disc. 1436 1944

Rotating Regulator for Arc Furnaces. Geiselman, Levy, Harris.....671–4; disc. 983 1943

Surface Heating by Induction. Storm.....749–55 1944

Treatment and Casting of Metals by Electromagnetic Forces. Hoke.....986–92 1944

Vacuum-Tube Radio-Frequency Generator—Characteristics and Application to Induction-Heating Problems. Kinn.1290–1303; disc. 1500 1944

Voltage Transients in Arc-Furnace Circuits. (Committee Report).....563–8; disc. 1435 1944

Electrode Freezing, Investigation of Arc Starting Characteristics of D-C Welders With Reference to. Tyrner.....97–9; disc. 511 1946

Electrodes for the Glow-to-Arc Transition, Importance of Gas in. Maxfield, Hegbar, Eaton.....816–21; disc. 1095 1940

Electrodynamic Instrument Mechanism, Applications of the. Corson, Millar.....1131–6 1947

"Electrogear"—A New Electromechanical Vehicle Drive, The. Weber.....770–7; disc. 1308 1941

Electrolysis and Corrosion of Underground Power-System Cables. Gorman.....329–36; disc. 479 1945

Electrolytic Corrosion—Methods of Evaluating Insulating Materials Used in Tropical Service. Thompson, Mathes.....295–9; disc. 443 1945

Electrolytic Process of Scale Removal From Steel. Neblett.....294–6; disc. 761 1941

Electromagnetic Devices, Dynamic Measurements on. Norton.....151–6 1945

Electromagnetic Drive for a Resonant Fatigue Machine, Self-Excited. Willson.....1073–8 1946

Electromagnetic Forces, Treatment and Casting of Metals by. Hoke.....986–92 1944

Electromagnetic Horn Design. Chu, Barrow.....333–8 1939

Electromechanical Calculator for Directional-Antenna Patterns, An. Smith, Gove.....78–83 1943

Electromechanical System Development, Laboratory Aids for. Newton, White.....315–19: disc. 319 1947

Electromechanical Transient Performance of Induction Motors. Weygandt, Charp...1000–09; disc. 1167 1946

Electromechanical Vehicle Drive, The "Electrogear"—A New. Weber.....770–7; disc. 1308 1941

Electrometallurgy

Cathodic Protection of Steel Water Tanks Using Aluminum Anodes. Sudrabin, Mears.....197–200 1947

Electric Equipment for Large Electrochemical Installations. Rhea, Zielinski.....733–41; disc. 1062 1942

Electrical Characteristics of the Junction in a Simplified Selenium Rectifier Cell. Angello.....175–80 1947

Electrolytic Process of Scale Removal from Steel. Neblett.....294–6; disc. 761 1941

Large Electric-Arc Furnaces—Performance and Power Supply. Jones, Stearns...763–9; disc. 1325 1941

Electron Microscope for Practical Laboratory Service, An. Zworykin, Hillier, Vance.....157–62 1941

Electron Tube Design, Trends in. White.....796–808 1948

Electronic Circuits of a Supersonic Reflectoscope. DeLano.....128–37 1948

Electronic Constant-Current Motor Systems. Livingston.....425–30; disc. 430 1947

Electronic Control Circuit for Resistance Welders, An. Gray, Breyer.....361–4; disc. 364 1939

Electronic Control for Capacitor-Discharge Resistance Welding, An Improved. Bichsel, Hughes.....1150–7; disc. 1384 1944

Electronic Control of D-C Motors. Puchlowski.....870–7; disc. 985 1943

Electronic Control of Frequency Converter Sets for Testing Aircraft Models. Heumann, Strong.931–9 1946

Electronic Converter for Exchange of Power, The. Cramer, Morton, Darling.....1059–69; disc. 1413 1944

Electronic Devices for Intermittent Service, Current Ratings of. Hellmund.....569–73 1942

Electronic Drive for Windup Reels, An. Puchlowski....585–91; disc. 1155 1946

Electronic Engineering, Trends in. Fink.....835–40 1948

Electronic Exciters for Large A-C Generators, Application and Performance of. Langstaff, Vaughan, Lawrence.....246–53; disc. 515 1946

Electronic Frequency Changer, Design of an. Willis, Kuenning, Christensen, Bedford...1070–8; disc. 1413 1944

Electronic Frequency Changers, Network Coupling by Means of Static. Marti.....495–503; disc. 1163 1940

Electronic Frequency Changers, Parallel Operation of Aircraft Alternators Using. Bowlus, Nims.....31–8 1947

Electronic Frequency Meter and Speed Regulator, An. Levin.....779–86; disc. 1181 1946

(Electronic Instruments) A Square-Law Power-Level Recorder. Clark, Turner, Williams.....476–82 1949

Electronic Measurement of Surge-Crest Voltages. Bryant, Newman.....807–11; disc. 1093 1940

(Electronic) Mercury-Arc Frequency Converter for Induction Heating of Metals. Durand, Rice....1592–9 1948

Electronic Multiplier for Power Frequencies, A New. Overbeck.931–6 1940

Electronic Null Detectors for Use With Impedance Bridges. Lamson.....535–40 1947

Electronic Power Converter, History and Development of the. Alexanderson, Phillipi.....654–7; disc. 1413 1944

Electronic Power Converter, Switchgear and Control for an. Gittings, Bateman.....585–8; disc. 1413 1944

(Electronic Power Converters) Diagnosis of Rectifier Ailments. Dortort.....1298–1304 1949

Electronic Power Converters, Pentode Ignitrons for. Steiner, Zehner, Zuvers.....693–7; disc. 1413 1944

(Electronic Power Converters) Rectifier Fault Currents:

Part I. Herskind & Kellogg.....145–50; disc. 442 1945

Part II. Herskind, Schmidt, Rettig.....243–51; disc. 251 1949

(Electronic Power Converters) Rectifier Transformer Characteristics. (Committee Report).....1305–11 1949

Electronic Protective Relays. MacPherson, Warrington, McConnell.....1702–07; disc. 1707 1948

Electronic Regeneration of Teleprinter Signals. Wilder.....34–40 1946

Electronic Regenerative Repeater for Teletypewriter Signals, An. Hearn.....904–11 1947

Electronic Register Control for Multicolor Printing. Cockrell.....617–22; disc. 1117 1946

Electronic Regulator for Arc Furnaces. Reilly, Valentine.....601–04 1944

Electronic Relay Developments. Loving.....233–40; disc. 240 1949

Electronic Semiconductors, The Physics of. Pearson.....209–14 1947

Electronic Speed Regulators for Sectional Paper Machine Drive. Baker, Kovalsky.....1636–42 1948

Electronic Stabilizer for Power Transmission. Alexanderson, Prince.....950–3; disc. 953 1947

Electronic Telemetering System. Foster, Kiefer.....802–7 1947

Electronic Timing Relay for Reducing Outages on Power Circuits, A New. Dlouhy.....407–11 1946

Electronic Tubes, A Decade of Progress in the Use of:

Part I. In the Field of Communication. Ingram.....643–9 1940

Part II. Other than Communication Field. White.....650–4 1940

Electronically Balanced Recorder for Flight Testing and Spectroscopy. Williams, Clark, Tarpley...205–08 1946

Electronically Controlled Dry-Disk Rectifier. Rosenstein, Barnett.....21–3; disc. 474 1944

Electronics

A 400-Ampere Sealed Ignitron. Steiner, Price....680–5; disc. 1161 1946

A Magnetic Compass With Cathode-Ray Sensing Element. Kliever, Syrdal.....529–34 1947

A Method for the Measurement of the Ionization and Deionization Times of Thyratron Tubes. Birnbaum.....209–14 1948

A New Line of Thyratrons. Coolidge.....723–7; disc. 727 1948

A New Postgraduate Course in Industry in High-Frequency Engineering. Stevenson, Ramo..374–8; disc. 378 1940

A Practical Approach to Calculating Optimum Performance of Semiconductor Rectifiers. Wilson.....640–2; disc. 642 1948

A Thyratron Circuit for Theater Lighting. Wischmeyer...1067–72 1941

Air-Borne Magnetometers for Search and Survey. Felch, Means, Slonczewski, Parratt, Rumbaugh, Tickner.....640–50 1947

Amalgam-Cathode Materials for Power Tubes. Lyon, Williams.....627–30 1948

An Instrument for the Determination of Contact Making and Breaking Time. Richter, Elliot.....14–16; disc. 459 1943
Analysis of Rectifier Circuits. Christensen, Willis, Herskind.....1048–58 1944
Analytical Determination of Characteristics of Magnetic Amplifiers with Feedback. VerPlanck, Finzi, Beaumariage.....565–70 1949
Analytical Treatment of Establishing Load-Cycle Ratings of Ignitrons. Marshall, Arnott.....545–8; disc. 1051 1942
Application of the Betatron to Practical Radiography. Girard, Adams.....241–6; disc. 489 1946
Arc-Back Testing of Graphite. Pakala, Cucullu.....439–42 1947
Arc-Backs in Ignitrons in Series. Slepian, Pakala.....292–4 1941
Arc-Backs in Rectifier Circuits—Artificial Arc-Back Tests. Evans, Maslin.....303–11; disc. 439 1945
Circuit Cushioning of Gas-Filled Grid-Controlled Rectifiers. Edwards, Smith.....640–3; disc. 1131 1946
Cold-Cathode Gas-Filled Tubes as Circuit Elements. Ingram.....342–7 1939
Condensation of Mercury in Mercury-Arc Tubes. Slepian, Brubaker.....381–4 1940
Current Rating and Life of Cold-Cathode Tubes. Rockwood.....901–03; disc. 1390 1941
Design of Sealed Ignitron Rectifiers for Three-Wire Service. Morack.....103–07 1945
Development of Excitron-Type Rectifier. Winograd.....969–78; disc. 1454 1944
D-C Amplifier Stabilized for Zero and Gain. Williams, Tarpley, Clark.....47–57 1948
Electrically Charged Dust in Rooms. Penney, Hewitt.....278–82 1949
Exitation Circuits for Ignitron Rectifiers. Myers, Cox.....943–8; disc. 1358 1941
Excitation, Control, and Cooling of Ignitron Tubes. Herskind, Remscheid.....632–5 1946
"Excitron" Mercury-Arc Rectifiers. Marti.....927–31; disc. 1168 1940
Frequency Performance of Thyratrons. Wittenberg.....843–8 1946
Fundamental Properties of the Vacuum Switch. Koller.....597–604; disc. 1141 1946
Harmonics and Load Balance of Multiphase Rectifiers. Evans.....182–7; disc. 400 1943
Heating of Radio-Frequency Cables. Macalpine.....283–8 1949
High Voltage Ignitron Rectifiers and Inverters for Railroad Service. Boyer, Hagensick.....463–70 1946
Ignitor Characteristics and Circuit Calculations. Marshall...1519–24 1947
Ignitor Excitation Circuits and Misfire Indication Circuits. Mittag, Schmidt.....574–7; disc. 1061 1942
Inductive Co-ordination Aspects of Rectifier Installations. (Committee Report)....417–36; disc. 1115 1946
Ionization Time of Thyratrons. Harrison.....737–50; disc. 1079 1940
Maintenance of Rectifiers on Electrochemical Installations. Housley, Hughes.....436–41; disc. 1115 1946
Measurements at Radio Frequencies. Meahl, Michel, Scheldorf, Dickinson.....654–9 1940
Mercury-Arc Power Converters in North America. (Committee Report).....1031–59 1948
Nonlinear Commutating Reactors for Rectifiers. Schmidt.....654–6 1946
Oil Film Thickness Indicator for Journal Bearings. Greenough.....589–95; disc. 595 1948
Operation of Large D-C Motors from Controlled Rectifiers. Schmidt, Smith.....679–83 1948
Operation of Nonsalient-Pole Type Generators Supplying a Rectifier Load. Ross, Batchelor.....667–70; disc. 959 1943
Operation of Rectifiers Under Unbalanced Conditions. Christensen, Morack.....628–31 1944
Performance of Pumped Ignitron Rectifiers. Herskind, Remscheid.....215–18 1948
Phase Occurrence of Arc-Backs in High-Current Mercury-Arc Rectifiers. Pakala, Batten.....345–7 1940
Quadrature Operation of Filamentary Thermionic Gas Tubes. Holdaway.....205–08 1948
Rectifier Capacity. Herskind, Steiner.....667–70 1946
Rectifier-Circuit Duty. Herskind.....123–8 1944
Rectifier Fault Currents. Herskind, Kellogg.....145–50; disc. 441 1945
Rectifier Terminology and Circuit Analysis. Willis, Herskind.....496–9; disc. 974 1942
Regulated Rectifiers in Telephone Offices. Trucksess. 613–17; disc. 985 1942
Sealed-Tube Ignitron Rectifiers. Morack, Steiner..594–9; disc. 1052 1942
Testing of Mercury-Arc Rectifiers, The. Kellogg, Herskind.....765–73; disc. 960 1943
The Measurement of Acceleration With a Vacuum Tube. Ramberg.....735–40 1947
The Permatron—A Magnetically Controlled Industrial Tube. Overbeck.....224–8; disc. 228 1939
The Power Rating of Radio-Frequency Cables. Mildner.....289–98; disc. 298 1949
The Shunt Tube Control of Thyratron Rectifiers. Potter.....421–4 1947
Theory of Rectifier—D-C Motor Drive. Vedder, Puchlowski.....863–70; disc. 960 1943
Transient Response of Controlled Rectifier Circuits. Chin, Walter.....208–14 1945
Trends in Electron Tube Design. White.....796–808 1948
Voltage and Current Relations for Controlled Rectification With Inductive and Generative Loads. Puchlowski.....255–60; disc. 442 1945
X-Ray Thickness Gauge for Cold-Rolled Strip Steel. Lundahl..83–90 1948
Electronics of the Fluorescent Lamp. Townsend.....607–12 1942
Electronics to Aircraft Flight Control, Application of. Gille, Kutsler.....849–53; disc. 1501 1944
Electro-optical Shutter for Photographic Purposes, An. Zarem, Marshall, Poole.....84–91 1949
Electroplating and Anodizing Applications, Automatically Controlled Copper-Oxide Rectifiers for. Buckley.....181–4 1947
Electropneumatic Brakes for High-Speed Trains With Particular Reference to Their Electrical Features. McCune.....137–42 1942
Electrostatic Unbalance of Transmission Lines and Its Effect on the Application of Petersen Coils, The. Lyon.....107–12; disc. 112 1939
Electrothermal Space Heating and Air Conditioning. Krueger.....718–22; disc. 1434 1944
Electrothermic Voltmeter for Measurements Between 20 and 20,000 Cycles, A Precision. Hermach.....1224–7 1948
Element, A Magnetic Compass With Cathode-Ray Sensing. Kliever, Syrdal.....529–34 1947
Element, A Polarised Relay as an Aircraft Control. Johnson, Glassow.....1249–55 1948
Element, Ferroinductance as a Variable Electric-Circuit. Ryder.....671–8; disc. 962 1945
Element for Regulation and Control, A New Mercury Rheostatic. Oplinger.....846–9; disc. 1386 1941
Element Mounted in a Protecting Case, Response Time and Lag of a Thermometer. Goodwin.....665–70; disc. 959 1945
Elevated Temperatures, The Electrical Performance of Ceramic Dielectrics at. Frey, Jesatko.911–20; disc. 1126 1946
Elevator Buffers by Electrical Means, Testing of. Kimberly.....53–4 1941
Elimination in All-Metal Aircraft, Radio Noise. Foulon...877–91; disc. 994 1943
Elimination in Military Aircraft, Radio-Noise. Weinstein, Howell, Lowe, Winter.....793–5; disc. 1466 1944
Elimination, Very High-Frequency Radio-Noise. Owen.....949–54 1944
Emergency Control of System Loads. Comly, Kelley, McCormack, Phillips, Schroeder..1474–81; disc. 1482 1948
Emergency Loading of Transformers in Open Delta, Mobile Capacitor Units for. Wolf, Mattison.....83–6; disc. 373 1943
Emergency Overloading of Air-Cooled Oil-Immersed Power Transformers by Hot-Spot Temperatures. Montsinger, Ketchum..906–16; disc. 993 1942
Emergency Overloading Practice, Substation-Transformer. Clark.....126–32; disc. 453 1943
Emergency Overloads for Oil-Insulated Transformers. Vogel, Sloat.....669–73; disc. 988 1942
Emergency Overloads on Overhead Conductors, Interim Report on. (Committee Report).....588–90; disc. 940 1943
Emergency Pipe-Line Projects, Electric Equipment for the War. Thomas, Taylor, Wolfe.....396–405 1944
Emergency Ratings, Notes on. Kidder.....599–607; disc. 607 1939
Empire State Building, Lightning to the. McEachron....885–90; disc. 1377 1941
Enclosed Bus-Bar Electrical Distribution Systems for Industrial Plants. Carlson.....297–302; disc. 700 1941
Enclosed Limiter for Network Use, A 600-Volt. Langguth, Rawlins, Wallace.....536–8; disc. 1062 1942
Enclosed Spark Gaps. Berkey.....429–33; disc. 1118 1940
Endurance of Class H Insulation and Silicone Varnish, Motor Tests Evaluate Thermal. Grant, Kauppi, Moses, Gibson.....1133–8 1949
Energy Conversion and Transmission Costs, Railroad Electrification. Kimball, Holm..219–26; disc. 227 1948
Energy, Factors Contributing to Improving Electric Service by Means of High-Speed Switching and Utilization of Stored. Logan, Miles.....1012–16; disc. 1408 1941
Energy Flow in Electric Systems—the Vi Energy-Flow Postulate. Slepian.....835–41; disc. 1054 1942
Energy in Airplanes, Cables Used for Transmitting Electric. Peters, Phillips, Kronstein, Jealous.....1270–82; disc. 1474 1944
Energy in Hydroelectric Systems, Factors in the Economic Supply of. Frampton, Floyd.....1117–24; disc. 1124 1947
Energy, Measurements of Erythemal. Scott.....725–29 1949

Energy Method of Calculating Stability, The Transient-. Magnusson.....747–55; disc. 755 1947

Energy Regulating Systems, Two-Stage Rototrol for Low-. Kimball.....1507–11 1947

Energy Sources for Motive Power Operation in the Pacific Northwest, The Present Competitive Position of Coal, Residual Oil, Diesel Oil, and Electricity as. Martin....1664–9 1948

Energy Transmission, Economics of Long-Distance. Pierce, George...1089–94; disc. 1094 1948

Engine-Accessory Vibration, Aircraft-. Tyler.....1334–49; disc. 1487 1944

Engine and Propeller Test-Cell Lighting, Aircraft. Tuck.....1264–70; disc. 1493 1944

Engine, Design of an Ignition System for an 18-Cylinder Aircraft. Harkness.....1321–7; disc. 1467 1944

Engine-Driven 400-Cycle Aircraft Generators, Parallel Operation of Main-. Levoy.....811–16; disc. 987 1945

Engine Ignition Circuits, Electrical Measurements on Aircraft-. Berkey.....49–53 1946

Engine Indicator for Measuring Static and Dynamic Pressures, An Electrical. Martin, Grinstead, Frawley..513–23; disc. 725 1941

Engine, Investigation of Starting Requirements of a 660-Horsepower Locomotive Diesel. Davidson, Lamborn.....31–4; disc. 632 1941

Engine-Synchronism Indicator for Aircraft, A Unique. Pearson...650–3 1946

Engine-Testing Power Recovery, Dodge Chicago Plant's Electric-Power-Distribution Scheme With Airplane-. Bailey.....121–3; disc. 484 1945

Engineer, Cultural Training of the. Boyajian.....6–9; disc. 478 1944

Engineering, A New Postgraduate Course in Industry in High-Frequency. Stevenson, Ramo.....374–8; disc. 378 1940

Engineering and Electroagricultural Engineering, Rural Electrification. Samuels.....193–7; disc. 459 1943

Engineering and the Petroleum Refiner, Electrical. Weeks, Giesecke, Lathrop.....106–90; disc. 109 1940

Engineering, Co-ordination of Physics With Electrical. Bryant.....35–6; disc. 43 1939

Engineering, Evening Courses at Graduate Levels—a Challenge to Colleges of. Beach.....88–94; disc. 430 1942

Engineering Features of the 230-Kv Boulder-Chino Transmission Line of the Southern California Edison Co., Ltd. Kroneberg, Hunter....982–7; disc. 1176 1940

Engineering in the Field of Transportation, Unsolved Problems of Electrical. Noertker.....992–6; disc. 1173 1940

Engineering Judgment in the Manufacture of Lightning-Arrester Blocks, Statistics as an Aid to. Goffman.....607–10; disc. 966 1945

Engineering, Mathematics and Physics in. Malti.....38–40; disc. 43 1939

Engineering on Diesel-Electric Locomotives in Railroad Service, Application. Bevan.....125–31 1949

Engineering Point of View, The Incandescent Lamp Situation From the. Millar.....1174–80; disc. 1387 1941

Engineering Problems, Courses to Develop Facility in the Use of Mathematics and Physics in the Solution of. Teare.....40–1; disc. 43 1939

Engineering Problems in Rural Electrification and Electroagriculture, Specific. Samuels.....1065–73; disc. 1182 1946

Engineering Requirements for Program Transmission Circuits. Cowan, McCurdy, Lattimer.....142–7 1941

Engineering Subjects, Co-ordination of Mathematics and Physics With Electrical. Morgan..42–3; disc. 43 1939

Engineering Subjects, The Co-ordination of Mathematics and Physics With Electrical. Curry.....36–7; disc. 43 1939

Engineering, The Combination of Probability Curves in. Wilkinson.....953–63 1942

Engineers, War Department, The Design and Performance of the Vertical Generator Thrust Bearings at the Bonneville Plant of the Corps of. Lewis, Gordon.....1231–7; disc. 1237 1947

Engines, The Power-Recovery System of Testing Aircraft, Cassidy, Moseteller, Wright....240–6; disc. 416 1943

Epitomization of Available Data, The Design of Bus-Bar Industrial Distribution Systems: Higgins.....385–400; disc. 486 1945

Equal-Volt-Ampere Method of Designing Capacitor Motors, The. Trickey.....990–2; disc. 1399 1941

Equalization of Coaxial Lines. Gould..1187–92 1949

Equalizers for Coaxial Lines, Attenuation and Delay. Lundry.....1174–9 1949

Equation, Solutions of the Mathieu. Gray, Merwin, Brainerd....429–41 1948

Equations With Real or Complex Coefficients, A Short Method for Evaluating Determinants and Solving Systems of Linear. Crout...1235–41 1941

Equilibrium Between Gas Space and Fibrous Materials in Enclosed Electric Equipment, Moisture. Piper.....791–7; disc. 1152 1946

Equipment, A Proposal for Broad-Band Coupling of Power-Line Carrier. Miller.....1028–30; disc. 1030 1949

Equipment and Systems, Modern Practice in Power-Plant Auxiliary. Muller.....868–72; disc. 976 1945

Equipment and Testing Methods for Cable Carrier Systems, New Test. Tidd, Rosen, Wenk.....726–30 1947

Equipment, Channels for Operation of Supervisory Control. Derr, Brown.....1654–60 1948

Equipment, Electric Braking for Railroad and Urban Transit. Craton, Turner.....489–94; disc. 1170 1940

Equipment, Field Tests on Power-Line Carrier-Current. Miller, Prud'Homme.....824–7; disc. 1177 1946

Equipment for Broadcast Stations, Television. Lawrence.....443–52 1947

Equipment for Capacitor Banks and Its Application, Automatic Control and Switching. Schroeder, Bloomquist.....649–54; disc. 1440 1944

Equipment for Chesapeake and Ohio Railway Company Steam Turbine-Electric Locomotives, Electric. Atwell, Baston.....145–8 1949

Equipment for Cornell Variable Density Wind Tunnel. Clymer, de-Ferranti.....554–63 1946

Equipment for Cold Strip Reduction Mills, Electric. Miller.....133–9; disc. 139 1948

Equipment for Industrial Diesel-Electric Locomotives, Modern Electrical. Greer.....229–32; disc. 400 1942

Equipment for Land-Mobile Services Operating on Frequencies Between 152–74 Megacycles, Design of Mobile Radio Communication. Beers, Harris, Zappacosta.....1232–9 1949

Equipment for Large Diesel-Electric Locomotives, Progress in Design of Electrical. Smith.....130–1; disc. 404 1942

Equipment for Large Electrochemical Installations, Electric. Rhea, Zielinski.....733–41; disc. 1062 1942

Equipment for New York City's Subway System, Modern Car. Cordts.....247–9; disc. 250 1947

Equipment for Power Shovels and Draglines, Electric. Schwedes, Stoetzel.....1498–1506; disc. 1507 1948

Equipment for Protection Against Conductor Burndown From That Cause, Power Arc-Over on Overhead Distribution Lines and Newly Developed. Matthews.....596–604; disc. 684 1941

Equipment for Quantity Production, High-Potential Testing. Summers.....289–92; disc. 756 1941

Equipment for Rotary Drilling Rigs, Variable-Voltage. Lamberger.....248–55; disc. 255 1940

Equipment for Ship-Propeller Milling Machine, Application of Electric. Morton, Rutemiller.....205–08; disc. 453 1945

Equipment for Telemetering and Load Control, Characteristics of New Carrier-Current. Beckwith.....1649–52; disc. 1652 1948

Equipment for the War Emergency Pipe-Line Projects, Electric. Thomas, Taylor, Wolfe.....396–405 1944

Equipment for Tidd High-Voltage Test Lines, Switchgear. Lane, Wyman.....1619–21; disc. 1621 1947

Equipment for Tidd High-Voltage Test Lines, Switchgear. Lane, Wyman, Thomas, Taylor, Wolfe...396–405 1944

Equipment for 2-for-1 Twister, Electric. Gwaltney, Burnham.....811–4 1947

Equipment, Functional Design of Aircraft Electric Actuator. Gagnier..813–15; disc. 1464 1944

Equipment in Hydraulic Power Plants, Trends in the Design and Arrangement of Electrical. Welchel.....78–82; disc. 82 1939

Equipment Maintenance, Airline Aircraft Electric-. Petrasek..900–05 1944

Equipment, Measurement of Interference From Radio-Frequency Heating. Brown.....1102–06 1948

Equipment, Modern Diesel-Electric Drilling Rig. Rhea.....447–53 1946

Equipment, Modern Railway Passenger-Car Auxiliary-Power. MacLeod, Hause.....930–8 1947

Equipment, Moisture Equilibrium Between Gas Space and Fibrous Materials in Enclosed Electric. Piper.....791–7; disc. 1152 1946

Equipment of the Union Pacific Steam-Electric Locomotive, Electrical. Hanna, Tritle...756–64; disc. 1082 1940

Equipment on Machine Tools, Electrical. Graves.....18–22; disc. 22 1940

Equipment on Shipboard, Ventilation of Rotating Electrical. Harrison..1263–9; disc. 1269 1948

Equipment on Stub Feeders, Interim Report on Application and Operation of Automatic Reclosing. (Committee Report).....536–40; disc. 934 1943

Equipment, One Slip Cycle Out-of-Step Relay. Morris.....1246–8 1949

Equipment, Reduction of Interference from Radio-Frequency Heating. Klingaman.....718–24; disc. 724 1949

Equipment Required in a Modern 6-Component Wind-Tunnel Model Suspension System, Electric. Cox.....1258–66 1947

Equipment, Silicone Insulation as Applied to Naval Electric Power. Walker.....977–80; disc. 980 1947

Equipment to Fractional Horsepower A-C Stator Windings, The Application of Surge Comparison Testing. Buchanan.....1356–8 1947

Equipment Under Intermittent Load, Rating of Electric. Zucker.....778–83; disc. 1381 1944

Equipment Used in Reflection-Seismograph Prospecting, Electrical. Nash, Palmer...855–60; disc. 860 1939

Equipment Used With Coaxial Cable for Carrier Current Installation on Power Lines, Line Tuning. Sutton.....44–8; disc. 48 1949

Equipment With Basic Insulation Levels, The Co-ordination of Electrical. Foote, North.....585–9; disc. 1204 1940

Equipments Switched in Large Banks, Analysis of Factors Which Influence the Application, Operation, and Design of Shunt-Capacitor. Butler.....795–800; disc. 1096 1940

Equivalent Ambient Temperatures for Loading Transformers. Sealey.....87–93; disc. 449 1943

Equivalent Circuit for a Five-Winding Transformer, A Useful. Aicher.....66–70; disc. 385 1943

Equivalent Circuit Impedance of Regulating Transformers. Clem.....871–3; disc. 873 1939

Equivalent Circuit of a Variable-Ratio Frequency Changer, Tensorial Analysis and. Kron.....1503–06 1947

Equivalent Circuit of the Capacitor Motor, The. Chang.....631–40 1947

Equivalent Circuit of the Primitive Rotating Machine With Asymmetrical Stator and Rotor. Kron.....17–23; disc. 23 1947

Equivalent Circuits for Oscillating Systems and the Riemann-Christoffel Curvature Tensor. Kron.....25–32; disc. 372 1943

Equivalent Circuits for Power-Flow Studies. Ward.....373–80; disc. 380 1949

Equivalent Circuits for the Hunting of Electrical Machinery. Kron.....290–6; disc. 456 1942

Equivalent Circuits of Synchronous and Induction Machines, Steady-State. Kron.....175–81 1948

Equivalent Circuits of the Synchronous Machine, The Direct- and Quadrature-Axis. Rankin.....861–8 1945

Equivalent Circuits of Transformers and Reactors to Switching Surges. Bewley.....797–802 1939

Equivalent Load Curves, Synthetic or. Hamilton.....369–81 1942

Erase Head for Magnetic Recorders Providing Intense High-Frequency Fields, A Turn-In-Gap. Wiegand, Zenner.....507–10 1948

Erosion in Electrical Contacts and Its Prevention, Bridge. Pfann.....1528–33 1948

Error and Phase Angle in Current Transformers, A Simple Method for Determination of Ratio. Wents.....949–54; disc. 1369 1941

Errors, A Proposed Method for the Determination of Current-Transformer. Camilli, Ten Broeck.....547–50; disc. 1138 1940

Errors by the Secondary-Voltage Method, Field Determination of Current-Transformer. Goodale, Holbeck.....879–82; disc. 1468 1944

Errors in the Determination of Synchronous-Machine Reactances by Test, Inherent. Concordia, Maginniss..288–94; disc. 491 1945

Erythemal Energy, Measurements of. Scott.....725–29 1949

Essex Generating Station, Reconstruction of Switching Facilities at. Taylor.....761–70; disc. 778 1939

Estimating Electric Loads for Military-Training Bases, Federal Housing, and Other Wartime Projects. Potts.....246–54; disc. 463 1943

Ethylene Diamine Tartrate Crystal Units, Design and Performance of. Griffin, Pennell.....557–61 1948

Ethylene Diamine Tartrate, Growing Crystals of. Walker, Kohman.....565–70; disc. 570 1948

Ethylene Diamine Tartrate in Place of Quarts, Crystal Filters Using. Willis.....552–6 1948

Evaluate Thermal Endurance of Class H Insulation and Silicone Varnish, Motor Tests. Grant, Kauppi, Moses, Gibson.....1133–8 1949

Evaluating Determinants and Solving Systems of Linear Equations With Real or Complex Coefficients, A Short Method for. Crout.....1235–41 1941

Evaluating Insulating Materials Used in Tropical Service, Electrolytic Corrosion—Methods of. Thompson, Mathes.....295–9; disc. 443 1945

Evaluating Operational Expressions Having a Finite Number of Different Roots, A Construction Theorem for. Cromwell...273–6; disc. 676 1941

Evaluation of Electric Distribution Losses in Terms of Generating-Station-Capacity Investment. Mortara.....1–7; disc. 411 1945

Evaluation of Insulating Materials, Functional. Mathes.....1236–9; disc. 1240 1948

Evaluation of the Stability of the Welding Arc, Instrumentation for the. Winsor, Schetky, Wyant...525–33 1949

Evening Courses at Graduate Levels—a Challenge to Colleges of Engineering. Beach.....88–94; disc. 430 1942

Evolution of Standard Lines of Current Transformers for High Overcurrent Capacity, The. Wents.....658–62; disc. 1426 1944

Evolution of Ward-Leonard Control for Shovels and Draglines. Stevens.....1491–7 1948

Exchange of Power, The Electronic Converter for. Cramer, Morton, Darling.....1059–60; disc. 1413 1944

Excitation Circuits and Misfire Indication Circuits, Ignitor. Mittag, Schmidt.....574–7; disc. 1061 1942

Excitation Circuits for Ignitron Rectifiers. Myers, Cox.....943–8; disc. 1358 1941

Excitation, Control, and Cooling of Ignitron Tubes. Herskind, Remscheid.....632–5 1946

Excitation Control Systems, Developments in Diesel-Electric Traction-Generator. Brancke, Adams.....223–8; disc. 228 1947

Excitation for Suddenly Applied Loads, Synchronous Motors With Controlled. Boice, Caldwell, Halberg.....113–19; disc. 416 1943

Excitation, Generator Stability at Low. Michelson, Lischer....1–6; disc. 7 1948

Excitation of Squirrel-Cage Motor, Dynamic Braking by Self-. Srinivasan, Thomas.....145–8 1947

Excitation, Performance Calculations on Polyphase Reluctance Motors—Synchronous Motors Without Field. Trickey.....191–3 1946

Excitation Problems in Hydroelectric Generators Supplying Long Transmission Lines. Killgore.....1277–82; disc. 1282 1947

Excitation Relay for Synchronous Generators, A New Loss-of-. Mason..1240–5 1949

Excitation Systems for Large Synchronous Machines, Modern. McClure, Whittlesey, Hartman.....939–45; disc. 1148 1946

Excitation Systems for Synchronous Condensers and Generators, The Development of Modern. Porter, Kinghorn.....1020–7; disc. 1156 1946

Excitation Systems, Long-Distance Power Transmission as Influenced by Concordia, Crary, Maginniss.....974–87; disc. 1175 1946

Excitation Systems, Rototrol. Barkle, Valentine.....529–34; disc. 534 1948

Excited Oscillations of Capacitor-Compensated Long-Distance Transmission Systems, Self-. Bodine, Concordia, Kron.....41–4; disc. 371 1943

Exciter Rototrol Excitation for Turbine Generators, Main. Lynn, Valentine.....535–9; disc. 539 1948

Exciter, Static Voltage Regulator for Rototrol. Harder, Valentine.....601–06 1945

Exciter Voltage Regulating System as Determined by Electrical Analogy, The Transient Behavior of the Two-Stage Rototrol Main. Carleton.....59–63 1949

Exciters, Arc-Furnace Control by Regulex. Montgomery, Bloodworth.....650–4; disc. 980 1943

Exciters for Large A-C Generators, Application and Performance of Electronic. Langstaff, Vaughan, Lawrence.....246–53; disc. 515 1946

Exciters for Turbine Alternators, Motor-Driven. Bodine, Crary, Rankin.....290–7; disc. 515 1946

Exciting Current, Transient Voltage Rise in Transformers Due to Interruption of. Srinivasan, Vogel.....1632–6 1947

"Excitron" Mercury-Arc Rectifiers. Marti.....927–31; disc. 1168 1940

Excitron-Type Rectifier, Development of. Winograd..969–78; disc. 1454 1944

Expanded Scale A-C Voltmeter, A New. Millar.....641–3 1949

Expansion, A Distribution System for War-Time Plant. McKeever.....862–5; disc. 1385 1941

Expectancy as a Basis for Generator Reserve, Outage. Seelye.....1483–8 1947

Expense for Service Restoration With Different Types of Overcurrent Protection for Distribution Circuits, Relative. Lincks, Craig.....813–21; disc. 980 1942

Experience and Practice, High-Speed Relaying. (Committee Report)..588–91; disc. 591 1939

Experience With Distance Ground Relays. Wolfe...458–62; disc. 1185 1946

Experience With Factory-Built Unit-Type Substations, Six Years'. Miller, Miller...751–6; disc. 1150 1946

Experience With 4-Kv Primary Network Systems in the Washington Area, Design and. Lank.....712–16; disc. 716 1949

Experience With Hydrogen-Cooled Synchronous Condensers and Alternators, Application of and Operating. Sporn, Porter.....890–907; disc. 1187 1940

Experience With Oil Circuit Reclosers on REA Systems. Moore, Watkins.....531–5; disc. 934 1943

Experience With Preventive Lightning Protection on Transmission Lines. Waldorf.....249–54; disc. 701 1941

Experience With Single-Pole Relaying and Reclosing on a Large 132-Kv System. Trainor, Parks.....405–11; disc. 411 1947

Experience with Transformer Impulse Failure Detection Methods. Aicher.....1621–7; disc. 1627 1948

Experience With Ultrahigh-Speed Reclosing of High-Voltage Transmission Lines. Sporn, Muller.....625–31; disc. 631 1939

Experience With Ultrahigh-Speed Reclosing of High-Voltage Transmission Lines, Five Years'. Sporn, Muller.....241–6; disc. 690 1941

Experiment at Cheyenne Wells, Colo., Rural Radiotelephone. Moore, Seyler, Wright.....525–8 1947
Experimental Confirmation of the Moving Coil Fluxmeter, General Theory and. Higgins, Robertson.....897–907; disc. 907 1949
Experimental Determination of the Capacitance of Heavy-Current Busses Comprised of Solid or Tubular Rectangular Conductors. Teasdale, Higgins.....653–9; disc. 659 1948
Experimental Investigation of Subharmonic Currents, An. McCrumm.....533–40; disc. 722 1941
Experimental Investigation of the Electrical Performance of Bolted Aluminum-to-Copper Connections, An. Bonwitt.....1208–18; disc. 1218 1948
Experimental Station of Chevilly (France), Especially on Corona Behavior of Bundle Conductors, Results of Tests Carried Out at the 500-Kv. Cahen.....1118–25; disc. 1125 1948
Experimental Study of Speed-Torque Curves, Dynamic Braking Control of D-C Series Motors—. Heumann.....560–4 1949
Experimental Test Procedures and Methods of Analysis of Results to Research Problems in Magnetic Recording Application of. Thompson.....407–17 1949
Exposition, Color, Light, and Structure at Golden Gate (a 16-page insert) facing page 746..... 1940
Exposition With Light, Painting the Golden Gate International. Dickerson, Mahan.....738–46 1940
Expulsion-Type Lightning Arresters' Impulse Spark-Over Volt-Time Characteristics. (Committee Report).....520 1948
Extending a Carrier Current Relay Channel to Other Uses, Possibilities and Methods of. Smith, Goldsborough.....23–7; disc. 645 1941
Extending the Use of Shunt Capacitors by Means of Automatic Switching. Cuttino.....674–8; disc. 1439 1944
Extension of Impact Speed-Drop Analysis, An. Crever.....191–6 1947
Extension of Magnetic Air Circuit Breakers up to 500,000 Kva, 15 Kv, Size Reduction and Rating. Dickinson, Frink.....220–3; disc. 510 1946
Extension of the Method of Symmetrical Components Using Ladder Networks, An. Lyon.....1025–30; disc. 1263 1940
Extinction, Displacement and Diffusion in Fluid-Flow Arc. Slepian.....162–7; disc. 643 1941
Extinction on a Petersen-Coil System, Factors Affecting Arc. Eaton.....576–81; disc. 581 1939
Extremes in the Insulation Co-ordination of Oil Insulated Transformers. Vogel.....965–8; disc. 968 1949

F

F-3 Lead Alloy—An Improved Cable Sheathing. Hickernell, Snyder.....563–9; disc. 1136 1946
Fabrics, Continuous Processing for Automobile Tire. Cassidy, Mosteller.....218–23 1939
Face—A Means to Better D-C Machine Performance, The Eccentric Pole. Baker.....1107–10 1949
Face Loss in Solid-Rotor Turbine Generators, Pole-. Kuyper.....827–34; disc. 925 1943
Facilities and Operating Plan for the First Chicago Subway, Electric. DeLeuw.....780–7; disc. 980 1942
Facilities for Microwave Radar Testing, Techniques and. Green, Fisher, Ferguson.....274–90 1946
Facilities for the Supply of Kilowatts and Kilovars. Sels, Seely.....249–55; disc. 402 1942
Facilities of the U. S. Forest Service, The Communication. Simson.971–6 1941
Facilities, Television Network. Abraham, Romnes.....459–64 1947
Facsimile Transmission for Pickup and Delivery of Telegrams. Ridings.....1293–8 1948
Facsimile Transmission Speed, Considerations on. Burkhard.....418–23; disc. 423 1949
Facsimile, Western Union Teletape. Pollard.....511–15 1948
Factor Meters, Crossed-Coil Power-. Millar.....294–301; disc. 460 1944
Factor of Unbalanced Sinusoidal 3-Phase Circuits, The Vector Power. Lamb, Brandt.....507–09 1959
Factor, The Effect of Overexciting Transformers on System Voltage Wave Shapes and Power. Butler, Pope.....49–53; disc. 656 1941
Factors Affecting Arc Extinction on a Petersen-Coil System. Eaton.....576–81; disc. 581 1939
Factors Affecting Insulation Resistance of Large D-C Machines. Johnson, Weil.....705–10; disc. 1194 1946
Factors Affecting the Design of D-C Magnets. Rader.307–10; disc. 387 1943
Factors Affecting the Mechanical Deterioration of Cellulose Insulation. Clark.....742–9; disc. 991 1942
Factors Affecting the Range of Radar Sets. Quarles, Breaseale.....546–8 1946
Factors and Pitch Factors of the Harmonics of a Fractional-Slot Winding, Distribution. Liwschits.....664–6; disc. 926 1943
Factors Contributing to Improving Electric Service by Means of High-Speed Switching and Utilisation of Stored Energy. Logan, Miles.....1012–16; disc. 1408 1941
Factors for 3-Phase Coaxial Busses Comprised of Square Tubular Conductors, Proximity Effect. Higgins, Messinger.....1538–9 1948
Factors in the Economic Supply of Energy in Hydroelectric Systems. Frampton, Floyd.....1117–24; disc. 1124 1947
Factors in the Mechanical Design of High-Speed Turbogenerators, Some Mortensen, Ryan.....51–6; disc. 56 1940
Factors Influencing the Mechanical Strength of Cellulose Insulation. Clark.....778–83; disc. 1321 1941
Factors Involved in the Selection of Railroad Motive Power. Wilcox, Oehler.....235–40; disc. 411 1943
Factors Which Influence the Application, Operation, and Design of Shunt - Capacitor Equipments Switched in Large Banks, Analysis of. Butler.....795–800; disc. 1096 1940
Factors Which Influence the Behavior of Directional Relays. Graybeal.....942–52 1942
Factory-Built Unit-Type Substations, Six Years' Experience With. Miller, Miller.....751–6; disc. 1150 1946
(Factory Wiring) Power Supply for Resistance Welding Machines. (Committee Report):
Parts I and II.....306–20 1940
Part III.....185–92 1941
Failure, Chemical Contamination as Causes of Electrical-Insulation. Braithwaite, Moses.....580–3; disc. 945 1945
Failure-Detection Methods as Applied to Distribution Transformers, Impulse-. Stewart, Holcomb.....640–44; disc 956 1945
Failure Detection Methods, Experience with Transformer Impulse. Aicher.....1621–7; disc. 1627 1948
Failure in High-Voltage Insulation, The Detection of Initial. Whitehead, Shaw.....267–72; disc. 761 1941
(Fair) Color, Light, and Structure at Golden Gate Exposition (a 16-page insert) facing page 746..... 1940
Fair, Lighting the New York World's. Engelken.....1288–1305 1940
Fast Circuit Breaker, A. Bohn, Jensen.....165–8; disc. 405 1942
Faster Telemeter for Carrier-Current Channels, A. Lynch, Thomas, Lunge.....288–94; disc. 294 1948
Fatigue Machine, Self-Excited Electromagnetic Drive for a Resonant. Willson.....1073–8 1946
Fault-Arc Paths, Deionisation Time of High-Voltage. Harrington, Starr.....997–1003; disc. 1003 1949
Fault Clearing on Single-Phase Electrified Railroad, Circuit Breaker Modernisation and Faster. Brown, Travers, Wood.....705–13; disc. 713 1948
Fault-Current Calculations, Impedance of 400-Cycle Three-Phase Power Circuits on Large Aircraft and Its Application to. Chappuis, Olmsted.....1213–20; disc. 1496 1944
Fault-Current Measuring Device. Lants.....839–43 1946
Fault Currents Determined Easily on D-C Board, System Voltages and. Asbury.....184–8; disc. 439 1944
Fault Currents in Low-Voltage A-C Circuits, Arcing. Wagner, Fountain.....166–72; disc. 172 1948
Fault Currents on Rural Distribution Systems, Graphical Method of Calculating. Linder..16–19; disc. 446 1945
Fault Currents, Rectifier:
Part I. Herskind and Kellogg.....145–50; disc. 441 1945
Part II. Herskind, Schmidt, Rettig.....243–51; disc. 251 1949
Fault Currents, Simplified Calculation of. (Committee Report):
Part I.....1133–35 1942
Part II.....1433–35 1948
Fault-Detecting Relay, A New Single-Phase-to-Ground. Sonnemann.....677–80; disc. 995 1942
Fault Detection and Location by Surge-Comparison Testing, Winding-. Moses, Harter..499–503; disc. 945 1945
Fault Limiting Means on High Interrupting Capacity Controllers, The Use of Air-Core Reactors as. Leitch.....469–74; disc. 474 1949
Fault Location and Relay Performance Analysis by Automatic Oscillographs. Dupuis, Jacobs.....442–6; disc. 1125 1946
Fault Locator for High-Voltage Lines, The "Linascope"—An Echo-Ranging Type. Leslie, Kidd.....1162–6; disc. 1166 1948
Fault Locator for High-Voltage Transmission Lines, A Transient. Spaulding, Diemond.....1005–1010; disc. 1010 1949
Fault Locator Using Fault-Generated Surges, A Transmission Line. Stevens, Stringfield.....1168–78; disc. 1178 1948
Fault Neutraliser on a Regulated Distribution System, Operation of a Ground-. Tomlinson, Hunt.....1321–6; disc. 1326 1949
Fault Neutralizers, Report on Survey of Unbalanced Charging Currents on Transmission Lines as Affecting Ground-. (Committee Report).....1328; disc. 1329 1949
Fault Protection for Rural Distribution Systems, Improved. Van Ryan.....261–3 1945

Fault Protection on Shipboard A-C Power-Distribution Systems. Rickover, Ross....1109–20; disc. 1429 1944

Fault-Protective Principles as Applied to D-C Aircraft Systems, Electric-Circuit. Kaufmann.....333–44; disc. 482 1944

Fault Tests of Relaying and Stability on Kansas-Nebraska 270-Mile 154-Kv Interconnection, Staged. Minard, Gow, Wolfe, Swanson.....358–67; disc. 425 1943

Fault Tests, Relaying Difficulties Disclosed by Staged. Morgan, Evans.....73–82 1948

Fault Voltage Drop and Impedance at Short-Circuit Currents in Low-Voltage Circuits. Schurig.....479–87; disc. 654 1941

Faults and Gas Detecter Relay Protection, Typical Transformer. Madill.....1052–8; disc. 1058 1947

Faults and Power Swings, Graphical Method for Estimating the Performance of Distance Relays During. Warrington.....608–20; disc. 620 1949

Faults and Switching Operations, Power System Overvoltages Produced by. (Committee Report).....912–21; disc. 921 1948

Faults, Impedances Seen by Relays During Power Swings With and Without. Clarke.....372–84; disc. 471 1945

Faults in Power Systems, Arcing. Concordia, Peterson..340–6; disc. 614 1941

Faults, Overvoltages During Power-System. Clarke, Crary, Peterson.....377–85; disc. 385 1939

Faults, Power-System Transients Caused by Switching and. Evans, Monteith, Witzke.....386–94; disc. 394 1939

Faults, The Effects of Mutual Induction Between Parallel Transmission Lines on Current Flow to Ground. Holbeck, Lantz.712–15; disc. 1002 1943

Faults to Ground, Performance of Ground-Relayed Distribution Circuits During. Gilkeson, Jeanne, Davenport.....40–8; disc. 424 1942

Faults, Transient Characteristics of Current Transformers During:

Part I. Concordia, Weygant, Shott.....280–6; disc. 469 1942

Part II. Concordia and Rothe.....731–4 1947

FCC Diathermy Design for Low Harmonic Radiation and Good Frequency Stability. Chapin, Roberts, Mobley.....42–6; disc. 46 1948

Features of Design and Operation to the Plantation Pipe Line, Electrical. Hyde, Britton..638–44; disc. 1051 1942

Features of Generators for Diesel-Electric Switcher Locomotives, Design. Atwell..... 41–5; disc. 433 1944

Features—Steam-Electric Generating Station P of the Pacific Gas and Electric Company, Electrical Design. Benson.1013–20; disc. 1020 1949

Fed Machine, The Doubly. Concordia, Crary, Kron.....286–9 1942

Federal Housing, and Other Wartime Projects, Estimating Electric Loads for Military-Training Bases. Potts.....246–54; disc. 463 1943

Feed Regulator, A New Grinding Circuit. Jones.....1240–2 1947

Feedback, Analytical Determination of Characteristics of Magnetic Amplifiers with. VerPlanck, Finzi, Beaumariage.....565–70 1949

Feed-Back Control Systems with Particular Reference to Backlash, Instrument Inaccuracies in. Marcy, Yachter, Zauderer..778–88 1949

Feeder Voltage Regulator Accuracy Standards. Birchard.....747–51; disc. 751 1948

Feeder Voltage Regulator Application on Power Systems. Gosinski, Oberholtzer...1458–61; disc. 1461 1948

Feeder Voltage Regulators, Power System Voltage Control Without. Smeloff.....1462–4; disc. 1465 1948

Feeders, Interim Report on Application and Operation of Automatic Reclosing Equipment on Stub. (Committee Report).....536–40; disc. 934 1943

Feeders, Sensitive Ground Protection for Radial Distribution. Hunt, Vivian.....84–7; disc. 87 1940

Feeders, Sensitive Ground Protection for Transmission Lines and Distribution. Gross.....968–71 1941

Ferroinductance as a Variable Electric-Circuit Element. Ryder.....671–8; disc. 962 1945

Ferromagnetic Materials, The Voltage Drop in the Welder Throat Loaded With. Stein.....356–62 1947

Ferroresonance, An Automatic Voltage Regulator Without Moving Parts Employing. Craig.....830–6; disc. 836 1939

Ferroresonant Circuits, Similitude of Critical Conditions in. Thomson.....127–30; disc. 130 1939

Ferroresonant Parallel Circuit, The Generalized Solution for the Critical Conditions of the. Thomson.....743–6; disc. 746 1939

Fiber Glass—An Inorganic Insulation. Atkinson.....277–82; disc. 283 1939

Fiber Magnet-Wire Insulation, Asbestos and Glass-. Mathes, Stewart.....290–4 1939

Fibrous Materials in Enclosed Electric Equipment, Moisture Equilibrium Between Gas Space and. Piper.....791–7; disc. 1152 1946

Field and Laboratory, Lightning Strokes in. Part III. Bellaschi.....1248–56; disc. 1392 1941 (Part I—1935; Part II—1937)

Field Components of Circular Filaments and Solenoids, Formulas and Tables for the Calculation of the Magnetic. Grover.....665–75 1949

Field Determination of Current-Transformer Errors by the Secondary-Voltage Method. Goodale. Holbeck.....879–82; disc. 1468 1944

Field Disturbances Produced by Lightning. McCann, Morgan.....345–57; disc. 427 1943

Field Excitation, Performance Calculations on Polyphase Reluctance Motors — Synchronous Motors Without. Trickey.....191–3 1946

Field Fluxes of the Shaded-Pole Motor, The. Kimberly.....273–7 1949

Field Harmonics in Induction Motors. Liwschits.....797–803 1942

Field Investigation of Electrical Insulation, The A-C Dielectric-Loss and Power-Factor Method for. Doble.....934–9; disc. 1348 1941

Field Investigation of Lightning Surges at Substations. Gross, McCann.....569–74; disc. 574 1947

Field Investigation of the Characteristics of Lightning Currents Discharged by Arresters. Gross, McCann, Beck.....266–71; disc. 461 1942

Field Investigations of Lightning. Wagner, McCann, Beck.....1222–30; disc. 1381 1941

Field, Lead Storage Batteries in the Transportation. Whitehurst.....303–07; disc. 683 1941

Field Power-Factor Testing of Transformer Insulation and Operating Experience. Whitmer.....605–11; disc. 741 1941

Field Protection for Generators, Loss-of-. Crossman, Lindemuth, Webb.....261–6; disc. 462 1942

Field Research on Lightning Arrester Discharges. McCann, Beck.....625–9; disc. 629 1947

Field Strength Near a Cylindrical Coil, Formulas for the Magnetic-. Dwight.....327–33; disc. 445 1942

Field Strength of Round Coils of Small Cross Section, The Computation of Magnetic. Dwight, Peters.....684–5 1944

Field Testing of Generator Insulation. (Committee Report).....1003–11; disc. 1314 1941

Field Tests and Experience at York and Middletown, Pa., Linear Couplers—. Harder, Klemmer, Neidig.....107–13 1946

Field Tests and High-Capacity Air-Blast Station-Type Circuit Breakers. Strang, Skeats.....100–04; disc. 409 1942

Field Tests and Performance of a High-Speed 138-Kv Air-Blast Circuit Breaker. Sporn, Strang.....1–6; disc. 412 1942

Field Tests and Performance of Heavy-Duty High-Speed 138-Kv Circuit Breakers—Oil and Air-Blast. Sporn, St. Clair..401–10; disc. 463 1945

Field Tests for Development of 10,000,-000-Kva 230-Kv Oil Circuit Breakers for Grand Coulee Power Plant. Killgore, Clagett.....271–83; disc. 283 1948

Field Tests of Interrupting Capacity of 138-Kv Oil Circuit Breakers. Buchanan, Floyd.....199–204; disc. 503 1946

Field Tests of Oil Circuit Recloser Substantiate Analytical Co-ordination Method. Auer, Branflick, Woodward, McKinley.801–08; disc. 808 1949

Field Tests on High-Capacity Station Circuit Breakers. Braley.....31–6; disc. 408 1942

Field Tests on Power-Line Carrier-Current Equipment. Miller, Prud'Homme.....824–7; disc. 1177 1946

Fields, A Turn-In-Gap Erase Head for Magnetic Recorders Providing Intense High-Frequency. Wiegand, Zenner.....507–10 1948

Fields in Air, Determination of Corona Starting Voltages for Nonuniform. Hutton.....1674–9; disc. 1680 1947

Fields in the Parallel Operation of D-C Motors, Use of Cumulative and Differential Series. Kimball.....1098–1100 1949

Fields in Watt-Hour Meters, Magnetic. Keener, Faucett, Helm.....202–05; disc. 758 1941

Fields, Performance of Portable Electrical Instruments in Magnetic. Peterson.....1228–31; disc. 1231 1948

Fields, The Shielding of Permanent Magnets From Transient Magnetic. Wey.....875–7; disc. 1338 1941

15,000-Volt Services, A Magnetic-Type Air Circuit Breaker for. Linde, Wyman.....140–4; disc. 453 1944

Filamentary Thermionic Gas Tubes, Quadrature Operation of. Holdaway.....205–08 1948

Filaments and Solenoids, Formulas and Tables for the Calculation of the Magnetic Field Components of Circular. Grover.....665–75 1949

Film Conditions on Commutation, Effects of Commutator Surface. Lynn, Elsey.....106–12; disc. 112 1949

Film Klydonograph With an Improved Coupling Method, A Simplified Double-. Waghorne.....1114–16; disc. 1116 1947

Film Thickness Indicator for Journal Bearings, Oil. Greenough.....589–95; disc. 595 1948

Films on Electrical Steel, Formation of Insulating Oxide. Schmidt..772–4 1948

Filter, A Tunable Rejection. Taylor... 263–7; disc. 490 1946
Filter for Broad Band Carrier Systems, A New Crystal Channel. Willis.. 134–8; disc. 490 1946
Filters Applied to Aircraft, Radio-Noise. Frick, Zimmerman... 590–5; disc. 979 1943
Filters, Diode Rectifying Circuits With Capacitance. Waidelich,... 1161–7; disc. 1388 1941
Filters for a 150-Kc Carrier System. Taylor... 583–8 1948
Filters Using Ethylene Diamine Tartrate in Place of Quarts, Crystal. Willis... 552–6 1948
Finishing Ranges, Electric Drives for Textile. Moore, Uhl... 684–94 1947
Fires Due to Insulator Contamination, Pole. Wickham, Adler, Oldacre.. 1741–4 1948
Five-Figure Table of the Bessel Function $I_n(x)$, A. Dwight... 135–6 1941
5,000,000 Kva, The Next Step in Interrupting Capacity—. Hill, Leeds... 317–23; disc. 463 1945
500,000-Kva 7.5-Kv Air Circuit Breaker for Steel-Mill Service, A. Dickinson... 242–5; disc. 450 1944
Five-Winding Transformer, A Useful Equivalent Circuit for a. Aicher.. 66–70; disc. 385 1943
Five Years' Experience With Ultra-high-Speed Reclosing of High-Voltage Transmission Lines. Sporn, Muller... 241–6; disc. 690 1941
Flash Welders, The Application of Series Capacitors to. Deffenbaugh... 686–7 1946
Flashover and Bus Short-Circuit Protection, D-C Machine. Montgomery, Sellers... 1168–73; disc. 1370 1941
Flashover and Corona Correction on Small Ceramic Bushings, High Altitude. Pendleton... 1324–30 1947
Flashover, Atmospheric Variations and Apparatus. McAuley... 798–803; disc. 1319 1941
Flashover Characteristics of Transformer Condenser Bushings. Cole. 27–32; disc. 32 1939
Flashover Deionisation Times as a Factor in Applying High-Speed Reclosing Circuit Breakers, Insulator. Boisseau, Wyman, Skeats.. 1058–66; disc. 1066 1949
Flashover of Aircraft Insulation, Effect of Altitude on Electric Breakdown and. Berberich, Moses, Stiles, Veinott... 345–54; disc. 458 1944
Flashover of Solid Insulators in Compressed Nitrogen, High-Voltage D-C. Trump, Andrias... 986–90; disc. 1393 1941
Flashovers of Suspension Insulators Due to Contamination. Adler, Wickham, Oldacre... 1680–3; disc. 1683 1948
Flaw Detectors, Design and Application of Supersonic. Erdman... 1271–6 1947
Flexible Cable for Induction Heating, Low Reactance. Zucker... 848–52 1946
Flight Control, Application of Electronics to Aircraft. Gille, Kutsler. 849–53; disc. 1501 1944
Flight Testing and Spectroscopy, Electronically Balanced Recorder for. Williams, Clark, Tarpley... 205–08 1946
Flow in A-C Networks, A New Simple Calculator of Load. Enns... 786–90; disc. 1000 1943
Flow in Electric Systems—the Vi Energy-Flow Postulate, Energy. Slepian... 835–41; disc. 1054 1942
Flow Ratio as a Design Parameter in Thermal Demand Meters, Heat. Nelson... 885–90; disc. 890 1949
Flow to Ground Faults, The Effects of Mutual Induction Between Parallel Transmission Lines on Current. Holbeck, Lants. 712–15; disc. 1002 1943
Flowing Liquids, Photographic Study of A-C Arcs in. Slepian, Browne. 823–8; disc. 1330 1941
Fluid Clutch, The Magnetic. Rabinow. 1308–15 1948
Fluid-Flow Arc Extinction, Displacement and Diffusion in. Slepian... 162–7; disc. 643 1941
Fluorescent Lamp, Electronics of the. Townsend... 607–12 1942
Flux Reversal in Reactor Cores Operating Above Saturation Density, Peak Voltages Induced by Accelerated. Specht, Wentz... 254–63 1946
Fluxes of the Shaded-Pole Motor, The Field. Kimberly... 273–7 1949
Fluxmeter for A-C Fields, Use of Bismuth-Bridge Magnetic. Smith... 52–5 1939
Fluxmeter, General Theory and Experimental Confirmation of the Moving Coil. Higgins, Robertson... 897–907; disc. 907 1949
Fog, Performance of Dust-Contaminated Insulators in. Cozzens, Blakeslee... 1686–91; disc. 1691 1948
Force of 2-Layer Windings of Rotating Machines, The Magnetomotive. Stein... 756–8 1947
Forced Circulation of Cooling Medium, Cooling Power Transformers by. Paluev, Burnham... 215–21; disc. 445 1943
Forces and Torques, Eddy Currents in Disks: Driving and Damping. Moore... 1–10; disc. 10 1947
Forces Between Channels Located Back to Back, Formulas for Calculating Short-Circuit. Higgins... 710–12 1944
Forces Between Conductors of Structural Shape, Formulas for Calculating Short-Circuit. Higgins.. 659–63 1943
Forces, The Output and Optimum Design of Permanent Magnets Subjected to Demagnetising. Hornfeck, Edgar... 1017–24; disc. 1256 1940
Forces, Treatment and Casting of Metals by Electromagnetic. Hoke. 986–92 1944
Forest Service, The Communication Facilities of the U. S. Simson... 971–6 1941
Form, Its Determination and Standardisation, History of A-C Wave. Bedell... 864–8; disc. 1071 1942
Form on Let-Go Currents, Effect of Wave. Dalziel.. 739–44; disc. 998 1943
Form Upon the Iron Losses of Transformers, Influence of the Core. Stein... 95–103; disc. 103 1948
Formation of Insulating Oxide Films on Electrical Steel. Schmidt... 772–4 1948
Formulas and Tables for the Calculation of the Magnetic Field Components of Circular Filaments and Solenoids. Grover... 665–75 1949
Formulas for Calculating Short-Circuit Forces Between Channels Located Back to Back. Higgins... 710–12 1944
Formulas for Calculating Short-Circuit Forces Between Conductors of Structural Shape. Higgins... 659–63 1943
Formulas for Calculating Short-Circuit Stresses for Bus Supports for Rectangular Tubular Conductors. Higgins... 578–80 1942
Formulas for Calculating Temperature Distribution in Transformer Cores and Other Electric Apparatus of Rectangular Cross Section. Higgins... 190–4; disc. 493 1945
Formulas for Calculating the Inductance of Channels Located Back to Back. Schwantz, Higgins... 893–9 1946
Formulas for Conductor Size According to Cost of Resistance Loss. Dwight 22–5; disc. 497 1946
Formulas for the Calculation of the Inductance of Linear Conductors of Structural Shape. Higgins... 53–8 1943
Formulas for the Four-Terminal Network Parameters of Uniform Ladder Networks. LePage... 604–08 1944
Formulas for the Inductance of Coaxial Busses Comprised of Square Tubular Conductors. Messinger, Higgins... 328–36; disc. 501 1946
Formulas for the Inductance of Rectangular Tubular Conductors. Higgins... 1046–50; disc. 1409 1941
Formulas for the Magnetic-Field Strength Near a Cylindrical Coil. Dwight... 327–33; disc. 445 1942
Formulas, Sag and Tension Calculations for Cable and Wire Spans Using Catenary. Nash, Nash... 685–92; disc. 984 1945
Fort Peck Project, Transmission and Relaying Problems on the. Floor, Muller, Goldsborough... 209–14; disc. 466 1944
40-Kva 400-Cycle Aircraft Alternator, A. Keneipp, Veinott... 816–21; disc. 1460 1944
Four-Arm Bridge, Sensitivity of the. Seletsky, Zurcher. 723–8; disc. 728 1939
400-Ampere Sealed Ignitron, A. Steiner, Price... 680–5; disc. 1161 1946
400-Cycle Aircraft Electric Systems, Instrumentation of. Corson, Stimson, Soley... 830–5; disc. 1501 1944
400-Cycle Aircraft Motor, A. Schwandt. 508–12; disc. 948 1945
400-Cycle Electrically Operated Aircraft Circuit Breaker, A 208Y/120-Volt 120-Ampere Three-Pole. Titus, Reifschneider... 551–5 1945
400-Cycle Inverters for Military Aircraft. Hayes, Ray... 233–7 1945
400-Cycle Three-Phase Power Circuits on Large Aircraft and Its Application to Fault-Current Calculations, Impedance of. Chappuis, Olmsted. 1213–20; disc. 1496 1944
400-Mile 230-Kv Series-Capacitor-Compensated Transmission System, Characteristics of a. Hoard.. 1102–14; disc. 1178 1946
Four-Phase Network, Two-Phase Coordinates of a. Kimbark... 7–9 1945
Four-Phase System, Symmetrical-Components Analysis of the. Boyajian. 48–51; disc. 426 1944
Four-Terminal Network and Its Application to the Capacitor Single-Phase Motor, A Generalized Circle Diagram for a. Tarboux... 881–9; disc. 943 1945
Four-Terminal Network Parameters of Uniform Ladder Networks, Formulas for the. LePage... 604–08 1944
Fourier Coefficient Harmonic Analyzer, A New. Charp... 644–9; disc. 649 1949
Foster's Reactance Networks, A Method for Determining the Normal Modes of. LePage... 674–8 1943
Fractional-Horsepower Motor Standards; Their Effect on Refrigeration and Pump Applications, New NEMA. Potter... 508–10 1947
Fractional-Horsepower Motor Stators, Temperature-Aging Tests on Class-A-Insulated. Scott, Thompson... 499–501; disc. 977 1942
Fractional-Horsepower Motors, Investigation of Hot-Spot Temperatures in. Hirsch, Munier, Schmidt, Wightman, Himebrook, Lloyd, Coffman, Potter. 128–36; disc. 421 1945
Fractional-Horsepower Motors, Some Problems in the Standardization of Temperature Ratings of. Veinott. 1055–61; disc. 1218 1940

Fractional Horsepower Ratings, The Hysteresis Motor — Advances Which Permit Economical. Roters. ....1419–30; disc. 1430 1947
Fractional-Slot and Dead-Coil Windings. Malti, Hersog.... ....782–94; disc. 1079 1940
Fractional-Slot Lap and Wave Windings, Doubly-Chorded or Doubly Shifted. Liwschits.....684–6 1948
Fractional-Slot Wave Windings, Balanced. Liwschits.....676–8 1948
Fractional-Slot Winding, Differential Leakage of a. Liwschits...314–20 1946
Fractional Slot Winding, Differential Leakage of the Different Patterns of a. Liwschits.... ....1129–31; disc. 1131 1949
Fractional-Slot Winding, Distribution Factors and Pitch Factors of the Harmonics of a. Liwschits.... ....664–6; disc. 926 1943
Fractional Termination for Ladder Networks, A. LePage.....530–6 1946
Frames, Stationary Networks and Transmission Lines Along Uniformly Rotating Reference. Kron. 690–6 1949
Frames, The Characteristics and Power Requirements of Spinning. Untersee:
Part I.....1–4 1940
Part II.....336–8 1940
(France), Especially on Corona Behavior of Bundle Conductors, Results of Tests Carried Out at the 500-Kv Experimental Station of Chevilly. Cahen.... ....1118-25; disc. 1125 1948
Freezing, Investigation of Arc Starting Characteristics of D-C Welders With Reference to Electrode. Tyrner.....97–9; disc. 511 1946
Freon in a Uniform Field at High Pressures, D-C Breakdown Strength of Air and of. Trump, Safford, Cloud....132–5; disc. 676 1941
Freon Under Pressure, The Electrical Strength of Nitrogen and. Skilling, Brenner.....191–5; disc. 441 1942
Frequencies, A New Electronic Multiplier for Power. Overbeck..931–6 1940
Frequencies, A Resonant-Cavity Method for Measuring Dielectric Properties at Ultrahigh. Works, Dakin, Boggs.....1092–8; disc. 1452 1944
Frequencies and Under Changing Temperature, The Measurement of Dielectric Loss at High. Whitehead, Ruezgeberg.....520–4 1949
Frequencies in Coils and Windings, Methods of Determining Natural. Bewley, Hagenguth, Jackson.... ....1145–50; disc. 1361 1941
Frequencies, Loss Measurements Made on Underground-Cable Overhead-Conductor 132-Kv Transmission Line at Carrier Current. Cornelius, Storer.....597–601 1949
Frequencies, Measurements at Radio. Meahl, Michel, Scheldorf, Dickinson.....654–9 1940
Frequencies of Natural Power Oscillations in Interconnected Generating and Distribution Systems, The. Rudenberg.....791–803 1943
Frequencies, Power Circuit Instruments for the Higher Range of Audio. Lunas, MacGahan.....1230–5 1941
Frequencies, Report on Method of Measurements at Carrier-Current. (Committee Report).... ....1429–32; disc. 1432 1948
Frequency and Load, A Power-System Governor Sensitive to. Curtis.... ....89–92; disc. 731 1941
Frequency, and Time of Interconnected Systems, Control of Load. Duff... ....778–86; disc. 999 1945
Frequency Cable, The S-Function Method of Measuring Attenuation of Coaxial Radio-. Stewart.... ....616–19, 938–9; disc. 966 1945
Frequency Cables, Heating of Radio-. Macalpine.....283–8 1949
Frequency Cables, Report of Conference on Radio-.....911–41 1945
Frequency Cables, The Power Rating of Radio-. Mildner.... ....289–98; disc. 298 1949
Frequency Capacitor, A New High-. Allison, Beverly.... ....915–16; disc. 1464 1944
Frequency Carrier Telegraph System, High-Speed Voice-. Bramhall.... ....873–9; disc. 1132 1940
Frequency Changer, Design of an Electronic. Willis, Kuenning, Christensen, Bedford....1070–8; disc. 1413 1944
Frequency Changer, Suddenly Applied Loads Carried by a Variable-Ratio Synchronous-Induction. Darling, Kaufman.....91–4 1948
Frequency Changer, Suddenly Applied Loads on a Variable-Ratio. Carter, Maginniss, Rothe.....1489–95 1947
Frequency Changer, Tensorial Analysis and Equivalent Circuit of a Variable-Ratio. Kron....1503–06 1947
Frequency Changers—Characteristics, Applications, and Economics. Crary, Easley....351–8; disc. 416 1945
Frequency Changers, Network Coupling by Means of Static Electronic. Marti.....495–503; disc. 1163 1940
Frequency Changers, Parallel Operation of Aircraft Alternators Using Electronic. Bowlus, Nims...31–8 1947
Frequency Coaxial-Line Calculations, High-. Race, Larrick.....526–30 1942
Frequency Compensated A-C Ammeters and Voltmeters. Whittenton, Wilkinson.....761–4 1946
Frequency Control for Interconnected Power Systems, Continuous Load-. Dimond, Lunge.... ....1483–8; disc. 1488 1948
Frequency Control of High-Speed Induction Motors, Adjustable. Heumann.....719–25 1947
Frequency Control of Load Swings. McCormack, Lombard.... ....623–4; disc. 1043 1942
Frequency-Control Possibilities, Short-Wave Diathermy Apparatus and. Gieringer.....459–64 1941
Frequency Converter for Induction Heating of Metals, Mercury-Arc. Durand, Rice.....1592–9 1948
Frequency Converter Sets for Testing Aircraft Models, Electronic Control of. Heumann, Strong...931–9 1946
Frequency Converters, Performance Calculation of Induction-Type. Latsko.....691–4 1948
Frequency Division Techniques for a Coaxial Cable Network. Crane, Dixon, Huber.....1451–9 1947
Frequency Generator, A Variable-Speed Constant-. Roys, Nader, Spotts.. ....1414–17; disc. 1417 1947
Frequency Generator—Characteristics and Application to Induction-Heating Problems, Vacuum-Tube Radio-. Kinn.....1290–1303; disc. 1500 1944
Frequency Heating Equipment, Measurement of Interference From Radio-. Brown.....1102–06 1948
Frequency Heating Equipment, Reduction of Interference from Radio-. Klingman.... ....718–24; disc. 724 1949
Frequency Heating, Some Economic Aspects of Radio. Duryee.105–12 1948
Frequency High-Voltage Phenomena, Radio-. Alford, Pickles.... ....129–36; disc. 136 1940
Frequency Ignition Circuits, Analysis of High-. Robinson.....916–19 1944
Frequency in Industrial Dielectric Heating, The Role of. Scott..... ....558–62 1945
Frequency, Induction Heating—Selection of. Stansel..755–9; disc. 1436 1944
Frequency Loop Antennas, Ultrahigh. Alford, Kandoian.....843–8 1940
Frequency Measurements and Standards, Microwave. Husten, Lyons. 321–8 1948
Frequency Meter and Speed Regulator, An Electronic. Levin..... ....779–86; disc. 1181 1946
Frequency Meter for Commercial Power Frequencies, An Improve. Knudsen.....866–9; disc. 1334 1941
Frequency-Modulated Carrier Telegraph System. Bramhall, Boughtwood.....36–9 1942
Frequency-Modulated Television Relays, The Application of Heterodyne Modulation to Wide-Band. Boothroyd.....1126–30 1947
Frequency Modulation. Everitt..... ....613–25 1940
Frequency-Modulation, and Single-Side-Band Systems for Power-Line Carrier Transmission, A Comparison of the Amplitude-Modulation. Cheek....215–20; disc. 450 1945
Frequency Modulation for Power-Line Carrier Current. Kenefake..... ....616–20; disc. 953 1943
Frequency Modulation Receiver Design Trends. Young.....1514–19 1948
Frequency Modulation Telegraph Terminal Without Relays, A. Cusack, Michon.....1165–70; disc. 1170 1947
Frequency of Occurrence and the Distribution of Lightning Flashes to Transmission Lines, The. Golde.. ....902–10; disc. 982 1945
Frequency on Let-Go Currents, Effect of. Dalziel, Ogden, Abbott..... ....745–50; disc. 998 1943
Frequency on the System of the Southern California Edison Company, Change of. Tice, Kroneberg, Johnson, Enefer, Tugby, Sidway.....809–25; disc. 825 1948
Frequency Performance of Thyratrons. Wittenberg.....843–8 1946
Frequency Radio-Noise Elimination, Very High-. Owen.....949–54 1944
Frequency Relay for Power-System Applications, A New. Carlin, Blackburn.....553–7; disc. 1421 1944
Frequency Resistance of Coils, Data on the High-. Witsig.....764–9 1947
Frequency Response Characteristics of Recording Instruments. Graybeal. 755–66 1948
Frequency Response Curves, Control Chart Methods Applied to. Mundel.....424–7 1949
Frequency Response of Automatic Control Systems. Harris..... ....539–46; disc. 1131 1946
Frequency Shift Telegraphy—Radio and Wire Applications. Davey, Matte.....479–93; disc. 493 1947
Frequency Stability, FCC Diathermy Design for Low Harmonic Radiation and Good. Chapin, Roberts, Mobley.....42–6; disc. 46 1948
Frequency System of Telemetering, A Modulated-. Renfro, Peterson.... ....45–7 1945
Frequency Test for Induction Motors, or S. F. Test, The Superimposed. Romeira.....952–3; disc. 953 1948
Frequency to Industrial Control Problems, Application of Low. Schmits. ....1571–5; disc. 1575 1948
Frequency Variations and Tie-Line Power Swings, Effect of Prime-Mover Speed Governor Characteristics on Power-System. Concordia, Crary, Parker..... ....559–67; disc. 733 1941

Friction on the Performance of Servomechanisms, The Effect of Coulomb. McCann, Lindvall, Wilts.. .....540–6 1948
Fuel Cost and Transmission Loss by Use of the Network Analyzer to Determine Plant Loading Schedules, Co-ordination of. George, Page, Ward...1152–60; disc. 1160 1949
Fuel Gauges, Capacitance. Clark, Adolphe.....1189–96; disc. 1196 1947
Fuel-Measurement System for Aircraft, A Capacitance-Type. Pearson.... .....1363–8 1947
Fuel Tanks, Totalizing Contents of Aircraft. Macintyre..... .....663–65; disc. 1419 1944
Full Utilization of Mexico's Hydraulic Resources Through Multiple Purposes. Alba.....989–92 1948
Function $I_n(x)$, A Five-Figure Table of the Bessel. Dwight.....135–6 1941
Function Loci for Servomechanism Components and Systems, Graphical Determination of Transfer. Thomas, Easton.307–14; disc. 314 1949
Function of Area, Insulation Breakdown as a. Hill, Schmidt..... .....442–4; disc. 444 1948
Functional Analysis of Measurements. Kinnard.....987–95 1946
Functional Design of Aircraft Electric Actuator Equipment. Gagnier.... .....813–15; disc. 1464 1944
Functional Evaluation of Insulating Materials. Mathes..... .....1236–9; disc. 1240 1948
Functionalized Resistance Welding Control. Stadum, Large, Hartwig. 414–18 1947
Functions ber x and bei x and Their Derivatives, Values of the Bessel. Dwight.....787–90 1939
Functions of Complex Quantities, Inverse. Dwight.....850–3 1942
Functions of Ground Preference in Carrier-Current Relay Schemes, The. Leyland, Goldsborough.... .....97–100; disc. 437 1944
Functions of Schwartz, A Derivation of Heaviside's Operational Calculus Based on the Generalised. Smith, Alger.....939–44; disc. 944 1949
Fundamental Basis for Distance Relaying on 3-Phase Systems. Lewis, Tippett.....694–708; disc. 708 1947
Fundamental Principles of Amplidyne Applications. Crever..... .....603–06; disc. 956 1943
Fundamental Properties of the Vacuum Switch. Koller..... .....597–604; disc. 1141 1946
Fundamental Theory of Inherent-Overheating Protection Under Running Overload Conditions. Veinott, Schaefer.....266–70; disc. 270 1949
Fundamental Wave and to the Harmonics, Differential Leakage With Respect to the. Liwschits..... .....1139–50 1944
Fundamentals, and Design Improvements, Aircraft Carbon-Pile Voltage Regulators. Austin, Richards. 983–7 1949
Fundamentals of a Theory of the Transductor or Magnetic Amplifier, Some. Lamm.....1078–85 1947
Fundamentals of D-C Controlled Reactors with Resistive Load, Some. Storm...188–94; disc. 194 1949
Fundamentals of Hearing-Aid Design. Penn.....744–9 1944
Fundamentals of Industrial Distribution Systems, The. Beeman, Kaufmann.....272–9; disc. 477 1942
Fundamentals of Potheads 69,000 Volts and Below, Design. Nicholas..... .....1263–7; disc. 1267 1949
Fundamentals of the Amplidyne Generator. Bower.....873–81 1945
Furnace Circuits, A Study of Voltage Transients in Arc-. Hodtum, Rice. .....556–62; disc. 921 1943
Furnace Control by Regulex Exciters, Arc-. Montgomery, Bloodworth.. .....650–4; disc. 980 1943
Furnace Duty, A Compressed Air Circuit Breaker for 23-Kv Arc. Wilcox, Baker.....154–8 1948
Furnace Load, A 10,000-Kva Series Capacitor Improves Voltage on 66-Kv Line Supplying Large Electric. Jones, Arthur, Stearns, Johnson... .....345–51; disc. 351 1948
Furnace Loads on Long Transmission Lines, Arc-. LeClair..... .....234–9; disc. 239 1940
Furnace Practice in Canada, Electric. Balleny.....917–24 1947
Furnaces During Wartime, Transmission-Line and System Problems in Supplying Large Electric-Arc. Jones.....197–202; disc. 392 1943
Furnaces, Electronic Regulator for Arc. Reilly, Valentine....601–04 1944
Furnaces—Performance and Power Supply, Large Electric-Arc. Jones, Stearns.....763–9; disc. 1325 1941
Furnaces, Rotating Regulator for Arc. Geiselman, Levy, Harris..... .....671–4; disc. 983 1943
Fuse, A Double-Break Oil- or Gas-Blast Power. Hill....402–07; disc. 646 1941
Fuse, A New Current-Limiting. Rawlins, Strom, Graybill..... .....77–80; disc. 657 1941
Fuse, A New Three-Element Current-Limiting Power. Rawlins, Fahnoe. .....156–9; disc. 451 1944
Fuse, Control of the Switching Surge Voltages Produced by the Current-Limiting Power. Williams, Schuck. .....214–17; disc. 678 1941
Fuse for Aircraft Applications, A Current-Limiting. Powell.....541–5 1945
Fuse for Voltages Through 138 Kv, A New High-Interrupting-Capacity. Fahnoe.....630–5; disc. 937 1943
Fuse, The Current-Limiting Power. Prince, Williams...11–14; disc. 15 1939
Fuses and Circuit Breakers, The Degree of Short-Circuit Protection Afforded Small Low-Voltage A-C and D-C Starters by Means of. Jones.....611–12; disc. 1408 1944
Fuses Must Protect, Aircraft. Lebens. .....581–5; disc. 1368 1944
Fuses, Performance Criteria for Current-Limiting Power:
Part I. Schuck.1028–34; disc. 1191 1946
Part II. Boehne..... .....1034–45; disc. 1191 1946
Fuses, The Calculated Risk of Operating Capacitors Without Individual. Brooks.....1219–25; disc. 1225 1949
Fusing of Transformer Banks, High-Voltage. Marsh, Dodds..... .....533–5; disc. 977 1942
Fusing on Rural Power Circuits, Sectionalising and Internal Transformer. Watkins..383–8; disc. 388 1947
Fusing Practices on Distribution Systems. Parsons, Wallace:
Part I.....89–91; disc. 467 1944
Part II.....598–600; disc. 1429 1944

G

Gain and for Zero, Wide-Band D-C Amplifier Stabilized for. Williams, Amey, McAdam.811–15; disc. 815 1949
Gain, D-C Amplifier Stabilized for Zero and. Williams, Tarpley, Clark... .....47–57 1948
Galloping Conductors and a Method for Studying Them. Tornquist, Becker. .....1154–61; disc. 1161 1947
Galvanic Corrosiveness of Soil Waters. Phelps, Kahn....156–9; disc. 482 1945
Gap Erase Head for Magnetic Recorders Providing Intense High Frequency Fields, A Turn-In. Wiegand, Zenner.....507-10 1948
Gap for Various Magnetic Materials in Cores of Coils Subject to Superposed Direct Current, Optimum Air. Legg.....709–12; disc. 969 1945
Gap, Polarity Limits of the Sphere. McMillan.....56–9; disc. 659 1939
Gap Reactance of Polyphase Machines, The Air. Alger, West....1331–43 1947
Gaps at 60 Cycles, Behavior of Point. Lebacqs.....44–8; disc. 651 1941
Gaps, Dielectric-Recovery Characteristics of Large Air. McCann, Clark.....45–52; disc. 394 1943
Gaps, Enclosed Spark. Berkey..... .....429–33; disc. 1118 1940
Gaps in Oil, Surge-Voltage Breakdown Characteristics for Electrical. Sorensen.....78–81; disc. 81 1940
Gaps Under Simulated High-Altitude Conditions, Potential Breakdown of Small. DeLerno..... .....109–12; disc. 456 1944
Gas As a Dielectric, High-Pressure. Nonken.....1017–20; disc. 1405 1941
Gas-Blast Power Fuse, A Double-Break Oil- or. Hill....402–07; disc. 646 1941
Gas Detector Relay Protection, Typical Transformer Faults and. Madill. .....1052–8; disc. 1058 1947
Gas-Filled Cable Impregnated with Extra-High-Viscosity Oil, High-Pressure. Sticher, Doan, Atkinson, Meyerhoff..336–45; disc. 345 1949
Gas-Filled Cable Installation, Thermal Characteristics of a 120-Kv High-Pressure. Sanderson, Sticher, McGrath.....487–98; disc. 499 1948
Gas-Filled Cable, Low-, Medium-, and High-Pressure. Shanklin..... .....719–26; disc. 1021 1942
Gas-Filled Cable, 120-Kv High-Pressure. Faucett, Komives, Collins, Atkinson.....658–65; disc. 1021 1942
Gas-Filled Cable, Operation of Low Pressure. Hatcher..... .....788–92; disc. 1399 1944
Gas-Filled-Cable Research and Experience. Shanklin..... .....549–53; disc. 1399 1944
Gas-Filled Grid-Controlled Rectifiers, Circuit Cushioning of. Edwards, Smith.....640–3; disc. 1131 1946
Gas-Filled Tubes as Circuit Elements, Cold-Cathode. Ingram.....342–7 1939
Gas in Electrodes for the Glow-to-Arc Transition, Importance of. Maxfield, Hegbar, Eaton..... .....816–21; disc. 1095 1940
Gas Leaks in Pipe-Encased Gas Pressure Cable Lines, Location of. Piper... .....10–21; disc. 21 1948
Gas or Diesel Bus Where No Overhead Facilities Exist?, Can the Trolley Coach Compete Economically With the. Gauss.....264–8; disc. 268 1947
Gas Power Transformers, High-Voltage Compressed-. Hobart..... .....690–2; disc. 1448 1944
Gas-Pressure Cable, Low-. Shanklin. .....307–15; disc. 315 and 912 1939
Gas Pressure for Telephone Cables. Giese.....471–8 1947
Gas Space and Fibrous Materials in Enclosed Electric Equipment, Moisture Equilibrium Between. Piper.....791–7; disc. 1152 1946
Gas Tubes, Quadrature Operation of Filamentary Thermionic. Holdaway.....205–08 1948
Gas Turbine Power Plant, A 3,000-Horsepower. Haverstick..458–60 1949
Gas Turbines for Power Generation and Other Applications, Two. Howard. .....461–5; disc. 465 1949

Gas Turbines in Stationary Power Generation. Hague.....467–8 1949
Gaseous-Discharge Lamps for Airplane Lighting Service. Beggs.....760–2; disc. 1456 1944
Gaseous Insulation for High-Voltage Apparatus. Camilli, Chapman.....1463–9; disc. 1469 1947
Gases, Breakdown Studies in Compressed. Howell.....193–204; disc. 204 1939
Gauge for Cold-Rolled Strip Steel. X-Ray Thickness. Lundahl.....83–90 1948
Gauge for Hot-Strip Rolling Mills, An X-Ray Thickness. Clapp, Pohl.....620–6 1948
Gauges, Capacitance Fuel. Clark, Adolphe.....1189–96; disc. 1196 1947
Gear Ratio and Its Effect on Traction Motors. Woods...65–8; disc. 433 1944
General Analysis of Speed Regulators Under Impact Loads. McCann, Osbon, Kirschbaum.....1243–52 1947
General Mobile Telephone System. Romnes, O'Connor.....1658–66 1947
General-Purpose Induction Motors, Rating of. Alger, Johnson.....445–56; disc. 456 1939
General-Purpose Squirrel-Cage Induction Motors, Measurement of Temperature in. Potter.....468–72; disc. 472 1939
General Solution Method of Power Network Analysis, The. Dunstan.....631–8; disc. 638 1948
General Theory and Experimental Confirmation of the Moving Coil Fluxmeter. Higgins, Robertson.....897–907; disc. 907 1949
General Theory of Multiple Cage Induction Motors. Chang..1139–43 1949
Generalized Bridge Network for Dielectric Measurements. Balsbaugh, Howell, Dotson.....950–6; disc. 1105 1940
Generalised Circle Diagram for a Four-Terminal Network and Its Application to the Capacitor Single-Phase Motor, A. Tarboux.....881–9; disc. 943 1945
Generalized Equivalent Circuit in the Theory of Polyphase Commutator Motors, A. Coulthard...423–31 1941
Generalized Solution for the Critical Conditions of the Ferroresonant Parallel Circuit, The. Thomson.....743–6; disc. 746 1939
Generating and Distribution Systems, The Frequencies of Natural Power Oscillations in Interconnected. Rudenberg.....791–803 1943
Generating and Transmission Stations, Ring Busses for. Michelson, Galassini.....665–9; disc. 1372 1944
Generating Capacity Outages, Calculating Probability of. Lyman.....1471–7; disc. 1477 1947
Generating Capacity Problems of a Combined Hydro and Steam System, Probability Methods Applied to. Loane, Watchorn.....1645–54; disc. 1654 1947
Generating Reserve Capacity Determined by the Probability Method. Calabrese.....1439–50 1947
Generating-Station Auxiliaries, Electric Drives for Steam Electric. Brownlee, Elsi....741–5; disc. 976 1945
Generating-Station-Capacity Investment, Evaluation of Electric Distribution Losses in Terms of. Mortara.....1–7; disc. 411 1945
Generating Station P of the Pacific Gas and Electric Company, Electrical Design Features—Steam-Electric. Benson.....1013–20; disc. 1020 1949
Generating Station, Reconstruction of Switching Facilities at Essex. Taylor.....761–70; disc. 778 1939
Generating Station, Relaying of Transmission Lines from the New. Green, Oewel, Ramsaur.....873–7; disc. 877 1949
Generating Stations, A New Isolated-Phase Metal-Enclosed Bus Designed for High Capacity. Wyman, Shores.....699–703; disc. 703 1948
Generating Stations, Automatic Control of Hydroelectric. Brown, Derr.....343–55; disc. 355 1947
Generating Stations, Auxiliary-Power Supply for. McCallum.....693–5; disc. 976 1945
Generating Units on the 2,000,000-Horsepower Saguenay System, Improvements in Performance of Hydroelectric. Lawton.....900–10; disc. 1187 1946
Generating Units, The Maintenance of Hydroelectric. Robertson, Standing.....776–82 1947
Generation and Other Applications, Two Gas Turbines for Power. Howard.....461–5; disc. 465 1949
Generation, Commutation of D-C Machines and Its Effects on Radio Influence Voltage. Motter.....491–5; disc. 495 1949
Generation, Gas Turbines in Stationary Power. Hague.....467–8 1949
(Generation) Hydroelectric Power Development in Quebec. Lawton.....1006–21 1947
Generation in Industry, Central Utility Power Service Versus Local Plant. Frampton.....880–3; disc. 884 1948
Generation of Electric Charges by Moving Rubber-Tired Vehicles. Mackeown, Wouk.....207–10; disc. 428 1943
Generation, Progress in Power—1940–46. (Committee Report).1681–97 1947
(Generation) Trends in the Design and Arrangement of Electrical Equipment in Hydraulic Power Plants. Welchel.....78–82; disc. 82 1939
Generative Loads, Voltage and Current Relations for Controlled Rectification With Inductive and. Puchlowski.....255–60; disc. 442 1945
Generator, A Broad-Band Signal. Hahn, Ebert, Lynch.....316–20 1948
Generator, A Variable-Speed Constant-Frequency. Roys, Nader, Spotts.....1414–17; disc. 1417 1947
Generator, A Wide-Band Square-Wave. Bartelink.....371–6 1941
Generator and Motor, Synchronous Starting of. Concordia, Crary, Kilbourne, Weygandt.....629–34; disc. 956 1945
Generator Applied to Speed-Controlled Electric Gun Turrets for Aircraft, The Amplidyne. Zahorsky.....221–5; disc. 436 1945
Generator—Characteristics and Application to Induction-Heating Problems, Vacuum-Tube Radio-Frequency. Kinn.....1290–1303; disc. 1500 1944
Generator Comes of Age, The Locomotive Traction. Lamborn..767–71 1948
Generator Control Relay for D-C Aircraft Electric Systems, Differential. Crever.....589–93 1944
Generator Control System for a Multijet Airplane, Starter-. Hart.1316–18 1948
Generator-Control Transformer System, Electrical Accuracy of Selsyn. Chestnut.....570–6; disc. 1118 1946
Generator Damper Windings at Wilson Dam. George, Bessesen.....166–71; disc. 171 1939
Generator Differential Relay, A New. McConnell.....11–13; disc. 381 1943
Generator Excitation Control Systems, Developments in Diesel-Electric Traction-. Brancke, Adams.....223–8; disc. 228 1947
Generator, Fundamentals of the Amplidyne. Bower.....873–81 1945
Generator Insulation, Field Testing of. (Committee Report).....1003–11; disc. 1314 1941
Generator Power Center, D-C Aircraft. Bottemiller.....1267–70 1947
Generator Protection, A High-Speed Differential Relay for. Sonnemann.....608–12; disc. 1250 1940
Generator Reserve, A Convenient Method for Determining. Seelye.....1317–20 1949
Generator Reserve, Outage Expectancy as a Basis for. Seelye.....1483–8 1947
Generator Stability at Low Excitation. Michelson, Lischer....1–6; disc. 7 1948
Generator, Steady-State Theory of the Amplidyne. Graybeal.....750–6; disc. 1049 1942
Generator, The Hydrogen-Cooled Turbine. Snell.....35–45; disc. 45 1940
Generator Thrust Bearings at the Bonneville Plant of the Corps of Engineers, War Department, The Design and Performance of the Vertical. Lewis, Gordon.....1231–7; disc. 1237 1947
Generator Used With the All-Electric Automatic Pilor for Airplanes, An Induction. Vickers.....182–5 1948
Generator Voltage Regulation, Recent Developments in. Hanna, Oplinger, Valentine....838–44; disc. 844 1939
Generator Voltage Regulator, The Direct-Acting. Boice, Crary, Kron, Thompson.....149–56; disc. 156 1940
Generators, A New Automatic Load Control for Turbine. Ruud, Farnham.....1337–42; disc. 1342 1949
Generators, A New Loss-of-Excitation Relay for Synchronous. Mason.....1240–5 1949
Generators, A Semiempirical Approach to Voltage Dip—with Suddenly Applied Loads on A-C. Rosenberg.....160–6; disc. 166 1949
Generators, Aids to Quality Control in the Manufacture of Aircraft. Potter.....525–9; disc. 1358 1944
Generators, An Integrated Control System for Aircraft D-C. McClinton.....94–8 1947
Generators, Analysis and Redesign of a Carbon Pile Voltage Regulator for Aircraft. Kouwenhoven, Thaler.....1197–1202; disc. 1202 1948
Generators and Batteries for Aircraft, Basic Considerations in the Selection of. Cobb, Winters.....889–93; disc. 1494 1944
Generators and Transformers, The Service Factor Rating of Arc-Welding Freeman, Welch..137–41; disc. 726 1941
Generators and Transformers with Bonneville Power Administration Transmission System, Matching Electrical Characteristics of McNary. Hoard, Weiner.....1022–5; disc. 1026 1949
Generators, Application and Performance of Electronic Exciters for Large A-C. Langstaff, Vaughan, Lawrence.....246–53; disc. 515 1946
Generators, Automatic Load Control for Turbine. Crever, Jackson.....656–60 1945
Generators, Blast-Tube Cooling for Aircraft. Veinott..520–5; disc. 1463 1944
Generators by Means of the Electrical-Mechanical Analogy, Determination of Transient Shaft Torques in Turbine. McCann, Warren, Criner.....51–6; disc. 492 1945
Generators by Test, Determination of Short-Circuit Torques in Turbine. Whitney, Criner..885–9; disc. 1195 1940
Generators, Design Considerations for D-C Aircraft. Miner.....1234–40; disc. 1459 1944

Generators During Short Circuits and Synchronising, Transient Electrical Torques of Turbine. Kirschbaum. ....65–70; disc. 492 1945
Generators for Diesel-Electric Switcher Locomotives, Design Features of. Atwell....41–5; disc. 433 1944
Generators for Testing Lightning Arresters, Modern Impulse. Brownlee....539–44; disc. 984 1942
Generators for Use in Aircraft, Design Relationships for D-C. Bergman. ....613–16; disc. 957 1943
Generators, Hydrogen-Cooled Turbine. Ross, Sterrett....11–16; disc. 16 1940
Generators in Multiengine Aircraft, Paralleling and Regulation of 24-28-Volt D-C. Siegal, DeCourcey.... ....854–7 1944
Generators in the Field, Progress Report of D-C Testing of. Davis, Leftwich....14–18; disc. 470 1942
Generators, Industrial Applications of Amplidyne. Shoults, Edwards, Crever....944–9; disc. 1136 1940
Generators, Liquid Cooling of A-C Turbine. Fechheimer.... ....553–61; disc. 561 1947
Generators, Loss-of-Field Protection for. Crossman, Lindemuth, Webb.... ....261–6; disc. 462 1942
Generators, Main Exciter Rototrol Excitation for Turbine. Lynn, Valentine....535–8; disc. 539 1948
Generators, Modern Bearing Practice for Vertical Water Wheel. Laffoon, Baudry....363–9; disc. 369 1947
Generators on Load Analysis, Effects of Thermal Characteristics of Aircraft. Rogers....819–24 1946
Generators on Naval Vessels to Supply Shore Power, Use of Propulsion. Anderson, Fifer.... ....1282–7; disc. 1287 1948
Generators, Parallel Operation of Main-Engine-Driven 400-Cycle Aircraft. Levoy....811–16; disc. 987 1945
Generators, Pole-Face Loss in Solid-Rotor Turbine. Kuyper.... ....827–34; disc. 925 1943
Generators Produced by Transmission-Line Reclosing, Transient Shaft Torques in Turbine. Batchelor, Whitehead, Williams.... ....159–64; disc. 164 1948
Generators, Progress Report on AIEE-ASME Standard Large 3,000-RPM Turbine. Mortensen, McClure, Laffoon....674–5; disc. 675 1948
Generators, Resynchronising of. Concordia, Temoshok....1512–18 1947
Generators, Solid Short Circuit of D-C Motors and. Linville, Ward.... ....119–23; disc. 123 1949
Generators, Special Problems of Two-Pole Turbine. Laffoon, Rose.... ....30–3; disc. 33 1940
Generators, Speed Governing Design Considerations for Multivalve Condensing Steam Turbine-. Barnett. ....1557–61; disc. 1561 1948
Generators, Steady-State Analysis of Aircraft D-C. Van Valkenburg, Matthews....1351–8 1948
Generators Supplying a Rectifier Load, Operation of Nonsalient-Pole Type. Ross, Batchelor..667–70; disc. 959 1943
Generators Supplying Long Transmission Lines, Excitation Problems in Hydroelectric. Killgore.... ....1277–82; disc. 1282 1947
Generators, Suppression of Magnetic Vibration and Noise of Two-Pole Turbine. Penniman, Taylor.... ....283–8; disc. 745 1941
Generators, Testing Aircraft. Keneipp. 105–09 1944
Generators, The Application of Voltage Regulators to Aircraft. Thompson, Crever....363–5 1942
Generators, The Design Characteristics of Amplidyne. Fisher.... ....939–44; disc. 1135 1940
Generators, The Development of Modern Excitation Systems for Synchronous Condensers and. Porter, Kinghorn....1020–7; disc. 1156 1946
Generators, The Short-Circuit Characteristics of D-C. Frost.... ....394–402; disc. 484 1946
Generators to Relieve Power-Supply Systems of Steel-Mill Load Swings, Automatic Regulation of Turbine. Eberhardt, Harrison, Kohn, Darling....751–8 1945
Generators, Transient Characteristics of D-C Motors and. McClinton, Brancato, Panoff....1100–06 1949
Generators, Transients in A-C Motors and. Smith....61–9 1946
Generators Under System Load Conditions, Determining Incremental Regulation and Dead Band of Governors on Steam Turbine. Tornquist, Wade....1343–7 1949
Generators, Use of Dielectric-Absorption Tests in Drying Out Large. Marcroft....56–60; disc. 415 1945
Generators With Suddenly Applied Loads, Regulation of A-C. Harder, Cheek....310–18; disc. 490 1944
Geometric Loci of the Synchronous Tie, The. Finsi, Wellard....168–71 1949
Geometric Mean Distances for Rectangular Conductors. Dwight.536–8 1946
Geometric Mean Distances, Theory and Application of Complex Logarithmic and. Higgins....12–16 1947
Geometry of Arc Interruption, The. Current-Zero Phenomena. Boehne: Part I....524–32; disc. 675 1941
Part II....375–87; disc. 447 1944
Geometry of General Transmission Systems, Power. Altar.... ....312–17; disc. 493 1945
German Electrical Utility Industry During World War II, The. Noest. ....1037–47; disc. 1047 1947
Glass—an Engineering Viewpoint, The Dielectric Strength of. Shand.... ....814–18; disc. 1331 1941
Glass—An Inorganic Insulation, Fiber. Atkinson....277–82; disc. 283 1939
Glass-Bulb Mercury-Arc Rectifiers for Traction Service. Woolgar.... ....843–6; disc. 1383 1941
Glass-Fiber Magnet-Wire Insulation, Asbestos and. Mathes, Stewart.. ....290–4 1939
Glow Lamps, Some Characteristics and Applications of Negative-. Ferree. ....8–12; disc. 622 1941
Glow-Switch, Development of the. Hays....223–6; disc. 723 1941
Glow-to-Arc Transition Importance of Gas in Electrodes for the. Maxfield, Hegbar, Eaton.... ....816–21; disc. 1095 1940
Golden Gate Exposition, Color, Light, and Structure at. (a 16-page insert) facing page 746.... 1940
Golden Gate International Exposition With Light, Painting the. Dickerson, Mahan....738–46 1940
Governing Design Considerations for Multivalve Condensing Steam Turbine-Generators, Speed. Barnett....1557–61; disc. 1561 1948
Governing—the Problem, Power System. Dougherty, Hayward, Monteith, Griscom...547–58; disc. 731 1941
Governor, A Carbon-Pile Speed. Button....4–7 1946
Governor, An Electrical. Morgan.... ....80–4 1941
Governor Characteristics on Power-System Frequency Variations and Tie-Line Power Swings, Effect of Prime-Mover Speed. Concordia, Crary, Parker....559–67; disc. 733 1941
Governor for Variable-Ratio Transmission Used in Developmental 400-Cycle Electric System for Large Aircraft. Desch, Garr, Hutton... ....194–8 1946
Governor Performance Analyzer, A Turbine-. Osbon.... ....963–7; disc. 1401 1941 ....disc. 393 1942
Governor Performance on Electric Power Systems With Improved Instruments, Testing. Allen, Hess.. ....329–39; disc. 339 1947
Governor, Precise Turbine. Warren... ....571–4; disc. 574 1948
Governor Requirements for Aircraft Alternator Drives. Boice, Levoy. ....534–40; disc. 947 1945
Governor Sensitive to Frequency and Load, A Power-System. Curtis... ....89–92; disc. 731 1941
Governors and the AIEE-ASME Governor Performance Specification. Schwendner, Astley....1334–6 1949
Governors for Interconnected Systems, Prime-Mover Speed. Caughey, McClure....147–51; disc. 728 1941
Governors on Steam Turbine Generators Under System Load Conditions, Determining Incremental Regulation and Dead Band of. Tornquist, Wade....1343–7 1949
Governors, Supplementary Control of Prime-Mover Speed. Crary, McClure....209–14; disc. 395 1942
Gradients of Grouped Conductors, Relative Surface Voltage. Temoshok.. ....1583–9; disc. 1589 1948
Graduate Levels—a Challenge to Colleges of Engineering, Evening Courses at. Beach.... ....88–94; disc. 430 1942
Grand Coulee, An Analysis to Determine the Optimum Bussing Arrangements and Transmission Capabilities at. Hoard, Bills.... ....1259–64; disc. 1478 1944
Grand Coulee Power Development, The. Denton....899–910; disc. 911 1948
Grand Coulee Power, Irrigation Pumping with. Denton.... ....1362–8; disc. 1368 1948
Grand Coulee Power Plant, Development of the Transmission System From the. Hoard, Helwith.... ....1095–1100; disc. 1100 1948
Grand Coulee Power Plant, Development of the 230-Kv Ring Bus for. Holmdahl, Killgore.... ....1369–78; disc. 1378 1948
Grand Coulee Power Plant, Field Tests for Development of 10,000,000-Kva 230-Kv Oil Circuit Breakers for. Killgore, Clagett..271–83; disc. 283 1948
Grand Coulee 230-Kv Bus, 4,370,000-Kva Short-Circuit Tests on. Clagett, Leeds....729–35; disc. 1119 1946
Graphical Analysis of Control Systems. Evans....547–51 1948
Graphical Analysis of the Voltage and Current Wave Forms of Controlled Rectifier Circuits, A. Chin, Moyer. 501–08 1944
Graphical Determination of Transfer Function Loci for Servomechanism Components and Systems. Thomas, Easton....307–14; disc. 314 1949
Graphical Method for Estimating the Performance of Distance Relays During Faults and Power Swings. Warrington....608–20; disc. 620 1949
Graphical Method of Calculating Fault Currents on Rural Distribution Systems. Linder.... ....16–19; disc. 446 1945
Graphical Method of Computing Thermal Transients, Simplified. Narbutovskih....78–81; disc. 82 1947
Graphite, Arc-Back Testing of. Pakala. Cucullu....439–42 1947

Great Northern Railway Electrification, Comparative Operating Results of Steam, Diesel-Electric, and Electric Motive Power on the. Gaynor. ....231–4; disc. 234 1948

Grid Breakers for High-Voltage Service, Multiple. MacNeill, Hill. ....427–31; disc. 431 1939

Grid-Controlled Rectifiers and Inverters, Harmonics in the A-C Circuits of. Evans, Muller. ....861–8; disc. 869 1939

Grid-Controlled Rectifiers, Circuit Cushioning of Gas-Filled. Edwards, Smith....640–3; disc. 1131 1946

Grinding Circuit Feed Regulator, A New. Jones....1240–2 1947

Ground Fault-Detecting Relay, A New Single-Phase-to-. Sonnemann. ....677–80; disc. 995 1942

Ground-Fault Neutralizer on a Regulated Distribution System, Operation of a. Tomlinson, Hunt. ....1321–6; disc. 1326 1949

Ground-Fault Neutralizer Systems, An Analysis of Transient and Sustained Voltages in. Farnham, Hunter, Peterson. ....1257–66; disc. 1394 1941

Ground-Fault Neutralizers, Report on Survey of Unbalanced Charging Currents on Transmission Lines as Affecting. (Committee Report).. ....1328; disc. 1329 1949

Ground Faults, The Effects of Mutual Induction Between Parallel Transmission Lines on Current Flow to. Holbeck, Lantz. ....712–15; disc. 1002 1943

Ground Preference in Carrier-Current Relay Schemes, The Functions of. Leyland, Goldsborough. ....97–100; disc. 437 1944

Ground Power for Aircraft. Blankenbuehler....1319–22; disc. 1322 1948

Ground Power Supply for Modern Aircraft. Owen, Murray, Rosenstein. 1296–1303 1947

Ground Protection for Radial Distribution Feeders, Sensitive. Hunt, Vivian....84–7; disc. 87 1940

Ground Protection for Transmission Lines and Distribution Feeders, Sensitive. Gross....968–71 1941

Ground Relay, A New Distance. Goldsborough..1442–6; disc. 1446 1948

Ground Relay Protection for Complex Distribution Circuits, Sensitive. Hunt....765–8; disc. 1180 1946

Ground-Relayed Distribution Circuits During Faults to Ground, Performance of. Gilkeson, Jeanne, Davenport....40–8; disc. 424 1942

Ground Relays, Operating Experience With Distance. Wolfe. ....458–62; disc. 1185 1946

Ground Tests on a Normally Ungrounded 13-Kv 3-Phase Bus, Arcing. Allen, Waldorf. ....298–306; disc. 498 1946

Ground Wires and Phase Conductors, The Effect of Corona on Coupling Factors Between. McCann. ....818–26; disc. 940 1943

Grounded-Primary Broken-Delta-Secondary Transformer Circuits, Criteria for Neutral Stability of Wye-. Shott, Peterson. ....997–1002; disc. 1394 1941

Grounding and Air-Break Switches for Protection of Transformer Stations, Automatic. Ricker. ....851–6; disc. 856 1949

Grounding Impedance, Correlation of System Overvoltages and System-. (Committee Report). ....17–24; disc. 383 1943

Grounding of Circuits on Self-Propelled Vehicles. Ewing..48–50; disc. 417 1945

Grounding of Instrument Transformer Secondary Circuits. (Committee Report).....419–20 1947

Grounding Practices on Power Systems, Present-Day. (Committee Report).....1525–48; disc. 1548 1947

Grounds, Impulse and 60-Cycle Characteristics of Driven:
Part I. Bellaschi..123–8; disc. 717 1941
Part II. Bellaschi, Armington, Snowden.....349–63; disc. 446 1942
Part III. Bellaschi & Armington... ....334–45; disc. 396 1943

Groups, Wave Shape of 30- and 60-Phase Rectifier. Marti, Taylor... ....218–24; disc. 224 1940

Growing Crystals of Ethylene Diamine Tartrate. Walker, Kohman. ....565–70; disc. 570 1948

Guide for Wartime Conductor Temperatures for Power Cables in Service. (Committee Report). ....606–10; disc. 942 1943

Guides for Operation of Transformers, Regulators, and Reactors. (Committee Report). ....797–806; disc. 957 1945

Guides for Overloading Transformers and Voltage Regulators, Interim Report on. (Committee Report) ....692–4; disc. 1063 1942

Gun Charging, All-Electric. Rohn.1–4 1946

Gun Turrets for Aircraft, Electric. Thompson....799–802; disc. 1475 1944

Gun Turrets for Aircraft, The Amplidyne Generator Applied to Speed-Controlled Electric. Zahorsky... ....221–5; disc. 436 1945

Gyroscope Testing, A Tachometer-Accelerometer-Vibrometer for Instrument-. Laurenson, Long. ....593–6; disc. 960 1945

Gyroscopes, Damping Cylinders for Aircraft. Sias, Wright.....979–85 1944

Gyroscopes for Aircraft, Electrically Driven. Witherow, Hansen. 204–08 1944

Gyroscopic Instruments, Electrically Operated. Konet.....735–8 1944

Gyrosyn Compass, The. Esval. ....857–60; disc. 1502 1944

H

Halides, Treatment of High-Altitude Brushes by Application of Metallic. Elsey.....576–9 1945

Handling Suburban Traffic on Steam Railroads. Sloman.....1670–4 1948

Hanford Plutonium Plant, Power System Development for Service to. Hoard, Curtin.....773–8 1946

Hardware for Tidd 500-Kv Test Lines, Insulators and Line. Gross, McCoy, Sheadel. ....1592–1602; disc. 1602 1947

Harmonic Analyzer, A New Fourier Coefficient. Charp. ....644–9; disc. 649 1949

Harmonic-Current-Restrained Relays for Transformer Differential Protection. Hayward. ....377–82; disc. 622 1941

Harmonic Radiation and Good Frequency Stability, FCC Diathermy Design for Low. Chapin, Roberts, Mobley.....42–6; disc. 46 1948

Harmonic Theory of Noise in Induction Motors. Morrill. ....474–80; disc. 1148 1940

Harmonic Voltages—Methods of Calculation and Control by Capacitors, System Lower-. Feaster, Harder.. ....1060–6; disc. 1310 1941

Harmonics and Load Balance of Multiphase Rectifiers. Evans. ....182–7; disc. 400 1943

Harmonics and the Equivalent Circuit of the Induction Motor, Leakage Reactance of the Squirrel Cage Rotor With Respect to the Stator. Liwschits.....1407–08 1947

Harmonics, Differential Leakage With Respect to the Fundamental Wave and to the. Liwschits....1139–50 1944

Harmonics in Induction Motors, Field. Liwschits.....797–803 1942

Harmonics in the A-C Circuits of Grid-Controlled Rectifiers and Inverters. Evans, Muller...861–8; disc. 869 1939

Harmonics of a Fractional-Slot Winding, Distribution Factors and Pitch Factors of the. Liwschits. ....664–6; disc. 926 1943

Haulage, Modern Electric Locomotives in Open-Pit Mine. Borland, Riley. ....52–8; disc. 433 1944

Haulage System, Electrification of an Ore. Corfield. 1155–61 1948

Hazard Eliminated in High-Voltage Oil Circuit Breakers, Switching Overvoltage. Hunt, Boehne, Peterson .....98–100; disc. 418 1943

Hazards of Static Electricity in Hospital Operating Rooms. Williams. ....1146–7; disc. 1147 1947

Head Design, A New Wire Recorder. Long.....216–20; disc. 495 1946

Head for Magnetic Recorders Providing Intense High-Frequency Fields, A Turn-In-Gap Erase. Wiegand, Zenner.....507–10 1948

Hearing-Aid Design, Fundamentals of. Penn.....744–9 1944

Heat—A Full-Fledged Industrial Tool, Radiant. Goodell.....464–71 1941

Heat, and Moisture, Motor Insulation. McAuley.....707–12 1942

Heat-Flow Effects in a Resistance-Type Thermometer. Millar.....678–85 1945

Heat Flow Ratio as a Design Parameter in Thermal Demand Meters. Nelson.....885–90; disc. 890 1949

Heat Pump From the Utility's Point of View, The. Andrews.....562–4 1948

Heat Pump—Its Significance as a Potential Residential Electric Load, The. Bary.....1–8 1949

Heat Pumps for Heating Homes, Possibilities of. Berry.619–22; disc. 1433 1944

Heat Run Data, Prediction of Ultimate Temperature Rise from Early. Ryan.....1164–6 1949

Heated Clothing, Electrically. Wotring.....1304–13 1944

Heating and Air Conditioning, Electrothermal Space. Krueger. ....718–22; disc. 1434 1944

Heating by Induction, Surface. Storm. 749–55 1944

Heating Circuits, Capacitors for High-Frequency Induction-. Clark, Scoville.....791–6; disc. 995 1945

Heating Coils for Cylindrical Magnetic Loads, Design of Induction. Vaughan, Williamson. ....887–92; disc. 1165 1946

Heating Coils for Cylindrical Nonmagnetic Loads, Design of Induction-. Vaughan, Williamson. ....587–92; disc. 965 1945

Heating Equipment, Measurement of Interference From Radio-Frequency. Brown 1102–06 1948

Heating Equipment, Reduction of Interference from Radio-Frequency Klingaman.....718–24; disc. 724 1949

Heating in Air or Conduit, Current Rating of Cables as Affected by Mutual. (IPCEA Committee Report) .....354–65; disc. 424, 1352 1944

Heating in Industry, Application of Vacuum-Tube Oscillators to Inductive and Dielectric. Jordan... .....831–4 1942

Heating, Induction and Dielectric. Scott.....885–92; disc. 892 1948

Heating, Industrial Electric Resistance. Hynes....1359–61 1948
Heating, Load-Calculation Procedure for Electric-Panel Space. Raber, Hutchinson...1085–91; disc. 1432 1944
Heating, Low Reactance Flexible Cable for Induction. Zucker.....848–52 1946
Heating of a D-C Armature. Fechheimer.....920–6; disc. 1210 1940
Heating of Long Cylindrical Charges, Induction. Storm.....369–77 1946
Heating of Metals, Mercury-Arc Frequency Converter for Induction. Durand, Rice.....1592–9 1948
Heating of Moving Magnetic Strip, Induction. Baker.....184–9 1945
Heating of Nonmagnetic Electric Conductors by Magnetic Induction—Longitudinal Flux. Baker..273–8 1944
Heating of Radio-Frequency Cables. Macalpine.....283–8 1949
Heating of Shunt-Motor Starting Resistors, Industrial Control: Leland, Rader.....695–9; disc. 961 1945
Heating of Transformers Under Short-Circuit Conditions. Montsinger, Halsey.....947–52; disc. 952 1949
Heating of Transmission Line Clamps, Magnetic. Crabb, Sheadel..1032–5 1949
Heating Problems, Vacuum-Tube Radio-Frequency Generator—Characteristics and Application to Induction-. Kinn.....1290–1303; disc. 1500 1944
Heating—Selection of Frequency, Induction. Stansel.755–9; disc. 1436 1944
Heating, Some Economic Aspects of Radio-Frequency. Duryee..105–12 1948
Heating—The Measurement of Loss Under Rising Temperature, Dielectric. Whitehead.....947–9 1947
Heating, The Role of Frequency in Industrial Dielectric. Scott..558–62 1945
Heating to Deicing of Aircraft Propellers, Development and Application of Electric. Sheets, Sand..1068–72 1949
Heaviside's Operational Calculus Based on the Generalised Functions of Schwartz, A Derivation of. Smith, Alger....939–44; disc. 944 1949
Heavy-Duty High-Speed 138-Kv Circuit Breakers—Oil and Air-Blast, Field Tests and Performance of. Sporn, St. Clair..401–10; disc. 463 1945
Heterodyne Modulation to Wide-Band Frequency-Modulated Television Relays, The Application of. Boothroyd.....1126–30 1947
High-Altitude Brush Problem. Ramadanoff, Glass...825–30; disc. 1489 1944
High-Altitude Brushes by Application of Metallic Halides, Treatment of. Elsey.....576–9 1945
High-Altitude Conditions, Potential Breakdown of Small Gaps Under Simulated. DeLerno.....109–12; disc. 456 1944
High-Altitude Flashover and Corona Correction on Small Ceramic Bushings. Pendleton.....1324–30 1947
High-Altitude Testing of Aircraft Ignition Cables and Connectors, Simulated-. Race, Ross.....20–6 1945
High Altitudes in Colorado, Lightning Investigation at. Robertson, Lewis, Foust....201–08; disc. 453 1942
High Altitudes, Investigation of Porcelain Insulators at. Fields, Cadwell.....656–60 1946
High-Capacity Air-Blast Circuit Breakers, Design and Construction of. Strang, Boisseau.....522–7; disc. 1131 1940
High-Capacity Air-Blast Station-Type Circuit Breakers, Field Tests on. Strang, Skeats...100–04; disc. 409 1942
High-Capacity Air Breaker, A New. Ludwig, Grissinger.....414–18; disc. 418 1939
High-Capacity Circuit Breaker Testing Station. MacNeill, Batten.....49–53; disc. 406 1942
High-Capacity Generating Stations, A New Isolated-Phase Metal-Enclosed Bus Designed for. Wyman, Shores.....699–703; disc. 703 1948
High-Capacity High-Voltage Three-Cycle Oil Circuit Breaker, A. Byrd, Rietz.....160–3; disc. 463 1945
High-Capacity "Hydro-Blast" Circuit Breaker for Central-Station Service. Skeats, Saylor.....111–14; disc. 114 1940
High-Capacity Station Circuit Breakers, Field Tests on. Braley.....31–6; disc. 408 1942
High-Current Mercury-Arc Rectifiers, Phase Occurrence of Arc-Backs in. Pakala, Batten.....345–7 1940
High Frequencies and Under Changing Temperature, The Measurement of Dielectric Loss at. Whitehead. Rueggeberg.....520–4 1949
High-Frequency Capacitor, A New. Allison, Beverly.....915–16; disc. 1464 1944
High-Frequency Coaxial-Line Calculations. Race, Larrick....526–30 1942
High-Frequency Engineering, A New Postgraduate Course in Industry in. Stevenson, Ramo.....374–8; disc. 378 1940
High-Frequency Fields, A Turn-In-Gap Erase Head for Magnetic Recorders Providing Intense. Wiegand, Zenner.....507–10 1948
High-Frequency Ignition Circuits, Analysis of. Robinson....916–19 1944
High-Frequency Induction-Heating Circuits, Capacitors for. Clark, Scoville.....791–6; disc. 995 1945
High-Frequency Radio-Noise Elimination, Very. Owen.....949–54 1944
High-Frequency Resistance of Coils, Data on the. Witzig.....764–9 1947
High-Frequency Twin-Conductor Cable, Design Considerations of. Greenfield.....932–3 1945
High-Gain D-C Amplifier for Bio-electric Recording, A. Goldberg.60–4 1940
High-Interrupting-Capacity Fuse for Voltages Through 138 Kv, A New. Fahnoe.....630–5; disc. 937 1943
High Overcurrent Capacity, The Evolution of Standard Lines of Current Transformers for. Wentz.....658–62; disc. 1426 1944
High-Potential Testing Equipment for Quantity Production. Summers..289–92; disc. 756 1941
High-Power "De-ion" Air Circuit Breaker for Central-Station Service. Dickinson.....421–25; disc. 425 1939
High-Power Oilless Circuit Interrupter Using Water, A. Leeds.....85–8; disc. 625 1941
High Precision Dynamometer for Small Motor Measurements, A. Duff...1344–8; disc. 1348 1947
High-Pressure Gas As a Dielectric. Nonken.....1017–20; disc. 1405 1941
High-Pressure Gas-Filled Cable Impregnated with Extra-High-Viscosity Oil. Sticher, Doan, Atkinson, Meyerhoff.....336–45; disc. 345 1949
High-Pressure, Gas-Filled Cable Installation, Thermal Characteristics of a 120-Kv. Sanderson, Sticher, McGrath.....487–98; disc. 499 1948
High-Pressure Gas-Filled Cable, Low-, Medium-, and. Shanklin.....719–26; disc. 1021 1942
High-Pressure Gas-Filled Cable, 120-Kv. Faucett, Komives, Collins, Atkinson.....658–65; disc. 1021 1942
High-Pressure Oil-Filled Pipe Cable Installation at New Orleans, La., 115-Kv. Bullard, Pettee, Rhodes.....475–84; disc. 484 1948
High Pressure, The Electric Strength of Air at:
Part I. Skilling....161–5; disc. 165 1939
Part II. Skilling & Brenner.....112–15; disc. 677 1941
High Pressures, D-C Breakdown Strength of Air and of Freon in a Uniform Field at. Trump, Safford, Cloud.....132–5; disc. 676 1941
High-Resistance Soil on Consumers Power Company 140-Kv System, Study of Driven Rods and Counterpoise Wires in. Hemstreet, Lewis, Foust.....628–34; disc. 1000 1942
High Q Cavities at 10,000 Megacycles, Measurement of. Lange....161–6 1947
High Slip, Induction-Motor Characteristics at. Morgan, Brown, Schumer.....464–8; disc. 1208 1940
High-Speed Balanced-Current Relay, A New. Stewart..553–5; disc. 972 1943
High-Speed Circuit Breakers, Protection of Large D-C Machines by Means of. Housley, Jensen.....637–40; disc. 1428 1944
High-Speed Differential Protection, With Particular Reference to Offset Transient Currents, Current Transformers and Relays for. Wentz, Sonnemann.....481–8; disc. 1144 1940
High-Speed Differential Relay for Generator Protection, A. Sonnemann..608–12; disc. 1250 1940
High-Speed Induction Motors, Adjustable Frequency Control of. Heumann.....719–25 1947
High-Speed 138-Kv Air-Blast Circuit Breaker, Field Tests and Performance of a. Sporn, Strang.....1–6; disc. 412 1942
High-Speed 138-Kv Circuit Breakers—Oil and Air-Blast, Field Tests and Performance of Heavy-Duty. Sporn, St. Clair..401–10; disc. 463 1945
High-Speed Reclosing Breakers to Transmission Systems, Analysis of the Application of. Crary, Kennedy, Woodrow..339–48; disc. 423 1942
High-Speed Reclosing Circuit Breakers, Insulator Flashover Deionisation Times as a Factor in Applying. Boisseau, Wyman, Skeats.....1058–66; disc. 1066 1949
High-Speed Reclosing Oil Circuit Breaker, Tests of 230-Kv. Schwager.....784–8; disc. 1468 1944
High-Speed-Relaying Experience and Practice. (Committee Report)...588–91; disc. 591 1939
High-Speed Service, Developments in Current Collectors for. Langer...51–4 1947
High-Speed Single-Pole Reclosing. Trainor, Hobson, Muller.....81–7; disc. 422 1942
High-Speed Single-Pole Tripping and Reclosing, Relays and Breakers for. Goldsborough, Hill.....77–81; disc. 429 1942
High-Speed Switching and Utilization of Stored Energy, Factors Contributing to Improving Electric Service by Means of. Logan, Miles...1012–16; disc. 1408 1941
High-Speed Thermal Wattmeter, A New. Miller....37–40; disc. 633 1941
High-Speed Traction Motors, Advantages of. Atwell 508–10 1943
High-Speed Train Braking, A Unique Application of the Wheatstone Bridge to. Hines.....360–2 1948
High-Speed Trains With Particular Reference to Their Electrical Features. Electropneumatic Brakes for. McCune.....137–42 1942
High-Speed Turbogenerators, Some Factors in the Mechanical Design of. Mortensen, Ryan.....51–6; disc. 56 1940

High-Speed Voice-Frequency Carrier Telegraph System. Bramhall . . . . . 873–9; disc. 1132 1940

High Temperature, Aging Characteristics of Dry-Type Transformer Insulation at. Stewart, Whitman . . . . . 1600–06; disc. 1607 1948

High-Temperature Induction Motors, Rating of. Alger, Jones . . . . . 300–02; disc. 458 1945

High-Temperature Railway Motor, Investigation of Silicone Insulation on. Grant, Kauppi, Moses . . . . . 305–10; disc. 310 1947

High Vacuum Leak Testing With the Mass Spectrometer. Worcester, Doughty . . 946–55; disc. 1170 1946

High Voltage, A Portable Instrument for Measuring Insulation Resistance at. Atkinson, Taylor . . . . . 164–7; disc. 428 1945

High-Voltage Apparatus, Gaseous Insulation for. Camilli, Chapman . . . . . 1463–9; disc. 1469 1947

High-Voltage Axial Air-Blast Circuit Breakers, Design and Operation of. Leuthold . . . . . 869–75; disc. 1073 1942

High-Voltage Bushing Design for High Altitudes, A Small. Vogel, Hart 761–4 1949

High-Voltage Bushings Designed to Meet Modern Service. Brandt, Rorden . . . . . 255–60; disc. 696 1941

High-Voltage Cable Joints, A Theoretical and Practical Approach to the Design of. Short . . . . . 1275–80; disc. 1280 1949

High-Voltage Cables Installed in Underground Subway Systems, Economical Loading of. Thomas . . . . . 611–15; disc. 615 1939

High-Voltage Compressed-Gas Power Transformers. Hobart . . . . . 690–2; disc. 1448 1944

High-Voltage Condenser Bushings for Circuit Breakers and Transformers, Oil-Impregnated-Paper. Lingal, Cole, Watts . . . . . 269–75; disc. 439 1943

High-Voltage Corona, Radio Influence from. Slemon . . . . . 198–204; disc. 204 1949

High-Voltage Dielectric Liquids, Water Solution in. Clark . . . . . 433–41; disc. 1192 1940

High-Voltage D-C Flashover of Solid Insulators in Compressed Nitrogen. Trump, Andrias . . . . . 986–90; disc. 1393 1941

High-Voltage D-C Point Discharges. Starr 356–62 1941

High Voltage D-C Testing of Rubber Insulated Wire. Eddy, Fenn . . . . . 576–8; disc. 1126 1946

High-Voltage Fault-Arc Paths, Deionization Time of. Harrington, Starr . . . . . 997–1003; disc. 1003 1949

High-Voltage Fusing of Transformer Banks. Marsh, Dodds . . . . . 533–5; disc. 977 1942

High-Voltage Ignition Cable Design for Aircraft. Wermine . . . . . 716–19; disc. 993 1943

High Voltage Ignition Rectifiers and Inverters for Railroad Service. Boyer, Hagensick 463–70 1946

High-Voltage Insulation, The Detection of Initial Failure in. Whitehead, Shaw . . . . . 267–72; disc. 761 1941

High-Voltage Lines and Design Features of Tidd 500-Kv Test Lines, Corona Considerations on. Wagner, Wagner, Peterson, Gross . . . . . 1583–90; disc. 1590 1947

High-Voltage Lines, The "Linascope"—An Echo-Ranging Type Fault Locator for. Leslie, Kidd . . . . . 1162–6; disc. 1166 1948

High-Voltage Oil Circuit Breakers, A Multiorifice Interrupter for. Ludwig, Leeds . . . . . 119–25; disc. 437 1943

High-Voltage Oil Circuit Breakers for Rapid Reclosing Duty. Hill, Leeds . . . . . 113–18; disc. 452 1944

High-Voltage Oil Circuit Breakers, Switching Overvoltage Hazard Eliminated in. Hunt, Boehne, Peterson . . . . . 98–100; disc. 418 1943

High-Voltage Outdoor Tank-Type Oil Circuit Breakers, A New Line of. Skeats, Rietz . . . . 224–31; disc. 502 1946

High-Voltage Phenomena, Radio-Frequency. Alford, Pickles . . . . . 129–36; disc. 136 1940

High-Voltage Power Transformer Design. Mallett:
Part I . . . . . 526–31; disc. 966 1943
Part II . . . . . 1086–91; disc. 1091 1947

High-Voltage Secondary Winding, Oscillations of a. Boyajian . . 1010–20 1946

High-Voltage Service, A Conserved-Pressure Air-Blast Circuit Breaker for. Rankin, Bennett . . . . . 193–7; disc. 673 1941

High-Voltage Service, Multiple-Grid Breakers for. MacNeill, Hill . . . . . 427–31; disc. 431 1939

High-Voltage Switching, Protection of Stations Without. (Committee Report) . . . . . 226–31; disc. 231 1949

High-Voltage Test Lines, Switchgear Equipment for. Lane, Wyman . . . . . 1619–21; disc. 1621 1947

High-Voltage Testing of Oil Circuit Breakers, Dielectric Strength of Oil for. Lingal, Skeats, Braley . 903–06 1941

High-Voltage Testing, Recommendations for. (Committee Report) . . . . . 598–602; disc. 1207 1940

High Voltage, The Interruption of Charging Current at. Leeds, Van Sickle . . . . . 373–80; disc. 381 1947

High-Voltage Three-Cycle Oil Circuit Breaker, A High-Capacity. Byrd, Rietz . . . . . 160–3; disc. 463 1945

High-Voltage Transmission Lines, A Transient Fault Locator for. Spaulding, Diemond . . . . . 1005–1010; disc. 1010 1949

High-Voltage Transmission Lines, Five Years' Experience With Ultrahigh-Speed Reclosing of. Sporn, Muller . . . . . 241–6; disc. 690 1941

High-Voltage Transmission Lines, Experience With Ultrahigh-Speed Reclosing of. Sporn, Muller . . . . . 625–31; disc. 631 1939

High-Voltage Transmission Lines, Nine Years' Experience With Ultrahigh-Speed Reclosing of. Sporn, Muller . . . . . 225–8; disc. 445 1945

High-Voltage Transmission Lines, Switching. Johnson, Wilson . . . . . 1552–60; disc. 1560 1947

High Voltages, A Simple and Inexpensive Method for Accurately Measuring Steady-State and Transient. Levinton . . . . . 1304–10; disc. 1310 1947

High Voltages, Transmission of Electric Power at Extra. Sporn, Monteith . . . . . 1571–7; disc. 1577 1947

Higher Voltage Copper-Oxide Rectifiers. Smith 220–2 1947

Higher-Voltage D-C Aircraft Electric Systems. Berry, Dallas . . . . . 843–9; disc. 1497 1944

Highway Lighting Circuits, Inductive Coordination With Series Sodium. Kent, Blye . . . . . 325–32; disc. 332 1939

Hiperco-A Magnetic Alloy. Stanley, Yensen 714–8 1947

Historical Development of Electric Connectors. Neifing 925–8 1944

History and Development of the Electronic Power Converter. Alexanderson, Phillipi . . . 654–7; disc. 1413 1944

History of A-C Wave Form, Its Determination and Standardization. Bedell . . . . . 864–8; disc. 1071 1942

Hoist Control, Dynamic Lowering D-C. Pettit . . . . . 1576–80; disc. 1581 1948

Hoist Drive for Cranes, A New Electric. Whiting 59–64 1944

Hoists, A Thrustor Lowering Control System for A-C Crane. Schwarz-Kast . . . . . 139–44; disc. 144 1947

Hollow Pipes of Relatively Small Dimensions. Barrow, Schaevitz 119–22 1941

Homes, Possibilities of Heat Pumps for Heating. Berry . . . . . 619–22; disc. 1433 1944

Horizons, Aircraft Electrical, Godsey, Berry, Holliday . . 821–4; disc. 1503 1944

Horn Design, Electromagnetic. Chu, Barrow 333–8 1939

Horsepower A-C Stator Windings, The Application of Surge Comparison Testing Equipment to Fractional. Buchanan 1356–8 1947

Horsepower Applied to Aeronautical Research, 150,000. White 833–9 1946

Horsepower Diesel-Electric Locomotive for the Seaboard Air Line Railway, A 3,000. Staples, Waybrew, Atwell 215–19 1947

Horsepower Gas Turbine Power Plant, A 3,000-. Haverstick 458–60 1949

Horsepower Motor Standards; Their Effect on Refrigeration and Pump Applications, New NEMA Fractional-. Potter 508–10 1947

Horsepower Motors, Investigation of Hot-Spot Temperatures in Fractional-. Hirsch, Munier, Schmidt, Wightman, Himebrook, Lloyd, Coffman, Potter . . 128–36; disc. 421 1945

Horsepower Motors, Investigation of Hot-Spot Temperatures in Integral. Hildebrand, Cain, Phillips, Hough, Rosswog, Potter . . . . . 124–8; disc. 421 1945

Horsepower Motors, Some Problems in the Standardization of Temperature Ratings of Fractional-. Veinott . . . . . 1055–61; disc. 1218 1940

Horsepower Output of Polyphase Induction Motors, The. Robinson 770–5 1947

Horsepower Ratings, The Hysteresis Motor—Advances Which Permit Economical Fractional. Roters . . . . . 1419–30; disc. 1430 1947

Hospital Operating Rooms, Hazards of Static Electricity in. Williams . . . . . 1146–7; disc. 1147 1947

Hot-Line Insulator Washing, Tests and Developments in Connection With. Hill 1203–16 1947

Hot-Spot Temperatures, Emergency Overloading of Air-Cooled Oil-Immersed Power Transformers by. Montsinger, Ketchum . . . . . 906–16; disc. 993 1942

Hot-Spot Temperatures in Dry-Type Transformer Windings. Stewart, Whitman . . . . . 763–8; disc. 1445 1944

Hot-Spot Temperatures in Fractional-Horsepower Motors, Investigation of. Hirsch, Munier, Schmidt, Wightman, Himebrook, Lloyd, Coffman, Potter . 128–36; disc. 421 1945

Hot-Spot Temperatures in Integral-Horsepower Motors, Investigation of. Hildebrand, Cain, Phillips, Hough, Rosswog, Potter . . . . . 124–8; disc. 421 1945

Hot-Spot Temperatures in Polyphase Induction Motors, Shutdown Versus. Potter, Frohardt . . . . . 56–8; disc. 483 1946

Hot-Spot Winding Temperatures in Self-Cooled Oil-Insulated Transformers. Vogel, Narbutovskih . . . . . 133–6; disc. 418 1942

Hot-Strip Rolling Mills, An X-Ray Thickness Gauge for. Clapp, Pohl 620–6 1948

Hours, A Precision Rotating Standard for the Measurement of Kilowatt. Goss, Hansen . . . 412–15; disc. 415 1940

Inductance of Rectangular Tubular Conductors, Formulas for the. Higgins.....1046–50; disc. 1409 1941
Inductance of 3-Conductor Shipyard Power Cables, Effective Resistance and. Summers.....1345–50 1948
Inductance When Iron Is Present, Some Aspects of. Rader, Litscher .....133–9; disc. 431 1944
Induction and Dielectric Heating. Scott. .....885–92; disc. 892 1948
Induction Between Parallel Transmission Lines on Current Flow to Ground Faults, The Effects of Mutual. Holbeck, Lants.....712–15; disc. 1002 1943
Induction, Co-ordination of Power and Communication Circuits for Low-Frequency. Coleman Trueblood..403–12; disc. 412 1940
Induction Frequency Changer, Suddenly Applied Loads Carried by a Variable-Ratio Synchronous. Darling, Kaufman 91–4 1948
Induction Generator Used With the All-Electric Automatic Pilot for Airplanes, An. Vickers.....182–5 1948
Induction-Heating Circuits, Capacitors for High-Frequency. Clark, Scoville.. .....791–6; disc. 995 1945
Induction Heating Coils for Cylindrical Magnetic Loads, Design of Vaughan, Williamson .....887–92; disc. 1165 1946
Induction-Heating Coils for Cylindrical Nonmagnetic Loads, Design of. Vaughan, Williamson.....587–92; disc. 965 1945
Induction Heating, Low Reactance Flexible Cable for. Zucker.848–52 1946
Induction Heating of Long Cylindrical Charges. Storm.....369–77 1946
Induction Heating of Metals, Mercury-Arc Frequency Converter for. Durand, Rice 1592–9 1948
Induction Heating of Moving Magnetic Strip. Baker.....184–9 1945
Induction-Heating Problems, Vacuum-Tube Radio-Frequency Generator —Characteristics and Application to. Kinn.....1290–1303; disc. 1500 1944
Induction Heating—Selection of Frequency. Stansel.....755–9; disc. 1436 1944
Induction—Longitudinal Flux, Heating of Nonmagnetic Electric Conductors by Magnetic. Baker ..273–8 1944
Induction Machines, Reverse-Rotation Test for the Determination of Stray Load Loss in. Morgan, Brown, Schumer .....319–22; disc. 322 1939
Induction Machines, Steady-State Equivalent Circuits of Synchronous and. Kron.....175–81 1948
Induction-Motor Characteristics at High Slip. Morgan, Brown, Schumer .....464–8; disc. 1208 1940
Induction-Motor Design to Meet Fixed Specifications, Some Aspects of Electric-Motor Design—Polyphase. Lloyd.....14–20; disc. 498 1944
Induction Motor, Dynamic Characteristics of a Single-Phase. Kurts.....801–06; disc. 1096 1940
Induction Motor, Leakage Reactance of the Squirrel Cage Rotor With Respect to the Stator Harmonics and the Equivalent Circuit of the. Liwschits.....1407–08 1947
Induction-Motor Manufacture, Critical-Material Conservation in. Hobart. .....549–52; disc. 927 1943
Induction-Motor Performance, An Application of Deceleration Test Methods to the Determination of. Ager.....72–6 1939
Induction-Motor Performance Calculation, Single-Phase. Himebrook... .....55–8; disc. 666 1941
Induction Motor, Precision Speed Control for World's Largest. Longwell, Reagan.....634–8; disc. 1050 1942
Induction Motor, Symmetrical Components as Applied to the Single Phase. Suhr.....651–6; disc. 958 1945
Induction-Motor Windings and Cores, Wound and Dummy-Rotor Methods of Quality Control and Trouble Shooting of. Trickey.....842–4; disc. 998 1945
Induction Motors, Adjustable Frequency Control of High-Speed. Heumann 719–25 1947
Induction Motors, Application of Capacitors for Power-Factor Improvement of. Bloomquist, Boice. 274–8 1945
Induction Motors, Design of Auxiliary Circuits of Single-Phase. Thacker, Gopalakrishna.....1373–9 1949
Induction Motors, Determination of Temperature Rise of. Summers..459–67; disc. 472 1939
Induction Motors, Die-Cast Rotors for. Packer.....253–60; disc. 260 1949
Induction Motors During Single-Phase Operation, Overvoltages in Polyphase. Macmillan, Carter.....819–23; disc. 1328 1941
Induction Motors, Electromechanical Transient Performance of. Weygandt, Charp..1000–09; disc. 1167 1946
Induction Motors, Field Harmonics in. Liwschits.....797–803 1942
Induction Motors, General Theory of Multiple Cage. Chang...1139–43 1949
Induction Motors, Harmonic Theory of Noise in. Morrill.....474–80; disc. 1148 1940
Induction Motors, Measurement of Stray-Load Loss in. Ware.....194–7; disc. 433 1945
Induction Motors, Measurement of Temperature in General-Purpose Squirrel-Cage. Potter.....468–72; disc. 472 1939
Induction Motors, or S. F. Test, The "Superimposed Frequency Test." Romeira.....952–3; disc. 953 1948
Induction Motors, Rating of General-Purpose. Alger, Johnson.....445–56; disc. 456 1939
Induction Motors, Rating of High-Temperature. Alger, Jones.....300–02; disc. 458 1945
Induction Motors, Reactances of Squirrel-Cage. Lloyd, Giusti, Chang. 1349–55 1947
Induction Motors, Rotor-Bar Currents in Squirrel-Cage. Gault.....784–91; disc. 1327 1941
Induction Motors, Self-Excitation of. Wagner.....47–51 1939
Induction Motors, Shutdown Versus Hot-Spot Temperatures in Polyphase. Potter, Frohardt.....56–8; disc. 483 1946
Induction Motors, Some Phases of Calculation of Leakage Reactance of. Liwschits, Formhals.....1409–12; disc. 1412 1947
Induction Motors, Starting Windings for Single-Phase. Veinott.....288–94; disc. 499 1944
Induction Motors, The Asymmetrical Stator as a Means of Starting Single-Phase. Baum.....245–50; disc. 496 1944
Induction Motors, The Calculation of Unbalanced Magnetic Pull in Synchronous and. Robinson.....620–24; disc. 924 1943
Induction Motors, The Horsepower Output of Polyphase. Robinson 770–5 1947
Induction Motors, The Liquid Rheostat for Speed Control of Wound Rotor. McFarland, Alvares.....603–09; disc. 609 1948
Induction Motors, The Use of Auxiliary Impedances in the Single-Phase Operation of Polyphase. Ager.....494–9; disc. 660 1941
Inductance Motors to Aircraft, Some Aspects of the Application of. Braun.....769–72; disc. 1476 1944
Induction Motors to Chippers, The Application of Synchronous and. Baker, Lory.....1070–7 1947
Induction Motors, Transient Overspeeding of. Ager.....1030–2 1941
Induction Motors, Transient Performance of. Maginniss, Schults.....641–6; disc. 1458 1944
Induction Motors, Transient Starting Torques in. Wahl, Kilgore.....603–07; disc. 1263 1940
Induction Motors With Series Capacitors, Self-Excitation of. Wagner.....1241–7; disc. 1391 1941
Induction Motors, With Special Reference to Plugging, Transient Torques in Squirrel-Cage. Gilfillan, Kaplan.....1200–09; disc. 1363 1941
Induction, Surface Heating by. Storm. 749–55 1944
Induction-Type Frequency Converters, Performance Calculation of. Latsko.....691–4 1948
Inductive and Dielectric Heating in Industry, Application of Vacuum-Tube Oscillators to. Jordan.....831–4 1942
Inductive and Generative Loads, Voltage and Current Relations for Controlled Rectification With. Puchlowski.....255–60; disc. 442 1945
Inductive Co-ordination Aspects of Rectifier Installations. (Committee Report).....417–36; disc. 1115 1946
Inductive Co-ordination of REA Distribution Systems and Telephone Systems. Plucknett, Smith, Taylor. .....586–95; disc. 723 1941
Inductive Co-ordination With Series Sodium Highway Lighting Circuits. Kent, Blye.....325–32; disc. 332 1939
Inductive Interference to Telegraph Systems, Control of. Milnor.....469–74; disc. 1134 1940
Inductors, Subharmonics in Circuits Containing Iron-Cored. Part II. Travis.....735–42 1939
(Part I—1938)
Industrial
An X-Ray Thickness Gauge for Hot-Strip Rolling Mills. Clapp, Pohl. 620–6 1948
Arcing Fault Currents in Low-Voltage A-C Circuits. Wagner, Fountain. .....166–72; disc. 172 1948
Dynamic Braking Control of D-C Series Motors—Experimental Study of Speed-Torque Curves. Heumann. 560–4 1949
Improvements in Rolling Mill Preset Screw-Down Controllers. Leitch, Schurr.....58–63 1948
Suddenly Applied Loads Carried by a Variable-Ratio Synchronous-Induction Frequency Changer. Darling, Kaufman 91–4 1948
The Heat Pump From the Utility's Point of View. Andrews....562–4 1948
The Liquid Rheostat for Speed Control of Wound Rotor Induction Motors. McFarland, Alvares.....603–09; disc. 609 1948
X-Ray Thickness Gauge for Cold-Rolled Strip Steel. Lundahl.83–90 1948
Industrial Application of Rototrol Regulators. Harris.....118–23 1946
Industrial Applications of Amplidyne Generators. Shoults, Edwards, Crever.....944–9; disc. 1136 1940
(Industrial Control) A Control System for Wind Tunnel Drives. Heidenreich.....1637–43; disc. 1643 1947

Industrial Control, Capacitor Relay Timing in. Stansbury, Jochem... 65–9; disc. 69 1940
Industrial-Control Coils, Insulation Temperature Standards for. Erikson... 546–8; disc. 1408 1944
Industrial Control Devices
A Balanced Amplifier Using Biased Saturable Core Reactors. Kirschbaum, Harder ... 273–8 1947
A Thrustor Lowering Control System for A-C Crane Hoists. Schwarz-Kast... 139–44; disc. 144 1947
An Electronic Drive for Windup Reels. Puchlowski... 585–91; disc. 1155 1946
Adjustable Frequency Control of High-Speed Induction Motors. Heumann... 719–25 1947
Control of Slip-Ring Motors by Means of Unbalanced Primary Voltages. Schmits... 1103–1112; disc. 1112 1947
Dynamic Braking by Self-Excitation of Squirrel-Cage Motor. Srinivasan, Thomas... 145–8 1947
Dynamic Braking Control of D-C Series Motors—Calculation of Stability Limit. Heumann, Smith... 454–7; disc. 1130 1946
Dynamic Braking of a Single D-C Series Motor. Leitch... 149–54 1947
Dynamic Braking of Two D-C Series Motors. Leitch... 787–91 1947
Electrical Accuracy of Selsyn Generator-Control Transformer System. Chestnut... 570–6; disc. 1118 1946
Electronic Control of Frequency Converter Sets for Testing Aircraft Models. Heumann, Strong... 931–9 1946
Electronic Register Control for Multicolor Printing. Cockrell ... 617–22; disc. 1117 1946
Fundamental Properties of the Vacuum Switch. Koller... 597–604; disc. 1141 1946
Rotating Stability Regulators for Synchronous Motor Drives. Schaelchlin... 884–7; disc. 887 1947
Shading Coil Calculations for Single-Phase Magnets. Evans ... 134–7; disc. 137 1947
Silicone-Resin-Treated Magnet Coils. Moses, Torok... 412–16; disc. 1184 1946
Some Fundamentals of a Theory of the Transductor or Magnetic Amplifier. Lamm... 1078–85 1947
Industrial Control: Dynamic Braking of a D-C Shunt Motor and Load. Leland, Rader... 472–6 1943
(Industrial Control) Dynamic Lowering D-C Hoist Control. Pettit... 1576–80; disc. 1581 1948
Industrial Control: Heating of Shunt-Motor Starting Resistors. Leland, Rader ... 695–9; disc. 961 1945
(Industrial Control) Prediction of Ultimate Temperature Rise from Early Heat Run Data. Ryan... 1164–6 1949
Industrial Control Problems, Application of Low Frequency to. Schmits... 1571–5; disc. 1575 1948
Industrial Control, Radar Technique in an. Cockrell... 269–72 1947
Industrial Control—Shunted-Armature Connection for a D-C Shunt Motor. Leland, Rader... 617–19; disc. 1410 1944
(Industrial Control) The Use of Air-Core Reactors as Fault Limiting Means on High Interrupting Capacity Controllers. Leitch ... 469–74; disc. 474 1949
Industrial Dielectric Heating, The Role of Frequency in. Scott ... 558–62 1945
Industrial Diesel-Electric Locomotives, Modern Electrical Equipment for. Greer... 229–32; disc. 400 1942
Industrial Distribution Systems: an Epitomisation of Available Data, The Design of Bus-Bar. Higgins... 385–400; disc. 486 1945
Industrial Distribution Systems, The Fundamentals of. Beeman, Kaufmann... 272–9; disc. 477 1942
Industrial Electric Resistance Heating. Hynes... 1359–61 1948
Industrial Plants Against Insulation Breakdown and Consequential Damages, Protection of. Vaughan. ... 592–6; disc. 1166 1946
Industrial Plants, Combined Light and Power Systems for. Beeman... 76–83 1946
Industrial Plants, Enclosed Bus-Bar Electrical Distribution Systems for. Carlson... 297–302; disc. 700 1941
Industrial Plants Prefer Diesel-Electric Switching Locomotives. Woods... 697–700 1949
Industrial Plants, Secondary Networks to Serve. Powel, Barnett... 154–6; disc. 698 1941
Industrial Power Applications
An Analysis of Motor Selection for Brass-Slab Rolling-Mill Service. Berkley... 185–9; disc. 189 1947
An Extension of Impact Speed-Drop Analysis. Crever... 191–6 1947
Electrification of the Cotton Industry in the South. Bobe... 201–08; disc. 208 1947
Power Distribution in Textile Plants. McConnell... 659–62 1947
Self-Excited Electromagnetic Drive for a Resonant Fatigue Machine. Willson... 1073–8 1946
Industrial Power Distribution Systems, Trends and Practices in Modern. Bloomquist... 872–9; disc. 879 1948
Industrial Tool, Radiant Heat—A Full-Fledged. Goodell... 464–71 1941
Industrial Tool, The Carbon Arc—a Valuable. Kalb... 581–5 1942
Industrial Tube, The Permatron—A Magnetically Controlled. Overbeck... 224–8; disc. 228 1939
Industry
Causes and Effects of Stray Electric Currents in Coal Mines. Harrison. ... 1759–61 1948
Electric Equipment for Cold Strip Reduction Mills. Miller... 133–9; disc. 139 1948
Electric Equipment for Power Shovels and Draglines. Schwedes, Stoetzel. ... 1498–1506; disc. 1507 1948
Electrical Developments in the Pulp and Paper Industry. Baker... 827–34; disc. 834 1948
Electronic Speed Regulators for Sectional Paper Machine Drive. Baker, Kovalsky... 1636–42 1948
Power Distribution and Utilisation in a Large Iron Ore Beneficiation Plant. Gettelman... 1726–32 1948
Selection of Electric Drives for Looms. Demartini, Lukens... 349–56 1949
The Bellingham Hydraulic Log Barker. Haner, Rose... 1068–74 1948
The Reversing Cycle of Modern Blooming Mills. Montgomery, Sellers... 1508–13; disc. 1513 1948
Industry, Application of Vacuum-Tube Oscillators to Inductive and Dielectric Heating in. Jordan.. 831–4 1942
Industry, Central Utility Power Service Versus Local Plant Generation in. Frampton... 880–3; disc. 884 1948
Industry During World War II, The German Electrical Utility. Noest. ... 1037–47; disc. 1047 1947
Industry, Electrical Progress in the Textile. Snyder... 863–70; disc. 870 1948
Industry, Ignitron Rectifiers in. Cox, Jones... 713–18; disc. 1065 1942
Industry, Ignitrons for the Transportation. Cox, Jones... 618–22; disc. 622 1939
Industry in High-Frequency Engineering, A New Postgraduate Course in. Stevenson, Ramo... 374–8; disc. 378 1940
Industry in the South, Electrification of the Cotton. Bobe... 201–08; disc. 208 1947
Industry, Mercury-Arc Rectifiers in the Coal-Mining. Renshaw... 242–4; disc. 244 1940
Industry, Trends in Electrification of American Steel. Umansky... 784–95 1948
Inertia Throat Microphones. Greibach, Pacent... 187–91 1947
Inexpensive Method for Accurately Measuring Steady-State and Transient High Voltages, A Simple and. Levinton... 1304–10; disc. 1310 1947
Influence from High-Voltage Corona, Radio. Slemon... 198–204; disc. 204 1949
Influence of Electricity on Aircraft Instrumentation. Savage... 802–05; disc. 1501 1944
Influence of Improved Magnetic Alloys on Design Trends of Electrical Instruments. Wilson, Whittenton. ... 100–04; disc. 461 1944
Influence of Magnetic Materials on the Welding Characteristics of Resistance Welding Machines. Riley, Smith... 852–60; disc. 1160 1946
Influence of Resistance on Switching Transients. VanSickle... 397–404; disc. 404 1939
Influence of the Concentration and Mobility of Ions on Dielectric Loss of Insulating Oils, The. Kang... 403–07; disc. 1132 1946
Influence of the Core Form Upon the Iron Losses of Transformers. Stein. ... 95–103; disc. 103 1948
Influence of Towers and Conductor Sag on Transmission-Line Shielding. Sorensen, McMaster... 159–65; disc. 448 1942
Influence of 230-Kv Lines, Radio-Noise. Rorden... 677–81; disc. 682 1947
Influence Voltage Generation, Commutation of D-C Machines and Its Effects on Radio. Motter... 491–5; disc. 495 1949
Information, A Method of Selecting Inherent Overheat Protectors Based Upon Motor Design. Vaughan... 1023–9; disc. 1030 1948
Inherent Errors in the Determination of Synchronous-Machine Reactances by Test. Concordia, Maginniss... 288–94; disc. 491 1945
Inherent Overheat Protectors Based Upon Motor Design Information, A Method of Selecting. Vaughan. ... 1023–9; disc. 1030 1948
Inherent Overheating Protection of D-C Aircraft Motors. Veinott... 920–5 1944
Inherent Overheating Protection of Single-Phase Motors, The. Potter... 993–6; disc. 1400 1941
Inherent-Overheating Protection Under Running Overload Conditions, Fundamental Theory of. Veinott, Schaefer... 266–70; disc. 270 1949
Initial Breakdown Voltages in Air, Calculation of. Ver Planck... 99–104 1941
Initial Conditions on Subharmonic Currents in a Nonlinear Series Circuit, The Effect of. Angello... 625–7 1942
Initial Failure in High-Voltage Insulation, The Detection of. Whitehead, Shaw... 267–72; disc. 761 1941
Inorganic Insulation, Fiber Glass—An. Atkinson... 277–82; disc. 283 1939

Inorganic Insulation, "Terratex"—A Thin Flexible. Walters.....123–7 1948
Inrush Currents and Influence on System Operation, Transformer Magnetising. Blume, Camilli, Farnham, Peterson...366–75; disc. 423 1944
Inrush Currents With Parallel Transformers Affect Differential Relaying, Prolonged. Hayward.....1096–1101; disc. 1305 1941
Instability in D-C Aircraft Systems. Bunce, Cunningham, Davidson.....786–91 1945
Installation, Alcoa Rectifier. Housley, Winograd.....1266–74; disc. 1409 1941
Installation at New Orleans, La., 115-Kv High-Pressure Oil-Filled Pipe Cable. Bullard, Pettee, Rhodes.....475–84; disc. 484 1948
Installation at Newport News, Capacitor. Parrack, Harder.....1165–73; disc. 1378 1944
Installation for Single-Phase Railway Service, Shunt Capacitor. Brown, Witske.....258–65; disc. 265 1948
Installation of 120-Kv Oil-Filled Cables in Canada, Design, Manufacture, and. Farnham, Titus.....881–9; disc. 1074 1942
Installation on Power Lines, Line Tuning Equipment Used With Coaxial Cable for Carrier Current. Sutton.....44–8; disc. 48 1949
Installation, Thermal Characteristics of a 120-Kv High-Pressure, Gas-Filled Cable. Sanderson, Sticher, McGrath.....487–98; disc. 499 1948
Installations, Electric Equipment for Large Electrochemical. Rhea, Zielinski.....733–41; disc. 1062 1942
Installations for Protection Against Magnetic Mines, Shipboard Degaussing. Michel.....1270–5; disc. 1275 1948
Installations in British Aircraft, Electric-Wiring. Horn.....896–900 1944
Installations in Canada, Some Air-Blast Circuit-Breaker. Haberl, Moore.....859–63; disc. 1073 1942
Installations, Inductive Co-ordination Aspects of Rectifier. (Committee Report).....417–36; disc. 1115 1946
Installations, Maintenance of Rectifiers on Electrochemical. Housley, Hughes.....436–41; disc. 1115 1946
Instantaneous Bus-Differential Protection Using Bushing Current Transformers. Seeley, von Roeschlaub.....1709–18; disc. 1718 1948
Instrument, A Unique Moving-Magnet Ratio. Sias, Fisk.....634–6; disc. 1420 1944
Instrument for Direct Current, A New Measuring. Faus, Corson.....683–6; disc. 1073 1940
Instrument for Direct Current, A New Moving-Magnet. Faus, Macintyre.....586–8; disc. 987 1942
Instrument for Measuring Insulation Resistance at High Voltage, A Portable. Atkinson, Taylor.....164–7; disc. 428 1945
Instrument for Recording Continuously the Salinity, Temperature, and Depth of Sea Water, An. Jacobson.....714–22 1948
Instrument for Recording Transient Phenomena, A New. Begun.....175–7; disc. 418 1942
Instrument for the Determination of Contact Making and Breaking Time, An. Richter, Elliot.....14–16; disc. 459 1943
Instrument for the Measurement of Large Alternating Currents, An. Richter.....38–40 1944
Instrument-Gyroscope Testing, A Tachometer — Accelerometer — Vibrometer for. Laurenson, Long.....593–6; disc. 960 1945
Instrument Having a General Circuit, Relation Between Electrical and Mechanical Parameters of a Permanent-Magnet Movable-Coil. Goodwin.....374–9 1948
Instrument Inaccuracies in Feed-Back Control Systems with Particular Reference to Backlash. Marcy, Yachter, Zauderer.....778–88 1949
Instrument Landing System at Indianapolis, The Development of the Civil Aeronautics Authority. Jackson, Alford, Byrne, Fischer.....849–58; disc. 1120 1940
Instrument Landing System, The CAA-MIT Microwave. Bowles, Barrow, Hall, Lewis, Kerr.....859–65; disc. 1120 1940
Instrument, Measuring Commutation with an Indicating. Lundy.....1380–2 1949
Instrument Mechanism, Applications of the Electrodynamic. Corson, Millar.....1131–6 1947
Instrument Mechanisms, A Bridge Method for Determining the Motional Characteristics of Permanent-Magnet Movable-Coil. Gilbert.....411–15 1948
Instrument Rotors, Basic Concepts of Moving-Magnet-. Mendelsohn.....529–34; disc. 947 1945
Instrument Servomechanisms, Damper Stabilized. Hall.....299–306; disc. 306 1949
Instrument Transformer Secondary Circuits, Grounding of. (Committee Report).....419–20 1947
Instrumentation and Measurement—Tidd 500-Kv Test Lines. Tremaine, Lippert.1624–30; disc. 1630 1947
Instrumentation for the Evaluation of the Stability of the Welding Arc. Winsor, Schetky, Wyant...525–33 1949
Instrumentation, Influence of Electricity on Aircraft. Savage.....802–05; disc. 1501 1944
Instrumentation of 400-Cycle Aircraft Electric Systems. Corson, Stimson, Soley.....830–5; disc. 1501 1944
Instruments
A Broad Band Signal Generator. Hahn, Ebert, Lynch.....316–20 1948
A Capacitance Bridge for Determining the Ratio and Phase Angle of Potential Transformers. Bousman, Ten Broeck.....541–5; disc. 944 1943
A Cathode-Ray Method of Wave Analysis. Johnson.....1032–6; disc. 1398 1941
A Comparison of Two Basic Servomechanism Types. Harris.....83–92; disc. 92 1947
A High-Gain D-C Amplifier for Bioelectric Recording. Goldberg.....60–4 1940
A Method for Detecting the Ionization Point on Electrical Apparatus. Quinn.....680–2; disc. 1229 1940
A Modulated-Frequency System of Telemetering. Renfro, Peterson.....45–7 1945
A Multiplied-Deflection A-C Potentiometer. Marshall.....77–80; disc. 460 1944
A New Design for the A-C Network Analyzer. Ryder, Boast.....674–80; disc. 1162 1946
A New Differential Analyzer. Kuehni, Peterson.221–8; disc. 429 1944
A New Expanded Scale A-C Voltmeter. Millar.....641–3 1949
A New Simple Calculator of Load Flow in A-C Networks. Enns.....786–90; disc. 1000 1943
A New Thermal Volt-Ampere Demand Meter. Douglass, Morong.....79–83; disc. 83 1949
A Polyphase Thermal Ampere-Demand Meter. Petsinger...167–74 1947
A Precision Rotating Standard for the Measurement of Kilowatt-Hours. Goss, Hansen...412–15; disc. 415 1940
A Proposed Method for the Determination of Current-Transformer Errors. Camilli, Ten Broeck.....547–50; disc. 1138 1940
A Self-Balancing Capacitance Bridge. Foley.....797–801 1947
A Simplified Double-Film Klydonograph With an Improved Coupling Method. Waghorne.....1114–16; disc. 1116 1947
A Study of Wave Shapes for Radio-Noise-Meter Calibrations. Frick.....890–901; disc. 969 1945
A Transient Fault Locator for High-Voltage Transmission Lines. Spaulding, Demond.....1005–10; disc. 1010 1949
A Turbine-Governor Performance Analyzer. Osbon.....963–7; disc. 1401 1941
Air-Borne Magnetometers for Search and Survey. Felch, Means, Slonczewski, Parratt, Rumbaugh, Tickner.....640–50 1947
Aluminum-Nickel-Cobalt Brake Magnets for Watt-Hour Meters. Green.....791–6; disc. 796 1939
Ampere-Squared-Second Recorder. Rich.....839–42 1941
Amplifier-Wattmeter Combination for the Accurate Measurement of Watts and Vars, An. Brown, Cahoon.....593–7; disc. 597 1939
An Automatic A-C Potentiometer and Its Application to the Non-Destructive Testing of Insulating Equipment. Keinath.887–90; disc. 890 1939
An Automatic Oscillograph With a Memory. Zarem.....150–4; disc. 514 1946
An Automatic Printing Ammeter. LeClair.....93–9; disc. 757 1941
An Electronic Frequency Meter and Speed Regulator. Levin.....779–86; disc. 1181 1946
An Electro-Optical Shutter for Photographic Purposes. Zarem, Marshall, Poole.....84–91 1949
An Improved Frequency Meter for Commercial Power Frequencies. Knudsen.....866–9; disc. 1334 1941
An Improved Type of D-C Wattmeter of the Shunted Type. MacGahan.....4–7; disc. 633 1941
An Interval Timer for Arc Duration. Quill.....237–40 1945
An Oscillograph for Recording Transient Recovery Voltages. Hoover.....1086–91; disc. 1174 1946
Analysis and Design of a D-C Selsyn System. Manildi.....512–16; disc. 946 1945
Anomalous Behavior of the Moving Systems of Single-Phase A-C Watt-Hour Meters at No Load, The. Holtz.....116–21; disc. 121 1940
Automatic Range-Adjusting Radiosonde Recorder. Beggs....602–07 1949
Biased-Core Current-Transformer Design Method. Specht...635–40 1945
Braking Magnets for Watt-Hour Meters. Kinnard, Goss.....431–9; disc. 653 1941
Bushing Tests. Brownlee, Wickham.....940–2; disc. 1344 1941
Capacitance Fuel Gauges. Clark, Adolphe.....1189–96; disc. 1196 1947
Cathode-Ray Oscillograph With Rotating-Drum Camera, A. Downie.....984–6 1941
Criteria for Neutral Stability of Wye-Grounded-Primary Broken-Delta-Secondary Transformer Circuits. Shott, Peterson.....997–1002; disc. 1394 1941
Demand-Meter Time Periods. Lincoln, Sprole.....729–33; disc. 733 1939

Design and Application of Supersonic Flaw Detectors. Erdman..1271–6 1947
Direct Coupled Oscillograph Amplifier. Christian.....1383–6 1947
Effect of Radio Frequencies of a Power System on Radio-Receiving Systems. Aggers, Pakala, Stickel. .....169–72; disc. 459 1943
Effect of Sapphire-Crystal Orientation on the Wear of Watt-Hour Meter Bearings. Goss..... .....811–14; disc. 1336 1941
Electrical Analogy Methods Applied to Servomechanism Problems. McCann, Herwald, Kirschbaum..... .....91–6; disc. 515 1946
Electronic Circuits of a Supersonic Reflectoscope. DeLano...128–37 1948
Electronic Measurement of Surge-Crest Voltages. Bryant, Newman. .....807–11; disc. 1093 1940
Electronic Null Detectors for Use With Impedance Bridges. Lamson. 535–40 1947
Electronic Telemetering System. Foster, Kiefer.....802–7 1947
Electronically Balanced Recorder for Flight Testing and Spectroscopy. Williams, Clark, Tarpley...205–08 1946
Frequency Compensated A-C Ammeters and Voltmeters. Whittendon, Wilkinson.....761–4 1946
Generalized Bridge Network for Dielectric Measurements. Balsbaugh, Howell, Dotson..950–6; disc. 1105 1940
Heat-Flow Effects in a Resistance-Type Thermometer. Millar..... .....678–85 1945
High Vacuum Leak Testing With The Mass Spectrometer. Worcester, Doughty.....946–55; disc. 1170 1946
Improvement in Modern Meter-Testing Technique. Lynch, Princi..... .....218–23 1942
Insulation Testing of Electric Windings. Foust, Rohats..... .....203–06; disc. 454 1943
Magnetic Fields in Watt-Hour Meters. Keener, Faucett, Helm..... .....202–05; disc. 758 1941
Magnetic Suspension of the Watt-Hour Meter Rotor. Trekell, Mendelsohn, Wright...1180–5; disc. 1185 1948
Measurement of Very Short Time Lags. Bryant, Newman..... .....812–16; disc. 1094 1940
Metering Power on the Low-Voltage Side. Petsinger, Lenehan..... .....159–63; disc. 406 1943
Metering With Transformer-Loss Compensators. Schleicher..... .....851–61; disc. 861 1947
Modern Cathode-Ray Oscillograph for Testing Lightning Arresters. Wade, Carpenter, MacCarthy.... .....549–53; disc. 982 1942
New Developments in Current-Transformer Design. Camilli..... .....835–42; disc. 1099 1940
Oil Film Thickness Indicator for Journal Bearings. Greenough.... .....589–95; disc. 595 1948
Orthomagnetic Bushing Current Transformer for Metering. Boyajian, Camilli.....137–40; disc. 427 1945
Parallel Circuits in Servomechanisms. Marcy.....521–9; disc. 1128 1946
Peak Voltages Induced by Accelerated Flux Reversal in Reactor Cores Operating Above Saturation Density. Specht, Wents...254–63 1946
Polar Vector Indicator. Walker, Waynick, Sulser.....154–9 1949
Polarized-Light Servo System. Berry. .....195–8; disc. 429 1944
Precision Testing of Electric Tachometers. Princi...504–08; disc. 946 1945
Quantitative Determination of Magnetic Properties by Use of Cathode-Ray Oscilloscope. Zamsky..783–7 1947
Radio Telemetering for Testing Aircraft in Flight. Frederick..861–70 1946
Rapid-Recording A-C Bridge. Mikelson, Bousman..628–31; disc. 1232 1940
Recent Research on Pulsed Light Sources. Whelan.....1303–07 1948
Relative Accuracy of Three-Phase Metering Combinations. Weller.. .....925–9; disc. 1336 1941
Response Time and Lag of a Thermometer Element Mounted in a Protecting Case. Goodwin..... .....665–70; disc. 959 1945
Sensitivity of the Four-Arm Bridge. Seletsky, Zurcher.723–8; disc. 728 1939
Some Practical Measuring Devices. Hunt.....765–8 1940
Surge Protection in a Modern Watt-Hour Meter. Busch, Williams.... .....74–7; disc. 77 1949
Surge-Voltage Breakdown Characteristics for Electrical Gaps in Oil. Sorensen.....78–81; disc. 81 1940
Testing of Elevator Buffers by Electrical Means. Kimberly.....53–4 1941
The Accuracy of Watt-Hour Meters on Intermittent Loads. Faucett, Keener, Helm...460–4; disc. 1184 1940
The Application of Lead Networks and Sinusoidal Analysis to Automatic Control Systems. Schwarts. .....69–76; disc. 76 1947
The Calibration of Ignition Crest Voltmeters. Davis, Warren..... .....99–104; disc. 104 1947
The Cathode-Ray Spectrograph. Feldt, Berkley.....105–10 1947
The Frequency Response of Automatic Control Systems. Harris... .....539–46; disc. 1131 1946
The Modern A-C Network Calculator. Parker.977–82; disc. 1395 1941
The Naval Ordnance Laboratory Six-Trace Cathode-Ray Oscillograph. Edwards.....1220–23 1948
The Output and Optimum Design of Permanent Magnets Subjected to Demagnetising Forces. Hornfeck, Edgar.....1017–24; disc. 1256 1940
The Shielding of Permanent Magnets From Transient Magnetic Fields. Wey.....875–7; disc. 1338 1941
Theoretical Possibilities in an Internally Heated Bimetal Type of Thermal Watt-Demand Meter. Lynch.....764–70; disc. 986 1942
Thermal-Demand-Meter Testing Techniques. Lynch, Douglass.... .....124–8; disc. 514 1946
Vector-Response Indicator. Loughlin. 355–7 1940
Volt-Time Areas of Impulse Spark-Over. Hagenguth..... .....803–10; disc. 1312 1941
Watt-Hour-Meter Performance With Power Rectifiers. Weller, Trekell, Stebbins.....449–57; disc. 1184 1940
X-Ray Thickness Gauge for Cold-Rolled Strip Steel. Lundahl..... .....83–90 1948
Instruments, A New Jewel for Indicating. McCune, Goss..... .....673–6; disc. 987 1942
Instruments, Advancements in the Design of Long-Scale Indicating. Rowell, Millar.....155–60 1947
Instruments, Aircraft-Engine Torque. Godsey, Langer..... .....686–90; disc. 1457 1944
Instruments and Methods of Measuring Radio Noise. Aggers, Foster, Young.....178–87; disc. 187 1940
Instruments, Design of Long-Scale Indicating. Corson, Rowell, Hoare... .....318–27; disc. 476 1942
Instruments, Electrically Operated Gyroscopic. Konet.....735–8 1944
Instruments for Recording Lightning Currents, New. Wagner, McCann. .....1061–8; disc. 1253 1940
Instruments for the Higher Range of Audio Frequencies, Power Circuit. Lunas, MacGahan.....1230–5 1941
Instruments, Frequency Response Characteristics of Recording. Graybeal.....755–66 1948
Instruments in Magnetic Fields, Performance of Portable Electrical. Peterson.....1228–31; disc. 1231 1948
Instruments, Influence of Improved Magnetic Alloys on Design Trends of Electrical. Wilson, Whittenton. .....100–04; disc. 461 1944
Instruments, Testing Governor Performance on Electric Power Systems With Improved. Allen, Hess. .....329–39; disc. 339 1947
Instruments to Meet War Service, Design Considerations in Aircraft. Savage, Whittenton..... .....992–8; disc. 1419 1944
Insulated Cables, Corona Discharge on Rubber. Paine, Brown..... .....709–14; disc. 1070 1940
Insulated Cables, Internal Corona Discharges in. Greenfield..... .....591–600; disc. 600 1947
Insulated Cables, Maximum Safe Operating Temperature for 15-Kv Paper. Franklin, Thomas..... .....556–60; disc. 560 1939
Insulated Cables, Some Impulse-Voltage Breakdown Tests on Oil-Treated Paper-. Foust, Scott..... .....389–91; disc. 391 1940
Insulated Cables, The Measurement and Investigation of Ionisation Level of Rubber. Graham, Duffy, Foster.....1107–16; disc. 1116 1948
Insulated Coaxial Cable for Carrier Current Control Circuit, Polyethylene. Slade, West..... .....1416–18; disc. 1419 1948
Insulated Conductors
A-C Resistance of Segmental Cables in Steel Pipe. Meyerhoff, Eager.. .....816–29; disc. 829 1949
High-Pressure Gas-Filled Cable Impregnated with Extra-High-Viscosity Oil. Sticher, Doan, Atkinson, Meyerhoff..336–45; disc. 345 1949
Problems in the Measurement of A-C Resistance and Reactance of Large Conductors. Salter..... .....1390–6; disc. 1396 1948
Reactance of Large Cables in Steel Pipe or Conduit. Del Mar..... .....1409–12; disc. 1412 1948
The Thermal Movement of Moisture in Soil. Mickley..330–3; disc. 333 1949
Transformer Manholes and Vaults: Design and Ventilation. Porter... .....534–9 1949
Insulated Fractional-Horsepower Motor Stators, Temperature-Aging Tests on Class-A-. Scott, Thompson.....499–501; disc. 977 1942
Insulated Motors for Shipboard Use, Overload Protection of Silicone-. Grigg, Watkins.1341–4; disc. 1344 1948
Insulated-Power-Cable Circuits, Impulse Strength of. Halperin, Shanklin.....1190–7; disc. 1386 1944
Insulated Transformers, Emergency Overloads for Oil-. Vogel, Sloat. .....669–73; disc. 988 1942
Insulated Transformers, Hot-Spot Winding Temperatures in Self-Cooled Oil-. Vogel, Narbutovskih. .....133–6; disc. 418 1942
Insulated Wire, High Voltage D-C Testing of Rubber-. Eddy, Fenn. .....576–8; disc. 1126 1946
Insulating Electric Machines, Organo-Silicon Compounds for. Kauppi, Moses.....90–3; disc. 457 1945
Insulating Equipment, An Automatic A-C Potentiometer and Its Application to the Non-Destructive Testing of. Keinath..887–90; disc. 890 1939

Insulating Liquids in a Continuously Circulating System, Dielectric Strength of. Race.....730–7 1940
Insulating Materials, Characteristics of Restricted Ionisation and Its Relation to Voids in. Dawes, Humphries.....701–08; disc. 1071 1940
Insulating Materials, Functional Evaluation of. Mathes.....1236–9; disc. 1240 1948
Insulating Materials Used in Tropical Service, Electrolytic Corrosion—Methods of Evaluating. Thompson, Mathes.....295–9; disc. 443 1945
Insulating Oils by Activated Alumina, Reconditioning of. Housley.....172–6; disc. 176 1939
Insulating Oils, Low-Voltage D-C Measurements on Electrical. Oncley, Hollibaugh..625–8; disc. 1227 1940
Insulating Oils, The Influence of the Concentration and Mobility of Ions on Dielectric Loss of. Kang.....403–07; disc. 1132 1946
Insulating Oils Under Limited Oxidation, Electrical Stability of Electrical. Balsbaugh, Assaf.....311–22; disc. 397 1943
Insulating Oxide Films on Electrical Steel, Formation of. Schmidt.....772–4 1948
Insulating Papers, The True Dielectric Breakdown Strength of Electric-Cable. Cloke, Bates.....1191–5; disc. 1195 1948
Insulating Varnishes, Control of Electrical-. Gibson, Braithwaite.....520–4 1945
(Insulation) A 138,000-Volt Polyethylene-Sheathed Compression Cable—Pipe Line Type. McCormack, Hatcher, Wyatt, Del Mar, Merrell, Palmer, DeTurk.....447–65; disc. 465 1948
Insulation and Operating Experience, Field Power-Factor Testing of Transformer. Whitmer.....605–11; disc. 741 1941
Insulation and Silicone Varnish, Motor Tests Evaluate Thermal Endurance of Class-H. Grant, Kauppi, Moses, Gibson.....1133–8 1949
Insulation and Spacing of Transmission Line Conductors, Co-ordination of. Lewis.....690–4; disc. 1142 1946
Insulation and Structural Rubber, Vibration. Connon.....324–9 1945
Insulation as Applied to Naval Electric Power Equipment, Silicone. Walker.....977–80; disc. 980 1947
Insulation, Asbestos and Glass-Fiber Magnet-Wire. Mathes, Stewart.....290–4 1939
Insulation at High Temperature, Aging Characteristics of Dry-Type Transformer. Stewart, Whitman.....1600–06; disc. 1607 1948
Insulation Breakdown and Consequential Damages, Protection of Industrial Plants Against. Vaughan.....592–6; disc. 1166 1946
Insulation Breakdown as a Function of Area. Hill, Schmidt.....442–4; disc. 444 1948
Insulation by Lightning Arresters, The Protection of Solid. MacCarthy, Carpenter.....912–15; disc. 1349 1941
Insulation Characteristics of Oil-Insulated Transformers, Standards and. Vogel.....167–71; disc. 431 1945
Insulation Co-ordination of Oil Insulated Transformers, Extremes in the. Vogel.....965–8; disc. 968 1949
Insulation Deterioration Treated as a Chemical Rate Phenomenon, Electrical. Dakin...113–18; disc. 118 1948
Insulation, Effect of Altitude on Electric Breakdown and Flashover of Aircraft. Berberich, Moses, Stiles, Veinott.....345–54; disc. 458 1944
Insulation, Factors Affecting the Mechanical Deterioration of Cellulose. Clark.....742–9; disc. 991 1942
Insulation, Factors Influencing the Mechanical Strength of Cellulose. Clark.....778–83; disc. 1321 1941
Insulation Failure, Chemical Contamination as Causes of Electrical-. Braithwaite, Moses.....580–3; disc. 945 1945
Insulation, Fiber Glass—An Inorganic. Atkinson.....277–82; disc. 283 1939
Insulation, Field Testing of Generator. (Committee Report).....1003–11; disc. 1314 1941
Insulation for Electric Machinery, The Application of Silicone Resins to. DeKiep, Hill, Moses.....94–8; disc. 460 1945
Insulation for High-Voltage Apparatus, Gaseous. Camilli, Chapman.....1463–9; disc. 1469 1947
Insulation for Withstanding Lightning, What Wood May Add to Primary. Lusignan, Miller.....534–40; disc. 1177 1940
Insulation, Heat, and Moisture, Motor. McAuley.....707–12 1942
Insulation Impregnated With Semiconducting Liquids, The Dielectric Properties of Cellulose. Clark.....55–62; disc. 62 1947
Insulation, Impulse Strength of Cable. Davis, Eddy.....394–9; disc. 399 1940
Insulation in Submarines—Toxicity, Silicone. Walker, Shea.....1232–5 1948
Insulation Level for Lightning Protection of Medium-Voltage Lines, Minimum. Ekvall.....128–32; disc. 719 1941
Insulation Level of Relay and Control Circuits. (Committee Report).....1255–7 1949
Insulation Levels, Basic Impulse. Sporn, Powel.....596–8; disc. 1197 1940
Insulation Levels, Co-ordination of Electrical Equipment With Basic. Foote, North.....585–9; disc. 1204 1940
Insulation, Lightning and 60-Cycle Power Tests on Wood-Pole Line. Bellaschi.....838–47; disc. 847 1947
Insulation, Methods for Determining the Effects of Contaminants on Electrical, Mathes, Sieffert, Walker, Lindsey.....113–18; disc. 118 1949
Insulation, Oil Stresses in Impregnated-Paper. Whitehead.555–7; disc. 955 1945
Insulation on High-Temperature Railway Motor, Investigation of Silicone. Grant, Kauppi, Moses.....305–10; disc. 310 1947
(Insulation) 115-Kv High-Pressure Oil-Filled Pipe Cable Installation at New Orleans, La. Bullard, Pettee, Rhodes.....475–84; disc. 484 1948
Insulation, Power-Factor Testing of Transformer. Hodtum.....28–30; disc. 647 1941
Insulation, Preliminary Report on Laboratory Aging Tests on Class A. (Committee Report).....879–81; disc. 881 1947
Insulation Protection in the Operation of Power Transformers, Controlled Temperature and. Satterlee, Reed.....753–8; disc. 759 1949
(Insulation) Recommendations for High-Voltage Testing. (Committee Report).....598–602; disc. 1207 1940
Insulation Resistance and Dielectric-Absorption Characteristics of Large A-C Stator Windings. Askey, Johnson.....347–51; disc. 458 1945
Insulation Resistance at High Voltage, A Portable Instrument for Measuring. Atkinson, Taylor.....164–7; disc. 428 1945
Insulation Resistance of Large D-C Machines, Factors Affecting. Johnson, Weil.....705–10; disc. 1194 1946
Insulation Strength, Rationalisation of Transmission-System. Part III. Sporn, Gross....591–5; disc. 1201 1940 (Part I—1928; Part II—1930)
Insulation, Temperature Aging Characteristics of Class A. Smith, Scott.....435–42; disc. 442 1939
Insulation, Temperature and Electric Stress in Impregnated-Paper. Whitehead, MacWilliams.....10–13; disc. 458 1942
Insulation, Temperature Limits and Characteristics of Mica as Used in Conjunction With Class "B." Spry.....287–9 1939
Insulation, Temperature Limits Set by Oil and Cellulose. Hill.....484–7; disc. 487 1939
Insulation Temperature Standards for Industrial-Control Coils. Erikson.....546–8; disc. 1408 1944
Insulation, "Terratex"—A Thin Flexible Inorganic. Walters.....123–7 1948
Insulation Testing by the Power-Factor Method, Bushing and Associated. Baltsly, Schlottere.....308–12; disc. 744 1941
Insulation Testing of Electric Windings, Foust, Rohats...203–06; disc. 454 1943
Insulation, The A-C Dielectric-Loss and Power-Factor Method for Field Investigation of Electrical. Doble.....934–9; disc. 1348 1941
Insulation, The Basis for the Non-destructive Testing of. Field.....890–5; disc. 1347 1941
Insulation, The Detection of Initial Failure in High-Voltage. Whitehead, Shaw.....267–72; disc. 761 1941
Insulation, The Dielectric Strength and Life of Impregnated-Paper. Whitehead.
Part I.....715–20; disc. 1085 1940
Part II.....660–3; disc. 1233 1940
Part III.....618–22; disc. 1039 1942
Part IV. Whitehead & Kopper.....171–7; disc. 477, 942 1945
(Insulation) Thermal Characteristics of a 120-Kv High-Pressure, Gas-Filled Cable Installation. Sanderson, Sticher, McGrath.487–98; disc. 499 1948
Insulation to Auxiliary-Type D-C Motors in Severe Duty Service, The Application of Class B. Compton.....828–34; disc. 1098 1940
Insulation to Switching Surges, Dielectric Strength of Station and Line. Bellaschi, Rademacher.....1047–54; disc. 1173 1946
Insulator Contamination, Pole Fires Due to. Wickham, Adler, Oldacre.....1741–4 1948
Insulator Designs Require Special Features to Insure Radio Quietness, Some. Miller.....62–6; disc. 657 1941
Insulator Development and Manufacture, Statistical Methods Applied to. Taylor.....495–9; disc. 952 1945
Insulator Flashover Deionization Times as a Factor in Applying High-Speed Reclosing Circuit Breakers. Boisseau, Wyman, Skeats.....1058–66; disc. 1066 1949
Insulator Surface Contamination. Frey.....1420–4; disc. 1424 1948
Insulator Washing, Tests and Developments in Connection With Hot-Line. Hill.....1203–16 1947
Insulators and Line Hardward for Tidd 500-Kv Test Lines. Gross, McCoy, Sheadel.....1592–1602; disc. 1602 1947
Insulators at High Altitudes, Investigation of Porcelain. Fields, Cadwell.....656–60 1946
Insulators Due to Contamination, Flashovers of Suspension. Adler, Wickham, Oldacre.....1680–3; disc. 1683 1948
Insulators for Pole Lines, Rubber. Wheeler, Markley.....195–7 1949

Insulators in Compressed Nitrogen, High-Voltage D-C Flashover of Solid. Trump, Andrias.....986–90; disc. 1393 1941

Insulators in Fog, Performance of Dust-Contaminated. Cozzens, Blakeslee.....1686–91; disc. 1691 1948

Insulators to Withstand Air-Borne Deposits. Taylor.....1436–41; disc. 1441 1948

Insure Radio Quietness, Some Insulator Designs Require Special Features to. Miller.....62–6; disc. 657 1941

Integral-Horsepower Motors, Investigation of Hot-Spot Temperatures in. Hildebrand, Cain, Phillips, Hough, Rosswog, Potter..124–8; disc. 421 1945

Integrated Control System for Aircraft D-C Generators, An. McClinton.....94–8 1947

Interconnected Generating and Distribution System, The Frequencies of Natural Power Oscillations in. Rudenberg.....791–803 1943

Interconnected Power Systems, Continuous Load-Frequency Control for. Dimond, Lunge.....1483–8; disc. 1488 1948

Interconnected Systems, Control of Load, Frequency and Time of. Duff.....778–86; disc. 999 1945

Interconnected Systems, Prime-Mover Speed Governors for. Caughey, McClure.....147–51; disc. 728 1941

Interconnection in Quebec, Power-System. Way.....841–7 1942

Interconnection, Methods of System Control in a Large. Wild.....232–6; disc. 737 1941

Interconnection, Staged Fault Tests of Relaying and Stability on Kansas-Nebraska 270-Mile 154-Kv. Minard, Gow, Wolfe, Swanson.....358–67; disc. 425 1943

Interconnections of the Columbia Gas and Electric Corporation, Increased Capacity and. DeForest...451–8 1941

Interconnections, Phase-Angle Control of System. Pierce, Hamilton.....83–91; disc. 91 1939

Interference, Aircraft Precipitation-Static Radio. Starr.....363–70 1941

Interference From Radio-Frequency Heating Equipment, Measurement of. Brown.....1102–06 1948

Interference from Radio-Frequency Heating Equipment, Reduction of. Klingaman.....718–24; disc. 724 1949

Interference, Methods of Controlling Radio. Aggers...193–9; disc. 199 1940

Interference Minimized on Boulder-Los Angeles Transmission Lines, Carrier-Current Losses Measured and. Laughlin, Pakala, Reagan.....4–9; disc. 9 1940

Interference to Telegraph Systems, Control of Inductive. Milnor.....469–74; disc. 1134 1940

Interim Report on Application and Operation of Automatic Reclosing Equipment on Stub Feeders. (Committee Report).....536–40; disc. 934 1943

Interim Report on Application and Operation of Circuit Breakers and Switchgear. (Committee Report).....481–83 1943

Interim Report on Application and Operation of Out-of-Step Protection. (Committee Report).....567–73 1943

Interim Report on Characteristics and Performance of Conductors for Supervisory Control and Telemetering. (Committee Report).....854–62 1943

Interim Report on Emergency Overloads on Overhead Conductors. (Committee Report).....588–90; disc. 940 1943

Interim Report on Guides for Overloading Transformers and Voltage Regulators. (Committee Report).....692–4; disc. 1063 1942

Interim Report on Overloading Distribution Transformers. (Committee Report).....516–17; disc. 968 1943

Interlaminar Eddy Current Loss in Laminated Cores. Beiler, Schmidt.....872–7; disc. 877 1947

Interlamination Resistance. Barton.....670–2 1944

Intermittent Duty Cycles, A Study of Short-Time Ratings and Their Application to. Hellmund, McAuley.....1050–5; disc. 1221 1940

Intermittent Load, Rating of Electric Equipment Under. Zucker.....778–83; disc. 1381 1944

Intermittent Loads, Analysis of Rating Methods for. Hellmund.....4–7 1943

Intermittent Loads, The Accuracy of Watt-Hour Meters on. Faucett, Keener, Helm...460–4; disc. 1184 1940

Intermittent Ratings and Applications, Classification and Co-ordination of Short-Time and. Hellmund.....792–8; disc. 1323 1941

Intermittent Service, Current Ratings of Electronic Devices for. Hellmund.....569–73 1942

Internal Corona Discharges in Insulated Cables. Greenfield.....591–600; disc. 600 1947

Internal Transformer Fusing on Rural Power Circuits, Sectionalising and. Watkins.....383–8; disc. 388 1947

International Exposition With Light, Painting the Golden Gate. Dickerson, Mahan.....738–46 1940

Interrupter, A New 15-Kv Pneumatic Circuit. Ludwig, Rawlins, Baker.....528–33; disc. 1123 1940

Interrupter and Its Application to "Oil-Poor" Circuit Breakers, The Vertical-Flow. Baker.....440–5; disc. 635 1941

Interrupter for High-Voltage Oil Circuit Breakers, A Multiorifice. Ludwig, Leeds.....119–25; disc. 437 1943

Interrupter for Severe Operating Duty, An Improved Axial Air-Blast. Taylor, Martin..323–33; disc. 431 1943

Interrupter Switch, The Auto-Blast. Williams, Harlow.....176–81; disc. 437 1943

Interrupter Using Water, A High-Power Oilless Circuit. Leeds.....85–8; disc. 625 1941

Interrupters, Dielectric Strength of Water in Relation to Use in Circuit. Slepian, Denault, Strom.....389–95; disc. 631 1941

Interrupters, Performance Criteria of D-C. Boehne, Jang.....1172–80; disc. 1180 1947

Interrupting Capacity, A New Air Circuit Breaker With 250,000-Kva. Dickinson, Nau.....197–201; disc. 671 1941

Interrupting Capacity Controllers, The Use of Air-Core Reactors as Fault Limiting Means on High-. Leitch.....469–74; disc. 474 1949

Interrupting Capacity—5,000,000 Kva, The Next Step in. Hill, Leeds.....317–23; disc. 463 1945

Interrupting-Capacity Fuse for Voltages Through 138 Kv, A New High-. Fahnoe.....630–5; disc. 937 1943

Interrupting Capacity of 138-Kv Oil Circuit Breakers, Field Tests of. Buchanan, Floyd.....199–204; disc. 503 1946

Interruption by Air Blast, Circuit. Edsall, Stubbs..503–09; disc. 1129 1940

Interruption Circuit Breakers for 400-Cycle Aircraft Electric-Power System, Pressure-Arc-. Austin.....58–60; disc. 487 1946

Interruption for Aircraft, D-C Arc. Quill, Rader.....883–8; disc. 1472 1944

Interruption for Aircraft, Peak Voltages With D-C Arc. Phillips, Mitchel.....944–9 1944

Interruption of Charging Current at High Voltage, The. Leeds, Van Sickle.....373–80; disc. 381 1947

Interruption, The Geometry of Arc. Boehne:
Part I.....524–32; disc. 675 1941
Part II.....375–87; disc. 447 1944

Interval and Dwell Tester for Bomb-Release Interval Controls. Long.....648–51 1945

Interval Timer for Arc Duration, An. Quill.....237–40 1945

Intrasystem Transmission Losses. George.....153–8; disc. 387 1943

Inverse Functions of Complex Quantities. Dwight.....850–3 1942

Inverter Action on Reversing of Thyratron Motor Control. Palmer, Leigh.....175–84; disc. 494 1944

Inverter Construction, Aircraft. Button.....598–602 1943

Inverter, New Type of D-C to A-C Vibrator. Kiltie..245–7; disc. 247 1940

Inverters for Military Aircraft, 400-Cycle. Hayes, Ray.....233–7 1945

Inverters for Railroad Service, High Voltage Ignitron Rectifiers and. Boyer, Hagensick.....463–70 1946

Inverters, Harmonics in the A-C Circuits of Grid-Controlled Rectifiers and. Evans, Muller.....861–8; disc. 869 1939

Inverters Supplying Large Single-Phase Loads, A Unit for Balancing the Voltages of Three-Phase Aircraft. Wimpie.....532–3; disc. 1358 1944

Investigating Mechanical and Hydraulic Conditions During Operation of Hydroelectric Units, Some Oscillographic Methods of. Engvall.....993–6 1949

Investigation at High Altitudes in Colorado, Lightning. Robertson, Lewis, Foust....201–08; disc. 453 1942

Investigation of Arc Starting Characteristics of D-C Welders With Reference to Electrode Freezing. Tyner.....97–9; disc. 511 1946

Investigation of Electrical Insulation, The A-C Dielectric-Loss and Power-Factor Method for Field. Doble.....934–9; disc. 1348 1941

Investigation of Hot-Spot Temperatures in Fractional-Horsepower Motors. Hirsch, Munier, Schmidt, Wightman, Himebrook, Lloyd, Coffman, Potter.128–36; disc. 421 1945

Investigation of Hot-Spot Temperatures in Integral-Horsepower Motors. Hildebrand, Cain, Phillips, Hough, Rosswog, Potter.....124–8; disc. 421 1945

Investigation of Ionization Level of Rubber Insulated Cables, The Measurement and. Graham, Duffy, Foster..1107–16; disc. 1116 1948

Investigation of Lightning Currents and Preventive Lightning Protection on a Transmission System, An Eight-Year. Hansson, Waldorf.....251–8; disc. 463, 1350 1944

Investigation of Lightning Surges at Substations, Field. Gross, McCann.....569–74; disc. 574 1947

Investigation of Porcelain Insulators at High Altitudes. Fields, Cadwell.....656–60 1946

Investigation of Silicone Insulation on High-Temperature Railway Motor. Grant, Kauppi, Moses.....305–10; disc. 310 1947

Investigation of Starting Requirements of a 660-Horsepower Locomotive Diesel Engine. Davidson, Lamborn.....31–4; disc. 632 1941

Investigation of Subharmonic Currents, An Experimental. McCrumm.....533–40; disc. 722 1941

Investigation of the Characteristics of Lightning Currents Discharged by Arresters, Field. Gross, McCann, Beck.....266–71; disc. 461 1942

Investigation of the Electrical Performance of Bolted Aluminum-to-Copper Connections, An Experimental. Bonwitt.1208–18; disc. 1218 1948

Investigation of the Relationship Between Temperature and Movement of Cables in Ducts, An. Nicholson, Brosnan.....723–8; disc. 1388 1944

Investigation on a Rural Distribution System, Lightning. MacCarthy, Stann, Edge, McKinley.....428–37; disc. 437 1949

Investigation on a Rural Distribution System, Overcurrent. Lincks, Edge, McKinley, Leh.....915–27; disc. 927 1949

Investigation on a 220-Kv System, Lightning. Part III. Bell.....822–8; disc. 1098 1940
(Part I—1934; Part II—1936)

Investigation on 132-Kv System of American Gas and Electric Company, Lightning. Gross, Lippert..76–84; disc. 474 1945

Investigation on 132-Kv Transmission System of the American Gas and Electric Company, Lightning. Gross, Lippert.....178–85; disc. 450, 974 1942

Investigation on the 25-Kv System of the West Penn Power Company, Lightning. Bowen, Beck.....831–6; disc. 836 1948

Investigation on Transmission Lines, Lightning. Lewis, Foust:
Part VII.....227–32; disc. 233 1940
Part VIII.....107–15; disc. 474 1945
(Part I—1930; Part II—1931; Part III—1933; Part IV—1934; Part V—1935; Part VI—1937)

Investigation on Wallenpaupack-Siegfried 220-Kv Line of Pennsylvania Power and Light Company, Lightning. Bell, Packer.....196–201 1942

Investigations, Aircraft-Electric-Accessory-Vibration. Miller.....1283–90; disc. 1486 1944

Investigations of Lightning, Field. Wagner, McCann, Beck.....1222–30; disc. 1381 1941

Investments, Kilowatts, Kilovars, and System. Butler..133–7; disc. 368 1943

Ionization and Deionization Times of Thyratron Tubes, A Method for the Measurement of the. Birnbaum.....209–14 1948

Ionization and Its Relation to Voids in Insulating Materials, Characteristics of Restricted. Dawes, Humphries. ...701–08; disc. 1071 1940

Ionization Level of Rubber Insulated Cables, The Measurement and Investigation of. Graham, Duffy, Foster.....1107–16; disc. 1116 1948

Ionization Point on Electrical Apparatus, A Method for Detecting. Quinn.....680–2; disc. 1229 1940

Ionization Time of Thyratrons. Harrison.....747–50; disc. 1079 1940

Ionosphere in Radio Wave Propagation, The Role of the. Dellinger..803–22 1939

Ions on Dielectric Loss of Insulating Oils, The Influence of the Concentration and Mobility of. Kang.....403–07; disc. 1132 1946

(IPCEA Committee Report) Current Rating of Cables as Affected by Mutual Heating in Air or Conduit. .....354–65; disc. 424 1944

Iron-Cored Inductors, Subharmonics in Circuits Containing. Part II. Travis.....735–42 1939
(Part I—1938)

Iron is Present, Some Aspects of Inductance When. Rader, Litscher..133–9; disc. 431 1944

Iron Losses in Series Motors, Armature. Chang, Karr.....262–4; disc. 264 1949

Iron Losses of Transformers, Influence of the Core Form Upon the. Stein.....95–103; disc. 103 1948

Iron Ore Beneficiation Plant, Power Distribution and Utilization in a Large. Gettelman.....1726–32 1948

Iron, The Self-Inductance of a Toroidal Coil Without. Dwight.....805–06; disc. 999 1945

Irrigation Pumping with Grand Coulee Power. Denton.....1362–8; disc. 1368 1948

Isolated Nonmagnetic Rectangular Conductors, Effective Resistance of. Dwight.....549–52 1947

Isolated-Phase Metal-Enclosed Bus Designed for High-Capacity Generating Stations, A New. Wyman, Shores.....699–703; disc. 703 1948

J

Jewel for Indicating Instruments, A New. McCune, Goss.....673–6; disc. 987 1942

Joint Usage, Power Line Carrier for Relaying and. Part I. Hampe, Storer.....864–7; disc. 871 1949

Joint Use of Pole Lines for Rural Power and Telephone Services. Campbell, Hill, Moore, Schols.....519–24; disc. 524 1947

Joints, A Theoretical and Practical Approach to the Design of High-Voltage Cable. Short.....1275–80; disc. 1280 1949

Joints and Clamps for Aluminum Conductors. Tebo.....1145–50; disc. 1150 1948

Joints by Means of a Bolometer, Detection of Overheated Transmission Line. Leslie, Wait..64–8; disc. 68 1949

Journal Bearings, Oil Film Thickness Indicator for. Greenough.....589–95; disc. 595 1948

Judging Mica Quality Electrically. Coutlee.....735–41 1945

Junction in a Simplified Selenium Rectifier Cell, Electrical Characteristics of the. Angello.....175–80 1947

K

Kansas-Nebraska 270-Mile 154-Kv Interconnection, Staged Fault Tests of Relaying and Stability on. Minard, Gow, Wolfe, Swanson.....358–67; disc. 425 1943

Keep Them Rolling. Teker....107–12 1943

Kilovar Supply on the Design of Systems for Load Growth, The Effect of. Schroeder, Butler, Meyers.....69–77; disc. 492 1944

Kilovars, and System Investments, Kilowatts. Butler...133–7; disc. 368 1943

Kilovars, Facilities for the Supply of Kilowatts and. Sels, Seely.....249–55; disc. 402 1942

Kilowatt-Hours, A Precision Rotating Standard for the Measurement of. Goss, Hansen...412–15; disc. 415 1940

Kilowatt Transmitter for Standard Band Broadcasting, A New 150. Boerner.....943–51 1948

Kilowatts and Kilovars, Facilities for the Supply of. Sels, Seely.....249–55; disc. 402 1942

Kilowatts, Kilovars, and System Investments. Butler.133–7; disc. 368 1943

Klydonograph With an Improved Coupling Method, A Simplified Double-Film. Waghorne.....1114–16; disc. 1116 1947

Kramer or Asynchronous-Synchronous Cascade Variable-Speed Drive, A Study of the Modified. Liwschits, Kilgore.....255–60 1942

L

Laboratory Aging Tests on Class A Insulation, Preliminary Report on. (Committee Report).....879–81; disc. 881 1947

Laboratory Aids for Electromechanical System Development. Newton, White.....315–19; disc. 319 1947

Laboratory, Lightning Strokes in Field and. Part III. Bellaschi.....1248–56; disc. 1392 1941
(Part I—1935; Part II—1937)

Laboratory Method for Objective Testing of Bone Receivers and Throat Microphones. Greibach....184–7 1946

Laboratory Service, An Electron Microscope for Practical. Zworykin, Hillier, Vance.....157–62 1941

Laboratory Techniques, Cable Accessory Design Utilizing New. Bosworth, Farr...1268–73; disc. 1273 1949

Ladder Networks, A Fractional Termination for. LePage.....530–6 1946

Ladder Networks, An Extension of the Method of Symmetrical Components Using. Lyon.....1025–30; disc. 1263 1940

Ladder Networks, Formulas for the Four-Terminal Network Parameters of Uniform. LePage..604–08 1944

Lag of a Thermometer Element Mounted in a Protecting Case, Response Time and. Goodwin.....665–70; disc. 959 1945

Lags, Measurement of Very Short Time. Bryant, Newman.....812–16; disc. 1094 1940

Laminated Cores, Interlaminar Eddy Current Loss in. Beiler, Schmidt.....872 7; disc. 877 1947

Lamp, Electronics of the Fluorescent. Townsend.....607–12 1942

Lamp Situation From the Engineering Point of View, The Incandescent. Millar.....1174–80; disc. 1387 1941

Lamps for Airplane Lighting Service, Gaseous-Discharge. Beggs.....760–2; disc. 1456 1944

Lamps, Saving Time in Testing Life of Incandescent. Purcell.....730–2 1949

Lamps, Some Characteristics and Applications of Negative-Glow. Ferree.....8–12; disc. 622 1941

Land-Mobile Services Operating on Frequencies Between 152–174 Megacycles, Design of Mobile Radio Communication Equipment for. Beers, Harris, Zappacosta.....1232–9 1949

Land Transportation

A Power Plant Regulating System for Diesel-Electric Locomotives. Lewis.....242–6; disc. 246 1947

Application Engineering on Diesel-Electric Locomotives in Railroad Service. Bevan.....125–31 1949

Comparison of Railway Motive Power for Operations in the Pacific Northwest. Martin..1054–65; disc. 1189 1946

Dynamic Braking With Traction Motors. Riley, Woods.....517–19 1945

Electric Equipment for Chesapeake and Ohio Railway Company Steam Turbine-Electric Locomotives. Atwell, Baston.....145–8 1949

Handling Suburban Traffic on Steam Railroads. Sloman.....1670–4 1948

Industrial Plants Prefer Diesel-Electric Switching Locomotives. Woods.....697–700 1949
Measurement of Railway-Motor Temperatures in Service. Teker.....545–50 1945
Modern Railway Passenger-Car Auxiliary-Power Equipment. MacLeod, Hause.....930–8 1947
Motor Control for Latest New York Transit System Subway Cars. Riley.....900–03 1947
Power Costs and the Contribution of Existing Transmission Networks Towards Cost Reduction of Power for Electrification of Main Line Railroads with Moderate Traffic. Evans.....596–8; disc. 499 1948
Proposed Rapid Transit System for Toronto. Duncan.....939–46 1947
Rewinding Commutator-Type Traction Armatures. Greene, Stafford, Gentilini.....563–9; disc. 943 1945
Selenium Rectifiers in Motor Vehicle Power Systems. Ramsey.....149–53; disc. 153 1949
Short Time Ratings of Diesel-Electric Locomotives. Campbell, Woods.....1661–3 1948
Special 10-Car Train for the New York City Transit System. Sinclair.....251–4; disc. 254 1947
The Design of New York Subway Motors for Dynamic Braking. Widell.....808–10 1947
The Locomotive Traction Generator Comes of Age. Lamborn..767–71 1948
The Present Competitive Position of Coal, Residual Oil, Diesel Oil, and Electricity as Energy Sources for Motive Power Operation in the Pacific Northwest. Martin.....1664–9 1948
The Renaissance of Electric Motive Power, Candee.....138–44 1949
Trackless Trolley Operation in Rhode Island. Blomquist.....397–402 1949
Trolley Coaches and PCC Street Cars Provide Successful City Transportation. Clardy.....925–9 1947
Trolley Coaches Replace Busses. McMillon.....403–06 1949
Twenty-Five Years Progress in the Design of Traction Motors. Baldwin.....132–7 1949
Land Transportation, The Increasing Uses for Electricity in. Kerr.....775–81 1948
Landing System at Indianapolis, The Development of the Civil Aeronautics Authority Instrument. Jackson, Alford, Byrne, Fischer.....849–58; disc. 1120 1940
Landing System, The CAA-MIT Microwave Instrument. Bowles, Barrow, Hall, Lewis, Kerr.....859–65; disc. 1120 1940
Lap and Wave Windings, Doubly Chorded or Doubly Shifted Fractional-Slot. Liwschitz.....684–6 1948
Large Electric-Arc Furnaces—Performance and Power Supply. Jones, Stearns.....763–9; disc. 1325 1941
Large Indoor Power Air-Blast Circuit Breakers. Jansson.....1675–8; disc. 1679 1948
Large-Scale General-Purpose Electric Analog Computer, A. Harder, McCann.....664–73 1948
Large Size Conductors in Steel Pipe or Conduit, A-C Resistance of. Wiseman.....1745–52; disc. 1752 1948
Law Power-Level Recorder, A Square. Clark, Turner, Williams....476–82 1949
Layer Windings of Rotating Machines, The Magnetomotive Force of 2-. Stein.....756–8 1947
Layout of 66-Kv 10,000-Kva Series Capacitor Substation, Design and. Miller.....355–9 1948
Lead Alloy—An Improved Cable Sheathing, F-3. Hickernell, Snyder.....563–9; disc. 1136 1946
Lead-Cable-Sheath Corrosion, Study of A-C Sheath Currents and Their Effect on. Sherer, Granbois.....264–8; disc. 483 1945
Lead Cable Sheathing, A New Technique for. Reinits, Wiseman.....165–71; disc. 171 1940
Lead-Encased Cable, Solid Type, Pulling Loads on Single- and Multiple-Conductor Impregnated-Paper. Bellis.....138–48; disc. 403 1943
Lead Networks and Sinusoidal Analysis to Automatic Control Systems, The Application of. Schwartz.....69–76; disc. 76 1947
Lead Storage Batteries in the Transportation Field. Whitehurst.....303–07; disc. 683 1941
Leak Testing With the Mass Spectrometer, High Vacuum. Worcester, Doughty.....946–55; disc. 1170 1946
Leakage Currents, Burning of Wood Structures by. Ross.....279–84; disc. 285 1947
Leakage of a Fractional-Slot Winding, Differential. Liwschitz....314–20 1946
Leakage of the Different Patterns of a Fractional Slot Winding, Differential. Liwschitz.....1129–31; disc. 1131 1949
Leakage Reactance of Induction Motors, Some Phases of Calculation of. Liwschitz, Formhals.....1409–12; disc. 1412 1947
Leakage Reactance of the Squirrel Cage Rotor With Respect to the Stator Harmonics and the Equivalent Circuit of the Induction Motor. Liwschitz.....1407–8 1947
Leakage Reactance, Saturation Effect of. Chang, Lloyd.....1144–7 1949
Leakage With Respect to the Fundamental Wave and to the Harmonics, Differential. Liwschitz.....1139–50 1944
Leaks in Pipe-Encased Gas Pressure Cable Lines,. Location of Gas Piper.....10–21; disc. 21 1948
Let-Go Currents, Effect of Frequency on. Dalziel, Ogden, Abbott.....745–50; disc. 998 1943
Let-Go Currents, Effect of Wave Form on. Dalziel.....739–44; disc. 998 1943
Level for Lightning Protection of Medium-Voltage Lines, Minimum Insulation. Ekvall.....128–32; disc. 719 1941
Level of Relay and Control Circuits, Insulation. (Committee Report).....1255–7 1949
Level of Rubber Insulated Cables, The Measurement and Investigation of Ionisation. Graham, Duffy, Foster.....1107–16; disc. 1116 1948
Level Recorder, A Square-Law Power-. Clark, Turner, Williams,.....476–82 1949
Level Recorder, The "Speedomax" Power-. Clark.....957–64 1940
Levels, Basic Impulse Insulation. Sporn, Powel....596–8; disc. 1197 1940
Levels of Transformers. A Study of Sound. Fahnoe.....277–83; disc. 748 1941
Levels, The Co-ordination of Electrical Equipment With Basic Insulation. Foote, North.....585–9; disc. 1204 1940
Life and Performance Under Various Altitude Conditions, The Testing of Brushes for. Herman.....929–33; disc. 1491 1944
Life, Cyclic Movement of Cable—Its Causes and Effects on Cable-Sheath. Schifreen.....1121–30; disc. 1388 1944
Life of Impregnated-Paper Insulation, The Dielectric Strength and. Whitehead:
Part I.....715–20; disc. 1085 1940
Part II.....660–3; disc. 1233 1940
Part III.....618–22; disc. 1039 1942
Part IV. Whitehead & Kopper.....171–7; disc. 477, 942 1945
Life of Incandescent Lamps, Saving Time in Testing. Purcell...730–2 1949
Life Quality, Statistical Methods in the Development of Apparatus. Ferrell.....700–03; disc. 998 1945
Light and Power Systems for Industrial Plants, Combined. Beeman..76–83 1946
Light and Structure at Golden Gate Exposition, Color. (a 16-page insert) facing page 746..... 1940
(Light) Measurements of Erythemal Energy. Scott.....725–9 1949
Light, Painting the Golden Gate International Exposition With. Dickerson, Mahan.....738–46 1940
Light, Production and Application of.
Development of the Glow-Switch. Hays.....223–6; disc. 723 1941
Radiant Heat—a Full-Fledged Industrial Tool. Goodell....464–71 1941
Some Characteristics and Applications of Negative-Glow Lamps. Ferree.....8–12; disc. 622 1941
The Carbon Arc—a Valuable Industrial Tool. Kalb.....581–5 1942
The Incandescent Lamp Situation From the Engineering Point of View. Millar.1174–80; disc. 1387 1941
Light, Progress in the Production and Application of. Powell...1265–76 1940
(Light) Saving Time in Testing Life of Incandescent Lamps. Purcell.730–2 1949
Light Servo System, Polarized-. Berry.....195–8; disc. 429 1944
Light Sources, Recent Developments in. Millar.....1505–17 1944
Light Sources, Recent Research on Pulsed. Whelan.....1303–07 1948
Lighting, A Thyratron Circuit for Theater. Wischmeyer....1067–72 1941
Lighting, Aircraft Engine and Propeller Test-Cell. Tuck.....1264–70; disc. 1493 1944
Lighting, Airport Runway and Approach. Kevern.....1396–9 1947
Lighting Circuits, Inductive Co-ordination With Series Sodium Highway. Kent, Blye.....325–32; disc. 332 1939
Lighting Required for Commercial-Airline Aircraft. Petrasek.....593–8; disc. 1456 1944
Lighting Service, Gaseous-Discharge Lamps for Airplane. Beggs.....760–2; disc. 1456 1944
Lighting the New York World's Fair. Engelkin.....1288–1305 1940
Lighting, The Scientific Basis for the New British System of Cockpit. Calvert.....869–70 1944
Lightning, Abnormal Currents in Distribution Transformers Due to. Bryant, Newman.564–8; disc. 1003 1942
Lightning and Lightning Protection on Distribution Systems. Bergvall, Beck.....442–9; disc. 1112 1940
Lightning and 60-Cycle Power Tests on Wood-Pole Line Insulation. Bellaschi.....838–47; disc. 847 1947
Lightning-Arrester Blocks, Statistics as an Aid to Engineering Judgment in the Manufacture of. Goffman.....607–10; disc. 966 1945
Lightning Arrester Discharges, Field Research on. McCann, Beck.....625–9; disc. 629 1947
Lightning-Arrester Performance Characteristics, Distribution-Type.(Committee Report).....132 1942
Lightning-Arrester Performance Characteristics, Line-Type. (Committee Report).....982–3 1941

Lightning-Arrester Performance Characteristics, Station-Type. (Committee Report).....347–8 1940
Lightning Arresters for Distribution Apparatus. Beck, Forbes.....719–24; disc. 970 1945
Lightning Arresters' Impulse Spark-Over Volt-Time Characteristics Expulsion-Type. (Committee Report).....520 1948
Lightning Arresters, Modern Cathode-Ray Oscillograph for Testing. Wade, Carpenter, MacCarthy.....549–53; disc. 982 1942
Lightning Arresters, Modern Impulse Generators for Testing. Brownlee.....539–44; disc. 984 1942
Lightning Arresters, Testing and Application of.(Committee Report).68–71 1939
Lightning Arresters, The Protection of Solid Insulation by. MacCarthy, Carpenter.....912–15; disc. 1349 1941
Lightning Arresters—Tidd 500-Kv Test Lines, Transformers and. Lane, Hodnette, Bellaschi, Beck.....1613–18; disc. 1618 1947
Lightning Currents and Preventive Lightning Protection on a Transmission System, An Eight-Year Investigation of. Hansson, Waldorf.....251–8; disc. 463, 1350 1944
Lightning Currents Discharged by Arresters, Field Investigation of the Characteristics of. Gross, McCann, Beck.....266–71; disc. 461 1942
Lightning Currents in Arresters at Stations. Gross, McMorris.....417–22; disc. 1110 1940
Lightning Currents in Direct Strokes, The Measurement of. McCann.....1157–64; disc. 1370 1944
Lightning Currents in Low-Voltage Currents, Voltage Stresses in Distribution Transformers Due to. Beardsley, McMorris, Stewart.....1632–5; disc. 1635 1948
Lightning Currents, New Instruments for Recording. Wagner, McCann.....1061–8; disc. 1253 1940
Lightning Field Disturbances Produced by. McCann, Morgan.....345–57; disc. 427 1943
Lightning, Field Investigations of. Wagner, McCann, Beck.....1222–30; disc. 1381 1941
Lightning Flashes to Transmission Lines, The Frequency of Occurrence and the Distribution of. Golde.....902–10; disc. 982 1945
Lightning Investigation at High Altitudes in Colorado. Robertson, Lewis, Foust....201–08; disc. 453 1942
Lightning Investigation on a Rural Distribution System. MacCarthy, Stann, Edge, McKinley.....428–37; disc. 437 1949
Lightning Investigation on a 220-Kv System. Part III. Bell.....822–8; disc. 1098 1940
(Part I—1934; Part II—1936)
Lightning Investigation on 132-Kv System of American Gas and Electric Company. Gross, Lippert.....76–84; disc. 474 1945
Lightning Investigation on 132-Kv Transmission System of the American Gas and Electric Company. Gross, Lippert.....178–85; disc. 450, 974 1942
Lightning Investigation on the 25-Kv System of the West Penn Power Company. Bowen, Beck.....831–6; disc. 836 1947
Lightning Investigation on Transmission Lines. Lewis, Foust:
Part VII.....227–32; disc. 233 1940
Part VIII.....107–15; disc. 474 1945
(Part I—1930; Part II—1931; Part III—1933; Part IV—1934; Part V—1935; Part VI—1937)
Lightning Investigation on Wallenpaupack-Siegfried 220-Kv Line of Pennsylvania Power and Light Company. Bell, Packer..196–201 1942
Lightning Investigations on 33-Kv Wood-Pole Lines. Andrews, McCann.....768–77; disc. 954 1945
Lightning Measurements, Advances in Technique of. Brownlee..515–19 1949
Lightning on Thin Metal Surfaces, Effect of. McEachron, Hagenguth.....559–64; disc. 1013 1942
Lightning Performance of 110- to 165-Kv Transmission Lines. (Committee Report)..294–304; disc. 304 1939
Lightning Performance of 220-Kv Transmission Lines. Part II. (Committee Report).....70–6; disc. 499 1946
(Part I—1934)
Lightning, Photographic Study of. Hagenguth.....577–83; disc. 583 1947
Lightning Protection for Rotating Machines. McCann, Beck, Finzi.....319–33; disc. 488 1944
Lightning Protection of Medium-Voltage Lines, Minimum Insulation Level for. Ekvall.....128–32; disc. 719 1941
Lightning Protection of Stations, Development in. Whitehead.....898–900; disc. 1372 1941
Lightning Protection of Wood-Pole Lines. Sels, Gothberg.....328–31; disc. 331 1940
Lightning Protection on Transmission Lines, Experience With Preventive. Waldorf.....249–54; disc. 701 1941
Lightning Protection, Practical Design of Counterpoise for Transmission-Line. Hansson, Waldorf.....599–603; disc. 1010 1942
Lightning Protective Devices in Wartime, Application of. Gross.....173–5; disc. 441 1943
Lightning Protective Devices in Wartime, Report on Application of. (Committee Report).....586–8; disc. 952 1943
Lightning Protective Devices. Performance Characteristics of. (Committee Report).....1330–6 1949
Lightning Protective Equipment for Rotating A-C Machines, Survey of. (Committee Report).....516–19; disc. 519 1948
Lightning-Resistant Wood-Pole Transmission Lines, Ten Years Performance of. Schahfer, Knuts.....934–40; disc. 940 1948
Lightning Stroke Damage to Aircraft. Hagenguth....1036–44; disc. 1044 1949
Lightning Strokes in Field and Laboratory. Part III. Bellaschi.....1248–56; disc. 1392 1941
(Part I—1935; Part II—1937)
Lightning Strokes, Transmission Line Design and Performance Based on Direct. Harder, Clayton.....439–46; disc. 447 1949
Lightning Surges at Substations, Field Investigation of. Gross, McCann.....569–74; disc. 574 1947
Lightning Surges, Protection of Power Transformers Against. (Committee Report).....568–77; disc. 749 1941
Lightning Surges Transferred From One Circuit to Another Through Transformers. Bellaschi.....731–8; disc. 1002 1943
Lightning to the Empire State Building. McEachron....885–90; disc. 1377 1941
Lightning, What Wood May Add to Primary Insulation for Withstanding. Lusignan, Miller.....534–40; disc. 1177 1940
Lights, The Development of Aircraft Position. Vitol..796–8; disc. 1493 1944
Lightweight Aircraft Transformers. Stephens.....1073–8 1949
Lightweight Motors for Aircraft, Dimensional Studies of. Morrill.....698–701 1944
Limitations in Design of D-C Adjustable Speed Motors. Opel.....1095–8 1949
Limitations of Long-Distance A-C Power-Transmission Systems, Stability. Clarke, Crary.....1051–9; disc. 1299 1941
Limiter for Network Use, A 600-Volt Enclosed. Langguth, Rawlins, Wallace.....536–8; disc. 1062 1942
Limiting Fuse, A New Current-. Rawlins, Strom, Graybill.....77–80; disc. 657 1941
Limiting Fuse for Aircraft Applications, A Current-. Powell.....541–5 1945
Limiting Means on High Interrupting Capacity Controllers, The Use of Air-Core Reactors as Fault. Leitch.....469–74; disc. 474 1949
Limiting Power Fuse, A New Three-Element Current-. Rawlins, Fahnoe.....156–9; disc. 451 1944
Limiting Reactors, Interim Report on Overloading Current-. (Committee Report).....611–12; disc. 968 1943
Limits and Measurements for Rating of D-C Machines, Temperature. Compton.....780–5 1943
Limits for Copper in Overhead Lines, Ampere Load. Kidder, Woodward.....148–52; disc. 388 1943
Limits Set by Oil and Cellulose Insulation, Temperature. Hill.....484–7; disc. 487 1939
"Linascope"—An Echo-Ranging Type Fault Locator for High-Voltage Lines, The. Leslie, Kidd.....1162–6; disc. 1166 1948
Line at Carrier Current Frequencies, Loss Measurements Made on Underground-Cable Overhead-Conductor 132-Kv Transmission. Cornelius, Storer.....597–601 1949
Line Carrier Channels, Operation of Power. Lensner..888–93; disc. 893 1947
(Line) Carrier-Current Equipment. Laughlin.....147–51; disc. 156 1939
Line Carrier Equipment, A Proposal for Broad-Band Coupling of Power-. Miller.....1028–30; disc. 1030 1949
Line Carrier for Relaying and Joint Usage, Power. Part I. Hampe, Storer.....864–7; disc. 871 1949
Line-Carrier System, A Versatile Power-. Lensner, Singel.....129–33; disc. 437 1944
Line Clamps, Magnetic Heating of Transmission. Crabb, Sheadel.....1032–5 1949
Line Conductor, Hy-Therm Copper—An Improved Overhead-. Hickernell, Jones, Snyder..22–7; disc. 27 1949
Line Conductors, Co-ordination of Insulation and Spacing of Transmission. Lewis.....690–4; disc. 1142 1946
Line Conductors, Safe Ratings for Overhead. Olmsted..845–53; disc. 938 1943
Line Conductors—Tidd 500-Kv Test Lines. Peterson, Simmons, Hickernell, Noyes...1603–11; disc. 1611 1947
(Line) Corona Experience on Transmission Line. Cozzens, Peterson.....137–40; disc. 156 1939
Line—Design and Construction Features, Powerton-Crawford 220-Kv. Oldacre, Wollaston.....1108–20; disc. 1297 1941
Line Design and Performance Based on Direct Lightning Strokes, Transmission. Harder, Clayton.....439–46; disc. 447 1949
Line, Design and Protection of 10,000-Kva Series Capacitor for 66-Kv Transmission. Johnson, Marbury, Arthur.....363–7; disc. 368 1948
Line Diagrams, New Transmission-. Schwager, Wang.....610–15; disc. 955 1945

Line-Drop Compensator, A New Voltage-Regulating Relay Plus. Carlin. . . . . 63–6; disc. 481 1942

Line Drop Produced by Resistance Welders. Longini. . . . . 619–23; disc. 963 1945

Line Electric Loadings, Transmission-. Crary . . . . . 1198–1204; disc. 1373 1944

Line Fault Locator Using Fault-Generated Surges, A Transmission. Stevens, Stringfield. . . . . 1168–78; disc. 1178 1948

(Line) General Operation of Transmission Line. Peterson. . . . . 131–7; disc. 156 and 911 1939

Line Hardware for Tidd 500-Kv Test Lines, Insulators and. Gross, McCoy, Sheadel. . . . . 1592–1602; disc. 1602 1947

Line Images, Narrow-Band Transmission System for Animated. Skellett. 124–7 1939

(Line) Insulation and Lightning Protection. Cozzens. . . . . 140–6; disc. 156 and 911 1939

Line Insulation, Lightning and 60-Cycle Power Tests on Wood-Pole. Bellaschi. . . . . 838–47; disc. 847 1947

Line Insulation to Switching Surges, Dielectric Strength of Station and. Bellaschi, Rademacher. . . . . 1047–54; disc. 1173 1946

Line Insulator Washing, Tests and Developments in Connection With Hot-. Hill. 1203–16 1947

Line Joints by Means of a Bolometer, Detection of Overheated Transmission. Leslie, Wait . . 64–8; disc. 68 1949

Line, Multichannel Carrier-Current Facilities for a Power. Sandstrom, Foster. . . . . 71–6; disc. 469 1942

Line of Pennsylvania Power and Light Company, Lightning Investigation on Wallenpaupack-Siegfried 220-Kv. Bell, Packer. 196–201 1942

Line of the Southern California Edison Co., Ltd., Engineering Features of the 230-Kv Boulder-Chino Transmission. Kroneberg, Hunter. . . . . 982–7; disc. 1176 1940

Line of Thyratrons, A New. Coolidge. . . . . 723–7; disc. 727 1948

Line Problems in the Case of Attenuating Transmission Line, The Solution of Transmission-. Glinski 46–9 1946

Line Problems in the Development of the 12-Channel Open-Wire Carrier System. Ilgenfritz, Hunter, Whitman. . . . . 658–64; disc. 664 1939

Line Reclosing, Transient Shaft Torques in Turbine Generators Produced by Transmission. Batchelor, Whitehead, Williams . . . 159–64; disc. 164 1948

Line Sectionalising and Load Transfer, Automatic Control of Air Switches for. Rich, Kirwen . . 293–9; disc. 299 1947

Line Sectionalising Circuit Breakers, A-C Tripping and Reclosing of. Winegartner, Bonheimer . . . 1357–9 1949

Line-System Operating Features and Terminal Design, Powerton-Crawford 220-Kv. Wulfing, LeClair . . . . . 1084–9; disc. 1304 1941

Line, The Tapered Transmission. Milnor. 345–6 1945

(Line) Transmission Line Relay Protection. Draper . . . . 151–6; disc. 156 1939

Line Tuning Equipment Used With Coaxial Cable for Carrier Current Installation on Power Lines. Sutton. . . . . 44–8; disc. 48 1949

Line-Type Lightning-Arrester Performance Characteristics. (Committee Report) 982–3 1941

Line Wire, Thermal Rating of Overhead. Zucker. . . . . 501–07; disc. 918 1943

Linear Conductors of Structural Shape, Formulas for the Calculation of the Inductance of. Higgins 53–8 1943

Linear Couplers—Field Tests and Experience at York and Middletown, Pa. Harder, Klemmer, Neidig 107–13 1946

Linear Couplers for Bus Protection. Harder, Klemmer, Sonnemann, Wents. . . . . 241–8; disc. 463 1942

Linear Equations With Real or Complex Coefficients, A Short Method for Evaluating Determinants and Solving Systems of. Crout . . . 1235–41 1941

Linear Servomechanisms, The Analysis and an Optimum Synthesis of. Herr, Gerst. 959–70 1947

Linear Transformations in Three-Phase Circuits. Pipes . . 351–6; disc. 619 1941

Linear Vibration Problems, Summary of Transformations Useful in Constructing Analogs of. Corbett . 661–4 1949

Lines, A New Single-Side-Band Carrier System for Power. Lenehan. . . . . 826–30; disc. 830 1947

Lines, A Transient Fault Locator for High-Voltage Transmission. Spaulding, Diemond . . 1005–10; disc. 1010 1949

Lines, A 12-Channel Carrier Telephone System for Open-Wire. Kendall, Affel. . . . . 351–60; disc. 360 1939

Lines, Abnormal Overvoltages Caused by Transformer Magnetising Currents in Long Transmission. Peterson, Schroeder . . . . . 32–40; disc. 1943

Lines Along Uniformly Rotating Reference Frames, Stationary Networks and Transmission. Kron . . . 690–6 1949

Lines, Ampere Load Limits for Copper in Overhead. Kidder, Woodward. . . . . 148–52; disc. 388 1943

Lines and Design Features of Tidd 500-Kv Test Lines, Corona Considerations on High-Voltage. Wagner, Wagner, Peterson, Gross. . . . . 1583–90; disc. 1590 1947

Lines and Distribution Feeders, Sensitive Ground Protection for Transmission. Gross. 968–71 1941

Lines and Its Effect on the Application of Petersen Coils, The Electrostatic Unbalance of Transmission. Lyon. . . . . 107–12; disc. 112 1939

Lines and Newly Developed Equipment for Protection Against Conductor Burndown From That Cause, Power Arc-Over on Overhead Distribution. Matthews. . . . . 596–604; disc. 684 1941

Lines, Application of Carrier to Power. Rives. . . . . 835–44; disc. 945 1943

Lines, Arc-Furnace Loads on Long Transmission. LeClair. . . . . 234–9; disc. 239 1940

Lines as Affecting Ground-Fault Neutralisers, Report on Survey of Unbalanced Charging Currents on Transmission. (Committee Report) . . . . . 1328; disc. 1329 1949

Lines, Attenuation and Delay Equalizers for Coaxial. Lundry . . 1174–9 1949

Lines Between Systems, Reclosing of Single Tie. Parker, Travers. . . . . 119–22; disc. 470 1944

Lines, Carrier-Current Losses Measured and Interference Minimized on Boulder-Los Angeles Transmission. Laughlin, Pakala, Reagan. . . . . 4–9; disc. 9 1940

Lines, Comparative Performance Records—Steel and Wood Transmission. Booker . . . . 686–9; disc. 689 1949

Lines, Cost Studies of 69- to 230-Kv Underground Power-Transmission Systems and Tie. Holm . . . 852–60 1945

Lines, Electrification of Petroleum Pipe. Hyde. . . . . 968–74; disc. 974 1948

Lines, Equalization of Coaxial. Gould. 1187–92 1949

Lines, Excitation Problems in Hydroelectric Generators Supplying Long Transmission. Killgore. . . . . 1277–82; disc. 1282 1947

Lines, Experience With Preventive Lightning Protection on Transmission. Waldorf . . 249–54; disc. 701 1941

Lines, Experience With Ultrahigh-Speed Reclosing of High-Voltage Transmission. Sporn, Muller. . . . . 625–31; disc. 631 1939

Lines, Five Years' Experience With Ultrahigh-Speed Reclosing of High-Voltage Transmission. Sporn, Muller. . . . . 241–6; disc. 690 1941

Lines for Rural Power and Telephone Services, Joint Use of Pole. Campbell, Hill, Moore, Schols . . . . . 519–24; disc. 424 1947

Lines from the New Sunbury Generating Station, Relaying of Transmission. Green, Oewel, Ramsaur. . . . . 873–7; disc. 877 1949

Lines in Los Angeles, New 138-Kv Cable. Mansfield. . . . . 1240–9; disc. 1479 1944

Lines, Induced Voltages on Transmission. Wagner, McCann. . . . . 916–30; disc. 1007 1942

1944–1946.....24–7 1948

Load, A Power-System Governor Sensitive to Frequency and. Curtis.....89–92; disc. 731 1941

Load, A 10,000-Kva Series Capacitor Improves Voltage on 66-Kv Line Supplying Large Electric Furnace. Jones, Arthur, Stearns, Johnson.....345–51; disc. 351 1948

Load Analysis, Effects of Thermal Characteristics of Aircraft Generators on. Rogers.....819–24 1946

Load and Reactive Components in Power Line Networks, The Use of Business Machines in Determining the Distribution of. Jennings, Quinan.....1045–6 1946

Load Balance of Multiphase Rectifiers, Harmonics and. Evans.....182–7; disc. 400 1943

Load-Calculation Procedure for Electric-Panel Space Heating. Raber, Hutchinson....1085–9; disc. 1432 1944

Load-Center Unit Substations for Low-Voltage A-C Systems, Standardized. Hunter, Page....519–25 1942

Load Characteristics, Coincidence-Factor Relationships of Electric-Service-. Bary.....623–9 1945

Load Conditions, Determining Incremental Regulation and Dead Band of Governors on Steam Turbine Generators Under System. Tornquist, Wade.....1343–7 1949

Load Control, Characteristics of New Carrier-Current Equipment for Telemetering and. Beckwith.....1649–52; disc. 1652 1948

Load Control for Turbine Generators, A New Automatic. Ruud, Farnham.....1337–42; disc. 1342 1949

Load Control for Turbine Generators, Automatic. Crever, Jackson.....656–60 1945

Load Control, System Operation Improved With Carrier Telemetering and. Walton, Lensner.....1643–7; disc. 1647 1948

Load Curves, Synthetic or Equivalent. Hamilton.....369–81 1942

Load Curves, The Summation of. Hamilton.....729–35; disc. 1361 1944

Load-Cycle Ratings of Ignitrons, Analytical Treatment for Establishing. Marshall, Arnott.....545–8; disc. 1051 1942

Load Division by Means of Accurate Time Control, Preliminary Consideration of System-Wide. Curtis, Pickslay....1562–9; disc. 1569 1948

Load Factor on Operation of Power Transformers by Temperature, Effect of. Montsinger .....632–6; disc. 1224 1940

Load Flow in A-C Networks, A New Simple Calculator of. Enns.....786–90; disc. 1000 1943

Load, Frequency, and Time of Interconnected Systems, Control of. Duff.....778–86; disc. 999 1945

Load-Frequency Control for Interconnected Power Systems, Continuous. Dimond, Lunge.....1483–8; disc. 1488 1948

Load Growth, The Effect of Kilovar Supply on the Design of Systems for. Schroeder, Butler, Meyers.....69–77; disc. 492 1944

Load Limits for Copper in Overhead Lines, Ampere, Kidder, Woodward.....148–52; disc. 388 1943

Load Loss in Induction Machines. Reverse-Rotation Test for the Determination of Stray. Morgan, Brown, Schumer..319–22; disc. 322 1939

Load Loss in Induction Motors, Measurement of Stray-. Ware.....194–7; disc. 433 1945

Load Losses Measured in D-C Motors, Stray. (Committee Report).....219–23; disc. 223 1949

Load, Measuring Transformer Winding Temperatures Continuously with the Transformer Carrying. Lockie, Stein.....1608–16; disc. 1616 1948

Load, Operation of Nonsalient-Pole Type Generators Supplying a Rectifier. Ross, Batchelor.....667–70; disc. 959 1943

Load Outgrows the Distribution Power Supply, When the Welding. Clark, Stearns....645–8; disc. 964 1945

Load Pickup by a Group of Ignitron Rectifiers. Morton, Bohn.....679–84; disc. 963 1943

Load Power Factor, A Static Voltage Regulator Insensitive to. Summers, Short.....67–70 1942

Load Radio Control Transformers Operating in Parallel and in Networks, Operating. Starr.....1274–80; disc. 1407 1941

Load, Rating of Electric Equipment Under Intermittent. Zucker.....778–83; disc. 1381 1944

Load-Rating Theory for Multichannel Amplifiers. Holbrook, Dixon.....265–72 1940

Load Ratings of Cable. Halperin:
Part I.....535–53; disc. 553 1939
Part II.....930–42; disc. 1040 1942

Load-Ratio-Control Transformers, A New Control System for Automatic Parallel Operation of. Minneci, Farnham.....488–93; disc. 916 1943

Load Reduction, The Performance of a Topped Steam Power Plant on Sudden. Noest.....1348–56 1949

Load, Some Fundamentals of D-C Controlled Reactors with Resistive. Storm.....188–94; disc. 194 1949

Load Stations, A New Transformer for Base-. Sporn, Putman.....916–18; disc. 1358 1941

Load Swings, Automatic Regulation of Turbine Generators to Relieve Power-Supply Systems of Steel-Mill. Eberhardt, Harrison, Kohn, Darling.....751–8 1945

Load Swings, Frequency Control of. McCormack, Lombard.....623–4; disc. 1043 1942

Load Swings, System. Bauman, Mans, McCormack, Seeley.....541–7; disc. 735 1941

Load, The Effect of Weather on the System. Dryar..1006–13; disc. 1364 1944

Load, The Heat Pump—Its Significance as a Potential Residential Electric. Bary.....1–8 1949

Load Transfer, Automatic Control of Air Switches for Line Sectionalising and. Rich, Kirwen.....293–9; disc. 299 1947

Loaded With Ferromagnetic Materials, The Voltage Drop in the Welder Throat. Stein.....356–62 1947

Loading Apparatus for Telephone Cables, Recent Improvements in. Hale, Quinlan, Ranges.....385–92 1948

Loading of a Transformer System, Economic. Levine, Smith.....733–8; disc. 738 1949

Loading of High-Voltage Cables Installed in Underground Subway Systems, Economical. Thomas.....611–15; disc. 615 1939

Loading of Three-Phase Three-Winding Transformer Banks, Asymmetrical. Denissov.....27–9; disc. 444 1944

Loading of Transformers in Open Delta, Mobile Capacitor Units for Emergency. Wolf, Mattison.....83–6; disc. 373 1943

Loading Schedules, Co-ordination of Fuel Cost and Transmission Loss by Use of the Network Analyzer to Determine Plant. George, Page, Ward.....1152–60; disc. 1160 1949

Loading Transformers by Copper Temperature. Putnam, Dann.....504–09; disc. 510 1939

Loading Transformers, Equivalent Ambient Temperatures for. Sealey..87–93; disc. 449 1943

Loadings, Transmission-Line Electric. Crary.....1198–1204; disc. 1373 1944

Loads, A Unit for Balancing the Voltages of Three-Phase Aircraft Inverters Supplying Large Single-Phase. Wimpie..532–3; disc. 1358 1944

Loads, Analysis of Rating Methods for Intermittent. Hellmund.....4–7 1943

Loads Carried by a Variable-Ratio Synchronous-Induction Frequency Changer. Darling, Kaufman.91–4 1948

Loads, Design of Induction Heating Coils for Cylindrical Magnetic. Vaughan, Williamson.....887–92; dis. 1165 1946

Loads, Design of Induction-Heating Coils for Cylindrical Nonmagnetic. Vaughan, Williamson.....587–92; disc. 965 1945

Loads, Emergency Control of System. Comly, Kelley, McCormack, Phillips, Schroeder..1474–81; disc. 1482 1948

Loads for Military-Training Bases, Federal Housing, and Other Wartime Projects, Estimating Electric. Potts.....246–54; disc. 463 1943

Loads, General Analysis of Speed Regulators Under Impact. McCann, Osbon, Kirschbaum.....1243–52 1947

Loads on a Variable-Ratio Frequency Changer, Suddenly Applied. Carter, Maginniss, Rothe.....1489–95 1947

Loads on A-C Generators, A Semiempirical Approach to Voltage Dip—with Suddenly Applied. Rosenberg.....160–6; disc. 166 1949

Loads on Long Transmission Lines, Arc-Furnace. LeClair.....234–9; disc. 239 1940

Loads on Single- and Multiple-Conductor Impregnated-Paper Lead-Encased Cable, Solid Type, Pulling. Bellis.....138–48; disc. 403 1943

Loads, Regulation of A-C Generators With Suddenly Applied. Harder, Cheek.....310–18; disc. 490 1944

Loads, Synchronous Motors With Controlled Excitation for Suddenly Applied. Boice, Caldwell, Halberg..113–19; disc. 416 1943

Loads, The Accuracy of Watt-Hour Meters on Intermittent. Faucett, Keener, Helm...460–4; disc. 1184 1940

Loads, Voltage and Current Relations for Controlled Rectification With Inductive and Generative. Puchlowski.....255–60; disc. 442 1945

Loads, Voltage Changes Caused by Resistance Welding. Johnson, Peterson, Rhoades....664–73; disc. 674 1948

Location and Relay Performance Analysis by Automatic Oscillographs, Fault. Dupuis, Jacobs.....442–6; disc. 1125 1946

Location by Surge-Comparison Testing, Winding-Fault Detection and. Moses, Harter..499–503; disc. 945 1945

Location of Gas Leaks in Pipe-Encased Gas Pressure Cable Lines. Piper.....10–21; disc. 21 1948

Locator for High-Voltage Lines, The "Linascope"—An Echo-Ranging Type Fault. Leslie, Kidd.....1162–6; disc. 1166 1948

Locator for High-Voltage Transmission Lines, A Transient Fault. Spaulding, Diemond.....1005–1010; disc. 1010 1949

Locator Using Fault-Generated Surges, A Transmission Line Fault. Stevens, Stringfield.....1168–78; disc. 1178 1948

Loci for Servomechanism Components and Systems, Graphical Determination of Transfer Function. Thomas, Easton..307–14; disc. 314 1949

Loci for the Capacitor Motor, Current. McFarland.....152–6 1942

Loci of the Synchronous Tie, The Geometric. Finzi, Wellard....168–71 1949

Lockout Circuits in Telephone Switching, Relay Preference. Joel.....1720–5; disc. 1725 1948

Locomotive Application by Means of Nomographic Charts, Diesel-Electric Switching- Millan, Perkinson.....45–7 1944

Locomotive Application, Electric. Brandenstein, MacLeod.....1210–15; disc. 1382 1941

Locomotive Diesel Engine, Investigation of Starting Requirements of a 660-Horsepower, Davidson, Lamborn.....31–4; disc. 632 1941

Locomotive, Electrical Equipment of the Union Pacific Steam-Electric. Hanna, Tritle.....756–64; disc. 1082 1940

Locomotive for the Seaboard Air Line Railway, A 3,000 Horsepower Diesel-Electric. Staples, Weybrew, Atwell.....215–19 1947

Locomotive Traction Generator Comes of Age, The. Lamborn....767–71 1948

Locomotives, A Power Plant Regulating System for Diesel-Electric. Lewis.....242–6; disc. 246 1947

Locomotives, Braking Resistors and Control for Diesel-Electric. Weiser.....229–32 1947

Locomotives, Design Features of Generators for Diesel-Electric Switcher. Atwell.....41–5; disc. 433 1944

Locomotives, Developments in Control Systems for Diesel-Electric. Henshaw.....233–41 1947

Locomotives, Electric Control for Steam Boilers on Diesel-Electric and Straight Electric. Burgess.....604–06; disc. 980 1942

Locomotives, Electric Equipment for Chesapeake and Ohio Railway Company Steam Turbine-Electric. Atwell, Baston.....145–8 1949

Locomotives in Open-Pit Mine Haulage, Modern Electric. Borland, Riley.....52–8; disc. 433 1944

Locomotives in Railroad Service, Application Engineering on Diesel-Electric. Bevan.....125–31 1949

Locomotives, Industrial Plants Prefer Diesel-Electric Switching. Woods.....697–700 1949

Locomotives, Modern Electrical Equipment for Industrial Diesel-Electric. Greer.....229–32; disc. 400 1942

Locomotives on the Pennsylvania Railroad—Protection and Tonnage Rating, Single-Phase A-C Electric. Griffith.....224–8 1942

Locomotives, Progress in Design of Electrical Equipment for Large Diesel-Electric. Smith..130–1; disc. 404 1942

Locomotives, Short Time Ratings of Diesel-Electric. Campbell, Woods.....1661–3 1948

Locomotives, Speed-Responsive Devices on Diesel-Electric. Johansson.336–8 1948

Locomotives, Study of the Performance of the 3,600-Horsepower New Haven Electric. Konn, Craton.....212–16; disc. 217 1939

Locomotives With Identical Basic Components, Electric. Brecht, Kerr..339–43; disc. 343 1948

Locomotives With Particular Reference to Resistor Transition, Improvements in Preventive-Coil Control for A-C. Hatch, Ogden...727–32 1942

Locus, Current-Transformer Performance Based on Admittance-Vector. Schwager.....26–30; disc. 465 1942

Log Barker, The Bellingham Hydraulic. Haner, Rose.....1068–74 1948

Logarithmic and Geometric Mean Distances, Theory and Application of. Higgins.....12–16 1947

Logic of Relay Circuits, The. Keister..571–6 1949

Long-Distance A-C Power Transmission, Economics of. Crary, Johnson.....1092–9; disc. 1099 1947

Long-Distance A-C Power-Transmission Systems, Stability Limitations of. Clarke, Crary.1051–9; disc. 1299 1941

Long-Distance Energy Transmission, Economics of. Pierce, George.....1089–94; disc. 1094 1948

Long-Distance Power Transmission as Influenced by Excitation Systems. Concordia, Crary, Maginniss.....974–87; disc. 1175 1946

Long-Distance Transmission Systems, Self-Excited Oscillations of Capacitor-Compensated. Bodine, Concordia, Kron.....41–4; disc. 371 1943

Long-Scale Indicating Instruments, Advancements in the Design of. Rowell, Millar.....155–60 1947

Long-Scale Indicating Instruments, Design of. Corson, Rowell, Hoare...318–27; disc. 476 1942

Long 60-Cycle Arcs in Air. Strom.....113–18; disc. 504 1946

Long-Time and Short-Time Analog Computers, Comparison of. Paschkis.....70–3 1949

Long-Time Switching Transients, The Cathode-Ray Oscillograph Applied to. Dunlap, Rohats.....231–4; disc. 445 1943

Longitudinal Flux, Heating of Nonmagnetic Electric Conductors by Magnetic Induction—. Baker...273–8 1944

Looms, Selection of Electric Drives for. Demartini, Lukens.....349–56 1949

Loop Antennas, Ultrahigh-Frequency. Alford, Kandoian.....843–8 1940

Loop Tracer for Small Samples of Low-Permeability Material, A 60-Cycle Hysteresis. Wiegand, Hansen.....119–31; disc. 131 1947

Los Angeles, New 138-Kv Cable Lines in. Mansfield...1240–9; disc. 1479 1944

Los Angeles Transmission Lines, Carrier-Current Losses Measured and Interference Minimized on Boulder-. Laughlin, Pakala, Reagan..4–9; disc. 9 1940

Loss and Power-Factor Method for Field Investigation of Electrical Insulation, The A-C Dielectric. Doble.....934–9; disc. 1348 1941

Loss at High Frequencies and Under Changing Temperature, The Measurement of Dielectric. Whitehead, Rueggeberg.....520–4 1949

Loss by Use of the Network Analyzer to Determine Plant Loading Schedules, Co-ordination of Fuel Cost and Transmission. George, Page, Ward.....1152–60; disc. 1160 1949

Loss Compensators, Metering With Transformer-. Schleicher.....851–61; disc. 861 1947

Loss, Formulas for Conductor Size According to Cost of Resistance. Dwight.....22–5; disc. 497 1946

Loss in Induction Machines, Reverse-Rotation Test for the Determination of Stray Load. Morgan, Brown, Schumer.....319–22; disc. 322 1939

Loss in Induction Motors, Measurement of Stray-Load. Ware.....194–7; disc. 433 1945

Loss in Laminated Cores, Interlaminar Eddy Current, Beiler, Schmidt..872–7; disc. 877 1947

Loss in Solid-Rotor Turbine Generators, Pole-Face. Kuyper.....827–34; disc. 925 1943

Loss Measurements Made on Underground-Cable Overhead-Conductor 132-Kv Transmission Line at Carrier Current Frequencies. Cornelius, Storer.....597–601 1949

Loss-of-Excitation Relay for Synchronous Generators, A New. Mason.....1240–5 1949

Loss-of-Field Protection for Generators. Crossman, Lindemuth, Webb.....261–6; disc. 462 1942

Loss of Insulating Oils, The Influence of the Concentration and Mobility of Ions on Dielectric. Kang.....403–07; disc. 1132 1947

Loss Under Rising Temperature, Dielectric Heating—The Measurement of. Whitehead.....947–9 1947

Losser Circuits, Vario-. Bennett, Doba.....17–22 1941

Losses in Radio-Frequency-Cable Components. Ragan.....927 1945

Losses in Series Motors, Armature Iron. Chang, Karr.....262–4; disc. 264 1949

Losses in Terms of Generating-Station-Capacity Investment, Evaluation of Electric Distribution. Mortara.....1–7; disc. 411 1945

Losses, Intrasystem Transmission. George.....153–8; disc. 387 1943

Losses Measured and Interference Minimised on Boulder-Los Angeles Transmission Lines, Carrier-Current. Laughlin, Pakala, Reagan..4–9; disc. 9 1940

Losses Measured in D-C Motors, Stray Load. (Committee Report).....219–23; disc. 223 1949

Losses of Transformers, Influence of the Core Form Upon the Iron. Stein..95–103; disc. 103 1948

Low-Current-Secondary Current Transformers. (Committee Report).....649–50 1946

Low-Energy Regulating Systems, Two-Stage Rototrol for. Kimball.....1507–11 1947

Low Excitation, Generator Stability at. Michelson, Lischer....1–6; disc. 7 1948

Low-Frequency Induction, Co-ordination of Power and Communication Circuits for. Coleman, Trueblood.....403–12; disc. 412 1940

Low Frequency to Industrial Control Problems, Application of. Schmitz.....1571–5; disc. 1575 1948

Low-Gas-Pressure Cable. Shanklin.....307–15; disc. 315 and 912 1939

Low-, Medium-, and High-Pressure Gas-Filled Cable. Shanklin.....719–26; disc. 1021 1942

Low-Permeability Material, A 60-Cycle Hysteresis Loop Tracer for Small Samples of. Wiegand, Hansen.....119–31; disc. 131 1947

Low-Pressure Gas-Filled Cable, Operation of. Hatcher.....788–92; disc. 1399 1944

Low Reactance Flexible Cable for Induction Heating. Zucker..848–52 1946

Low Speeds, Rotating Electric Machine Time Constants at. Concordia.....882–7 1946

Low-Voltage Air Circuit Breakers, Improved Selective Tripping of. West.....608–10; disc. 1431 1944

Low-Voltage Air Circuit Breakers, Modern Trends of. Seaman.....24–29; disc. 29 1940

Low-Voltage Air Circuit Breakers, Selective Tripping of. Deans.....971–6; disc. 976 1947

Low-Voltage Aircraft Cable, Requirements for. Hedges.....808–10; disc. 1473 1944

Low-Voltage A-C and D-C Starters by Means of Fuses and Circuit Breakers, The Degree of Short-Circuit Protection Afforded Small. Jones.....611–12; disc. 1408 1944

Low-Voltage A-C Circuits, Arcing Fault Currents in. Wagner, Fountain.....166–72; disc. 172 1948

Low-Voltage A-C Systems, Short-Circuit Calculating Procedure for. Darling.....1121–36; disc. 1294 1941

Low-Voltage A-C Systems, Standardized Load-Center Unit Substations for. Hunter, Page.....519–25 1942

Low-Voltage Circuit Breakers, An Improved Overcurrent Tripping Device for. Rawlins, Sandin.....1149–53; disc. 1153 1947

Low-Voltage Circuits by Air Circuit Breakers in Cascade Arrangement, Protection of. Anderson, Black..1151–60; disc. 1356 1941

Low-Voltage Circuits, Voltage Stresses in Distribution Transformers, Due to Lightning Currents in. Beardsley, McMorris, Stewart.....1632–5; disc. 1635 1948

Low-Voltage D-C Measurements on Electrical Insulating Oils. Oncley, Hollibaugh.....625–8; disc. 1227 1940

Low-Voltage Panel-Mounted Air Circuit Breaker, Improved Design. Sperow, Favre....695–8; disc. 698 1948

Low Voltage Side, Metering Power on the. Petsinger, Lenehan.....159–63; disc. 406 1943

Low-Voltage-Welding Power Distribution, The Design of. Adams, Fetcher, Johnson.....1180–90; disc. 1382 1944

Lower-Harmonic Voltages—Methods of Calculation and Control by Capacitors, System. Feaster, Harder.....1060–6; disc. 1310 1941

Lowering Control System for A-C Crane Hoists, A Thrustor. Schwarz-Kast.....139–44; disc. 144 1947

Lowering D-C Hoist Control, Dynamic. Pettit.....1576–80; disc. 1581 1948

Lumped R-C Cable Circuits as Used in the Study of Transient Heat Flow, The Accuracy of Measurements in. Paschkis, Heisler.....165–71; disc. 426 1944

M

Machine and Power Supply, Resistance-Welding. Smith.....995–1003; disc. 1003 1948

Machine, Application of Electric Equipment for Ship-Propeller Milling, Morton, Rutemiller.....205–08; disc. 453 1945

Machine Armatures, Short Circuits in Synchronous-. Galbraith..1024–9 1941

Machine Computation of Power Network Performance. Dunstan.....610–20; disc. 621 1947

Machine, Damping and Synchronizing Torque of the Double-Fed Asynchronous. Liwschits.....923–4 1941

Machine Drive, Electronic Speed Regulators for Sectional Paper. Baker, Kovalsky.....1636–42 1948

Machine Flashover and Bus Short-Circuit Protection, D-C. Montgomery, Sellers.....1168–73; disc. 1370 1941

Machine, Performance of the Single-Phase Synchronous. Robertson, Rogers.....194–6 1948

Machine Performance, The Eccentric Pole Face—A Means to Better D-C. Baker.....1107–10 1949

Machine Reactances by Test, Inherent Errors in the Determination of Synchronous-. Concordia, Maginniss.....288–94; disc. 491 1945

Machine, Self-Excited Electromagnetic Drive for a Resonant Fatigue. Willson.....1073–8 1946

Machine, Single-Phase Synchronous. Terry, Robertson.....186–93 1948

Machine Starter and Its Relation to Maximum Utilization of Power and Facilities, The Automatic Welding-. Porter.....728–30; disc. 996 1943

Machine, The Direct- and Quadrature-Axis Equivalent Circuits of the Synchronous. Rankin.....861–8 1945

Machine, The Doubly Fed. Concordia, Crary, Kron.....286–9 1942

Machine, The Negative-Sequence Reactances of an Ideal Synchronous. Duesterhoeft....510–13; disc. 513 1949

Machine Time Constants at Low Speeds, Rotating Electric. Concordia.....882–7 1946

Machine Tools, Electrical Equipment on. Graves.....18–22; disc. 22 1940

(Machine Tools) The Application of Synchronous and Induction Motors to Chippers. Baker, Lory.....1070–7 1947

Machine, Tracer-Controlled Position Regulator for Propeller Milling. Hanna, Osbon, Hartley.....201–05; disc. 452 1945

Machine With Asymmetrical Stator and Rotor, Equivalent Circuit of the Primitive Rotating. Kron.....17–23; disc. 23 1947

Machinery and Apparatus, The Rating of Electrical. Hellmund.....499–503; disc. 503 1939

Machinery, Effects of Temperature on Mechanical Performance of Rotating Electrical. Lynn.....514–7; disc. 517 1939

Machinery, Equivalent Circuits for the Hunting of Electrical. Kron.....290–6; disc. 456 1942

Machinery, Negative Damping of Electrical. Concordia, Carter.....116–19; disc. 752 1941

Machinery—1934–39, Progress of the Art in Electrical. (Committee Report).....103–06 1940

Machinery, The Nature of Vibration in Electric. Graybeal.....712–18; disc. 1458 1944

Machinery, Vibration Protection for Rotating. Webb, Murray.....534–7; disc. 1355 1944

Machines, Analysis of Unsymmetrical. Burian.....643–6 1948

Machines and Its Effects on Radio Influence Voltage Generation, Commutation of D-C. Motter.....491–5; disc. 495 1949

Machines as Affected by Angle-Regulator Characteristics, Steady-State Stability of Synchronous. Concordia.....687–90 1948

Machines as Affected by Voltage-Regulator Characteristics, Steady-State Stability of Synchronous. Concordia.....215–20; disc. 489 1944

Machines, Asynchronous and Single-Phase Operation of Synchronous. Rankin.....1092–1102 1946

Machines by Means of High-Speed Circuit Breakers, Protection of Large D-C. Housley, Jensen.....637–40; disc. 1428 1944

Machines by Series Capacitors, Power-Factor Correction of Resistance-Welding. Levoy.....1002–09; disc. 1102 1940

Machines, Calorimetric Method for Determining Efficiencies of Electric. Siegfried, Thulin.....530–2 1942

Machines, Effect of Altitude on Ventilation and Rating of Aircraft Electric. Veinott..84–90; disc. 488 1946

Machines, Factors Affecting Insulation Resistance of Large D-C. Johnson, Weil.....705–10; disc. 1194 1946

Machines in Determining the Distribution of Load and Reactive Components in Power Line Networks, The Use of Business. Jennings, Quinan.....1045–6 1946

Machines, Influence of Magnetic Materials on the Welding Characteristics of Resistance Welding. Riley, Smith...852–60; disc. 1160 1946

Machines, Lightning Protection for Rotating. McCann, Beck, Finzi..319–33; disc. 488 1944

Machines, Modern Excitation Systems for Large Synchronous. McClure, Whittlesey, Hartman.....939–45; disc. 1148 1946

Machines on Short Circuit, Current and Torque of D-C. Linville.....956–65; disc. 1144 1946

Machines, Organo-Silicon Compounds for Insulating Electric. Kauppi, Moses.....90–3; disc. 457 1945

Machines, Per-Unit Impedances of Synchronous. Rankin:
Part I.....569–73 1945
Part II.....839–41 1945

Machines, Power Supply for Resistance Welding. (Committee Report):
Parts I and II.....306–20 1940
Part III.....185–92 1941

Machines, Reverse-Rotation Test for the Determination of Stray Load Loss in Induction. Morgan, Brown, Schumer.....319–22; disc. 322 1939

Machines, Static Power Limits of Synchronous. Dalziel..93–101; disc. 101 1939

Machines, Steady-State Equivalent Circuits of Synchronous and Induction. Kron.....175–81 1948

Machines, Survey of Lightning Protective Equipment for Rotating A-C. (Committee Report).....516–19; disc. 519 1948

Machines, Synchronizing Transients and Synchronizers for Large. Evans, Gulliksen, Myhre.....965–73; disc. 1104 1940

Machines, Temperature Limits and Measurements for Rating of D-C. Compton.....780–5 1943

Machines, Temperature Rise Values for D-C. (Committee Report):
Part I.....206–12; disc. 212 1949
Part II.....1118–23; disc. 1123 1949

Machines, The Air Gap Reactance of Polyphase. Alger, West..1331–43 1947

Machines, The Magnetomotive Force of 2-Layer Windings of Rotating. Stein.....756–8 1947

Machines, The Quadrature Synchronous Reactance of Salient-Pole Synchronous. Shepherd, Kilbourne.....684–9; disc. 926 1943

Machines, Transients in 2-Phase Synchronous. Wilson.....1360–7 1949

Machines Under Transient Conditions in the Pole Axis, Saturated Synchronous. Rudenberg.....297–306; disc. 444 1942

"Magne-Blast" Air Circuit Breaker for 5,000-Volt Service. Boehne, Linde.....202–08; disc. 208 1940

Magne-Blast Breaker, New Solenoid Mechanism for. Wyman, Keagy.....268–74; disc. 448 1945

Magnesium-Copper Sulphide Rectifier Battery Charger for Railroad Passenger Cars, The. Kotterman.....260–5 1939

Magnesyn Remote Indication. Childs.....679–82 1944

Magnet Coils, Silicone-Resin-Treated. Moses, Torok..412–16; disc. 1184 1946

Magnet Instrument for Direct Current, A New Moving-. Faus, Macintyre.....586–8; disc. 987 1942

Magnet-Instrument Rotors, Basic Concepts of Moving-. Mendelsohn.....529–34; disc. 947 1945

Magnet Movable-Coil Instrument Having a General Circuit, Relation Between Electrical and Mechanical Parameters of a Permanent. Goodwin.....374–9 1948

Magnet Movable-Coil Instrument Mechanisms, A Bridge Method for Determining the Motional Characteristics of Permanent. Gilbert.....411–15 1948

Magnet Ratio Instrument, A Unique Moving-. Sias, Fisk.....634–6; disc. 1420 1944

Magnet-Wire Insulation, Asbestos and Glass-Fiber. Mathes, Stewart.....290–4 1939

Magnetic Air Circuit Breakers up to 500,000 Kva, 15 Kv, Size Reduction and Rating Extension of. Dickinson, Frink..220–3; disc. 510 1946

Magnetic Alloy, Hiperco-A. Stanley, Yensen.....714–8 1947

Magnetic Alloys on Design Trends of Electrical Instruments, Influence of Improved. Wilson, Whittenton.....100–04; disc. 461 1944

Magnetic Amplifier, Some Fundamentals of a Theory of the Transductor or. Lamm.....1078–85 1947

Magnetic Amplifiers for Naval Shipboard Applications. Buechler.....1241–5; disc. 1245 1948

Magnetic Amplifiers, Self-Saturation in. Dornhoefer.....835–46; disc. 846 1949

Magnetic Amplifiers with Feedback, Analytical Determination of Characteristics of. VerPlanck, Finzi, Beaumariage.....565–70 1949

Magnetic Circuit, Some Aspects of Polyphase Motor Design—The Design and Properties of the. Lloyd, Stone...812–18; disc. 1151 1946

Magnetic Clutch and Its Associated Brake Used on Aircraft Electric Motors, One Type of Rotary. Andrews, Shanely.893–5; disc. 1477 1944

Magnetic Compass, Electric Circuits and the. Burt, Beck.....24–6 1944

Magnetic Compass With Cathode-Ray Sensing Element, A. Kliever, Syrdal.....529–34 1947

Magnetic Compasses by Use of Compass-Compensating Coils, Compensation of Effects of Degaussing Coils on Shipboard. Robinson.....1278–81 1948

Magnetic "De-ion" Air Breaker for 2,500–5,000 Volts. Ludwig, Nau.....518–22; disc. 1125 1940

Magnetic-Drag Tachometer, The. Ballard.....366–9 1942

Magnetic Field Components of Circular Filaments and Solenoids, Formulas and Tables for the Calculation of the. Grover.....665–75 1949

Magnetic-Field Strength Near a Cylindrical Coil, Formulas for the. Dwight.....327–33; disc. 445 1942

Magnetic Field Strength of Round Coils of Small Cross Section, The Computation of. Dwight, Peters.....684–5 1944

Magnetic Fields in Watt-Hour Meters. Keener, Faucett, Helm.....202–05; disc. 758 1941

Magnetic Fields, Performance of Portable Electrical Instruments in. Peterson.....1228–31; disc. 1231 1948

Magnetic Fluid Clutch, The. Rabinow.....1308–15 1948

Magnetic Fluxmeter for A-C Fields, Use of Bismuth-Bridge. Smith.....52–5 1939

Magnetic Heating of Transmission Line Clamps. Crabb, Sheadel..1032–5 1949

Magnetic Induction — Longitudinal Flux, Heating of Nonmagnetic Electric Conductors by. Baker.....273–8 1944

Magnetic Loads, Design of Induction Heating Coils for Cylindrical. Vaughan, Williamson.....887–92; disc. 1165 1946

Magnetic Materials in Cores of Coils Subject to Superposed Direct Current, Optimum Air Gap for Various. Legg.....709–12; disc. 969 1945

Magnetic Materials on the Welding Characteristics of Resistance Welding Machines, Influence of. Riley, Smith.....852–60; disc. 1160 1946

Magnetic Mines, Shipboard Degaussing Installations for Protection Against. Michel..1270–5; disc. 1275 1948

Magnetic Properties by Use of Cathode-Ray Oscilloscope, Quantitative Determination of. Zamsky....783–7 1947

Magnetic Properties of Stainless Steels, The. Stein.....1534–7 1948

Magnetic Pull in Synchronous and Induction Motors, The Calculation of Unbalanced. Robinson.....620–24; disc. 924 1943

Magnetic Recorders Providing Intense High-Frequency Fields, A Turn-In-Gap Erase Head for. Wiegand, Zenner.....507–10 1948

Magnetic Recording, Application of Experimental Test Procedures and Methods of Analysis of Results to Research Problems in. Thompson.....407–17 1949

Magnetic Recording Tapes. Camras.....503–06 1948

Magnetic-Recording Wire, A B-H Curve Tracer for. Long, McMullen.....146–50; disc. 494 1946

Magnetic Saturation, Nonharmonic Oscillations as Caused by. Rudenberg.....676–85 1949

Magnetic Strip, Induction Heating of Moving. Baker.....184–9 1945

Magnetic Suspension of the Watt-Hour Meter Rotor. Trekell, Mendelsohn, Wright...1180–5; disc. 1185 1948

Magnetic Tape Recording, Signal and Noise Levels in. Wooldridge.....343–52; disc. 495 1946

Magnetic-Type Air Circuit Breaker for 15,000-Volt Services, A. Linde, Wyman.....140–4; disc. 453 1944

Magnetic-Type Power Circuit Breakers, The Development, Design, and Performance of. Linde, Wyman.....386–93; disc. 510 1946

Magnetic Vibration and Noise of Two-Pole Turbine Generators, Suppression of. Penniman, Taylor.....283–8; disc. 745 1941

Magnetically Controlled Industrial Tube, The Permatron—A. Overbeck.....224–8; disc. 228 1939

Magnetism on Balanced-Current or Differential Relays, The Effect of Current - Transformer Residual. Seeley.....164–9; disc. 384 1943

Magnetism, Teaching Electricity and. Hessler.....828–33 1946

Magnetizing Currents in Long Transmission Lines, Abnormal Overvoltages Caused by Transformer. Peterson, Schroeder.....32–40 1943

Magnetising Inrush Currents and Influence on System Operation, Transformer. Blume, Camilli, Farnham, Peterson.....366–75; disc. 423 1944

Magnetometers for Search and Survey, Air-Borne. Felch, Means, Slonczewski, Parratt, Rumbaugh, Tickner.....640–50 1947

Magnetomotive Force of 2-Layer Windings of Rotating Machines, The. Stein.....756–8 1947

Magnets, Factors Affecting the Design of D-C. Rader..307–10; disc. 387 1943

Magnets for Watt-Hour Meters, Aluminum-Nickel-Cobalt Brake. Green.....791–6; disc. 796 1939

Magnets for Watt-Hour Meters, Braking. Kinnard, Goss.....431–9; disc. 653 1941

Magnets From Transient Magnetic Fields, The Shielding of Permanent. Wey.....875–7; disc. 1338 1941

Magnets, Shading Coil Calculations for Single-Phase. Evans.....134–7; disc. 137 1947

Magnets, Stabilized Permanent. Cioffi.....1540–3 1948

Magnets Subjected to Demagnetizing Forces, The Output and Optimum Design of Permanent. Hornfeck, Edgar.....1017–24; disc. 1256 1940

Magnitude and Phase Angle of Electrical Quantities, The Determination of. Walker.....837–9; disc. 1333 1941

Main Bus, Protection of the Airplane. Exner.....979–82 1949

Main Exciter Rototrol Excitation For Turbine Generators. Lynn, Valentine.....535–9; disc. 539 1948

Maintenance, Airline Aircraft Electric Equipment. Petrasek.....900–05 1944

Maintenance Essential to Transportation, Adequate Electrical. Clardy.....517–21; disc. 945 1943

Maintenance of Good Brush Performance. Kalb.....819–25; disc. 996 1945

Maintenance of Hydroelectric Generating Units, The. Robertson, Standing.....776–82 1947

Maintenance of Rectifiers on Electrochemical Installations. Housley, Hughes.....436–41; disc. 1115 1946

Maintenance of Shunt Capacitors, Report on the Operation and. (Committee Report).....1208–18 1949

Manholes and Vaults: Design and Ventilation, Transformer. Porter.....534–9 1949

Manual Switches for Aircraft. Millermaster.....596–8 1943

Manually-Operated Spring Mechanism for Medium Voltage Oilless Circuit Breakers, A. Wyman, Casey.....357–61; disc. 361 1949

Manufacture, and Installation of 120-Kv Oil-Filled Cables in Canada, Design. Farnham, Titus.....881–9; disc. 1074 1942
Manufacture and Testing of Wire and Cable, Statistical Methods as Applied to the. Woolfson.....752–4; disc. 754 1948
Manufacture, Critical-Material Conservation in Induction-Motor. Hobart.....549–52; disc. 927 1943
Manufacture of Aircraft Generators, Aids to Quality Control in the. Potter.....525–9; disc. 1358 1944
Manufacture of Lightning-Arrester Blocks, Statistics as an Aid to Engineering Judgment in the. Goffman.....607–10; disc. 966 1945
Manufacture of Soldered Porcelain Potheads, A New Technique in the. Papp, Nicholas. 1258–60; disc. 1261 1949
Manufacture, Statistical Methods Applied to Insulator Development and. Taylor.....495–9; disc. 952 1945
Manufacturing Methods, Radio-Frequency Cable. Odarenko...922–5 1945
Marine Propulsion Motors on Vibrations Produced in Drive Shafts by Large Propellers, Damping Effect of D-C. Litman.....31–7 1945
Marine Radar for Peacetime Use. Lynn, Winn.....271–3 1946
Marine Service, Design of D-C Auxiliary Controllers for. Schaelchlin..623–9 1946
Marine Transportation
Compensation of Effects of Degaussing Coils on Shipboard Magnetic Compasses by Use of Compass-Compensating Coils. Robinson.....1278–81 1948
Diesel-Electric Synchronous Motor Ship Drives-Propulsion Control Problems. Frisch.....660–6 1946
Effective Resistance and Inductance of 3-Conductor Shipyard Power Cables. Summers.....1345–50 1948
Electric Propulsion in Naval Surface Vessels. Jucarone.....1329–39; disc. 1340 1948
Fault Protection on Shipboard A-C Power-Distribution Systems. Rickover, Ross....1109–20; disc. 1429 1944
Functional Evaluation of Insulating Materials. Mathes.....1236–9; disc. 1240 1948
Magnetic Amplifiers for Naval Shipboard Applications. Buechler.....1241–5; disc. 1245 1948
Modern Cargo-Winch Control for Use on Victory Ships. Holt.....623–8; disc. 1411 1944
Overload Protection of Silicone-Insulated Motors for Shipboard Use. Grigg, Watkins.....1341–4; disc. 1344 1948
Selective Tripping Arrangements for Protection of Ship's A-C Electric Distribution Systems. Cole.....1256–62; disc. 1262 1948
Shipboard Degaussing Installations for Protection Against Magnetic Mines. Michel.....1270–5; disc. 1275 1948
Silicone Insulation in Submarines—Toxicity. Walker, Shea...1232–5 1948
Use of Propulsion Generators on Naval Vessels to Supply Shore Power. Anderson, Fifer.....1282–7; disc. 1287 1948
Ventilation of Rotating Electrical Equipment on Shipboard. Harrison.....1263–9; disc. 1269 1948
Mass Spectrometer, High Vacuum Leak Testing With the. Worcester, Doughty.....946–55; disc. 1170 1946
Matching Electrical Characteristics of McNary Generators and Transformers with Bonneville Power Administration Transmission System. Hoard, Weiner..1022–5; disc. 1026 1949
Material, A 60-Cycle Hysteresis Loop Tracer for Small Samples of Low-Permeability. Wiegand, Hansen..119–31; disc. 131 1947
Material Conservation in Induction-Motor Manufacture, Critical-. Hobart.....549–52; disc. 927 1943
Materials, Attenuators and Terminations for Microwaves, Attenuator. Teal, Rigterink, Frosch....419–28 1948
Materials, Functional Evaluation of Insulating. Mathes.....1236–9; disc. 1240 1948
Materials on the Welding Characteristics of Resistance Welding Machines, Influence of Magnetic. Riley, Smith...852–60; disc. 1160 1946
Materials, The Voltage Drop in the Welder Throat Loaded With Ferromagnetic. Stein.....356–62 1947
Materials Used in Tropical Service, Electrolytic Corrosion—Methods of Evaluating Insulating. Thompson, Mathes.....295–9; disc. 443 1945
Mathematical Models, A Study of A-C Arc Behavior Near Current Zero by Means of. Browne.....141–50; disc. 150 1948
Mathematics and Physics in Engineering. Malti.....38–40; disc. 43 1939
Mathematics and Physics in the Solution of Engineering Problems, Courses to Develop Facility in the Use of. Teare.....40–1; disc. 43 1939
Mathematics and Physics With Electrical-Engineering Subjects, Coordination of. Morgan.....42–3; disc. 43 1939
Mathematics and Physics With Electrical-Engineering Subjects, The Co-ordination of. Curry.....36–7; disc. 43 1939
Mathieu Equation, Solutions of the. Gray, Merwin, Brainerd...429–41 1948
Maximum Demand, Measurement of. Lincoln.....57–62; disc. 472 1942
Maximum Safe Operating Temperature for 15-Kv Paper-Insulated Cables. Franklin, Thomas. 556–60; disc. 560 1939
Maximum Utilization of Power and Facilities, The Automatic Welding-Machine Starter and Its Relation to. Porter.....728–30; disc. 996 1943
McNary Generators and Transformers with Bonneville Power Administration Transmission System, Matching Electrical Characteristics of. Hoard, Weiner..1022–5; disc. 1026 1949
Mean Distances, Theory and Application of Complex Logarithmic and Geometric. Higgins.....12–16 1947
Means on High Interrupting Capacity Controllers, The Use of Air-Core Reactors as Fault Limiting. Leitch.....469–74; disc. 474 1949
Measured Electrical Constants of 270-Mile 154-Kv Transmission Line. Streifus, Roadhouse, Gow.....538–42; disc. 1351 1944
Measurement and Control of Conductor Vibration. Tebo.....1188–93; disc. 1380 1941
Measurement and Effect of Contact Resistance in Spot Welding. Wyant.....26–33; disc. 513 1946
Measurement and Investigation of Ionization Level of Rubber Insulated Cables, The. Graham, Duffy, Foster.....1107–16; disc. 1116 1948
Measurement by Electrical Means, Stress. Kern, Williams....100–07 1946
Measurement of Acceleration With a Vacuum Tube, The. Ramberg.....735–40 1947
Measurement of A-C Resistance and Reactance of Large Conductors, Problems in the. Salter.....1390–6; disc. 1396 1948
Measurement of Body Currents, The. Schwab.....919–23 1941
Measurement of Dielectric Loss at High Frequencies and Under Changing Temperature, The. Whitehead, Rueggeberg.....520–4 1949
Measurement of High Q Cavities at 10,000 Megacycles. Lange.....161–6 1947
Measurement of Interference From Radio-Frequency Heating Equipment. Brown.....1102–06 1948
Measurement of Kilowatt-Hours, A Precision Rotating Standard for the. Goss, Hansen.....412–15; disc. 415 1940
Measurement of Large Alternating Currents, An Instrument for the. Richter.....38–40 1944
Measurement of Large Varying Currents, The. Johnson.....8–11; disc. 513 1946
Measurement of Lightning Currents in Direct Strokes, The. McCann.....1157–64; disc. 1370 1944
Measurement of Loss Under Rising Temperature, Dielectric Heating—. Whitehead.....947–9 1947
Measurement of Maximum Demand. Lincoln.....57–62; disc. 472 1942
Measurement of Railway-Motor Temperatures in Service. Teker.....545–50 1945
Measurement of Spot-Welding Current, The. Hess, Wyant, Muller.....349–53; disc. 353 1940
Measurement of Stray-Load Loss in Induction Motors. Ware.....194–7; disc. 433 1945
Measurement of Surge-Crest Voltages, Electronic. Bryant, Newman.....807–11; disc. 1093 1940
Measurement of Temperature in General-Purpose Squirrel-Cage Induction Motors. Potter.....468–72; disc. 472 1939
Measurement of the Ionization and De-Ionization Times of Thyratron Tubes, A Method for the. Birnbaum.....209–14 1948
Measurement of the Subtransient Impedances of Synchronous Machines. Tracy, Tice.....70–6; disc. 429 1945
Measurement of Very Short Time Lags. Bryant, Newman.....812–16; disc. 1094 1940
Measurement of Watts and Vars, An Amplifier-Wattmeter Combination for the Accurate. Brown, Cahoon.....593–7; disc. 597 1939
(Measurement) Polarity Limits of the Sphere Gap. McMillan.....56–9; disc. 59 1939
Measurement System for Aircraft, A Capacitance-Type Fuel-. Pearson.....1363–8 1947
Measurement, The Acceleration-Oscillogram Method of Motor-Torque. Atkinson, Downie...7–9; disc. 473 1942
Measurement—Tidd 500-Kv Test Lines, Instrumentation and. Tremaine, Lippert.....1624–30; disc. 1630 1947
Measurements
A High-Gain D-C Amplifier for Bioelectric Recording. Goldberg..60–4 1940
A New High-Speed Thermal Wattmeter. Miller...37–40; disc. 633 1941
A Polyphase Thermal Ampere-Demand Meter. Petsinger.....167–74 1947
A Proposed Method for the Determination of Current-Transformer Errors. Camilli, Ten Broeck.....547–50; disc. 1138 1940
A Simple Method for the Determination of Bushing-Current-Transformer Characteristics. Moreton.....581–5; disc. 948 1943
A Variable-Register-Ratio Watt-Hour Meter. Shuck.....76–8 1939

Anomalous Behavior of the Moving Systems of Single-Phase A-C Watt-Hour Meters at No Load, The. Holts....116–21; disc. 121 1940

Behavior of Pint Gaps at 60 Cycles. Lebacqz....44–8; disc. 651 1941

Bushing Tests. Brownlee, Wickham. ....940–2; disc. 1344 1941

Cathode-Ray Oscillograph Applied to Long-Time Switching Transients, The. Dunlap, Rohats. ....231–4; disc. 445 1943

Cathode-Ray Oscillograph With Rotating-Drum Camera, A. Downie. 984–6 1941

Computation of Accuracy of Current Transformers. Sinks. ....663–8; disc. 1252 1940

Crossed-Coil Power-Factor Meters. Millar....294–301; disc. 460 1944

Effect of Radio Frequencies of a Power System on Radio-Receiving Systems. Aggers, Pakala, Stickel. ....169–72; disc. 459 1943

Electrical Equipment Used in Reflection-Seismograph Prospecting. Nash, Palmer....855–60; disc. 860 1939

High-Potential Testing Equipment ment for Quantity Production. Summers....289–92; disc. 756 1941

Insulation Testing of Electric Windings. Foust, Rohats. ....203–06; disc. 454 1943

Metering With Transformer-Loss Compensators. Schleicher. ....851–61; disc. 861 1947

Parallel Circuits in Servo-Mechanisms. Marcy..521–9; disc. 1128 1946

Primary Detectors for Measurements. Lynch, Corson....843–53 1948

Sensitivity of the Four-Arm Bridge. Seletzky, Zurcher..723–8; disc. 728 1939

Some Recent Developments in Impulse-Voltage Testing. Foust, Rohats....257–62; disc. 262 1940

Surge-Voltage Breakdown Characteristics for Electrical Gaps in Oil. Sorensen....78–81; disc. 81 1940

Testing of Elevator Buffers by Electrical Means. Kimberly....53–4 1941

The Accuracy of Watt-Hour Meters on Intermittent Loads. Faucett, Keener, Helm...460–4; disc. 1184 1940

The A-C Dielectric-Loss and Power-Factor Method for Field Investigation of Electrical Insulation. Doble....934–9; disc. 1348 1941

The Determination of Magnitude and Phase Angle of Electrical Quantities. Walker...837–9; disc. 1333 1941

The "Speedomax" Power-Level Recorder. Clark....957–64 1940

Use of Bismuth-Bridge Magnetic Fluxmeter for A-C Fields. Smith. 52–5 1939

Vector-Response Indicator. Loughlin....355–7 1940

Volt-Time Areas of Impulse Spark-Over. Hagenguth. 803–10; disc. 1312 1941

Watt-Hour-Meter Performance With Power Rectifiers. Weller, Trekell, Stebbins....449–57; disc. 1184 1940

Measurements, A Direct Reading D-C Bridge for Microwave Power. Carlin, Blass....311–15 1948

Measurements, A High Precision Dynamometer for Small Motor. Duff. ....1344–8; disc. 1348 1947

Measurements, A Standard of Attenuation for Microwave. Grantham, Freeman....329–35 1948

Measurements, Advances in Technique of Lightning. Brownlee...515–19 1949

Measurements and Standards, Microwave Frequency. Husten, Lyons. 321–8 1948

Measurements at Carrier-Current Frequencies, Report on Method of. (Committee Report)....1429–32; disc. 1432 1948

Measurements at Radio Frequencies. Meahl, Michel, Scheldorf, Dickinson....654–9 1940

Measurements Between 20 and 20,000 Cycles, A Precision Electrothermic Voltmeter for. Hermach..1224–7 1948

Measurements During Reignitions and Recovery, Circuit-Breaker Current. Lewis....1253–7; disc. 1257 1947

Measurements for Rating of D-C Machines, Temperature Limits and. Compton....780–5 1943

Measurements, Functional Analysis of. Kinnard....987–95 1946

Measurements, Generalized Bridge Network for Dielectric. Balsbaugh, Howell, Dotson..950–6; disc. 1105 1940

Measurements in Lumped R-C Cable Circuits as Used in the Study of Transient Heat Flow, The Accuracy of. Paschkis, Heisler. ....165–71; disc. 426 1944

Measurements Made on Underground-Cable Overhead-Conductor 132-Kv Transmission Line at Carrier Current Frequencies, Loss. Cornelius, Storer....597–601 1949

Measurements of Capacitor Discharge Welding Transformers, Design and. Dietz, Stein....154–9; disc. 512 1946

Measurements of Erythemal Energy. Scott....725–29 1949

Measurements of Pre-Breakdown Currents in Dielectrics With a Cathode-Ray Tube. Race. ....854–8; disc. 1388 1941

Measurements on Aircraft-Engine Ignition Circuits, Electrical. Berkey.. ....49–53 1946

Measurements on Coil Surfaces, Accuracy of Temperature. Beede, Cain. ....586–90; disc. 590 1947

Measurements on Electrical Insulating Oils, Low-Voltage D-C. Oncley, Hollibaugh....625–8; disc. 1227 1940

Measurements on Electromagnetic Devices, Dynamic. Norton...151–6 1945

Measurements on Polyethylene and Rubber Cables, Corona-Initiation. Depackh....939–40 1945

Measurements on Telephone and Television Facilities, Pulse Echo. Abraham, Lebert, Maggio, Schott. ....541–8; disc. 548 1947

Measurements Pertaining to the Coordination of Radio Reception With Power Apparatus and Systems. Foust, Frick....284–91; disc. 455 1943

Measures of Electrical-Brush Disintegration, Some. Coover, Jones.... ....750–4 1943

Measuring Attenuation of Coaxial Radio-Frequency Cable, The S-Function Method of. Stewart.... ....616–19; disc. 966 1945

Measuring Commutation with an Indicating Instrument. Lundy. 1380–2 1949

Measuring Device, Fault-Current. Lantz....839–43 1946

Measuring Devices, Some Practical. Hunt....765–8 1940

Measuring Dielectric Properties at Ultrahigh Frequencies, A Resonant-Cavity Method for. Works, Dakin, Boggs...1092–8; disc. 1452 1944

Measuring Instrument for Direct Current, A New. Faus, Corson. ....683–6; disc. 1073 1940

Measuring Insulation Resistance at High Voltage, A Portable Instrument for. Atkinson, Taylor. ....164–7; disc. 428 1945

Measuring Radio Noise, Instruments and Methods of. Aggers, Foster, Young....178–87; disc. 187 1940

Measuring Static and Dynamic Pressures, An Electrical Engine Indicator for. Martin, Grinstead, Frawley....513–23; disc. 725 1941

Measuring Steady-State and Transient High Voltages, A Simple and Inexpensive Method for Accurately. Levinton....1304–10; disc. 1310 1947

Measuring Transformer Winding Temperatures Continuously with the Transformer Carrying Load. Lockie, Stein..1608–16; disc. 1616 1948

Mechanical and Hydraulic Conditions During Operation of Hydroelectric Units, Some Oscillographic Methods of Investigating. Engvall.... ....993–6 1949

Mechanical Design of High-Speed Turbogenerators, Some Factors in the. Mortensen, Ryan. ....51–6; disc. 56 1940

Mechanical Design, Tennessee Valley Authority Hydroelectric Stations—Electrical and. Hopkins, Petersen. ....920–31; disc. 1132 1946

Mechanical Deterioration of Cellulose Insulation, Factors Affecting the. Clark....742–9; disc. 991 1942

Mechanical Parameters of a Permanent-Magnet Movable-Coil Instrument Having a General Circuit, Relation Between Electrical and. Goodwin. 374–9 1948

Mechanical Simplicity of Air-Blast Circuit Breakers. Haberl, Jensen.... ....869–74; disc. 1355 1941

Mechanical Strength of Cellulose Insulation, Factors Influencing the. Clark....778–83; disc. 1321 1941

Mechanics and Servomechanisms, Application of the California Institute of Technology Electric Analog Computer to Nonlinear. McCann, Wilts, Locanthi....652–60 1949

Mechanism, Applications of the Electrodynamic Instrument. Corson, Millar....1131–6 1947

Mechanism for Magne-Blast Breaker, New Solenoid. Wyman, Keagy... ....268–74; disc. 448 1945

Mechanism for Medium Voltage Oilless Circuit Breakers, A Manually-Operated Spring. Wyman, Casey. ....357–61; disc. 361 1949

Mechanism for Oil Circuit Breakers, A Compressed-Air Operating. Cunningham, Hill...695–8; disc. 1019 1942

Mechanism for Outdoor Oil Circuit Breakers, A Pneumatic. Linde, Rietz....543–6; disc. 1428 1944

Mechanisms, A Bridge Method for Determining the Motional Characteristics of Permanent-Magnet Movable-Coil Instrument. Gilbert. 411–15 1948

Medium-, and High-Pressure Gas-Filled Cable, Low-. Shanklin. ....719–26; disc. 1021 1942

Medium-Capacity Air-Blast Circuit Breakers for Metal-Clad Switchgear. Bennett, Wyman. ....383–8; disc. 627 1941

Medium, Cooling Power Transformers by Forced Circulation of Cooling. Paluev, Burnham.215–21; disc. 445 1943

Medium-Voltage Lines, Minimum Insulation Level for Lightning Protection of. Ekvall..128–32; disc. 719 1941

Megacycles, Design of Mobile Radio Communication Equipment for Land-Mobile Services Operating on Frequencies Between 152–174. Beers, Harris, Zappacosta..1232–9 1949

Megacycles, Measurement of High Q Cavities at 10,000. Lange..161–6 1947

Megavolt-Ampere Air-Blast Circuit Breaker for 138,000-Volt Service, A Three-Cycle 3,500-. Byrd, Beall. ....229–32; disc. 463 1945

Memory, An Automatic Oscillograph With a. Zarem..150–4; disc. 514 1946

Men, Study of Artificial Respiration on Anesthetized Men. Kouwenhoven, Hooker, York..1–2; disc. 446 1944

Mercury-Arc Frequency Converter for Induction Heating of Metals. Durand, Rice....1592–9 1948
Mercury-Arc Power Converters in North America. (Committee Report)....1031–59 1948
Mercury-Arc-Rectifier Anode Circuits and Its Relation to the Arc-Back Problem, A New Multiple High-Speed Air Circuit Breaker for. Seaman, Morton....788–96; disc. 1057 1942
Mercury-Arc Rectifiers, "Excitron." Marti....927–31; disc. 1168 1940
Mercury-Arc Rectifiers for Railroads, Watkins....84–6; disc. 419 1945
Mercury-Arc Rectifiers for Traction Service, Glass-Bulb. Woolgar....843–6; disc. 1383 1941
Mercury-Arc Rectifiers in the Coal-Mining Industry. Renshaw....242–4; disc. 244 1940
Mercury-Arc Rectifiers, Phase Occurrence of Arc-Backs in High-Current. Pakala, Batten....345–7 1940
Mercury-Arc Rectifiers, The Testing of. Kellogg, Herskind....765–73; disc. 960 1943
Mercury-Arc Rectifiers, Voltage Control of. McDonald....563–6; disc. 566 1939
Mercury in Mercury-Arc Tubes, Condensation of. Slepian, Brubaker....381–4 1940
Mercury Rheostatic Element for Regulation and Control, A New. Oplinger....846–9; disc. 1386 1941
Metal Aircraft, Radio Noise Elimination in All-. Foulon..877–91; disc. 994 1943
(Metal) Causes and Effects of Stray Electric Currents in Coal Mines. Harrison....1759–61 1948
Metal-Clad Switchgear, Medium-Capacity Air-Blast Circuit Breakers for. Bennett, Wyman..383–8; disc. 627 1941
Metal-Clad Switchgear Unit, A New 50,000-Kva 5-Kv Oilless Circuit-Breaker and. Dickinson, Hayford....302–06; disc. 434 1943
Metal-Clad Unit-Type Switchgear for 33-Kv Service. Kreger....360–8; disc. 569 1946
(Metal) Electric Equipment for Power Shovels and Draglines. Schwedes, Stoetzel....1498–1506; disc. 1507 1948
Metal-Enclosed Bus and Switch Structure, Station "C," Oakland, Pacific Gas and Electric Company, 12-Kv. Benson, Strang..751–5; disc. 1080 1940
Metal-Enclosed Bus Designed for High-Capacity Generating Stations, A New Isolated-Phase. Wyman, Shores....699–703; disc. 703 1948
(Metal) Evolution of Ward-Leonard Control for Shovels and Draglines. Stevens....1491–7 1948
(Metal Industry) An X-Ray Thickness Gauge for Hot-Strip Rolling Mills. Clapp, Pohl....620–6 1948
(Metal) Power Distribution and Utilization in a Large Iron Ore Beneficiation Plant. Gettelman...1726–32 1948
Metal Surfaces, Effect of Lightning on Thin. McEachron, Hagenguth....559–64; disc. 1013 1942
Metallic and Carrier, Telemetering Circuits—. Bostwick....1081–6; disc. 1086 1948
Metallic Halides, Treatment of High-Altitude Brushes by Application of. Elsey....576–9 1945
Metals by Electromagnetic Forces, Treatment and Casting of. Hoke....986–92 1944
Metals, Mercury-Arc Frequency Converter for Induction Heating of. Durand, Rice....1592–9 1948
Meter, A New Thermal Volt-Ampere Demand. Douglass, Morong....79–83; disc. 83 1949
Meter, A Polyphase Thermal Ampere-Demand. Petzinger....167–74 1947
Meter, A Variable-Register-Ratio Watt-Hour. Shuck....76–8 1939
Meter and Speed Regulator, An Electronic Frequency. Levin....779–86; disc. 1181 1946
Meter Bearings, Effect of Sapphire-Crystal Orientation on the Wear of Watt-Hour-. Goss....811–14; disc. 1336 1941
Meter Calibrations, A Study of Wave Shapes for Radio-Noise-. Frick....890–901; disc. 969 1945
Meter for Commercial Power Frequencies, An Improved Frequency. Knudsen....866–9; disc. 1334 1941
Meter Performance With Power Rectifiers, Watt-Hour-. Weller, Trekell, Stebbins....449–57; disc. 1184 1940
Meter Rotor, Magnetic Suspension of the Watt-Hour. Trekell, Mendelsohn, Wright...1180–5; disc. 1185 1948
Meter, Surge Protection in a Modern Watt-Hour. Busch, Williams....74–7; disc. 77 1949
Meter-Testing Technique, Improvement in Modern. Lynch, Princi....218–23 1942
Meter Testing Techniques, Thermal-Demand. Lynch, Douglas....124–8; disc. 514 1946
Meter, Theoretical Possibilities in an Internally Heated Bimetal Type of Thermal Watt-Demand. Lynch....764–70; disc. 986 1942
Meter Time Periods, Demand-. Lincoln, Sprole....728–33; disc. 733 1939
Metering Combinations, Relative Accuracy of Three-Phase. Weller....925–9; disc. 1336 1941
Metering, Orthomagnetic Bushing Current Transformer for. Boyajian, Camilli....137–40; disc. 427 1945
Metering Power on the Low-Voltage Side. Petzinger, Lenehan....159–63; disc. 406 1943
Metering With Transformer-Loss Compensators. Schleicher....851–61; disc. 861 1947
Meters, Aluminum-Nickel-Cobalt Brake Magnets for Watt-Hour. Green....791–6; disc. 796 1939
Meters at No Load, The Anomalous Behavior of the Moving Systems of Single-Phase A-C Watt-Hour. Holtz....116–21; disc. 121 1940
Meters, Braking Magnets for Watt-Hour. Kinnard, Goss....431–9; disc. 653 1941
Meters, Crossed-Coil Power-Factor. Millar....294–301; disc. 460 1944
Meters, Heat Flow Ratio as a Design Parameter in Thermal Demand. Nelson....885–90; disc. 890 1949
Meters, Magnetic Fields in Watt-Hour. Keener, Faucett, Helm....202–05 disc. 758 1941
Meters on Intermittent Loads, The Accuracy of Watt-Hour. Faucett, Keener, Helm...460–4; disc. 1184 1940
Method, A Simplified Double-Film Klydonograph With an Improved Coupling. Waghorne....1114–16; disc. 1116 1947
Method, Biased-Core-Current Transformer Design. Specht....635–40 1945
Method, Bushing and Associated Insulation Testing by the Power-Factor. Baltsly, Schlottere....308–12; disc. 744 1941
Method, Die Cast Rotor Testing by Test Stator. Trickey..139–41; disc. 483 1946
Method, Dynamic Brush Characteristics by the Dynamotor. Herman....759–63 1947
Method, Field Tests of Oil Circuit Recloser Substantiate Analytical Coordination. Auer, Branflick, Woodward, McKinley..801–08; disc. 808 1949
Method for Accurately Measuring Steady-State and Transient High Voltages, A Simple and Inexpensive. Levinton....1304–10; disc. 1310 1947
Method for A-C Network Analysis Using Resistance Networks. Enns....875–80; disc. 1069 1942
Method for Capacitor Start Motors, A Design. Chang....1369–74 1947
Method for Correlating Duty-Cycle Tests on Solenoids, A. Ryan....579–81; disc. 945 1943
Method for Designing Pulse Transformers, A. Kirschbaum, Warren....971–8 1949
Method for Detecting the Ionization Point on Electrical Apparatus, A. Quinn....680–2; disc. 1229 1940
Method for Determination of Ratio Error and Phase Angle in Current Transformers, A Simple. Wentz....949–54; disc. 1369 1941
Method for Determining Efficiencies of Electric Machines, Calorimetric. Siegfried, Thulin....530–2 1942
Method for Determining Generator Reserve, A Convenient. Seelye....1317–20 1949
Method for Determining the Motional Characteristics of Permanent-Magnet Movable-Coil Instrument Mechanisms, A Bridge. Gilbert....411–15 1948
Method for Determining the Normal Modes of Foster's Reactance Networks, A. LePage....674–8 1943
Method for D-C Machines, A Design. Beers, Karr....172–5; disc. 497 1944
Method for Estimating the Performance of Distance Relays During Faults and Power Swings, Graphical. Warrington....608–20; disc. 620 1949
Method for Evaluating Determinants and Solving Systems of Linear Equations With Real or Complex Coefficients, A Short. Crout....1235–41 1941
Method for Introducing Relaxed Initial Conditions in Transient Problems, A New. Johnson....178–81 1941
Method for Objective Testing of Bone Receivers and Throat Microphones, Laboratory. Greibach....184–7 1946
Method for Studying Them, Galloping Conductors and a. Tornquist, Becker....1154–61; disc. 1161 1947
Method for the Determination of Bushing-Current-Transformer Characteristics, A Simple. Moreton....581–5; disc. 948 1943
Method for the Determination of Current-Transformer Errors, A Proposed. Camilli, Ten Broeck....547–50; disc. 1138 1940
Method for the Measurement of the Ionization and Deionization Times of Thyratron Tubes, A. Birnbaum....209–14 1948
Method, Generating Reserve Capacity Determined by the Probability. Calabrese....1439–50 1947
Method of Approach to the Consideration of Power-Distribution-System Costs, A. Falls....1078–84; disc. 1377 1944
Method of Calculating Fault Currents on Rural Distribution Systems, Graphical. Linder....16–19; disc. 446 1945
Method of Calculating Single-Phase Motor Performance, The Apparent-Impedance. Morrill....1037–41 1941
Method of Calculating Stability, The Transient-Energy. Magnusson....747–55; disc. 755 1947
Method of Computing Thermal Transients, Simplified Graphical. Narbutovskih....78–81; disc. 82 1947

Method of Designing Capacitor Motors, The Equal-Volt-Ampere. Trickey.....990–2; disc. 1399 1941
Method of Estimating Telephone-Influence Factor of Power Systems With Rectifier Load, A Short-Cut. Frick.....91–6 1944
Method of Measurements at Carrier-Current Frequencies, Report on. (Committee Report).....1429–32; disc. 1432 1948
Method of Measuring Attenuation of Coaxial Radio-Frequency Cable, The S-Function. Stewart.....616–19; disc. 966 1945
Method of Motor-Torque Measurement, The Acceleration-Oscillogram. Atkinson, Downie.....7–9; disc. 473 1942
Method of Power Network Analysis, The General Solution. Dunstan.....631–8; disc. 638 1948
Method of Selecting Inherent Overheat Protectors Based Upon Motor Design Information, A. Vaughan.....1023–9; disc. 1030 1948
Method of Wave Analysis, A Cathode-Ray. Johnson..1032–6; disc. 1398 1941
Methods Applied to Frequency Response Curves, Control Chart. Mundel.....424–7 1949
Methods Applied to Generating Capacity Problems of a Combined Hydro and Steam System, Probability. Loane, Watchorn.....1645–54; disc. 1654 1947
Methods Applied to Insulator Development and Manufacture, Statistical. Taylor.....495–9; disc. 952 1945
Methods Applied to Servomechanism Problems, Electrical Analogy. McCann, Herwald, Kirschbaum.....91–6; disc. 515 1946
Methods as Applied to Distribution Transformers, Impulse-Failure-Detection. Stewart, Holcomb.....640–44; disc. 956 1945
Methods as Applied to the Manufacture and Testing of Wire and Cable, Statistical. Woolfson.....752–4; disc. 754 1948
Methods, Experience with Transformer Impulse Failure Detection. Aicher.....1621–7; disc. 1627 1948
Methods for Cable Carrier Systems, New Test Equipment and Testing. Tidd, Rosen, Wenk.....726–30 1947
Methods for Determining the Effects of Contaminants on Electrical Insulation. Mathes, Sieffert, Walker, Lindsey.....113–18; disc. 118 1949
Methods for Intermittent Loads, Analysis of Rating. Hellmund.....4–7 1943
Methods in the Development of Apparatus Life Quality, Statistical. Ferrell.....700–03; disc. 998 1945
Methods of Analysis of Results to Research Problems in Magnetic Recording, Application of Experimental Test Procedures and. Thompson.....407–17 1949
Methods of Controlling Radio Interference. Aggers..193–9; disc. 199 1940
Methods of Determining Natural Frequencies in Coils and Windings. Bewley, Hagenguth, Jackson.....1145–50; disc. 1361 1941
Methods of Evaluating Insulating Materials Used in Tropical Service, Electrolytic Corrosion—. Thompson, Mathes.....295–9; disc. 443 1945
Methods of Extending a Carrier Current Relay Channel to Other Uses, Possibilities and. Smith, Goldsborough.....23–7; disc. 645 1941
Methods of Investigating Mechanical and Hydraulic Conditions During Operation of Hydroelectric Units, Some Oscillographic. Engvall.....993–6 1949
Methods of Measuring Radio Noise, Instruments and. Aggers, Foster, Young.....178–87; disc. 187 1940
Methods of Solving Discrete Nonlinear Problems in Electrical Engineering, Analytical. Keller.....1194–1200; disc. 1389 1941
Methods of System Control in a Large Interconnection. Wild.....232–6; disc. 737 1941
Metropolitan Area, A 66-Kv Subtransmission Plan for a. Smith, Michelson.....908–12; disc. 912 1949
Metropolitan Edison Company, Operating Experience With Petersen Coils on 66-Kv System of. Rankin, Neidig.....568–73; disc. 573 1939
Metropolitan Electric System, Planning the Development of a. Waring.....1467–72; disc. 1472 1948
Metropolitan Electrical System From the Viewpoint of Possible Major Shutdowns, The Design and Operation of a. Dean.575–9; disc. 1150 1940
Metropolitan Power System, Restoration of Service on a. Bryson, Hayward.....563–70; disc. 1153 1940
Metropolitan System After Complete Shutdown, Restoration of Service From Large. Dryar, Bailey.....571–4; disc. 1154 1940
Metropolitan System, Pilot-Wire Relaying on a. LeClair, Michelson.....511–15; disc. 974 1943
Mexico, Hydroelectric Potentiality of. Quintero.....993–4 1948
Mexico, Power Development in. Urquidi, Del Busto, Lozano....841–2 1948
Mexico's Hydraulic Resources Through Multiple Purposes, Full Utilization of. Alba.....989–92 1948
MHO-Carrier Relaying Scheme, The. Cordray, Warrington.....228–35; disc. 434 1944
Mho Distance Relay, The. Hutchinson.....353–60 1946
Mho Principles to Protective Relays, Application of the Ohm and. Warrington.....378–86; disc. 490 1946
Mica as Used in Conjunction With Class "B" Insulation, Temperature Limits and Characteristics of. Spry.....287–9 1939
Mica Capacitors for Carrier Telephone Systems. Christopher, Kater.....670–4; disc. 1116 1946
(Mica) Electrical Properties of Ceramics as Influenced by Temperature. Lindsay, Berberich.....734–41; disc. 741 1948
Mica Quality Electrically, Judging. Coutlee.....735–41 1945
Microphones, Inertia Throat. Greibach, Pacent.....187–91 1946
Microphones, Laboratory Method for Objective Testing of Bone Receivers and Throat. Greibach.....184–7 1946
Microscope for Practical Laboratory Service, An Electron. Zworykin, Hillier, Vance.....157–62 1941
Microwave Channels for Power System Applications. (Committee Report).....40–2; disc. 42 1949
Microwave Communication Relay System, A. Boothroyd, Churchill.....637–41 1949
Microwave Frequency Measurements and Standards. Husten, Lyons.....321–8 1948
Microwave Instrument Landing System, The CAA-MIT. Bowles, Barrow, Hall, Lewis, Kerr.....859–65; disc. 1120 1940
Microwave Measurements, A Standard of Attenuation for. Grantham, Freeman.....329–35 1948
Microwave Power Measurements, A Direct Reading D-C Bridge for. Carlin, Blass.....311–15 1948
Microwave Radar Testing, Techniques and Facilities for. Green, Fisher, Ferguson.....274–90 1946
Mobile Radio Communication Equipment for Land-Mobile Services Operating on Frequencies Between 152–174 Megacycles, Design of. Beers, Harris, Zappacosta..1232–9 1949
Microwave Radio Relay System, A Multichannel. Black, Beyer, Grieser, Polkinghorn.....798–806 1946
Microwave Relay Systems, Power Supplies for. Ward.....631–6 1949
Microwave Television System, A New. Wentz, Smith.....465–70 1947
Microwaves, Attenuator Materials, Attenuators and Terminations for. Teal, Rigterink, Frosch....419–28 1948
Middletown, Pa., Linear Couplers—Field Tests and Experience at York and. Harder, Klemmer, Neidig.....107–13 1946
Military Aircraft, Basic Design Principles for A-C Electric-Power Systems in Large. Chappuis, Olmsted.....12–17; disc. 487 1946
Military Aircraft, 400-Cycle Inverters for. Hayes, Ray.....233–7 1945
Military Aircraft, Radio-Noise Elimination in. Weinstein, Howell, Lowe, Winter.....793–5; disc. 1466 1944
Military Communications, Systems Development of. Putnam.....757–61; disc. 1160 1946
Military Teletypewriter Systems of World War II. Singer..1398–1408 1948
Military-Training Bases, Federal Housing, and Other Wartime Projects, Estimating Electric Loads for. Potts.....246–54; disc. 463 1943
Mill Preset Screw-Down Controllers, Improvements in Rolling. Leitch, Schurr.....58–63 1948
Milling Machine, Application of Electric Equipment for Ship-Propeller. Morton, Rutemiller.....205–08; disc. 453 1945
Milling Machine, Tracer-Controlled Position Regulator for Propeller. Hanna, Osbon, Hartley.....201–05; disc. 452 1945
Mills, An X-Ray Thickness Gauge for Hot-Strip Rolling. Clapp, Pohl.....620–6 1948
Mills, Electric Drives for Supercalenders in Paper. Smith.....338–41; disc. 341 1939
Mills, Electric Equipment for Cold Strip Reduction. Miller.....133–9; disc. 139 1948
Mills, The Reversing Cycle of Modern Blooming. Montgomery, Sellers.....1508–13; disc. 1513 1948
Mine Haulage, Modern Electric Locomotives in Open-Pit. Borland, Riley.....52–8; disc. 433 1944
Mines, Causes and Effects of Stray Electric Currents in Coal. Harrison.....1759–61 1948
Mines, Electrification of Large Open-Pit Copper. Birch 30–8; disc. 433 1944
Mines, Shipboard Degaussing Installations for Protection Against Magnetic. Michel...1270–5; disc. 1275 1948
Mingled Hydro and Steam Power Production in California—Past, Present, and Future. Markwart.....775–82; disc. 1077 1940
Minimum Insulation Level for Lightning Protection of Medium-Voltage Lines. Ekvall..128–32; disc. 719 1941
Mining
A New Grinding Circuit Feed Regulator. Jones.....1240–2 1947
Electric Equipment for Power Shovels and Draglines. Schwedes, Stoetzel.....1498–1506; disc. 1507 1948
Evolution of Ward-Leonard Control for Shovels and Draglines. Stevens.....1491–7 1948

Power Distribution and Utilization in a Large Iron Ore Beneficiation Plant. Gettelman.....1726–32 1948
Trends in Electrification of American Steel Industry. Umansky..784–95 1948
Mining, Utilization of Electric Power in Open-Pit Copper. French, Speight.....956–66; disc. 966 1948
Misfire Indication Circuits, Ignitor Excitation Circuits and. Mittag, Schmidt.....575–7; disc. 1061 1942
Mobile Capacitor Units for Emergency Loading of Transformers in Open Delta. Wolf, Mattison.....83–6; disc. 373 1943
Mobile Radio. Bailey.....923–31; disc. 932 1948
Mobile Radio Systems, Vibrating Reed Selectors for. Keller, Bostwick.....383–6 1949
Mobile Telephone System, General. Romnes, O'Connor.....1658–66 1947
Mobile Telephone Use, Vibrating Reed Selective Signaling System for. Pruden, Hoth.....387–91 1949
Mobility of Ions on Dielectric Loss of Insulating Oils, The Influence of the Concentration and. Kang.....403–07; disc. 1132 1946
Model Suspension System, Electric Equipment Required in a Modern 6-Component Wind-Tunnel. Cox.....1258–66 1947
Models, A Study of A-C Arc Behavior Near Current Zero by Means of Mathematical. Browne.....141–50; disc. 150 1948
Models, Determination of Cable Temperatures by Means of Reduced-Scale. Gemant, Sticher:
Part I.....475–82; disc. 1128 1946
Part II.....28–33; disc. 34 1948
Modern Aircraft, Ground Power Supply for. Owen, Murray, Rosenstein.....1296–1303 1947
Modern A-C Network Calculator, The. Parker.....977–82; disc. 1395 1941
Modern Bearing Practice for Vertical Water Wheel Generators. Laffoon, Baudry.....363–9; disc. 369 1947
Modern Blooming Mills, The Reversing Cycle of. Montgomery, Sellers.....1508–13; disc. 1513 1948
Modern Car Equipment for New York City's Subway System. Cordts.....247–9; disc. 250 1947
Modern Cargo-Winch Control for Use on Victory Ships. Holt.....623–8; disc. 1411 1944
Modern Diesel-Electric Drilling Rig Equipment. Rhea.....447–53 1946
Modern Double-Reduction Traction Motor. Greer, Lanier.....471–4 1946
Modern Electric Locomotives in Open-Pit Mine Haulage. Borland, Riley.....52–8; disc. 433 1944
Modern Electric-Power Distribution Ideas as Applied in a Large War Plant. Kaufmann, Kieb.....279–87; disc. 488 1945
Modern Electrical Equipment for Industrial Diesel-Electric Locomotives. Greer.....229–32; disc. 400 1942
Modern Excitation Systems for Large Synchronous Machines. McClure, Whittlesey, Hartman.....939–45; disc. 1148 1946
Modern Excitation Systems for Synchronous Condensers and Generators, The Development of. Porter, Kinghorn.....1020–7; disc. 1156 1946
Modern Impulse Generators for Testing Lightning Arresters. Brownlee.....539–44; disc. 984 1942
Modern Meter-Testing Technique, Improvement in. Lynch, Princi.....218–23 1942
Modern Motive Power for the Sorocabana Railway. Chapman, Kjolseth.....558–62 1944
Modern Motors Serve City Transit Systems. Clardy, Atwell.....850–4 1941
Modern Practice in Power-Plant Auxiliary Equipment and Systems. Muller.....868–72; disc. 976 1945
Modern Rail Transport. Wright.....1306–12; disc. 1247 1940
Modern Railway Passenger-Car Auxiliary-Power Equipment. MacLeod, Hause.....930–8 1947
Modern Relaying for A-C Secondary Network Systems. Beeman.....237–41; disc. 683 1941
Modern Service, High-Voltage Bushings Designed to Meet. Brandt, Rorden.....255–60; disc. 696 1941
Modern Techniques in Ocean Cable Telegraphy, Some. Cramer.....494–500; disc. 500 1947
Modern Trends in Hydraulic Turbine Design. Rheingans.....1075–80 1948
Modern Trends of Low-Voltage Air Circuit Breakers. Seaman.....24–29; disc. 29 1940
Modern Watt-Hour Meter, Surge Protection in a. Busch, Williams.....74–7; disc. 77 1949
Modernization and Faster Fault Clearing on Single-Phase Electrified Railroad, Circuit Breaker. Brown, Travers, Wood..705–13; disc. 713 1948
Modernization of a Transit System—Factors That Determine the Choice of Vehicle. Hoard.....292–303; disc. 303 1940
Modernization of L Street Station Switch-House, Boston Edison Company. Corney, Edson.....770–8; disc. 778 1939
Modernization of Switch-House Design. Strang, Hanna...747–51; disc. 778 1939
Modernization of Switch-House Design, Consolidated Edison Company of New York, Inc. de Bellis.....752–60; disc. 778 1939
Modes of Foster's Reactance Networks, A Method for Determining the Normal. LePage.....674–8 1943
Modulated Carrier Telegraph System, Frequency-. Bramhall, Boughtwood.....36–9 1942
Modulated-Frequency System of Telemetering, A. Renfro, Peterson.....45–7 1945
Modulation, Distortion and Band-Width Characteristics of Pulse. Krauss, Ordung.....984–8 1947
Modulation for Power-Line Carrier Current, Frequency. Kenefake.....616–20; disc. 953 1943
Modulation, Frequency. Everitt.....613–25 1940
Modulation, Frequency-Modulation, and Single-Side-Band Systems for Power-Line Carrier Transmission, A Comparison of the Amplitude-. Cheek.....215–20; disc. 450 1945
Modulation in Communication. Cowan.....792–6 1947
Modulation, Pulse Code. Black, Edson.....895–9 1947
Modulation Receiver Design Trends, Frequency. Young.....1514–19 1948
Modulation System, Distortion in a Pulse Count. Clavier, Panter, Grieg.....989–1005; disc. 1005 1947
Modulation Telegraph Terminal Without Relays, A Frequency. Cusack, Michon.....1165–70; disc. 1170 1947
Modulation to Wide-Band Frequency-Modulated Television Relays, The Application of Heterodyne. Boothroyd.....1126–30 1947
Modulators in Carrier Telephone Systems, Copper-Oxide. Caruthers.....253–60 1939
Moisture Equilibrium Between Gas Space and Fibrous Materials in Enclosed Electric Equipment. Piper.....791–7; disc. 1152 1946
Moisture in Soil, The Thermal Movement of. Mickley.....330–3; disc. 333 1949
Moisture, Motor Insulation, Heat, and. McAuley.....707–12 1942
Molybdenum Permalloy for High-Quality Inductance Coils, Compressed Powdered. Legg, Given.....865–72; disc. 1131 1940
Montreal, Canada, Electrification and Signaling of the Canadian National Railways Terminal. Gage.....41–4; disc. 417 1945
Motional Characteristics of Permanent-Magnet Movable-Coil Instrument Mechanisms, A Bridge Method for Determining the. Gilbert..411–15 1948
Motive Power, Factors Involved in the Selection of Railroad. Wilcox, Oehler.....235–40; disc. 411 1943
Motive Power for Operations in the Pacific Northwest, Comparison of Railway. Martin.....1054–65; disc. 1189 1946
Motive Power for the Sorocabana Railway, Modern. Chapman, Kjolseth.....558–62 1944
Motive Power on the Great Northern Railway Electrification, Comparative Operating Results of Steam, Diesel-Electric, and Electric. Gaynor.....231–4; disc. 234 1948
Motive Power Operation in the Pacific Northwest, The Present Competitive Position of Coal, Residual Oil, Diesel Oil, and Electricity as Energy Sources for. Martin....1664–9 1948
Motive Power, The Renaissance of Electric. Candee.....138–44 1949
Motor, A 400-Cycle Aircraft. Schwandt.....508–12; disc. 948 1945
Motor, A Generalized Circle Diagram for a Four-Terminal Network and Its Application to the Capacitor Single Phase. Tarboux.....881–9; disc. 943 1945
Motor—Advances Which Permit Economical Fractional Horsepower Ratings, The Hysteresis. Roters.....1419–30; disc. 1430 1947
Motor and Load, Industrial Control: Dynamic Braking of a D-C Shunt. Leland, Rader.....472–6 1943
Motor Characteristics at High Slip, Induction-. Morgan, Brown, Schumer.....464–8; disc. 1208 1940
Motor Control for Latest New York Transit System Subway Cars. Riley.....900–03 1947
Motor Control, Inverter Action on Reversing of Thyratron. Palmer, Leigh.....175–84; disc. 494 1944
Motor Control, Thyratron. Moyer, Palmer.....706–12; disc. 962 1943
Motor, Current Loci for the Capacitor. McFarland.....152–6 1942
Motor Design Information, A Method of Selecting Inherent Overheat Protectors Based Upon. Vaughan.....1023–9; disc. 1030 1948
Motor Design—Polyphase-Induction-Motor Design to Meet Fixed Specifications, Some Aspects of Electric-. Lloyd.....14–20; disc. 498 1944
Motor Design—The Design and Properties of the Magnetic Circuit, Some Aspects of Polyphase. Lloyd, Stone.....812–18; disc. 1151 1946
Motor Drive, Theory of Rectifier—D-C. Vedder, Puchlowski.....863–70; disc. 960 1943
Motor-Driven Exciters for Turbine Alternators. Bodine, Crary, Rankin.....290–7; disc. 515 1946
Motor Drives, Rotating Stability Regulators for Synchronous. Schaelchlin.....884–7; disc. 887 1947
Motor, Dynamic Braking by Self-Excitation of Squirrel-Cage. Srinivasan, Thomas.....145–8 1947

Motor, Dynamic Braking of a Single D-C Series. Leitch.....149–54 1947
Motor, Dynamic Characteristics of a Single-Phase Induction. Kurtz.....801–06; disc. 1096 1940
Motor Hunting, Oscillographic Study of Synchronous. Kurtz....647–52 1948
Motor, Impedance Relationships of the Adjustable-Speed A-C Brush-Shifting. Baumann.....1460–2 1947
Motor, Industrial Control—Shunted-Armature Connection for a D-C Shunt. Leland, Rader.....617–19; disc. 1410 1944
Motor Insulation, Heat, and Moisture. McAuley.....707–12 1942
Motor, Investigation of Silicone Insulation on High-Temperature Railway. Grant, Kauppi, Moses.....305–10; disc. 310 1947
Motor, Leakage Reactance of the Squirrel Cage Rotor With Respect to the Stator Harmonics and the Equivalent Circuit of the Induction. Liwschitz.....1407–08 1947
Motor Manufacture, Critical-Material Conservation in Induction-. Hobart.....549–52; disc. 927 1943
Motor Measurements, A High Precision Dynamometer for Small. Duff.....1344–8; disc. 1348 1947
Motor, Modern Double-Reduction, Traction Motor. Greer.....471–4 1946
Motor, Origin of the Electric. Michalowicz.....1288–92 1948
Motor Performance, An Application of Deceleration Test Methods to the Determination of Induction. Ager.....72–6 1939
Motor Performance Calculation, Single-Phase Induction. Himebrook.....55–8; disc. 666 1941
Motor Performance, The Apparent-Impedance Method of Calculating Single-Phase. Morrill....1037–41 1941
Motor, Precision Speed Control for World's Largest Induction. Longwell, Reagan....634–8; disc. 1050 1942
Motor Protection, Principles of Aircraft Electric-. Vaughan.....760–5; disc. 1943
Motor Rating, Duty Cycles and. Hildebrand.....478–83; disc. 483 1939
Motor, (Schrage Type), The Circle Diagram of the Polyphase Brush-Shifting Commutator. Franklin.....1667–72; disc. 1672 1947
Motor Selection for Brass-Slab Rolling-Mill Service, An Analysis of. Berkley.....185–9; disc. 189 1947
Motor Ship Drives—Propulsion Control Problems, Diesel-Electric Synchronous. Frisch.....660–6 1946
Motor Standards; Their Effect on Refrigeration and Pump Applications, New NEMA Fractional-Horsepower. Potter.....508–10 1947
Motor Starting and Speed Control, Theory and Design of NEMA Resistors for. Armstrong....277–81 1940
Motor Stators, Temperature-Aging Tests on Class-A-Insulated Fractional-Horsepower. Scott, Thompson.....499–501; disc. 977 1942
Motor, Symmetrical Components as Applied to the Single-Phase Induction. Suhr.....651–6; disc. 958 1945
Motor Systems, Electronic Constant-Current. Livingston.....425–30; disc. 430 1947
Motor, Synchronous Starting of Generator and. Concordia, Crary, Kilbourne, Weygandt.....629–34; disc. 956 1945
Motor Temperature Rise, Complete Analysis of. Felix, Jungk.....578–86; disc. 684 1941
Motor Temperatures in Service, Measurement of Railway-. Teker.....545–50 1945
Motor Tests Evaluate Thermal Endurance of Class-H Insulation and Silicone Varnish. Grant, Kauppi, Moses, Gibson.....1133–8 1949
Motor, The Cross-Field Theory of the Capacitor. Puchstein, Lloyd.....58–62; disc. 667 1941
Motor, The Equivalent Circuit of the Capacitor. Chang.....631–40 1947
Motor, The Field Fluxes of the Shaded-Pole. Kimberly.....273–7 1949
Motor Theory—a Correlation of the Cross-Field and Revolving-Field Concepts, Single-Phase. Button.....507–12; disc. 664 1941
Motor, Theory of the Brush-Shifting A-C. Conrad, Zweig, Clarke:
Part I.....829–34 1941
Part II.....834–36 1941
Part III.....502–06 1942
Part IV.....507–13 1942
Motor-Torque Measurement, The Acceleration-Oscillogram Method of. Atkinson, Downie...7–9; disc. 473 1942
Motor Torque, Theory of Hysteresis-. Teare.....907–12; disc. 1208 1940
Motor, Turn Ratio of the Capacitor. McFarland.....892–8 1943
Motor Vehicle Power Systems, Selenium Rectifiers in. Ramsey.....149–53; disc. 153 1949
Motored Appliances, Design Factors Involved in the Design of Domestic. Packer.....500–07; disc. 665 1941
Motors, A Design Method for Capacitor. Lloyd, Chang.....651–7; disc. 657 1947
Motors, A Design Method for Capacitor Start. Chang.....1369–74 1947
Motors, A Generalized Equivalent Circuit in the Theory of Polyphase Commutator. Coulthard..423–31 1941
Motors, Adjustable Frequency Control of High-Speed Induction. Heumann.....719–25 1947
Motors, Advantages of High-Speed Traction. Atwell.....508–10 1943
Motors and Generators, Solid Short Circuit of D-C. Linville, Ward.....119–23; disc. 123 1949
Motors and Generators, Transient Characteristics of D-C. McClinton, Brancato, Panoff.....1100–06 1949
Motors and Generators, Transients in A-C. Smith.....61–9 1946
Motors, Application of Capacitors for Power-Factor Improvement of Induction. Bloomquist, Boice.....274–8 1945
Motors, Armature Iron Losses in Series. Chang, Karr.....262–4; disc. 264 1949
Motors Automatically, Two New Methods of Accelerating Electric. Leitch.....487–93; disc. 655 1941
Motors, Behavior Factors of Rectifier-Driven D-C. Siegfried.....530–3; disc. 1357 1944
Motors by Means of Unbalanced Primary Voltages, Control of Slip-Ring. Schmitz.....1103–1112; disc. 1112 1947
Motors—Calculation of Stability Limit, Dynamic Braking Control of D-C Series. Heumann, Smith.....454–7; disc. 1130 1946
Motors, Control, and Their Branch Circuits on Power Supplies of 600 Volts and Less, Thermal Co-ordination of. Jones..483–7; disc. 975 1942
Motors, Dead Points in Squirrel-Cage. Graham.....637–42 1940
Motors, Design Considerations of 400-Cycle Aircraft. Sawyer.....877–9; disc. 1464 1944
Motors, Design of Auxiliary Circuits of Single-Phase Induction. Thacker, Gopalakrishna.....1373–9 1949
Motors, Design of Starting Windings for Split-Phase. Lloyd, Karr.....9–13 1944
Motors, Determination of Temperature Rise of Induction. Summers.....459–67; disc. 472 1939
Motors, Die-Cast Rotors for Induction. Packer.....253–60; disc. 260 1949
Motors During Single-Phase Operation, Overvoltages in Polyphase Induction. Macmillan, Carter.....819–23; disc. 1328 1941
Motors, Dynamic Braking of Two D-C Series. Leitch.....787–91 1947
Motors, Dynamic Braking With Traction. Riley, Woods.....517–19 1945
Motors, Electromechanical Transient Performance of Induction. Weygandt, Charp..1000–09; disc. 1167 1946
Motors, Electronic Control of D-C. Puchlowski.....870–7; disc. 985 1943
Motors—Experimental Study of Speed-Torque Curves, Dynamic Braking Control of D-C Series. Heumann.....560–4 1949
Motors, Field Harmonics in Induction. Liwschitz.....797–803 1942
Motors for Aircraft, Dimensional Studies of Lightweight. Morrill.....698–701 1944
Motors for Constant and Adjustable Speed, Central-Station Auxiliary-Drive. Gibson..746–50; disc. 976 1945
Motors for Dynamic Braking, The Design of New York Subway. Widell.....808–10 1947
Motors for Refrigeration and Air Conditioning, The Rating and Application of. Rutherford.....519–23; disc. 523 1939
Motors for Shipboard Use, Overload Protection of Silicone-Insulated. Grigg, Watkins..1341–4; disc. 1344 1948
Motors for Use in Automatic Control Systems, The Design of D-C. Lebenbaum.....1089–94 1949
Motors From Controlled Rectifiers, Operation of Large D-C. Schmidt, Smith.....679–83 1948
Motors, Gear Ratio and Its Effect on Traction. Woods..65–8; disc. 433 1944
Motors, General Theory of Multiple Cage Induction. Chang..1139–43 1949
Motors, Harmonic Theory of Noise in Induction. Morrill.....474–80; disc. 1148 1940
Motors in Severe Duty Service, The Application of Class B Insulation to Auxiliary-Type D-C. Compton..828–34; disc. 1098 1940
Motors, Inherent Overheating Protection of D-C Aircraft. Veinott.....920–5 1944
Motors, Investigation of Hot-Spot Temperature in Fractional-Horsepower. Hirsch, Munier, Schmidt, Wightman, Himebrook, Lloyd, Coffman, Potter..128–36; disc. 421 1945
Motors, Investigation of Hot-Spot Temperatures in Integral-Horsepower. Hildebrand, Cain, Phillips, Hough, Rosswog, Potter..124–8; disc. 421 1945
Motors, Limitations in Design of D-C Adjustable Speed. Opel...1095–8 1949
Motors, Measurement of Stray-Load Loss in Induction. Ware.....194–7; disc. 433 1945
Motors, Measurement of Temperature in General-Purpose Squirrel-Cage Induction. Potter.....468–72; disc. 472 1939
Motors on Vibrations Produced in Drive Shafts by Large Propellers, Damping Effect of D-C Marine Propulsion. Litman.....31–7 1945
Motors, One Type of Rotary Magnetic Clutch and Its Associated Brake Used on Aircraft Electric. Andrews, Shanely..893–5; disc. 1477 1944
Motors, or S. F. Test, The "Superimposed Frequency Test" for Induction. Romeira.....952–3; disc. 953 1948

Motors, Performance Calculations on Capacitor. Trickey.73–6; disc. 662 1941
Motors, Performance Calculations on Repulsion. Trickey.....67–73; disc. 661 1941
Motors, Performance Calculations on Shaded Pole. Trickey.....1431–8; disc. 1438 1947
Motors, Performance Calculations on Tapped-Winding Capacitor. Trickey.....1–3; disc. 1943
Motors, Problems in Applying Protectors to Electric Aircraft. Buell.....1250–8 1944
Motors, Rating of General-Purpose Induction. Alger, Johnson.....445–56; disc. 456 1939
Motors, Rating of High-Temperature Induction. Alger, Jones.....300–02; disc. 458 1945
Motors, Reactances of Squirrel-Cage Induction. Lloyd, Giusti, Chang.....1349–55 1947
Motors, Requirements for Aircraft Electric. Siefkin.....810–13 1944
Motors, Rotor-Bar Currents in Squirrel-Cage Induction. Gault.....784–91; disc. 1327 1941
Motors, Self-Excitation of Induction. Wagner.....47–51 1939
Motors Serve City Transit Systems, Modern. Clardy, Atwell...850–4 1941
Motors, Shutdown Versus Hot-Spot Temperatures in Polyphase Induction. Potter, Frohardt.....56–8; disc. 483 1946
Motors, Some Acceleration Tests on Large Synchronous Pump. Ager.....416–22; disc. 649 1941
Motors, Some Phases of Calculation of Leakage Reactance of Induction. Liwschits, Formhals.....1409–12; disc. 1412 1947
Motors, Some Problems in the Standardization of Temperature Ratings of Fractional-Horsepower. Veinott.....1055–61; disc. 1218 1940
Motors, Starting Performance of Salient-Pole Synchronous. Liwschits.....913–19; disc. 1215 1940
Motors, Starting Windings for Single-Phase Induction. Veinott.....288–94; disc. 499 1944
Motors, Stray Load Losses Measured in D-C. (Committee Report).....219–23; disc. 223 1949
Motors—Synchronous Motors Without Field Excitation, Performance Calculations on Polyphase Reluctance. Trickey.....191–3 1946
Motors, The Application of Traction. Wynne, Woods.....369–74 1940
Motors, The Asymmetrical Stator as a Means of Starting Single-Phase Induction. Baum.....245–50; disc. 496 1944
Motors, The Calculation of Unbalanced Magnetic Pull in Synchronous and Induction. Robinson.....620–24; disc. 924 1943
Motors, The Equal-Volt-Ampere Method of Designing Capacitor. Trickey.....990–2; disc. 1399 1941
Motors, The Horsepower Output of Polyphase Induction. Robinson.....770–5 1947
Motors, The Inherent Overheating Protection of Single-Phase. Potter.....993–6; disc. 1400 1941
Motors, The Liquid Rheostat for Speed Control of Wound Rotor Induction. McFarland, Alvares.....603–09; disc. 609 1948
Motors, The Use of Auxiliary Impedances in the Single-Phase Operation of Polyphase Induction. Ager.....494–9; disc. 660 1941
Motors to Aircraft, Some Aspects of the Application of Induction. Braun.....769–72; disc. 1476 1944
Motors to Chippers, The Application of Synchronous and Induction. Baker, Lory.....1070–7 1947
Motors, Transient Overspeeding of Induction. Ager.....1030–2 1941
Motors, Transient Performance of Induction. Maginniss, Schultz.....641–6; disc. 1458 1944
Motors, Transient Starting Torques in Induction. Wahl, Kilgore.....603–07; disc. 1263 1940
Motors, Twenty-Five Years Progress in the Design of Traction. Baldwin.....132–7 1949
Motors, Use of Cumulative and Differential Series Fields in the Parallel Operation of D-C. Kimball.....1098–1100 1949
Motors With Controlled Excitation for Suddenly Applied Loads, Synchronous. Boice, Caldwell, Halberg.....113–19; disc. 416 1943
Motors With Series Capacitors, Self-Excitation of Induction. Wagner.....1241–7; disc. 1391 1941
Motors, With Special Reference to Plugging, Transient Torques in Squirrel-Cage Induction. Gilfillan, Kaplan.....1200–09; disc. 1363 1941
Movable-Coil Instrument Mechanisms, A Bridge Method for Determining the Motional Characteristics of Permanent-Magnet. Gilbert.....411–15 1948
Movement of Cable—Its Causes and Effects on Cable-Sheath Life, Cyclic. Schifreen.....1121–30; disc. 1388 1944
Movement of Cables in Ducts, An Investigation of the Relationship Between Temperature and. Nicholson, Broanan..723–8; disc. 1388 1944
Movement of Moisture in Soil, The Thermal. Mickley.330–3; disc. 333 1949
Mover Speed Governors, Supplementary Control of Prime-. Crary, McClure.....209–14; disc. 395 1942
Moving Coil Fluxmeter, General Theory and Experimental Confirmation of the. Higgins, Robertson.....897–907; disc. 907 1949
Moving-Magnet Instrument for Direct Current, A New. Faus, Macintyre.....586–8; disc. 987 1942
Moving-Magnet-Instrument Rotors, Basic Concepts of. Mendelsohn.....529–34; disc. 947 1945
Moving-Magnet Ratio Instrument, A Unique. Sias, Fisk.....634–6; disc. 1420 1944
Moving Magnetic Strip, Induction Heating of. Baker.....184–9 1945
Multichannel Amplifiers, Load-Rating Theory for. Holbrook, Dixon.....265–72 1940
Multichannel Carrier-Current Facilities for a Power Line. Sandstrom, Foster.....71–6; disc. 469 1942
Multichannel Microwave Radio Relay System, A. Black, Beyer, Grieser, Polkinghorn.....798–806 1946
Multicolor Printing, Electronic Register Control for. Cockrell.....617–22; disc. 1117 1946
Multiconductor Transmission Lines, Transient Analysis of Completely Transposed. Pipes.....346–51; disc. 621 1941
Multiengine Aircraft, Paralleling and Regulation of 24–28-Volt D-C Generators in. Siegal, DeCourcey.....854–7 1944
Multifrequency Pulsing in Switching, Application of. Dahlbom, Horton, Moody.....392–6 1949
Multigrounded Neutrals, Calculation of Unbalanced Voltage Drops in Distribution Circuits With Particular Reference to. Bullard, Lowe, Wahlquist.....145–8 1944
Multijet Airplane, Starter-Generator Control System for a. Hart.....1316–18 1948
Multilayer Coils, Eddy-Current Resistance of. Long.....712–18 1945
Multilayer Windings, Effective Resistance to Alternating Currents of. Bennett, Larson.....1010–17; disc. 1262 1940
Multiorifice Interrupter for High-Voltage Oil Circuit Breakers, A. Ludwig, Leeds.....119–25; disc. 437 1943
Multiphase Rectifiers, Harmonics and Load Balance of. Evans.....182–7; disc. 400 1943
Multiple Cage Induction Motors, General Theory of. Chang.....1139–43 1949
Multiple-Conductor Impregnated-Paper Lead-Encased Cable, Solid Type, Pulling Loads on Single- and. Bellis.....138–48; disc. 403 1943
Multiple-Grid Breakers for High-Voltage Service. MacNeill, Hill.....427–31; disc. 431 1939
Multiple High-Speed Air Circuit Breaker for Mercury-Arc-Rectifier Anode Circuits and its Relation to the Arc-Back Problem, A New. Seaman, Morton.....788–96; disc. 1057 1942
Multiple-Unit Rapid-Transit Cars, A Control System for Modern. Moore.....142–7 1942
Multiplex to Navy Radio, The Application of Western Union. Hoover.....1478–82 1947
Multiplexing System, A Time Division. Boothroyd, Creamer.....92–7 1949
Multiplied-Deflection A-C Potentiometer, A. Marshall.....77–80; disc. 460 1944
Multiplier for Power Frequencies, A New Electronic. Overbeck..931–6 1940
Multistage Rototrol, The. Liwschits.....564–8 1947
Multivalve Condensing Steam Turbine-Generators, Speed Governing Design Considerations for. Barnett.....1557–61; disc. 1561 1948
Multiwinding Transformers With Synchronous Condensers for System Voltage Regulation, The Use of. St. Clair.....212–17; disc. 217 1940

N

Narrow-Band Transmission System for Animated Line Images. Skellett.....124–7 1939
Natural Frequencies in Coils and Windings, Methods of Determining. Bewley, Hagenguth, Jackson.....1145–50; disc. 1361 1941
Natural Power Oscillations in Interconnected Generating and Distribution Systems, The Frequencies of. Rudenberg.....791–803 1943
Nature of Vibration in Electric Machinery, The. Graybeal.....712–18; disc. 1458 1944
Naval Electric Power Equipment, Silicone Insulation as Applied to. Walker.....977–80; disc. 980 1947
Naval Ordnance Laboratory Six-Trace Cathode-Ray Oscillograph, The. Edwards.....1220–23 1948
Naval Research Laboratory, Methods of Electrical and Mechanical Testing of Radio-Frequency Cables at the. Miller.....934–5 1945
Naval Shipboard Applications, Magnetic Amplifiers for. Buechler.....1241–5; disc. 1245 1948
Naval Surface Vessels, Electric Propulsion in. Jucarone.....1329–39; disc. 1340 1948

Naval Vessels to Supply Shore Power, Use of Propulsion Generators on. Anderson, Fifer. 1282–7; disc. 1287 1948

Navigation and Obstacle Detection, Airborne Radar for. Jensen, Arnett. 307–13; disc. 491 1946

Navy Radio, The Application of Western Union Multiplex to. Hoover. 1478–82 1947

Negative Damping in Synchronous Machines, Positive and. Liwschitz. 210–13 1941

Negative Damping of Electrical Machinery. Concordia, Carter. 116–19; disc. 752 1941

Negative-Glow Lamps, Some Characteristics and Applications of. Ferree. 8–12; disc. 622 1941

Negative Resistance Effects in Saturable Reactor Circuits. Manley, Peterson. 870–81 1946

Negative-Sequence Reactances of an Ideal Synchronous Machine, The. Duesterhoeft. 510–13; disc. 513 1949

NEMA Fractional-Horsepower Motor Standards; Their Effect on Refrigeration and Pump Applications, New. Potter. 508–10 1947

NEMA Resistors for Motor Starting and Speed Control, Theory and Design of. Armstrong. 277–81 1940

Network Analysis, General Solution Method of Power. Dunstan. 631–8; disc. 638 1948

Network Analysis Using Resistance Networks, Method for A-C. Enns. 875–80; disc. 1069 1942

Network Analyzer, A New Design for the A-C. Ryder, Boast. 674–80; disc. 1162 1946

Network Analyzer, An Improved A-C. Morgan, Rothe, Winsness. 891–5; disc. 895 1949

Network Analyzer to Determine Plant Loading Schedules, Co-ordination of Fuel Cost and Transmission Loss by Use of the. George, Page, Ward. 1152–60; disc. 1160 1949

Network and Its Application to the Capacitor-Single-Phase Motor, A Generalized Circle Diagram for a Four-Terminal. Tarboux. 881–9; disc. 943 1945

Network Calculator, The Modern A-C. Parker. 977–82; disc. 1395 1941

Network Coupling by Means of Static Electronic Frequency Changers. Marti. 495–503; disc. 1163 1940

Network Facilities, Television. Abraham, Romnes. 459–64 1947

Network for Dielectric Measurements, Generalized Bridge. Balsbaugh, Howell, Dotson. 950–6; disc. 1105 1940

Network, Frequency Division Techniques for a Coaxial Cable. Crane, Dixon, Huber. 1451–9 1947

Network, Improvements to Oklahoma City Primary. Brady. 701–02; disc. 702 1949

Network Parameters of Uniform Ladder Networks, Formulas for the Four-Terminal. LePage. 604–08 1944

Network Performance, Machine Computation of Power. Dunstan. 610–20; disc. 621 1947

Network Protector of Higher Rating, A New Submersible. Grissinger, Johnson. 41–6 1946

Network Systems in the Washington Area, Design and Experience With 4-Kv Primary. Lank. 712–16; disc. 716 1949

Network Systems, Modern Relaying for A-C Secondary. Beeman. 237–41; disc. 683 1941

Network, Two-Phase Co-ordinates of a Four-Phase. Kimbark. 7–9 1945

Network Use, A 600-Volt Enclosed Limiter for. Langguth, Rawlins, Wallace. 536–8; disc. 1062 1942

Networks, A Fractional Termination for Ladder. LePage. 530–6 1946

Networks, A Method for Determining the Normal Modes of Foster's Reactance. LePage. 674–8 1943

Networks, A New Simple Calculator of Load Flow in A-C. Enns. 786–90; disc. 1000 1943

Networks, An Extension of the Method of Symmetrical Components Using Ladder. Lyon. 1025–30; disc. 1263 1940

Networks, Analysis of Transient Voltages in. Bellaschi, Palermo. 973–81 1940

Networks and Sinusoidal Analysis to Automatic Control Systems, The Application of Lead. Schwartz. 69–76; disc. 76 1947

Networks and Transmission Lines Along Uniformly Rotating Reference Frames. Kron. 690–6 1949

Networks by the Method of Symmetrical Components, Transient Analysis of Symmetrical. Pipes. 457–9; disc. 1107 1940

Networks on the Duquesne Light Company System, Primary. Holben, Lange. 704–09; disc. 709 1949

Networks, Operation of Load Ratio Control Transformers Operating in Parallel and in. Starr. 1274–80; disc. 1407 1941

Networks, Rural Automatic Telephone. Ffolliott. 1079–83; disc. 1304 1941

Networks, The Use of Business Machines in Determining the Distribution of Load Reactive Components in Power Line. Jennings, Quinan. 1045–6 1946

Networks to Serve Industrial Plants, Secondary. Powel, Barnett. 154–6; disc. 698 1941

Networks, Transformation Theory of General Static Polyphase. Pipes. 123–8; disc. 128 1940

Networks, Transmission, Power Costs and the Contribution Towards Cost Reduction of Power for Electrification of Main Line Railroads with Moderate Traffic. Evans. 596–8; disc. 599 1948

Neutral Grounding Reactors and Transformers, Temperature Limits for Short-Time Overloads for Oil-Insulated. Part II Montsinger, Clem. 966–73; disc. 1155 1946 (Part I by V. M. Montsinger–1938)

Neutral Stability of Wye-Grounded-Primary Broken-Delta-Secondary Transformer Circuits, Criteria for. Shott, Peterson. 997–1002; disc. 1394 1941

Neutralizer on a Regulated Distribution System, Operation of a Ground-Fault. Tomlinson, Hunt. 1321–6; disc. 1326 1949

Neutralizer Systems, An Analysis of Transient and Sustained Voltages in Ground-Fault. Farnham, Hunter, Peterson. 1257–66; disc. 1394 1941

Neutralizers, Report on Survey of Unbalanced Charging Currents on Transmission Lines as Affecting Ground-Fault. (Committee Report). 1328; disc. 1329 1949

Neutrals, Calculation of Unbalanced Voltage Drops in Distribution Circuits With Particular Reference to Multigrounded. Bullard, Lowe, Wahlquist. 145–8 1944

New Approach to Probability Problems in Electrical Engineering, A. Adler, Miller. 630–2; disc. 1118 1946

New Automatic Load Control for Turbine Generators, A. Ruud, Farnham. 1337–42; disc. 1342 1949

New Current Transformer for Bus Differential Protection. Kennedy, Sinks. 1180–7; disc. 1363 1941

New Design for the A-C Network Analyzer, A. Ryder, Boast. 674–80; disc. 1162 1946

New Developments in Current-Transformer Design. Camilli. 835–42; disc. 1099 1940

New Distance Ground Relay, A. Goldsborough. 1442–6; disc. 1446 1948

New Electronic Multiplier for Power Frequencies, A. Overbeck. 931–6 1940

New Expanded Scale A-C Voltmeter, A. Millar. 641–3 1949

New 15-Kv Pneumatic Circuit Interrupter, A. Ludwig, Rawlins, Baker 528–33; disc. 1123 1940

New Haven Electric Locomotives, Study of the Performance of the 3,600-Horsepower. Konn, Craton. 212–16; disc. 217 1939

New High-Frequency Capacitor, A. Allison, Beverly. 915–16; disc. 1464 1944

New Instruments for Recording Lighting Currents. Wagner, McCann. 1061–8; disc. 1253 1940

New Isolated-Phase Metal-Enclosed Bus Designed for High-Capacity Generating Station, A. Wyman, Shores. 699–703; disc. 703 1948

New Line of Oil-Filled Apparatus Bushings, A. Bowers, Johnston. 729–32; disc. 733 1948

New Line of Thyratrons, A. Coolidge. 723–7; disc. 727 1948

New Loss-of-Excitation Relay for Synchronous Generators, A. Mason. 1240–5 1949

New 150-Kilowatt Transmitter for Standard Band Broadcasting, A. Boerner. 943–51 1948

New 138-Kv Cable Lines in Los Angeles. Mansfield. 1240–9; disc. 1479 1944

New Orleans, La., 115-Kv High-Pressure Oil-Filled Pipe Cable Installation at. Bullard, Pettee, Rhodes. 475–84; disc. 484 1948

New Reactance Distance Relay, A. Dewey, McGlynn. 743–6; disc. 746 1948

New Single-Pole Service Restorer, A. Tugby. 889–92; disc. 1070 1942

New 69-Kv Compressed-Air Circuit Breaker, A. Baker, Frisch. 363–8; disc. 369 1949

New Solenoid Mechanism for Magne-Blast Breaker. Wyman, Keagy. 268–74; disc. 448 1945

New Technique for Lead Cable Sheathing, A. Reinits, Wiseman. 165–71; disc. 171 1940

New Test Chambers for Aircraft Electric Apparatus With Particular Reference to Carbon Brushes. Summers, Settle. 1205–12; disc. 1491 1944

New Time Standard, A. Warren. 137–41; disc. 141 1940

New Transmission-Line Diagrams. Schwager, Wang. 610–15; disc. 955 1945

New-Type Carrier Relay Protection, A. Wood, Haberl, Baily. 774–9; disc. 987 1943

New York City Transit System, Special 10-Car Train for the. Sinclair. 251–4; disc. 254 1947

New York City's Subway System, Modern Car Equipment for. Cordts. 247–9; disc. 250 1947

New York Subway Motors for Dynamic Braking, The Design of. Widell. 808–10 1947

New York Transit System Subway Cars, Motor Control for Latest. Riley. 900–03 1947

New York World's Fair, Lighting The. Engelken. 1288–1305 1940

Newport News, Capacitor Installation at. Parrack, Harder. 1165–73; disc. 1378 1944

Next Step in Interrupting Capacity—5,000,000 Kva, The. Hill, Leeds..317–23; disc. 463 1945
Nickel-Cobalt Brake Magnets for Watt-Hour Meters, Aluminum. Green.....791–6; disc. 796 1939
Nine Years' Experience With Ultra-high-Speed Reclosing of High-Voltage Transmission Lines. Sporn, Muller....225–8; disc. 445 1945
Nitrogen and Freon Under Pressure, The Electrical Strength of. Skilling, Brenner.....191–5; disc. 441 1942
Nitrogen, High-Voltage D-C Flashover of Solid Insulators in Compressed. Trump, Andrias.....986–90; disc. 1393 1941
Noise Elimination in All-Metal Aircraft, Radio. Foulon..877–91; disc. 994 1943
Noise Elimination in Military Aircraft, Radio-. Weinstein, Howell, Lowe, Winter.....793–5; disc. 1466 1944
Noise Elimination, Very High-Frequency Radio-. Owen.....949–54 1944
Noise Filters Applied to Aircraft, Radio. Frick, Zimmerman.....590–5; disc. 979 1943
Noise in Induction Motors, Harmonic Theory of. Morrill.....474–80; disc. 1148 1940
Noise Influence of 230-Kv Lines, Radio. Rorden.....677–81; disc. 682 1947
Noise, Instruments and Methods of Measuring Radio. Aggers, Foster, Young.....178–87; disc. 187 1940
Noise Levels in Magnetic Tape Recording, Signal and. Wooldridge..343–52; disc. 495 1946
Noise-Meter Calibrations, A Study of Wave Shapes for Radio-. Frick...890–901; disc. 969 1945
Noise of Transformers, The Audio. Sealey.....109–12; disc. 745 1941
Noise of Two-Pole Turbine Generators, Suppression of Magnetic Vibration and. Penniman, Taylor.....283–8; disc. 745 1941
Noise Problems on an Electric Power System, Transformer Audio. Murray.....740–7; disc. 747 1949
Nomenclature of Three-Phase Circuits, Symmetrical. Brady.....955–7; disc. 1402 1941
Nomographic Charts, Diesel-Electric Switching-Locomotive Application by Means of. Millan, Perkinson..45–7 1944
Nondestructive Testing of Insulation, The Basis for the. Field.....890–5; disc. 1347 1941
Nonharmonic Oscillations as Caused by Magnetic Saturation. Rudenberg.676–85 1949
Nonlinear Circuit, An Unstable. Summers.....273–6 1940
Nonlinear Commutating Reactors for Rectifiers. Schmidt.....654–6 1946
Nonlinear Mechanics and Servomechanisms, Application of the California Institute of Technology Electric Analog Computer to. McCann, Wilts, Locanthi..652–60 1949
Nonlinear Problems in Electrical Engineering, Analytical Methods of Solving Discrete. Keller.....1194–1200; disc. 1389 1941
Nonlinear Series Circuit, The Effect of Initial Conditions on Subharmonic Currents in a. Angello.....625–7 1942
Nonmagnetic Electric Conductors by Magnetic Induction—Longitudinal Flux, Heating of. Baker.....273–8 1944
Nonmagnetic Loads, Design of Induction-Heating Coils for Cylindrical. Vaughan, Williamson.....587–92; disc. 965 1945
Nonmagnetic Rectangular Conductors, Effective Resistance of Isolated. Dwight.....549–52 1947
Nonsalient-Pole Type Generators Supplying a **Rectifier** Load, Operation of. Ross, Batchelor.....667–70; disc. 959 1943
Normal Modes of Foster's Reactance Networks, A Method for Determining the. LePage.....674–8 1943
North America, Mercury-Arc Power Converters in. (Committee Report).....1031–59 1948
Notes on Emergency Ratings. Kidder.599–607; disc. 607 1939
Novel Reclosing Relay, A. Bobo.....1041–5; disc. 1403 1941
Novel Test Circuits for Protective Relays. Sonnemann.....1249–54 1949
Null Detectors for Use With Impedance Bridges, Electronic. Lamson.....535–40 1947

O

Oakland, Pacific Gas and Electric Company, 12-Kv Metal-Enclosed Bus and Switch Structure, Station "C". Benson, Strang.....751–5; disc. 1080 1940
Objective Testing of Bone Receivers and Throat Microphones, Laboratory Method for. Greibach.....184–7 1946
Observation, The "Black Band" Method of Commutation. Schroeder, Aydelott....446–51; disc. 659 1941
Obstacle Detection, Air-borne Radar for Navigation and. Jensen, Arnett.....307–13; disc. 491 1946
Occurrence and the Distribution of Lightning Flashes to Transmission Lines, The Frequency of. Golde..902–10; disc. 982 1945
Occurrence of Arc-Backs in High-Current Mercury-Arc Rectifiers, Phase. Pakala, Batten.....345–7 1940
Ocean Cable Telegraphy, Some Modern Techniques in. Cramer.....494–500; disc. 500 1947
Officers and Committees, AIEE:
1941–42.....1464–8 1941
1942–43.....1150–54 1942
1943–44.....1023–29 1943
1944–45.....1532–7 1944
1945–46.....1017–21 1945
1946–47.....1217–28 1946
1947–48.....1724–37 1947
1948–49.....1784–98 1948
1949–50.....1409–28 1949
Offset Transient Currents, Current Transformers and Relays for High-Speed Differential Protection, With Particular Reference to. Wentz, Sonnemann.....481–8; disc. 1144 1940
Ohm and Mho Principles to Protective Relays, Application of the. Warrington.....378–86; disc. 490 1946
Oil and Air-Blast, Field Tests and Performance of Heavy-Duty High-Speed 138-Kv Circuit Breakers—. Sporn, St. Clair..401–10; disc. 463 1945
Oil and Cellulose Insulation, Temperature Limits Set by. Hill.....484–7; disc. 487 1939
Oil Circuit Breaker, A High-Capacity High-Voltage Three-Cycle. Byrd, Rietz.....160–3; disc. 463 1945
Oil Circuit Breaker for Extra-Heavy Arc Rupturing Duty, A 230-Kv 3-Cycle. Leeds, Cushing.....236–42; disc. 242 1948
Oil Circuit Breaker, Tests of 230-Kv High-Speed Reclosing. Schwager.784–8; disc. 1468 1944
Oil Circuit Breakers, A Compressed-Air Operating Mechanism for. Cunningham, Hill.....695–8; disc. 1019 1942
Oil Circuit Breakers, A Multiorifice Interrupter for High-Voltage. Ludwig, Leeds...119–25; disc. 437 1943
Oil Circuit Breakers, A New Line of High-Voltage Outdoor Tank-Type. Skeats, Rietz....224–31; disc. 502 1946
Oil Circuit Breakers, A Pneumatic Mechanism for Outdoor. Linde, Rietz.....543–6; disc. 1428 1944
Oil Circuit Breakers, Field Tests of Interrupting Capacity of 138-Kv. Buchanan, Floyd.....199–204; disc. 503 1946
Oil Circuit Breakers for Grand Coulee Power Plant, Field Tests for Development of 10,000,000 Kva 230-Kv. Killgore, Clagett.....271–83; disc. 283 1948
Oil Circuit Breakers for Rapid Reclosing Duty, High-Voltage. Hill, Leeds..113–18; disc. 452 1944
Oil Circuit Breakers on Field Tests, Unusual Performance of Standard 230-Kv Impulse and Tank-Type. Rietz.....267–70; disc. 270 1948
Oil Circuit Breakers, Switching Overvoltage Hazard Eliminated in High-Voltage. Hunt, Boehne, Peterson.98–100; disc. 418 1943
Oil Circuit Recloser Substantiate Analytical Co-ordination Method, Field Tests of. Auer, Branflick, Woodward, McKinley.....803–08; disc. 808 1949
Oil Circuit Reclosers on REA Systems, Experience With. Moore, Watkins.....531–5; disc. 934 1943
Oil, Diesel Oil, and Electricity as Energy Sources for Motive Power Operation in the Pacific Northwest, The Present Competitive Position of Coal, Residual. Martin...1664–9 1948
Oil-Filled Apparatus Bushings, A New Line of. Bowers, Johnston.....729–32; disc. 733 1948
Oil-Filled Cables in Canada, Design, Manufacture, and Installation of 120-Kv. Farnham, Titus.....881–9; disc. 1074 1942
Oil-Filled Pipe Cable Installation at New Orleans, La., 115-Kv High-Pressure. Bullard, Pettee, Rhodes.....475–84; disc. 484 1948
Oil Film Thickness Indicator for Journal Bearings. Greenough.....589–95; disc. 595 1948
Oil for High-Voltage Testing of Oil Circuit Breakers, Dielectric Strength of. Lingal, Skeats, Braley.....903–06 1941
Oil, High-Pressure Gas-Filled Cable Impregnated with Extra-High-Viscosity. Sticher, Doan, Atkinson, Meyerhoff..336–45; disc. 345 1949
Oil-Immersed Power Transformers by Hot-Spot Temperatures, Emergency Overloading of Air-Cooled. Montsinger, Ketchum.....906–16; disc. 993 1942
Oil-Impregnated-Paper High-Voltage Condenser Bushings for Circuit Breakers and Transformers. Lingal, Cole, Watts.269–75; disc. 439 1943
Oil-Impregnated Paper, Tests on. Part IV. Race.....721–9; disc. 1083 1940 (Part I—1936; Part II—1937; Part III—1938)
Oil-Insulated Neutral Grounding Reactors and Transformers, Temperature Limits for Short Time Overloads for. Part II. Montsinger, Clem...966–73; disc. 1155 1946 (Part I by V. M. Montsinger—1938)
Oil-Insulated Transformers, Emergency Overloads. Vogel, Sloat.....669–73; disc. 988 1942
Oil Insulated Transformers, Extremes in the Insulation Co-ordination of. Vogel.....965–8; disc. 968 1949

Oil-Insulated Transformers, Hot-Spot Winding Temperatures in Self-Cooled. Vogel, Narbutovskih.... .....133–6; disc. 418 1942

Oil-Insulated Transformers, Standards and Insulation Characteristics of. Vogel.....167–71; disc. 431 1945

Oil- or Gas-Blast Power Fuse, A Double-Break. Hill....402–07; disc. 646 1941

"Oil-Poor" Circuit Breakers, The Vertical-Flow Interrupter and Its Application to. Baker..... .....440–5; disc. 635 1941

Oil Production by Electric Power. Taylor.....977–86; disc. 986 1948

Oil Stresses in Impregnated-Paper Insulation. Whitehead..... .....555–7; disc. 955 1945

Oil, Surge-Voltage Breakdown Characteristics for Electrical Gaps in. Sorensen.....78–81; disc. 81 1940

Oil-Treated Paper-Insulated Cables, Some Impulse-Voltage Breakdown Tests on. Foust, Scott..... .....389–91; disc. 391 1940

Oil with Variations of Pressure and Temperature, Dielectric Strength of. Hoover, Hixson.....1047–50 1949

Oilless Circuit-Breaker and Metal-Clad Switchgear Unit, A New 50,000-Kva 5-Kv Dickinson, Hayford... .....302–06; disc. 434 1943

Oilless Circuit Breakers, A Manually-Operated Spring Mechanism for Medium Voltage. Wyman, Casey. .....357–61; disc. 361 1949

Oilless Circuit Interrupter Using Water, A High-Power. Leeds..... .....85–8; disc. 625 1941

Oils by Activated Alumina, Reconditioning of Insulating. Housley.... .....172–6; disc. 176 1939

Oils, Low-Voltage D-C Measurements on Electrical Insulating. Oncley, Hollibaugh.....625–8; disc. 1227 1940

Oils, The Influence of the Concentration and Mobility of Ions on Dielectric Loss of Insulating. Kang..... .....403–07; disc. 1132 1946

Oils Under Limited Oxidation, Electrical Stability of Electrical Insulating. Balsbaugh, Assaf..... .....311–22; disc. 397 1943

Oklahoma City Primary Network, Improvements to. Brady..... .....701–02; disc. 702 1949

One-Cycle Directional-Overcurrent Relay, A New. Morris..... .....725–7; disc. 989 1943

150,000 Horsepower Applied to Aeronautical Research. White..833–9 1946

138-Kv Cable Lines in Los Angeles, New. Mansfield..... .....1240–9; disc. 1479 1944

132-Kv System, Experience With Single-Pole Relaying and Reclosing on a Large. Trainor, Parks..... .....405–11; disc. 411 1947

132-Kv System of American Gas and Electric Company, Lighting Investigation on. Gross, Lippert... .....76–84; disc. 474 1945

120-Volt D-C Aircraft Electric System, A. Cobb.....1327–34; disc. 1495 1944

100 Years, American Telegraph After. D'Humy, Howe..... .....1014–32; disc. 1386 1944

One Slip Cycle Out-of-Step Relay Equipment. Morris.....1246–8 1949

One Type of Rotary Magnetic Clutch and Its Associated Brake Used on Aircraft Electric Motors. Andrews, Shanely.....893–5; disc. 1477 1944

Open Delta, Mobile Capacitor Units for Emergency Loading of Transformers in. Wolf, Mattison..... .....83–6; disc. 373 1943

Open-Delta Transformer Banks—Analysis of Circuit. Clem..... .....292–7; disc. 374 1943

Open-Pit Copper Mines, Electrification of Large. Birch..... .....30–8; disc. 433 1944

Open-Pit Copper Mining, Utilization of Electric Power in. French, Speight.....956–66; disc. 966 1948

Open-Pit Mine Haulage, Modern Electric Locomotives in. Borland, Riley.....52–8; disc. 433 1944

Open-Wire Carrier System, Line Problems in the Development of the 12-Channel. Ilgenfritz, Hunter, Whitman.....658–64; disc. 664 1939

Open-Wire Lines, A 12-Channel Carrier Telephone System for. Kendall, Affel.....351–60; disc. 360 1939

Operated Control Valves, Solenoid-. Eckel, Wisegarver.....911–14 1944

Operated Gyroscopic Instruments, Electrically. Konet.....735–8 1944

Operated Hydraulic Valves for Aircraft Applications, Solenoid-. Goepfrich. 866–8 1944

Operated Spring Mechanism for Medium Voltage Oilless Circuit Breakers, A Manually-. Wyman, Casey.....357–61; disc. 361 1949

Operating Capacitors Without Individual Fuses, The Calculated Risk of. Brooks...1219–25; disc. 1225 1949

Operating Characteristics of Modern Dry-Type Air-Cooled Transformers, Design and. Satterlee..... .....701–04; disc. 1445 1944

Operating Characteristics of Two-Phase Servomotors. Koopman..... .....319–27; disc. 327 1949

Operating Experience, Field Power-Factor Testing of Transformer Insulation and. Whitmer..... .....605–11; disc. 741 1941

Operating Experience With Distance Ground Relays. Wolfe..... .....458–62; disc. 1185 1946

Operating Experience With Hydrogen-Cooled Synchronous Condensers and Alternators, Application of and. Sporn, Porter..... .....890–907; disc. 1187 1940

Operating Experience With Petersen Coils on 66-Kv System of Metropolitan Edison Company. Rankin, Neidig.....568–73; disc. 573 1939

Operating Features and Terminal Design, Powerton-Crawford 220-kv Line-System. Wulfing, LeClair.... .....1084–9; disc. 1304 1941

Operating Mechanism for Oil Circuit Breakers, A Compressed-Air. Cunningham, Hill..... .....695–8; disc. 1019 1942

Operating Plan for the First Chicago Subway, Electric Facilities and. DeLeuw.....780–7; disc. 980 1942

Operating Results in Pittsburgh, PCC Car. Clardy....214–17; disc. 400 1942

Operating Results of Steam, Diesel-Electric, and Electric Motive Power on the Great Northern Railway Electrification, Comparative. Gaynor.....231–4; disc. 234 1948

Operating Rooms, Hazards of Static Electricity in Hospital. Williams.. .....1146–7; disc. 1147 1947

Operation, and Design of Shunt-Capacitor Equipments Switched in Large Banks, Analysis of Factors Which Influence the Application. Butler. .....795–800; disc. 1096 1940

Operation and Maintenance of Shunt Capacitors, Report on the. (Committee Report).....1208–18 1949

Operation, Economics of Trolley-Coach. Woods.....578–81; disc. 1451 1944

Operation Improved With Carrier Telemetering and Load Control, System. Walton, Lensner..... .....1643–7; disc. 1647 1948

Operation in Rhode Island, Trackless Trolley. Blomquist.....397–402 1949

Operation in the Pacific Northwest, The Present Competitive Position of Coal, Residual Oil, Diesel Oil, and Electricity as Energy Sources for Motive Power. Martin....1664–9 1948

Operation of a Ground-Fault Neutralizer on a Regulated Distribution System. Tomlinson, Hunt..... .....1321–6; disc. 1326 1949

Operation of a Metropolitan Electrical System From the Viewpoint of Possible Major Shutdowns, The Design and. Dean.575–9; disc. 1150 1940

Operation of Aircraft Alternators Using Electronic Frequency Changers, Parallel. Bowlus, Nims.....31–8 1947

Operation of Airplane Alternators, Parallel. Exner..755–60; disc. 992 1943

Operation of Automatic Reclosing Equipment on Stub Feeders, Interim Report on Application and. (Committee Report)..... .....536–40; disc. 934 1943

Operation of Circuit Breakers and Switchgear, Interim Report on Application and. (Committee Report).....481–83 1943

Operation of D-C Motors, Use of Cumulative and Differential Series Fields in the Parallel. Kimball... .....1098–1100 1949

Operation of Electric Boilers, Automatic. Eaton..1061–8; disc. 1068 1947

Operation of Filamentary Thermionic Gas Tubes, Quadrature. Holdaway.....205–08 1948

Operation of High-Voltage Axial Air-Blast Circuit Breakers, Design and. Leuthold.....869–75; disc. 1073 1942

Operation of Large D-C Motors from Controlled Rectifiers. Schmidt, Smith.....679–83 1948

Operation of Load-Ratio-Control Transformers, A New Control System for Automatic Parallel. Minneci, Farnham.....488–93; disc. 916 1943

Operation of Load Ratio Control Transformers Operating in Parallel and in Networks. Starr..... .....1274–80; disc. 1407 1941

Operation of Low-Pressure Gas-Filled Cable. Hatcher.788–92; disc. 1399 1944

Operation of Main-Engine-Driven 400-Cycle Aircraft Generators, Parallel. Levoy.....811–16; disc. 987 1945

Operation of Nonsalient-Pole Type Generators Supplying a Rectifier Load. Ross, Batchelor..... .....667–70; disc. 959 1943

Operation of Out-of-Step Protection, Interim Report on Application and. (Committee Report).....567–73 1943

Operation of Power Line Carrier Channels. Lensner...888–93; disc. 893 1947

Operation of Rectifiers Under Unbalanced Conditions. Christensen, Morack.....628–31 1944

Operation of Supervisory Control Equipment, Channels for. Derr, Brown.....1654–60 1948

Operation of Synchronous Machines, Asynchronous and Single-Phase. Rankin.....1092–1102 1946

Operation of Transformers, Regulators, and Reactors, Guides for. (Committee Report)..797–806; disc. 957 1945

Operation of Turbogenerators, Underexcited. Adams, McClure..... .....521–6; disc. 526 1948

Operation, The Dynamoelectric Amplifier—Class A. Saunders...1368–73 1949

Operational Calculus Based on the Generalised Functions of Schwartz, A Derivation of Heaviside's. Smith, Alger....939–44; disc. 944 1949

Operational Expressions Having a Finite Number of Different Roots, A Construction Theorem for Evaluating. Cromwell..... .....273–6; disc. 676 1941

Operations, Power System Overvoltages Produced by Faults and Switching. (Committee Report).....912–21; disc. 921 1948
Optical Radar for Surveying, An. Hansen.....660–3 1948
Optical Shutter for Photographic Purposes, An Electro-. Zarem, Marshall, Poole.....84–91 1949
Optimum Air Gap for Various Magnetic Materials in Cores of Coils Subject to Superposed Direct Current. Legg.....709–12; disc. 969 1945
Optimum Bussing Arrangements and Transmission Capabilities at Grand Coulee, An Analysis to Determine the. Hoard, Bills.....1259–64; disc. 1478 1944
Optimum Design of Permanent Magnets Subjected to Demagnetising Forces, The Output and. Hornfeck, Edgar...1017–24; disc. 1256 1940
Optimum Performance of Semiconductor Rectifiers, A Practical Approach to Calculating. Wilson.....640–2; disc. 642 1948
Optimum Synthesis of Linear Servomechanisms, The Analysis and an. Herr, Gerst.....959–70 1947
Ore Beneficiation Plant, Power Distribution and Utilization in a Large Iron. Gettelman.....1726–32 1948
Ore Haulage System, Electrification of an. Corfield.....1155–61 1948
Organo-Silicon Compounds for Insulating Electric Machines. Kauppi, Moses.....90–3; disc. 457 1945
Orientation on the Wear of Watt-Hour-Meter Bearings, Effect of Sapphire-Crystal. Goss..811–14; disc. 1336 1941
Origin of the Electric Motor. Michalowics.....1288–92 1948
Orthomagnetic Bushing Current Transformer for Metering. Boyajian, Camilli.....137–40; disc. 427 1945
Oscillating Systems and the Riemann-Christoffel Curvature Tensor, Equivalent Circuits for. Kron.....25–32; disc. 372 1943
Oscillations as Caused by Magnetic Saturation, Nonharmonic. Rudenberg.....676–85 1949
Oscillations in Interconnected Generating and Distribution Systems, The Frequencies of Natural Power. Rudenberg.....791–803 1943
Oscillations of a High-Voltage Secondary Winding. Boyajian..1010–20 1946
Oscillations of Capacitor-Compensated Long-Distance Transmission Systems, Self-Excited. Bodine, Concordia, Kron.....41–4; disc. 371 1943
Oscillators to Inductive and Dielectric Heating in Industry, Application of Vacuum-Tube. Jordan.....831–4 1942
Oscillogram Method of Motor-Torque Measurement, The Acceleration-. Atkinson, Downie.....7–9; disc. 473 1942
Oscillograms, Analysis of Short-Circuit. Kuyper.....151–3; disc. 752 1941
Oscillograph Amplifier, Direct Coupled. Christian.....1383–6 1947
Oscillograph Applied to Long-Time Switching Transients, The Cathode-Ray. Dunlap, Rohats.....231–4; disc. 445 1943
Oscillograph for Recording Transient Recovery Voltages, An. Hoover..1086–91; disc. 1174 1946
Oscillograph for Testing Lightning Arresters, Modern Cathode-Ray. Wade, Carpenter, MacCarthy.....549–53; disc. 982 1942
Oscillograph, The Naval Ordnance Laboratory Six-Trace Cathode-Ray. Edwards.....1220–23 1948
Oscillograph With a Memory, An Automatic. Zarem...150–4; disc. 514 1946
Oscillograph With Rotating-Drum Camera, A Cathode-Ray. Downie.....984–6 1941
Oscillographic Methods of Investigating Mechanical and Hydraulic Conditions During Operation of Hydroelectric Units. Engvall.....993–6 1949
Oscillographic Study of Synchronous Motor Hunting. Kurtz...647–52 1948
Oscillographing Commutation. Baldwin.....100–05; disc. 105 1949
Oscillographs, Fault Location and Relay Performance Analysis by Automatic. Dupuis, Jacobs.....442–6; disc. 1125 1946
Oscilloscope, Quantitative Determination of Magnetic Properties by Use of Cathode-Ray. Zamsky..783–7 1947
Out-of-Step Blocking and Selective Tripping With Impedance Relays. Vaughan, Sawyer.....637–45; disc. 645 1939
Out-of-Step Protection, Interim Report on Application and Operation of. (Committee Report).....567–73 1943
Outage Expectancy as a Basis for Generator Reserve. Seelye.....1483–8 1947
Outage Rates of Steam Turbines and Boilers and of Hydro Units. (Committee Report).....450–7 1949
Outages, Calculating Probability of Generating Capacity. Lyman.....1471–7; disc. 1477 1947
Outages on Power Circuits, A New Electronic Timing Relay for Reducing. Dlouhy.....407–11 1946
Outdoor Air Switch and a New Concept of Contact Performance, A New. Killian.....1382–7; disc. 1387 1948
Outdoor Air Switch and the Principles Involved in Its Design, A New. Graybill, Ferguson.....583–6; disc. 953 1945
Outdoor Bushings, Proposed Standards for. (Committee Report).....590–1; disc. 1207 1940
Outdoor Compressed-Air Breaker, A Vertical-Flow. Ludwig, Baker...217–22; disc. 672 1941
Outdoor Oil Circuit Breakers, A Pneumatic Mechanism for. Linde, Rietz.....543–6; disc. 1428 1944
Outdoor Tank-Type Oil Circuit Breakers, A New Line of High-Voltage. Skeats, Rietz....224–31; disc. 502 1946
Outgrows the Distribution Power Supply, When the Welding Load. Clark, Stearns....645–8; disc. 964 1945
Output and Application Charts, Current-Transformer. Koller.....573–7; disc. 1422 1944
Output and Optimum Design of Permanent Magnets Subjected to Demagnetising Forces, The. Hornfeck, Edgar...1017–24; disc. 1256 1940
Output of Polyphase Induction Motors, The Horsepower. Robinson.....770–5 1947
Overcurrent Capacity, The Evolution of Standard Lines of Current Transformers for High. Wents...658–62; disc. 1426 1944
Overcurrent Investigation on a Rural Distribution System. Lincks, Edge, McKinley, Leh..915–27; disc. 927 1949
Overcurrent Performance of Bushing-Type Current Transformers. Woods, Bottonari.....554–60; disc. 1140 1940
Overcurrent Protection for Distribution Circuits, Relative Expense for Service Restoration With Different Types of. Lincks, Craig.....813–21; disc. 980 1942
Overcurrent Protection for Distribution Relative Value of Different Types of. Lincks.....19–26; disc. 426 1942
Overcurrent Relay, A New One-Cycle Directional-. Morris.....725–7; disc. 989 1943
Overcurrent Tripping Device for Low-Voltage Circuit Breakers, An Improved. Rawlins, Sandin.....1149–53; disc. 1153 1947
Overexciting Transformers on System Voltage Wave Shapes and Power Factor, The Effect of. Butler, Pope.....49–53; disc. 656 1941
Overhead-Conductor 132-Kv Transmission Line at Carrier Current Frequencies, Loss Measurements Made on Underground-Cable. Cornelius, Storer.....597–601 1949
Overhead Conductors, Interim Report on Emergency Overloads on. (Committee Report).....588–90; disc. 940 1943
Overhead Distribution Costs Retarding Railroad Electrification, Are the? Birch.....243–55; disc. 255 1948
Overhead Distribution Lines and Newly Developed Equipment for Protection Against Conductor Burndown From that Cause, Power Arc-Over on. Matthews..596–604; disc. 684 1941
Overhead Distribution Systems in Wartime. Cole.....123–6; disc. 432 1942
Overhead Facilities Exist?, Can the Trolley Coach Compete Economically With the Gas or Diesel Bus Where No. Gauss.....264–8; disc. 268 1947
Overhead-Line Conductor, Hy-Therm Copper—Air Improved. Hickernell, Jones, Snyder..22–7; disc. 27 1949
Overhead Line Conductors, Safe Ratings for. Olmsted.....845–53; disc. 938 1943
Overhead Line Wire, Thermal Rating of. Zucker.....501–07; disc. 918 1943
Overhead Lines, Ampere Load Limits for Copper in. Kidder, Woodward.....148–52; disc. 388 1943
Overhead Power-Transmission Systems, Costs Study of 69- to 345-Kv. Holm.....406–22 1944
Overhead Reflected in Higher Service Standards, Progress in Development of Trolley-Coach. Birch.....185–91 1942
Overheat Protectors Based Upon Motor Design Information, A Method of Selecting Inherent. Vaughan.....1023–9; disc. 1030 1948
Overheated Transmission Line Joints by Means of a Bolometer, Detection of. Leslie, Wait..64–8; disc. 68 1949
Overheating Protection of D-C Aircraft Motors, Inherent. Veinott..920–5 1944
Overheating Protection of Single-Phase Motors, The Inherent. Potter.....993–6; disc. 1400 1941
Overheating Protection Under Running Overload Conditions, Fundamental Theory of Inherent-. Veinott, Schaefer.....266–70; disc. 270 1949
Overload Conditions, Fundamental Theory of Inherent-Overheating Protection Under Running. Veinott, Schaefer....266–70; disc. 270 1949
Overload Conditions, Thermal Protection of Transformers Under. Montsinger, Camilli....160–4; disc. 444 1944
Overload Protection of Silicone-Insulated Motors for Shipboard Use. Grigg, Watkins..1341–4; disc. 1344 1948
Overloading Current-Limiting Reactors, Interim Report on. (Committee Report).....611–12; disc. 968 1943
Overloading Distribution Transformers, Interim Report on. (Committee Report).....516–17; disc. 968 1943
Overloading of Air-Cooled Oil-Immersed Power Transformers by Hot-Spot Temperatures, Emergency. Montsinger, Ketchum..906–16; disc. 993 1942

Overloading of Transformers—Cases Not Covered by the General Rules. Sealey, Hodtum..149–53; disc. 443 1944
Overloading Practice, Substation-Transformer Emergency. Clark.....126–32; disc. 453 1943
Overloading Transformers and Voltage Regulators, Interim Report on Guides for. (Committee Report).....692–4; disc. 1063 1942
Overloading Transformers and Voltage Regulators, Use of Equivalent Annual Ambient Temperature in. Oldacre.....477–80; disc. 916 1943
Overloads for Oil-Insulated Neutral Grounding Reactors and Transformers, Temperature Limits for Short-Time. Part II. Montsinger, Clem.....966–73; disc. 1155 1946 (Part I by V. M. Montsinger—1938)
Overloads for Oil-Insulated Transformers, Emergency. Vogel, Sloat.....669–73; disc. 988 1942
Overloads on Overhead Conductors, Interim Report on Emergency. (Committee Report).....588–90; disc. 940 1943
Overspeeding of Induction Motors, Transient. Ager.....1030–2 1941
Overvoltage Hazard Eliminated in High-Voltage Oil Circuit Breakers, Switching. Hunt, Boehne, Peterson.....98–100; disc. 418 1943
Overvoltage Protection of Current-Transformer Secondary Windings and Associated Circuits. Kaufmann, Camilli...467–72; disc. 919 1943
Overvoltages and System-Grounding Impedance, Correlation of System. (Committee Report).....17–24; disc. 383 1943
Overvoltages Caused by Transformer Magnetizing Currents in Long Transmission Lines, Abnormal. Peterson, Schroeder.....32–40 1943
Overvoltages During Power-System Faults. Clarke, Crary, Peterson.....377–85; disc. 385 1939
Overvoltages in Polyphase Induction Motors During Single-Phase Operation. Macmillan, Carter.....819–23; disc. 1328 1941
Overvoltages Produced by Faults and Switching Operations, Power System. (Committee Report).....912–21; disc. 921 1948
Oxidation, Electrical Stability of Electrical Insulating Oils Under Limited. Balsbaugh, Assaf.....311–22; disc. 397 1943
Oxide Films on Electrical Steel, Formation of Insulating. Schmidt.....772–4 1948
Oxide Modulators in Carrier Telephone Systems, Copper-. Caruthers.....253–60 1939
Oxide Rectifier in Electrochemical Work, The Copper-. Smith.....739–44; disc. 1438 1944
Oxide Rectifiers, Applications of Copper. Morris.....103–06 1939
Oxide Rectifiers for Electroplating and Anodizing Applications, Automatically Controlled Copper-. Buckley.....181–4 1947
Oxide Rectifiers, Twenty-Five Years of Copper—Copper. Grondahl.....403–10 1948

P

Pacific Gas and Electric Company, Electrical Design Features—Steam-Electric Generating Station P of the. Benson.....1013–20; disc. 1020 1949
Pacific Gas and Electric Company, 12-Kv Metal-Enclosed Bus and Switch Structure, Station "C", Oakland. Benson, Strang..751–5; disc. 1080 1940
Pacific Northwest, Comparison of Railway Motive Power for Operations in the. Martin.....1054–65; disc. 1189 1946
Pacific Northwest, The Present Competitive Position of Coal, Residual Oil, Diesel Oil, and Electricity as Energy Sources for Motive Power Operation in the. Martin..1664–9 1948
Pacific Steam-Electric Locomotive, Electrical Equipment of the Union. Hanna, Tritle.....756–64; disc. 1082 1940
Painting the Golden Gate International Exposition With Light. Dickerson, Mahan.....738–46 1940
Paired-Phase Bus Bars for Large Polyphase Currents. Fisher, Frank.....71–7; disc. 417 1943
Panel-Mounted Air Circuit Breaker, An Improved Design of Low-Voltage. Sperow, Favre.....695–8; disc. 698 1948
Panel Space Heating, Load-Calculation Procedure for Electric-. Raber, Hutchinson....1085–91; disc. 1432 1944
Paper-Base Plastics, The Electrical Resistivity of Resin-Treated Wood and Laminated Hydrolyzed-Wood and. Weatherwax, Stamm.....833–8 1945
Paper Cable, The Type CB Impregnated-. Rosch.....1041–50; disc. 1235 1940
Paper Capacitors, Characteristics of Chlorinated Impregnants in D-C. Berberich, Fields, Marbury.....1173–9; disc. 1437 1944
Paper Dielectric Capacitors, The Probable Breakdown Voltage of. Brooks.....1137–44; disc. 1144 1947
Paper High-Voltage Condenser Bushings for Circuit Breakers and Transformers, Oil-Impregnated-. Lingal, Cole, Watts.....269–75; disc. 439 1943
Paper Industry, Electrical Developments in the Pulp and. Baker.....827–34; disc. 834 1948
Paper-Insulated Cables, Maximum Safe Operating Temperature for 15-Kv. Franklin, Thomas.....556–60; disc. 560 1939
Paper-Insulated Cables, Some Impulse-Voltage Breakdown Tests on Oil Treated. Foust, Scott.....389–91; disc. 391 1940
Paper Insulation, Oil Stresses in Impregnated. Whitehead.....555–7; disc. 955 1945
Paper Insulation, Temperature and Electric Stress in Impregnated-. Whitehead, MacWilliams.....10–13; disc. 458 1942
Paper Insulation, The Dielectric Strength and Life of Impregnated. Whitehead:
Part I.....715–20; disc. 1085 1940
Part II.....660–3; disc. 1233 1940
Part III.....618–22; disc. 1039 1942
Part IV. Whitehead and Kopper.....171–7; disc. 477, 942 1945
Paper Machine Drive, Electronic Speed Regulators for Sectional. Baker, Kovalsky.....1636–42 1948
Paper Mills, Electric Drives for Supercalenders in. Smith.....338–41; disc. 341 1939
(Paper) Preliminary Report on Laboratory Aging Tests on Class A Insulation. (Committee Report).....879–81; disc. 881 1947
Paper, Tests on Oil-Impregnated. Part IV. Race.....721–9; disc. 1083 1940 (Part I—1936; Part II—1937; Part III—1938)
Papers, The True Dielectric Breakdown Strength of Electric-Cable Insulating. Cloke, Bates.1191–5; disc. 1195 1948
Parallel Circuits and Its Effect Upon Relays, Induced Current in. Bancker.....582–5; disc. 585 1939
Parallel Circuits in Servomechanisms. Marcy.....521–9; disc. 1128 1946
Parallel Operation of Aircraft Alternators Using Electronic Frequency Changers. Bowlus, Nims....31–8 1947
Parallel Operation of Airplane Alternators. Exner....755–60; disc. 992 1943
Parallel Operation of D-C Motors, Use of Cumulative and Differential Series Fields in the. Kimball.....1098–1100 1949
Parallel Operation of Load-Ratio-Control Transformers, A New Control System for Automatic. Minneci, Farnham.....488–93; disc. 916 1943
Parallel Operation of Main-Engine-Driven 400-Cycle Aircraft Generators. Levoy....811–16; disc. 987 1945
Parallel Transformers Affect Differential Relaying, Prolonged Inrush Currents With. Hayward.....1096–1101; disc. 1305 1941
Parallel Transmission Lines on Current Flow to Ground Faults, The Effects of Mutual Induction Between. Holbeck, Lantz..712–15; disc. 1002 1943
Paralleling and Regulation of 24–28 Volt D-C Generators in Multiengine Aircraft. Siegal, DeCourcey...854–7 1944
Parameter in Thermal Demand Meters, Heat Flow Ratio as a Design. Nelson.....885–90; disc. 890 1949
Parameters of a Permanent-Magnet Movable-Coil Instrument Having a General Circuit, Relation Between Electrical and Mechanical. Goodwin.....374–9 1948
Parameters of Uniform Ladder Networks, Formulas for the Four-Terminal Network. LePage...604–08 1944
Passenger-Car Auxiliary-Power Equipment, Modern Railway. MacLeod, Hause.....930–8 1947
Paths, Deionization Time of High-Voltage Fault-Arc. Harrington, Starr.....997–1003; disc. 1003 1949
Patterns, An Electromechanical Calculator for Directional-Antenna. Smith, Gove.....78–83 1943
Patterns of a Fractional Slot Winding, Differential Leakage of the Different. Liwschits.1129–31; disc. 1131 1949
PCC Car Operating Results in Pittsburgh. Clardy..214–17; disc. 400 1942
PCC Car, Some Recent Developments in the. Cooper..288–92; disc. 292 1947
PCC Cars, Recent Developments in Track Brakes and Drum Brakes for. Vouch.....302–04 1947
PCC Street Cars Provide Successful City Transportation, Trolley Coaches and. Clardy.....925–9 1947
Peacetime Use, Marine Radar for. Lynn, Winn.....271–3 1946
Peak Voltages Induced by Accelerated Flux Reversal in Reactor Cores Operating Above Saturation Density. Specht, Wents.....254–63 1946
Peak Voltages With D-C Arc Interruption for Aircraft. Phillips, Mitchel.....944–9 1944
Pennsylvania Power and Light Company, Lightning Investigation on Wallenpaupack-Siegfried 220-Kv Line of. Bell, Packer....196–201 1942
Pennsylvania Railroad New York-Washington-Harrisburg Electrification—Relay Protection of Power Supply System. Harder.....266–73; disc. 273 1939
Pennsylvania Railroad—Protection and Tonnage Rating, Single-Phase A-C Electric Locomotives on the. Griffith.....224–8 1942

Pentode Ignitrons for Electronic Power Converters. Steiner, Zehner, Zuvers....693–7; disc. 1413 1944
Pentode Tubes, Calculation and Design of Resistance-Coupled Amplifiers Using. Terman, Hewlett, Palmer, Pan....879–84; disc. 1133 1940
Per-Unit Impedances of Synchronous Machines. Rankin:
Part I....569–73 1945
Part II....839–41 1945
Performance, A New Outdoor Air Switch and a New Concept of Contact. Killian..1382–7; disc. 1387 1948
Performance Analysis by Automatic Oscillographs, Fault Location and Relay. Dupuis, Jacobs....442–6; disc. 1125 1946
Performance, Analysis of Bushing-Current-Transformer. Gebelein, Elsi....541–6; disc. 1137 1940
Performance Analyzer, A Turbine-Governor. Osbon...963–7; disc. 1401 1941
Performance Based on Admittance-Vector Locus, Current-Transformer. Schwager....26–30; disc. 465 1942
Performance Based on Direct Lightning Strokes, Transmission Line Design and. Harder, Clayton....439–46; disc. 447 1949
Performance Calculation of Induction-Type Frequency Converters. Latzko....691–4 1948
Performance Calculation, Single-Phase Induction-Motor. Himebrook....55–8; disc. 666 1941
Performance Calculations on Capacitor Motors. Trickey...73–6; disc. 662 1941
Performance Calculations on Polyphase Reluctance Motors—Synchronous Motors Without Field Excitation. Trickey....191–3 1946
Performance Calculations on Repulsion Motors. Trickey..67–73; disc. 661 1941
Performance Calculations on Shaded Pole Motors. Trickey....1431–8; disc. 1438 1947
Performance Calculations on Tapped-Winding Capacitor Motors. Trickey....1–3; disc. 1943
Performance, Capacitors and Circuit. Butler....408–15; disc. 646 1941
Performance Characteristics, Distribution-Type Lightning-Arrester. (Committee Report)....132 1942
Performance Characteristics, Line-Type Lightning-Arrester. (Committee Report)....982–3 1941
Performance Characteristics of Lightning Protective Devices. (Committee Report)....1330–6 1949
Performance Characteristics, Station-Type Lightning-Arrester. (Committee Report)....347–8 1940
Performance Criteria, Anode-Circuit-Breaker Design and. Boehne, Atwood....337–45; disc. 437 1945
Performance Criteria for Current-Limiting Power Fuses:
Part I. Schuck..1028–34; disc. 1191 1946
Part II. Boehne....1034–45; disc. 1191 1946
Performance Criteria of D-C Interrupters. Boehne, Jang....1172–80; disc. 1180 1947
Performance, Machine Computation of Power Network. Dunstan....610–20; disc. 621 1947
Performance, Maintenance of Good Brush. Kalb...819–25; disc. 996 1945
Performance of a Topped Steam Power Plant on Sudden Load Reduction, The. Noest....1348–56 1949
Performance of Bolted Aluminum-to-Copper Connections, An Experimental Investigation of the Electrical. Bonwitt..1208–18; disc. 1218 1948
Performance of Bushing-Type Current Transformers, Overcurrent. Woods, Bottonari....554–60; disc. 1140 1940
Performance of Ceramic Dielectrics at Elevated Temperatures, The Electrical. Frey, Jesatko....911–20; disc. 1126 1946
Performance of Conductors for Supervisory Control and Telemetering, Interim Report on Characteristics and, (Committee Report)..854–62 1943
Performance of Diesel-Electric Rig for Deep-Well Drilling. Clark, Moore....497–506 1949
Performance of Distance Relays During Faults and Power Swings, Graphical Method for Estimating the. Warrington....608–20; disc. 620 1949
Performance of Dust-Contaminated Insulators in Fog. Cozzens, Blakeslee....1686–91; disc. 1691 1948
Performance of Electronic Exciters for Large A-C Generators, Application and. Langstaff, Vaughan, Lawrence....246–53; disc. 515 1946
Performance of Ethylene Diamine Tartrate Crystal Units, Design and. Griffin, Pennell....557–61 1948
Performance of Ground-Relayed Distribution Circuits During Faults to Ground. Gilkeson, Jeanne, Davenport....40–8; disc. 424 1942
Performance of Heavy-Duty High-Speed 138-Kv Circuit Breakers—Oil and Air-Blast, Field Tests and. Sporn, St. Clair..401–10; disc. 463 1945
Performance of Hydroelectric Generating Units on the 2,000,000-Horsepower Saguenay System, Improvements in. Lawton....900–10; disc. 1187 1946
Performance of Induction Motors, Electromechanical Transient. Weygandt, Charp..1000–09; disc. 1167 1946
Performance of Induction Motors, Transient. Maginniss, Schultz....641–6; disc. 1458 1944
Performance of Magnetic-Type Power Circuit Breakers, The Development, Design, and. Linde. Wyman....386–93; disc. 510 1946
Performance of 161-Kv and 115-Kv Transmission Lines. Hapgood, Almon....863–9; disc. 869 1947
Performance of 110- to 165-Kv Transmission Lines, Lightning. (Committee Report).294–304; disc. 304 1939
Performance of Portable Electrical Instruments in Magnetic Fields. Peterson....1228–31; disc. 1231 1948
Performance of Potential Devices, Transient and Steady-State. Harder, Langguth, Woods....91–9; disc. 99 1940
Performance of Pumped Ignitron Rectifiers. Herskind, Remscheid..215–18 1948
Performance of Salient-Pole Synchronous Motors, Starting. Liwschitz....913–19; disc. 1215 1940
Performance of Semiconductor Rectifiers, A Practical Approach to Calculating Optimum. Wilson....640–2; disc. 642 1948
Performance of Servomechanisms, Comparison of Steady-State and Transient. Chestnut, Mayer...765–77 1949
Performance of Servomechanisms, The Effect of Coulomb Friction on the. McCann, Lindvall, Wilts....540–6 1948
Performance of Shunt Capacitors, Report of a Survey on the. (Committee Report).1200–06; disc. 1206 1949
Performance of Standard 230-Kv Impulse and Tank-Type Oil Circuit Breakers on Field Tests, Unusual. Riets....267–70; disc. 270 1948
Performance of the Single-Phase Synchronous Machine. Robertson, Rogers....194–6 1948
Performance of the 3,600-Horsepower New Haven Electric Locomotives, Study of the. Konn, Craton....212–16; disc. 217 1939
Performance of the Vertical Generator Thrust Bearings at the Bonneville Plant of the Corps of Engineers, War Department, The Design and. Lewis, Gordon..1231–7; disc. 1237 1947
Performance of Thyratrons, Frequency. Wittenberg....843–8 1946
Performance of Traveling Waves in Coils and Windings. Rudenberg....1031–40; disc. 1257 1940
Performance of 220-Kv Transmission Lines, Lightning. Part II. (Committee Report)....70–6; disc. 499 1946 (Part I—1934)
Performance on Electric Power Systems With Improved Instruments, Testing Governor. Allen, Hess....329–39; disc. 339 1947
Performance Records—Steel and Wood Transmission Lines, Comparative. Booker....686–9; disc. 689 1949
Performance Requirements for Relays on Unusually Long Transmission Lines. Poage, Streifus, MacGregor, Goerge..275–83; disc. 422 1943
Performance Specification, Governors and the AIEE-ASME Governor. Schwendner, Astley....1334–6 1949
Performance Test of the Allgemeine Elektricitats Gesellschaft Free-Jet Air-Blast 220-Kv 2,500-Megavolt-Ampere Reclosing Circuit Breaker. Dovjikov, Diemond....295–304; disc. 304 1948
Performance, The Apparent-Impedance Method of Calculating Single-Phase Motor. Morrill....1037–41 1941
Performance, The Eccentric Pole Face—A Means to Better D-C Machine. Baker....1107–10 1949
Performance With Power Rectifiers, Watt-Hour-Meter. Weller, Trekell, Stebbins....449–57; disc. 1184 1940
Periods, Demand-Meter Time. Lincoln, Sprole....728–33; disc. 733 1933
Permalloy for High-Quality Inductance Coils, Compressed Powdered Molybdenum. Legg, Given....865–72; disc. 1131 1940
Permalloy Tape in Wide-Band Telephone and Pulse Transformers, Applications of Thin. Gans..177–83 1946
Permanent-Magnet Movable-Coil Instrument Having a General Circuit, Relation Between Electrical and Mechanical Parameters of a. Goodwin....374–9 1948
Permanent-Magnet Movable-Coil Instrument Mechanisms, A Bridge Method for Determining the Motional Characteristics of. Gilbert....411–15 1948
Permanent Magnets From Transient Magnetic Fields, The Shielding of. Wey..875–7; disc. 1338 1941
Permanent Magnets, Stabilised. Cioffi....1540–3 1948
Permatron—A Magnetically Controlled Industrial Tube, The. Overbeck....224–8; disc. 228 1939
Permeability Material, A 60-Cycle Hysteresis Loop Tracer for Small Samples of Low-. Wiegand, Hansen....119–31; disc. 131 1947
Petersen-Coil System, Factors Affecting Arc Extinction on a. Eaton....576–81; disc. 581 1939
Petersen Coils on 66-Kv System of Metropolitan Edison Company, Operating Experience With. Rankin, Neidig....568–73; disc. 573 1939
Petersen Coils, The Electrostatic Unbalance of Transmission Lines and Its Effect on the Application of. Lyon....107–12; disc. 112 1939
Petroleum Pipe Lines, Electrification of. Hyde....968–74; disc. 974 1948
Petroleum Refiner, Electrical Engineering and the. Weeks, Giesecke, Lathrop....106–09; disc. 109 1940

Phase-Angle Control of System Interconnections. Pierce, Hamilton. . . . . 83–91; disc. 91 1939

Phase-Angle Discrimination, A Distance Relay With Adjustable. Goldsborough. . . . . 835–8; disc. 1471 1944

Phase Angle in Current Transformers, A Simple Method for Determination of Ratio Error and. Wents. . . . . 949–54; disc. 1369 1941

Phase Angle of Electrical Quantities, The Determination of Magnitude and. Walker. . . 837–9; disc. 1333 1941

Phase Angle of Potential Transformers, A Capacitance Bridge for Determining the Ratio and. Bousman, Ten Broeck. . . . . 541–5; disc. 944 1943

Phase Commutator Armature With Six Adjustable Brushes, A Study of the 3. Franklin. 197–204 1948

Phase-Comparison Carrier-Current Relaying. McConnell, Cramer, Seeley. . . . . 825–33; disc. 973 1945

Phase Conductors, The Effect of Corona on Coupling Factors Between Ground Wires and. McCann. . . . . 818–26; disc. 940 1943

Phase Occurrence of Arc-Backs in High-Current Mercury-Arc Rectifiers. Pakala, Batten. 345–7 1940

Phase Synchronous Machine, Single. Terry, Robertson. 186–93 1948

Phases of Calculation of Leakage Reactance of Induction Motors, Some. Liwschitz, Formhals. . . . . 1409–12; disc. 1412 1947

Phenomena, A New Instrument for Recording Transient. Begun. . . . . 175–7; disc. 418 1942

Phenomena, Current Zero. The Geometry of Arc Interruption. Boehne:
Part I. 524–32 1941
Part II. . . . . 375–87; disc. 448 1944

Phenomena in Telephone Switching Circuits, Contact. Curtis. . . . . 360–8; disc. 368 1940

Phenomena of 3-Conductor Cables, Transient Temperature. Wollaston. . . . . 1284–95; disc. 1295 1949

Phenomena on Aircraft Structures, Electric-Circuit Burning-Clear and Damage. Foust, Hutton. . . . . 198–204; disc. 457 1944

Phenomena, Radio-Frequency High-Voltage. Alford, Pickles. . . . . 129–36; disc. 136 1940

Phenomenon, Electrical Insulation Deterioration Treated as a Chemical Rate. Dakin. . . 113–18; disc. 118 1948

Philadelphia, 69-Kv Pipe-Type Cable Circuits in. Kidder, Van Antwerp. . . . . 550–6; disc. 556 1949

Philosophy of Relaying. Knapp, Hicks. . . . . 735–41; disc. 1135 1946

Phonograph Reproducer Design. Bachman. 159–62 1946

Photographic Purposes, An Electro-Optical Shutter for. Zarem, Marshall, Poole. 84–91 1949

Photographic Study of A-C Arcs in Flowing Liquids. Slepian, Browne. . . . . 823–8; disc. 1330 1941

Photographic Study of Lightning. Hagenguth. . . . . 577–83; disc. 483 1947

Physics in Engineering, Mathematics in. Malti. . . . . 38–40; disc. 43 1939

Physics in the Solution of Enginering Problems, Courses to Develop Facility in the Use of Mathematics and Physics. Teare. . . . . 40–1; disc. 43 1939

Physics of Electronic Semiconductors, The. Pearson. 209–14 1947

Physics With Electrical Engineering, Co-ordination of. Bryant. . . . . 35–6; disc. 43 1939

Physics With Electrical-Engineering Subjects, Co-ordination of Mathematics and. Morgan. . . . . 42–3; disc. 43 1939

Physics With Electrical-Engineering Subjects, The Co-ordination of Mathematics and. Curry. . . . . 36–7; disc. 43 1939

Pickup and Delivery of Telegrams, Facsimile Transmission for. Ridings. 1293–8 1948

Pickup by a Group of Ignitron Rectifiers, Load. Morton, Bohn. . . . . 679–84; disc. 963 1943

Picture Transmission by Submarine Cable. Milnor. . . 105–08; disc. 756 1941

Pile Speed Governor, A Carbon-Button. 4–7 1946

Pile Voltage Regulator for Aircraft Generators, Analysis and Redesign of a Carbon. Kouwenhoven, Thaler. . . . . 1197–1202; disc. 1202 1948

Pile Voltage Regulators, Fundamentals, and Design Improvements, Aircraft Carbon-. Austin, Richards. 983–7 1949

Pilot for Airplanes, An Induction Generator Used With the All-Electric Automatic. Vickers. 182–5 1948

Pilot-Wire Circuits for Protective Relaying—Experience and Practice. (Committee Report) . . . . . 210–14; disc. 380 1943

Pilot-Wire Circuits, Protection of. Harder, Bostwick. . . . . 645–52; disc. 996 1942

Pilot-Wire Relay, An Improved A-C. Neher, McConnell. . . . . 12–17; disc. 638 1941

Pilot-Wire Relaying on a Metropolitan System. LeClair, Michelson. . . . . 511–15; disc. 974 1943

Pilot Wires From Induced Potentials, Protection of. Killen, Law. 267–70 1946

Pilots, Electrical Control in Automatic. Young, Lynch, Boynton. . . . . 939–43; disc. 1500 1944

Pilots for Aircraft, Electric Automatic. Halpert, Esval. . . 861–6; disc. 1501 1944

Pipe, A-C Resistance of Segmental Cables in Steel. Meyerhoff, Eager. . . . . 816–29; disc. 829 1949

Pipe Cable Installation at New Orleans, La., 115-Kv High-Pressure Oil-Filled. Bullard, Pettee, Rhodes. . . . . 475–84; disc. 484 1948

Pipe-Encased Gas Pressure Cable Lines, Location of Gas Leaks in. Piper. . . . . 10–21; disc. 21 1948

Pipe Line, Electrical Features of Design and Operation of the Plantation. Hyde, Britton. . 638–44; disc. 1051 1942

Pipe-Line Projects, Electric Equipment for the War Emergency. Thomas, Taylor, Wolfe. 396–405 1944

Pipe Line Type A 138,000-Volt Polyethylene-Sheathed Compression Cable McCormack, Hatcher, Wyatt, DelMar, Merrell, Palmer, DeTurk. . . . . 447–65; disc. 465 1948

Pipe Lines, Electrification of Petroleum Hyde. . . . . 968–74; disc. 974 1948

Pipe Lines, The Capacitor—An Aid to Electric-Power Service for. Hyde, Marbury. . . . . 387–95; disc. 476 1944

Pipe or Conduit, A-C Resistance of Large Size Conductors in Steel. Wiseman. . . . . 1745–52; disc. 1752 1948

Pipe or Conduit, Reactance of Large Cables in Steel. Del Mar. . . . . 1409–12; disc. 1412 1948

Pipe-Type Cable Circuits in Philadelphia, 69-Kv. Kidder, Van Antwero. . . . . 550–6; disc. 556 1949

Pipes of Relatively Small Dimensions, Hollow. Barrow, Schaevitz. 119–22 1941

Pipes, The Temperature Rise of Buried Cables and. Neher. . . . . 9–17; disc. 17 1949

Pit Copper Mining, Utilization of Electric Power in Open-. French, Speight. . . . . 956–66; disc. 966 1948

Pitch Factors of the Harmonics of a Fractional-Slot Winding, Distribution Factors and. Liwschitz. . . . . 664–6; disc. 926 1943

Pittsburgh, PCC Car Operating Results in. Clardy. . . . . 214–17; disc. 400 1942

Plan for a Metropolitan Area, A 66-Kv Subtransmission. Smith, Michelson. . . . . 908–12; disc. 912 1949

Plan for the First Chicago Subway, Electric Facilities and Operating. DeLeuw. . . . . 780–7; disc. 980 194

Planning the Development of a Metropolitan Electric System. Waring. . . . . 1467–72; disc. 1472 1948

Plant, A 3,000-Horsepower Gas Turbine Power. Haverstick. 458–60 1949

Plant, Development of the Transmission System From the Grand Coulee Power. Hoard, Helwith. . . . . 1095–1100; disc. 1100 1948

Plant, Development of the 230-Kv Ring Bus for Grand Coulee Power. Holmdahl, Killgore. . . . . 1369–78; disc. 1378 1948

Plant, Electric Power in a Steel. Graham. . . . . 816–18; disc. 994 1945

Plant Expansion, A Distribution System for War-Time. McKeever. . . . . 862–5; disc. 1385 1941

Plant Generation in Industry, Central Utility Power Service Versus Local. Frampton. . . . . 880–3; disc. 884 1948

Plant Loading Schedules, Co-ordination of Fuel Cost and Transmission Loss by Use of the Network Analyzer to Determine. George, Page, Ward. . . . . 1152–60; disc. 1160 1949

Plant, Modern Electric-Power-Distribution Ideas as Applied in a Large. Kaufmann, Kieb. 279–87; disc. 488 1945

Plant on Sudden Load Reduction, The Performance of a Topped Steam Power. Noest. 1348–56 1949

Plant, Power Distribution and Utilisation in a Large Iron Ore Beneficiation. Gettelman. 1726–32 1948

Plant, Power System Development for Service to Hanford Plutonium Hoard, Curtin. 773–8 1946

Plant Regulating System for Diesel-Electric Locomotives, A Power. Lewis. . . . . 242–6; disc. 246 1947

Plant Requirements, Auxiliary-Power-. O'Neil. 682–4 1944

Plant, Supervisory Control of 30,000-Kva Hydroelectric. Bohner, Manes. 337–42 1946

Plantation Pipe Line, Electrical Features of Design and Operation of the. Hyde, Britton. . 638–44; disc. 1051 1942

Plants Against Insulation Breakdown and Consequential Damages, Protection of Industrial. Vaughan. . . . . 592–6; disc. 1166 1946

Plants, Combined Light and Power Systems for Industrial. Beeman. 76–83 1946

Plants, Enclosed Bus-Bar Electrical Distribution Systems for Industrial. Carlson. . . . . 297–302; disc. 700 1941

Plants Prefer Diesel-Electric Switching Locomotives, Industrial. Woods. 697–700 1949

Plants, Secondary Networks to Serve Industrial. Powel, Barnett. . . . . 154–6; disc. 698 1941

Plants, Trends in the Design and Arrangement of Electrical Equipment in Hydraulic Power. Welchel. . . . . 78–82; disc. 82 1939

Plastics in Aircraft Electricity. Cooper. 1220–6 1944

Plastics, The Electrical Resistivity of Resin-Treated Wood and Laminated Hydrolyzed-Wood and Paper-Base. Weatherwax, Stamm. 833–8 1945

Plow, The Submarine Cable. Lawton. . . . . 675–85; disc. 685 1939

Plugging, Transient Torques in Squirrel-Cage Induction Motors, With Special Reference to. Gilfillan, Kaplan.....1200–09; disc. 1363 1941
Plutonium Plant, Power System Development for Service to Hanford. Hoard, Curtin.....773–8 1946
Pneumatic Circuit Interrupter, A New 15-Kv. Ludwig, Rawlins, Baker.....528–33; disc. 1123 1940
Pneumatic Mechanism for Outdoor Oil Circuit Breakers, A. Linde, Rietz.....543–6; disc. 1428 1944
Point Discharges, High-Voltage D-C. Starr.....356–62 1941
Point Gaps at 60 Cycles, Behavior of. Lebacqs.....44–8; disc. 651 1941
Points in Squirrel-Cage Motors, Dead. Graham.....637–42 1940
Polar Vector Indicator. Walker, Waynick, Sulzer.....154–9 1949
Polarity Limits of the Sphere Gap. McMillan.....56–9; disc. 59 1939
Polarized-Light Servo System. Berry.....195–8; disc. 429 1944
Polarized Relay as an Aircraft Control Element, A. Johnson, Glassow.....1249–55 1948
Pole Axis, Saturated Synchronous Machines Under Transient Conditions in the. Rudenberg.....297–306; disc. 444 1942
Pole Face—A Means to Better D-C Machine Performance, The Eccentric. Baker.....1107–10 1949
Pole-Face Loss in Solid-Rotor Turbine Generators. Kuyper.....827–34; disc. 925 1943
Pole Fires Due to Insulator Contamination. Wickham, Adler, Oldacre.....1741–4 1948
Pole 400-Cycle Electrically Operated Aircraft Circuit Breaker, A 208Y/-120-Volt 120-Ampere Three-. Titus, Reifschneider.....551–5 1945
Pole Lines for Rural Power and Telephone Services, Joint Use of. Campbell, Hill, Moore, Schols.....519–24; disc. 524 1947
Pole Lines, Lightning Investigations on 33-Kv Wood-. Andrews, McCann.....768–77; disc. 954 1945
Pole Lines, Rubber Insulators for. Wheeler, Markley.....195–7 1949
Pole Motor, The Field Fluxes of the Shaded-. Kimberly.....273–7 1949
Pole Motors, Performance Calculations on Shaded. Trickey.....1431–8; disc. 1438 1947
Pole Relaying and Reclosing on a Large 132-Kv System, Experience With Single-. Trainor, Parks.....405–11; disc. 411 1947
Pole Service Restorer, A New Single-. Tugby.....889–92; disc. 1070 1942
Pole Synchronous Machines, The Quadrature Synchronous Reactance of Salient-. Shepherd, Kilbourne.....684–9; disc. 926 1943
Pole Synchronous Motors, Starting Performance of Salient-. Liwschits.....913–19; disc. 1215 1940
Pole-Top Methods of Artificial Respiration, A Comparison of the Relative Efficiency of the Schafer and. Kouwenhoven, Hooker, Langworthy.....41–4; disc. 660 1941
Pole Transmission Lines, Ten Years Performance of Lightning-Resistant Wood. Schahfer, Knuts.....934–40; disc. 940 1948
Pole 230-Kv Transmission Lines, Wood-. Clark.....94–7 1943
Pole Type Generators Supplying a Rectifier Load, Operation of Non-salient-. Ross, Batchelor.....667–70; disc. 959 1943
Poles and Crossarms, The Preservative Treatment of Various Species. MacLean.....549–54 1946
Poles and Pole Treatment. Colley.....685–91 1942
Policy Becomes Effective in January 1947, New AIEE Publication.....1721–3 1947
Polyethylene and Rubber Cables, Corona-Initiation Measurements on. Depackh.....939–40 1945
Polyethylene as Cable Insulation. Maibauer, Myers.....916–18 1945
Polyethylene, Dielectric Strength of. Del Mar.....918–19 1945
Polyethylene, General Characteristics of. Shackleton.....912–16 1945
Polyethylene Insulated Coaxial Cable for Carrier Current Control Circuit. Slade, West...1416–18; disc. 1419 1948
Polyethylene-Sheathed Compression Cable—Pipe Line Type, A 138,000-Volt. McCormack, Hatcher, Wyatt, Del Mar, Merrell, Palmer, DeTurk.....447–65; disc. 465 1948
Polyethylenes, Properties of Different. Clarke.....919–21 1945
Polyphase Broadcasting. Byrne.....347–50 1939
Polyphase Brush-Shifting Commutator Motor, (Schrage Type), The Circle Diagram of the. Franklin.....1667–72; disc. 1672 1947
Polyphase Commutator Motors, A Generalized Equivalent Circuit in the Theory of. Coulthard.....423–31 1941
Polyphase Commutator Regulator for Speed Control, The. Conrad, Brooks, Fellers...321–8; disc. 484 1946
Polyphase Currents, Paired-Phase Bus Bars for Large. Fisher, Frank.....71–7; disc. 417 1943
Polyphase Directional Relay, An Improved. Hoard..246–8; disc. 681 1941
Polyphase-Induction-Motor Design to Meet Fixed Specifications, Some Aspects of Electric-Motor Design—Lloyd.....14–20; disc. 498 1944
Polyphase Induction Motors During Single-Phase Operation, Overvoltages in. Macmillan, Carter.....819–23; disc. 1328 1941
Polyphase Induction Motors, Shutdown Versus Hot-Spot Temperatures in. Potter, Frohardt...56–8; disc. 483 1946
Polyphase Induction Motors, The Horsepower Output of. Robinson.....770–5 1947
Polyphase Induction Motors, The Use of Auxiliary Impedances in the Single-Phase Operation of. Ager.....494–9; disc. 660 1941
Polyphase Machines, The Air Gap Reactance of. Alger, West...1331–43 1947
Polyphase Motor Design—The Design and Properties of the Magnetic Circuit, Some Aspects of. Lloyd, Stone.....812–18; disc. 1151 1946
Polyphase Networks, Transformation Theory of General Static. Pipes.....123–8; disc. 128 1940
Polyphase Reluctance Motors—Synchronous Motors Without Field Excitation, Performance Calculations on. Trickey.....191–3 1946
Polyphase Thermal Ampere-Demand Meter, A. Petsinger.....167–74 1947
Porcelain, Dielectric Strength of. Bellaschi, Manning.651–6; disc. 656 1939
Porcelain Insulators at High Altitudes, Investigation of. Fields, Cadwell.....656–60 1946
Porcelain Potheads, A New Technique in the Manufacture of Soldered. Papp, Nicholas.....1258–60; disc. 1261 1949
Portable Electrical Instruments in Magnetic Fields, Performance of. Peterson.....1228–31; disc. 1231 1948
Portable Instrument for Measuring Insulation Resistance at High Voltage, A. Atkinson, Taylor.....164–7; disc. 428 1945
Position Lights, The Development of Aircraft. Vitol..796–8; disc. 1493 1944
Position Regulator for Propeller Milling Machine, Tracer-Controlled. Hanna, Osbon, Hartley.....201–05; disc. 452 1945
Positive and Negative Damping in Synchronous Machines. Liwschits.....210–13 1941
Possibilities and Methods of Extending a Carrier Current Relay Channel to Other Uses. Smith, Goldsborough.....23–7; disc. 645 1941
Possibilities of Heat Pumps for Heating Homes. Berry.....619–22; disc. 1433 1944
Postgraduate Course in Industry in High-Frequency Engineering, A New. Stevenson, Ramo.....374–8; disc. 378 1940
Postulate, Energy Flow in Electric Systems—the Vi Energy-Flow. Slepian.....835–41; disc. 1054 1942
Postwar Televison Receiver Design. Pugsley.....453–8 1947
Potential Breakdown of Small Gaps Under Simulated High-Altitude Conditions. DeLerno.....109–12; disc. 456 1944
Potential, Causes of Corrosion of Fine Copper Wires Carrying a. Stephens, Gehrenbeck.....357–60; disc. 360 1940
Potential Devices and Suggested Material for a Standard, Rating of. Clem, Langguth.....676–80; disc. 1217 1940
Potential Devices, Application of Capacitance. Clem.....1–8; disc. 8 1939
Potential Devices, Transient and Steady-State Performance of. Harder, Langguth, Woods.....91–9; disc. 99 1940
Potential Residential Electric Load, The Heat-Pump—Its Significance as a. Bary.....1–8 1949
Potential Testing Equipment for Quantity Production, High. Summers.....289–92; disc. 756 1941
Potential-Transformer Design, New Developments in. Camilli.....483–7; disc. 920 1943
Potential-Transformer Standardisation, Current- and. (Committee Report).....698–706; disc. 998 1942
Potential Transformers, A Capacitance Bridge for Determining the Ratio and Phase Angle of. Bousman, Ten Broeck.....541–5; disc. 944 1943
Potentiality of Mexico, Hydroelectric. Quintero.....993–4 1948
Potentials, Protection of Pilot Wires From Induced. Killen, Law.....267–70 1946
Potentiometer, A Multiplied-Deflection A-C. Marshall.....77–80; disc. 460 1944
Potentiometer and Its Application to the Non-Destructive Testing of Insulating Equipment, An Automatic A-C. Keinath.....887–90; disc. 890 1939
Potheads, A New Technique in the Manufacture of Soldered Porcelain. Papp, Nicholas.....1258–60; disc. 1261 1949
Potheads 69,000 Volts and Below, Design Fundamentals of. Nicholas.....1263–7; disc. 1267 1949
Powdered Molybdenum Permalloy for High-Quality Inductance Coils, Compressed. Legg, Given.....865–72; disc. 1131 1940
Power Air-Blast Circuit Breakers, Large Indoor. Jansson.....1675–8; disc. 1679 1948
Power and Communication Circuits for Low-Frequency Induction, Co-ordination of. Coleman, Trueblood.....403–12; disc. 412 1940

Power and Facilities, The Automatic Welding-Machine Starter and its Relation to Maximum Utilisation of. Porter....728–30; disc. 996 1943

Power and Telephone Services, Joint Use of Pole Lines for Rural. Campbell, Hill, Moore, Schols....519–24; disc. 524 1947

Power Apparatus and Systems, Measurements Pertaining to the Co-ordination of Radio Reception With. Foust, Frick.....284–91; disc. 455 1943

(Power Applications) Data on the High-Frequency Resistance of Coils. Witzig.....764–9 1947

(Power Applications) Electric Drives for Textile Finishing Ranges. Moore, Uhl.....684–94 1947

(Power Applications, General) Applications of Copper-Oxide Rectifiers. Morris.....103–06 1939

Power Applications, Industrial

A Distribution System for War-Time Plant Expansion. McKeever.....862–5; disc. 1385 1941

A New Electric Hoist Drive for Cranes. Whiting.....59–64 1944

A New Mercury Rheostatic Element for Regulation and Control. Oplinger.....846–9; disc. 1386 1941

A New Multiple High-Speed Air Circuit Breaker for Mercury-Arc-Rectifier Anode Circuits and Its Relation to the Arc-Back Problem. Seaman, Morton.....788–96; disc. 1057 1942

A New Voltage-Regulating Relay Plus Line-Drop Compensator. Carlin.....63–6; disc. 481 1942

A 600-Volt Enclosed Limiter for Network Use. Langguth, Rawlins, Wallace.....536–8; disc. 1062 1942

A Study of the Modified Kramer or Asynchronous-Synchronous Cascade Variable-Speed Drive. Liwschitz, Kilgore.....255–60 1942

An Analysis of Motor Selection for Brass-Slab Rolling-Mill Service. Berkley.....185–9; disc. 189 1947

An Extension of Impact Speed-Drop Analysis. Crever.....191–6 1947

Application of Electric Equipment for Ship-Propeller Milling Machine. Morton, Rutemiller.....205–08; disc. 453 1945

Application of the Betatron to Practical Radiography. Girard, Adams.....241–6; disc. 489 1946

Application of Vacuum-Tube Oscillators to Inductive and Dielectric Heating in Industry. Jordan.....831–4 1942

Automatic Control and Switching Equipment for Capacitor Banks and Its Application. Schroeder, Bloomquist....649–54; disc. 1440 1944

Automatic Operation of Electric Boilers. Eaton....1061–8; disc. 1068 1947

Capacitor Relay Timing in Industrial Control. Stansbury, Jochem.....65–9; disc. 69 1940

Characteristics and Power Requirements of Spinning Frames. Untersee:

Part I.....1–4 1940

Part II.....336–8 1940

Continuous Processing for Automobile Tire Fabrics. Cassidy, Mosteller.....218–23 1939

Co-ordinated Electric Drive for a Rubber Calender Train. John, Knapp, Mosteller.....128–34; disc. 492 1946

Design of an Electronic Frequency Changer. Willis, Kuenning, Christensen, Bedford..1070–8; disc. 1413 1944

Design of Induction-Heating Coils for Cylindrical Nonmagnetic Loads. Vaughan, Williamson.....587–92; disc. 965 1945

Design of Sealed Ignitron Rectifiers for Three-Wire Service. Morack..103–07 1945

Dielectric Heating—The Measurement of Loss Under Rising Temperature. Whitehead.....947–9 1947

Electric Drives for Supercalenders in Paper Mills. Smith.....338–41; disc. 341 1939

Electric Equipment for the War Emergency Pipe-Line Projects. Thomas, Taylor, Wolfe...396–405 1944

Electric Equipment for 2-for-1 Twister. Gwaltney, Burnham....811–4 1947

Electric Furnace Practice in Canada. Balleny.....917–24 1947

Electric Power in a Steel Plant. Graham.....816–18; disc. 994 1945

Electrical Drives for Wide Speed Ranges. Caldwell, Formhals....54–6 1942

Electrical Engineering and the Petroleum Refiner. Weeks, Giesecke, Lathrop.....106–09; disc. 109 1940

Electrical Equipment on Machine Tools. Graves....18–22; disc. 22 1940

Electrical Features of Design and Operation of the Plantation Pipe Line. Hyde, Britton.....638–44; disc. 1051 1942

Electrification of the Cotton Industry in the South. Bobe.....201–08; disc. 208 1947

Electronic Control of D-C Motors. Puchlowski.....870–7; disc. 985 1943

Electronic Register Control for Multicolor Printing. Cockrell....617–22; disc. 1117 1946

Enclosed Bus-Bar Electrical Distribution Systems for Industrial Plants. Carlson.....297–302; disc. 700 1941

Extending the Use of Shunt Capacitors by Means of Automatic Switching. Cuttino.....674–8; disc. 1439 1944

Fault Voltage Drop and Impedance at Short-Circuit Currents in Low-Voltage Circuits. Schurig.....479–87; disc. 654 1941

Fundamentals of Industrial Distribution Systems, The. Beeman, Kaufmann.....272–9; disc. 477 1942

Heating of Nonmagnetic Electric Conductors by Magnetic Induction—Longitudinal Flux. Baker.....273–8 1944

Ignitron Rectifiers in Industry. Cox, Jones.....713–18; disc. 1065 1942

Induction Heating of Long Cylindrical Charges. Storm.....369–77 1946

Induction Heating of Moving Magnetic Strip. Baker.....184–9 1945

Industrial Application of Rototrol Regulators. Harris.....118–23 1946

Industrial Applications of Amplidyne Generators. Shoults, Edwards, Crever.....944–9; disc. 1136 1940

Industrial Control: Dynamic Braking of a D-C Shunt Motor and Load. Leland, Rader.....472–6 1943

Inverter Action on Reversing of Thyratron Motor Control. Palmer, Leigh.....175–84; disc. 494 1944

Large Adjustable-Speed Wind Tunnel Drive. Clymer..156–8; disc. 456 1942

Load Pickup by a Group of Ignitron Rectifiers. Morton, Bohn.....679–84; disc. 963 1943

Maintenance of Good Brush Performance. Kalb.....819–25; disc. 996 1945

Maintenance of Rectifiers on Electrochemical Installations. Housley, Hughes.....436–41; disc. 1115 1946

Mercury-Arc Rectifiers in the Coal-Mining Industry. Renshaw.....242–4; disc. 244 1940

Modern Diesel-Electric Drilling Rig Equipment. Rhea.....447–53 1946

Overvoltages in Polyphase Induction Motors During Single-Phase Operation. Macmillan, Carter.....819–23; disc. 1328 1941

Paired-Phase Bus Bars for Large Polyphase Currents. Fisher, Frank.....71–7; disc. 417 1943

Protection of Industrial Plants Against Insulation Breakdown and Consequential Damages. Vaughan.....592–6; disc. 1166 1946

Secondary Networks to Serve Industrial Plants. Powel, Barnett.....154–6; disc. 698 1941

Selenium Rectifiers and Their Design. Yarmack.....488–95; disc. 975 1942

Short-Circuit Calculating Procedure for Low-Voltage A-C Systems. Darling.....1121–36; disc. 1294 1941

Standardised Load-Center Unit Substations for Low-Voltage A-C Systems. Hunter, Page.....519–25 1942

Supervisory Control for the World's Most Modern Steel Mill. Garrett, Reagan.....259–64; disc. 1944

Switchgear and Control for an Electronic Power Converter. Gittings, Bateman.....585–8; disc. 1413 1944

Synchronous Motors With Controlled Excitation for Suddenly Applied Loads. Boice, Caldwell, Halberg..113–19; disc. 416 1943

Temperature Survey fo the United States. Smith, Tenney.....769–75; disc. 1090 1940

The Design Characteristics of Amplidyne Generators. Fisher.....939–44; disc. 1135 1940

The Design of Bus-Bar Industrial Distribution Systems: an Epitomisation of Available Data. Higgins..385–400; disc. 486 1945

The Electronic Converter for Exchange of Power. Cramer, Morton, Darling...1059–69; disc. 1413 1944

The Power-Recovery System of Testing Aircraft Engines. Cassidy, Mosteller, Wright.....240–6; disc. 416 1943

Theory and Design of NEMA Resistors for Motor Starting and Speed Control. Armstrong.....277–81 1940

Thyratron Motor Control. Moyer, Palmer.....706–12; disc. 962 1943

Tracer-Controlled Position Regulator for Propeller Milling Machine. Hanna, Osbon, Hartley.....201–05; disc. 452 1945

Turbine-Electric Textile-Range Drives. Richardson.....57–60 1940

Two New Methods of Accelerating Electric Motors Automatically. Leitch.....487–93; disc. 655 1941

Variable-Speed Drive for United States Army Air Corps Wind Tunnel at Wright Field, Dayton, Ohio. Dickey, Laffoon, Kilgore.....126–30; disc. 456 1942

Variable-Voltage Equipment for Rotary Drilling Rigs. Lamberger...248–55; disc. 255 1940

Power Arc-Over on Overhead Distribution Lines and Newly Developed Equipment for Protection Against Conductor Burndown From That Cause. Matthews.....596–604; disc. 684 1941

Power at Extra High Voltages, Transmission of Electric. Sporn, Monteith.....1571–7; disc. 1577 1947

Power Cable, Carrier Supervisory Control of Pumping Station Over. Derr, Keller, Hedke.....699–705; disc. 1124 1946

Power-Cable Circuits, Impulse Strength of Insulated-. Halperin, Shanklin.....1190–7; disc. 1386 1944

Power Cable, Semiconducting Shielding for A-C. Merrell.....605–09; disc. 1145 1946

Plugging, Transient Torques in Squirrel-Cage Induction Motors, With Special Reference to. Gilfillan, Kaplan.....1200–09; disc. 1363 1941
Plutonium Plant, Power System Development for Service to Hanford. Hoard, Curtin.....773–8 1946
Pneumatic Circuit Interrupter, A New 15-Kv. Ludwig, Rawlins, Baker.....528–33; disc. 1123 1940
Pneumatic Mechanism for Outdoor Oil Circuit Breakers, A. Linde, Rietz.....543–6; disc. 1428 1944
Point Discharges, High-Voltage D-C. Starr.....356–62 1941
Point Gaps at 60 Cycles, Behavior of. Lebacqs.....44–8; disc. 651 1941
Points in Squirrel-Cage Motors, Dead. Graham.....637–42 1940
Polar Vector Indicator. Walker, Waynick, Sulzer.....154–9 1949
Polarity Limits of the Sphere Gap. McMillan.....56–9; disc. 59 1939
Polarized-Light Servo System. Berry.....195–8; disc. 429 1944
Polarized Relay as an Aircraft Control Element, A. Johnson, Glassow.....1249–55 1948
Pole Axis, Saturated Synchronous Machines Under Transient Conditions in the. Rudenberg.....297–306; disc. 444 1942
Pole Face—A Means to Better D-C Machine Performance, The Eccentric. Baker.....1107–10 1949
Pole-Face Loss in Solid-Rotor Turbine Generators. Kuyper.....827–34; disc. 925 1943
Pole Fires Due to Insulator Contamination. Wickham, Adler, Oldacre.....1741–4 1948
Pole 400-Cycle Electrically Operated Aircraft Circuit Breaker, A 208Y/-120-Volt 120-Ampere Three-. Titus, Reifschneider.....551–5 1945
Pole Lines for Rural Power and Telephone Services, Joint Use of. Campbell, Hill, Moore, Schols.....519–24; disc. 524 1947
Pole Lines, Lightning Investigations on 33-Kv Wood-. Andrews, McCann.....768–77; disc. 954 1945
Pole Lines, Rubber Insulators for. Wheeler, Markley.....195–7 1949
Pole Motor, The Field Fluxes of the Shaded-. Kimberly.....273–7 1949
Pole Motors, Performance Calculations on Shaded. Trickey.....1431–8; disc. 1438 1947
Pole Relaying and Reclosing on a Large 132-Kv System, Experience With Single-. Trainor, Parks.....405–11; disc. 411 1947
Pole Service Restorer, A New Single-. Tugby.....889–92; disc. 1070 1942
Pole Synchronous Machines, The Quadrature Synchronous Reactance of Salient-. Shepherd, Kilbourne.....684–9; disc. 926 1943
Pole Synchronous Motors, Starting Performance of Salient-. Liwschitz.....913–19; disc. 1215 1940
Pole-Top Methods of Artificial Respiration, A Comparison of the Relative Efficiency of the Schafer and. Kouwenhoven, Hooker, Langworthy.....41–4; disc. 660 1941
Pole Transmission Lines, Ten Years Performance of Lightning-Resistant Wood. Schahfer, Knuts.....934–40; disc. 940 1948
Pole 230-Kv Transmission Lines, Wood-. Clark.....94–7 1943
Pole Type Generators Supplying a Rectifier Load, Operation of Non-salient-. Ross, Batchelor.....667–70; disc. 959 1943
Poles and Crossarms, The Preservative Treatment of Various Species. MacLean.....549–54 1946
Poles and Pole Treatment. Colley.....685–91 1942
Policy Becomes Effective in January 1947, New AIEE Publication.....1721–3 1947
Polyethylene and Rubber Cables, Corona-Initiation Measurements on. Depackh.....939–40 1945
Polyethylene as Cable Insulation. Maibauer, Myers.....916–18 1945
Polyethylene, Dielectric Strength of. Del Mar.....918–19 1945
Polyethylene, General Characteristics of. Shackleton.....912–16 1945
Polyethylene Insulated Coaxial Cable for Carrier Current Control Circuit. Slade, West...1416–18; disc. 1419 1948
Polyethylene-Sheathed Compression Cable—Pipe Line Type, A 138,000-Volt. McCormack, Hatcher, Wyatt, Del Mar, Merrell, Palmer, DeTurk.....447–65; disc. 465 1948
Polyethylenes, Properties of Different. Clarke.....919–21 1945
Polyphase Broadcasting. Byrne.....347–50 1939
Polyphase Brush-Shifting Commutator Motor, (Schrage Type), The Circle Diagram of the. Franklin.....1667–72; disc. 1672 1947
Polyphase Commutator Motors, A Generalized Equivalent Circuit in the Theory of. Coulthard.....423–31 1941
Polyphase Commutator Regulator for Speed Control, The. Conrad, Brooks, Fellers...321–8; disc. 484 1946
Polyphase Currents, Paired-Phase Bus Bars for Large. Fisher, Frank.....71–7; disc. 417 1943
Polyphase Directional Relay, An Improved. Hoard..246–8; disc. 681 1941
Polyphase-Induction-Motor Design to Meet Fixed Specifications, Some Aspects of Electric-Motor Design—Lloyd.....14–20; disc. 498 1944
Polyphase Induction Motors During Single-Phase Operation, Overvoltages in. Macmillan, Carter.....819–23; disc. 1328 1941
Polyphase Induction Motors, Shutdown Versus Hot-Spot Temperatures in. Potter, Frohardt...56–8; disc. 483 1946
Polyphase Induction Motors, The Horsepower Output of. Robinson.....770–5 1947
Polyphase Induction Motors, The Use of Auxiliary Impedances in the Single-Phase Operation of. Ager.....494–9; disc. 660 1941
Polyphase Machines, The Air Gap Reactance of. Alger, West...1331–43 1947
Polyphase Motor Design—The Design and Properties of the Magnetic Circuit, Some Aspects of. Lloyd, Stone.....812–18; disc. 1151 1946
Polyphase Networks, Transformation Theory of General Static. Pipes.....123–8; disc. 128 1940
Polyphase Reluctance Motors—Synchronous Motors Without Field Excitation, Performance Calculations on. Trickey.....191–3 1946
Polyphase Thermal Ampere-Demand Meter, A. Petsinger.....167–74 1947
Porcelain, Dielectric Strength of. Bellaschi, Manning.651–6; disc. 656 1939
Porcelain Insulators at High Altitudes, Investigation of. Fields, Cadwell.....656–60 1946
Porcelain Potheads, A New Technique in the Manufacture of Soldered. Papp, Nicholas.....1258–60; disc. 1261 1949
Portable Electrical Instruments in Magnetic Fields, Performance of. Peterson.....1228–31; disc. 1231 1948
Portable Instrument for Measuring Insulation Resistance at High Voltage, A. Atkinson, Taylor.....164–7; disc. 428 1945
Position Lights, The Development of Aircraft. Vitol..796–8; disc. 1493 1944
Position Regulator for Propeller Milling Machine, Tracer-Controlled. Hanna, Osbon, Hartley.....201–05; disc. 452 1945
Positive and Negative Damping in Synchronous Machines. Liwschitz.....210–13 1941
Possibilities and Methods of Extending a Carrier Current Relay Channel to Other Uses. Smith, Goldsborough.....23–7; disc. 645 1941
Possibilities of Heat Pumps for Heating Homes. Berry.....619–22; disc. 1433 1944
Postgraduate Course in Industry in High-Frequency Engineering, A New. Stevenson, Ramo.....374–8; disc. 378 1940
Postulate, Energy Flow in Electric Systems—the Vi Energy-Flow. Slepian.....835–41; disc. 1054 1942
Postwar Televison Receiver Design. Pugsley.....453–8 1947
Potential Breakdown of Small Gaps Under Simulated High-Altitude Conditions. DeLerno.....109–12; disc. 456 1944
Potential, Causes of Corrosion of Fine Copper Wires Carrying a. Stephens, Gehrenbeck.....357–60; disc. 360 1940
Potential Devices and Suggested Material for a Standard, Rating of. Clem, Langguth.....676–80; disc. 1217 1940
Potential Devices, Application of Capacitance. Clem.....1–8; disc. 8 1939
Potential Devices, Transient and Steady-State Performance of. Harder, Langguth, Woods.....91–9; disc. 99 1940
Potential Residential Electric Load, The Heat-Pump—Its Significance as a. Bary.....1–8 1949
Potential Testing Equipment for Quantity Production, High. Summers.....289–92; disc. 756 1941
Potential-Transformer Design, New Developments in. Camilli.....483–7; disc. 920 1943
Potential-Transformer Standardization, Current- and. (Committee Report).....698–706; disc. 998 1942
Potential Transformers, A Capacitance Bridge for Determining the Ratio and Phase Angle of. Bousman, Ten Broeck.....541–5; disc. 944 1943
Potentiality of Mexico, Hydroelectric. Quintero.....993–4 1948
Potentials, Protection of Pilot Wires From Induced. Killen, Law.....267–70 1946
Potentiometer, A Multiplied-Deflection A-C. Marshall.....77–80; disc. 460 1944
Potentiometer and Its Application to the Non-Destructive Testing of Insulating Equipment, An Automatic A-C. Keinath.....887–90; disc. 890 1939
Potheads, A New Technique in the Manufacture of Soldered Porcelain. Papp, Nicholas.....1258–60; disc. 1261 1949
Potheads 69,000 Volts and Below, Design Fundamentals of. Nicholas.....1263–7; disc. 1267 1949
Powdered Molybdenum Permalloy for High-Quality Inductance Coils, Compressed. Legg, Given.....865–72; disc. 1131 1940
Power Air-Blast Circuit Breakers, Large Indoor. Jansson.....1675–8; disc. 1679 1948
Power and Communication Circuits for Low-Frequency Induction, Co-ordination of. Coleman, Trueblood.....403–12; disc. 412 1940

Power and Facilities, The Automatic Welding-Machine Starter and its Relation to Maximum Utilization of. Porter....728–30; disc. 996 1943

Power and Telephone Services, Joint Use of Pole Lines for Rural. Campbell, Hill, Moore, Schols....519–24; disc. 524 1947

Power Apparatus and Systems, Measurements Pertaining to the Co-ordination of Radio Reception With. Foust, Frick.....284–91; disc. 455 1943

(Power Applications) Data on the High-Frequency Resistance of Coils. Witzig.....764–9 1947

(Power Applications) Electric Drives for Textile Finishing Ranges. Moore, Uhl.....684–94 1947

(Power Applications, General) Applications of Copper-Oxide Rectifiers. Morris.....103–06 1939

Power Applications, Industrial

A Distribution System for War-Time Plant Expansion. McKeever.....862–5; disc. 1385 1941

A New Electric Hoist Drive for Cranes. Whiting.....59–64 1944

A New Mercury Rheostatic Element for Regulation and Control. Oplinger.....846–9; disc. 1386 1941

A New Multiple High-Speed Air Circuit Breaker for Mercury-Arc-Rectifier Anode Circuits and Its Relation to the Arc-Back Problem. Seaman, Morton.....788–96; disc. 1057 1942

A New Voltage-Regulating Relay Plus Line-Drop Compensator. Carlin.....63–6; disc. 481 1942

A 600-Volt Enclosed Limiter for Network Use. Langguth, Rawlins, Wallace.....536–8; disc. 1062 1942

A Study of the Modified Kramer or Asynchronous-Synchronous Cascade Variable-Speed Drive. Liwschitz, Kilgore.....255–60 1942

An Analysis of Motor Selection for Brass-Slab Rolling-Mill Service. Berkley.....185–9; disc. 189 1947

An Extension of Impact Speed-Drop Analysis. Crever.....191–6 1947

Application of Electric Equipment for Ship-Propeller Milling Machine. Morton, Rutemiller.....205–08; disc. 453 1945

Application of the Betatron to Practical Radiography. Girard, Adams.....241–6; disc. 489 1946

Application of Vacuum-Tube Oscillators to Inductive and Dielectric Heating in Industry. Jordan.....831–4 1942

Automatic Control and Switching Equipment for Capacitor Banks and Its Application. Schroeder, Bloomquist....649–54; disc. 1440 1944

Automatic Operation of Electric Boilers. Eaton....1061–8; disc. 1068 1947

Capacitor Relay Timing in Industrial Control. Stansbury, Jochem.....65–9; disc. 69 1940

Characteristics and Power Requirements of Spinning Frames. Untersee:

Part I.....1–4 1940

Part II.....336–8 1940

Continuous Processing for Automobile Tire Fabrics. Cassidy, Mosteller.....218–23 1939

Co-ordinated Electric Drive for a Rubber Calender Train. John, Knapp, Mosteller.....128–34; disc. 492 1946

Design of an Electronic Frequency Changer. Willis, Kuenning, Christensen, Bedford..1070–8; disc. 1413 1944

Design of Induction-Heating Coils for Cylindrical Nonmagnetic Loads. Vaughan, Williamson.....587–92; disc. 965 1945

Design of Sealed Ignitron Rectifiers for Three-Wire Service. Morack..103–07 1945

Dielectric Heating—The Measurement of Loss Under Rising Temperature. Whitehead.....947–9 1947

Electric Drives for Supercalenders in Paper Mills. Smith.....338–41; disc. 341 1939

Electric Equipment for the War Emergency Pipe-Line Projects. Thomas, Taylor, Wolfe...396–405 1944

Electric Equipment for 2-for-1 Twister. Gwaltney, Burnham....811–4 1947

Electric Furnace Practice in Canada. Balleny.....917–24 1947

Electric Power in a Steel Plant. Graham.....816–18; disc. 994 1945

Electrical Drives for Wide Speed Ranges. Caldwell, Formhals....54–6 1942

Electrical Engineering and the Petroleum Refiner. Weeks, Giesecke, Lathrop.....106–09; disc. 109 1940

Electrical Equipment on Machine Tools. Graves....18–22; disc. 22 1940

Electrical Features of Design and Operation of the Plantation Pipe Line. Hyde, Britton.....638–44; disc. 1051 1942

Electrification of the Cotton Industry in the South. Bobe.....201–08; disc. 208 1947

Electronic Control of D-C Motors. Puchlowski.....870–7; disc. 985 1943

Electronic Register Control for Multicolor Printing. Cockrell....617–22; disc. 1117 1946

Enclosed Bus-Bar Electrical Distribution Systems for Industrial Plants. Carlson.....297–302; disc. 700 1941

Extending the Use of Shunt Capacitors by Means of Automatic Switching. Cuttino.....674–8; disc. 1439 1944

Fault Voltage Drop and Impedance at Short-Circuit Currents in Low-Voltage Circuits. Schurig.....479–87; disc. 654 1941

Fundamentals of Industrial Distribution Systems, The. Beeman, Kaufmann.....272–9; disc. 477 1942

Heating of Nonmagnetic Electric Conductors by Magnetic Induction—Longitudinal Flux. Baker.....273–8 1944

Ignitron Rectifiers in Industry. Cox, Jones.....713–18; disc. 1065 1942

Induction Heating of Long Cylindrical Charges. Storm.....369–77 1946

Induction Heating of Moving Magnetic Strip. Baker.....184–9 1945

Industrial Application of Rototrol Regulators. Harris.....118–23 1946

Industrial Applications of Amplidyne Generators. Shoults, Edwards, Crever.....944–9; disc. 1136 1940

Industrial Control: Dynamic Braking of a D-C Shunt Motor and Load. Leland, Rader.....472–6 1943

Inverter Action on Reversing of Thyratron Motor Control. Palmer, Leigh.....175–84; disc. 494 1944

Large Adjustable-Speed Wind Tunnel Drive. Clymer..156–8; disc. 456 1942

Load Pickup by a Group of Ignitron Rectifiers. Morton, Bohn.....679–84; disc. 963 1943

Maintenance of Good Brush Performance. Kalb.....819–25; disc. 996 1945

Maintenance of Rectifiers on Electrochemical Installations. Housley, Hughes.....436–41; disc. 1115 1946

Mercury-Arc Rectifiers in the Coal-Mining Industry. Renshaw.....242–4; disc. 244 1940

Modern Diesel-Electric Drilling Rig Equipment. Rhea.....447–53 1946

Overvoltages in Polyphase Induction Motors During Single-Phase Operation. Macmillan, Carter.....819–23; disc. 1328 1941

Paired-Phase Bus Bars for Large Polyphase Currents. Fisher, Frank.....71–7; disc. 417 1943

Protection of Industrial Plants Against Insulation Breakdown and Consequential Damages. Vaughan.....592–6; disc. 1166 1946

Secondary Networks to Serve Industrial Plants. Powel, Barnett.....154–6; disc. 698 1941

Selenium Rectifiers and Their Design. Yarmack.....488–95; disc. 975 1942

Short-Circuit Calculating Procedure for Low-Voltage A-C Systems. Darling.....1121–36; disc. 1294 1941

Standardized Load-Center Unit Substations for Low-Voltage A-C Systems. Hunter, Page.....519–25 1942

Supervisory Control for the World's Most Modern Steel Mill. Garrett, Reagan.....259–64; disc. 1944

Switchgear and Control for an Electronic Power Converter. Gittings, Bateman.....585–8; disc. 1413 1944

Synchronous Motors With Controlled Excitation for Suddenly Applied Loads. Boice, Caldwell, Halberg..113–19; disc. 416 1943

Temperature Survey fo the United States. Smith, Tenney.....769–75; disc. 1090 1940

The Design Characteristics of Amplidyne Generators. Fisher.....939–44; disc. 1135 1940

The Design of Bus-Bar Industrial Distribution Systems: an Epitomization of Available Data. Higgins..385–400; disc. 486 1945

The Electronic Converter for Exchange of Power. Cramer, Morton, Darling...1059–69; disc. 1413 1944

The Power-Recovery System of Testing Aircraft Engines. Cassidy, Mosteller, Wright.....240–6; disc. 416 1943

Theory and Design of NEMA Resistors for Motor Starting and Speed Control. Armstrong.....277–81 1940

Thyratron Motor Control. Moyer, Palmer.....706–12; disc. 962 1943

Tracer-Controlled Position Regulator for Propeller Milling Machine. Hanna, Osbon, Hartley.....201–05; disc. 452 1945

Turbine-Electric Textile-Range Drives. Richardson.....57–60 1940

Two New Methods of Accelerating Electric Motors Automatically. Leitch.....487–93; disc. 655 1941

Variable-Speed Drive for United States Army Air Corps Wind Tunnel at Wright Field, Dayton, Ohio. Dickey, Laffoon, Kilgore.....126–30; disc. 456 1942

Variable-Voltage Equipment for Rotary Drilling Rigs. Lamberger...248–55; disc. 255 1940

Power Arc-Over on Overhead Distribution Lines and Newly Developed Equipment for Protection Against Conductor Burndown From That Cause. Matthews.....596–604; disc. 684 1941

Power at Extra High Voltages, Transmission of Electric. Sporn, Monteith.....1571–7; disc. 1577 1947

Power Cable, Carrier Supervisory Control of Pumping Station Over. Derr, Keller, Hedke.....699–705; disc. 1124 1946

Power-Cable Circuits, Impulse Strength of Insulated-. Halperin, Shanklin.....1190–7; disc. 1386 1944

Power Cable, Semiconducting Shielding for A-C. Merrell.....605–09; disc. 1145 1946

Power Cables, Effective Resistance and Inductance of 3-Conductor Shipyard. Summers....1345–50 1948
Power Cables in Service, Guide for Wartime Conductor Temperatures for. (Committee Report)....606–10; disc. 942 1943
Power Center, D-C Aircraft Generator. Bottenmiller....1267–70 1947
Power-Circuit-Breaker Ratings. Van Sickle....882–4; disc. 1353 1941
Power Circuit Breakers, Application Ratings of Indoor. Vikoren....768–73; disc. 1168 1946
Power Circuit Breakers, The Development, Design, and Performance of Magnetic-Type. Linde, Wyman....386–93; disc. 510 1946
Power Circuit Instruments for the Higher Range of Audio Frequencies. Lunas, MacGahan...1230–5 1941
Power Circuits, A New Electronic Timing Relay for Reducing Outages on. Dlouhy....407–11 1946
Power Circuits on Large Aircraft and Its Application to Fault-Current Calculations, Impedance of 400-Cycle Three-Phase. Chappuis, Olmsted....1213–20; disc. 1496 1944
Power Circuits, Sectionalising and Internal Transformer Fusing on Rural. Watkins....383–8; disc. 388 1947
Power Control, Dynamoelectric Amplifier for. Alexanderson, Edwards, Bowman....937–9; disc. 1136 1940
Power Converter, History and Development of the Electronic. Alexanderson, Phillipi....654–7; disc. 1413 1944
Power Converters in North America, Mercury-Arc. (Committee Report)....1031–59 1948
Power Converters, Pentode Ignitrons for Electronic. Steiner, Zehner, Zuvers....693–7; disc. 1413 1944
Power Costs and the Contribution of Existing Transmission Networks Towards Cost Reduction of Power for Electrification of Main Line Railroads with Moderate Traffic. Evans....596–8; disc. 599 1948
Power Development in Mexico. Urquidi, Del Busto, Lozano....841–2 1948
Power Development in Quebec, Hydroelectric. Lawton....1006–21 1947
Power Development, The Grand Coulee. Denton....899–910; disc. 911 1948
Power Distribution and Utilization in a Large Iron Ore Beneficiation Plant. Gettelman....1726–32 1948
Power Distribution Circuits, Application of 720-Cycle Carrier to. Woodworth....903–15; disc. 1003 1943
Power-Distribution Ideas as Applied in a Large War Plant, Modern Electric-. Kaufmann, Kieb....279–87; disc. 488 1945
Power Distribution in Textile Plants. McConnell....659–62 1947
Power-Distribution Problem in Arc Welding, The. Pierce, Smith....178–84; disc. 435 1945
Power-Distribution Scheme With Airplane-Engine-Testing Power Recovery, Dodge Chicago Plant's Electric-. Bailey....121–3; disc. 484 1945
Power-Distribution-System Costs, A Method of Approach to the Consideration of. Falls....1078–84; disc. 1377 1944
Power-Distribution Systems, Fault Protection on Shipboard A-C. Rickover, Ross....1109–20; disc. 1429 1944
Power Distribution Systems in Wartime, Electric-. Sporn....105–07; disc. 432 1942
Power Distribution Systems, Trends and Practices in Modern Industrial. Bloomquist....872–9; disc. 879 1948
Power Distribution, The Design of Low-Voltage-Welding. Adams, Fetcher, Johnson....1180–90; disc. 1382 1944
Power Equipment, Modern Railway Passenger-Car Auxiliary-. MacLeod, Hause....930–8 1947
Power Equipment, Silicone Insulation as Applied to Naval Electric. Walker....977–80; disc. 980 1947
Power Factor, A Static Voltage Regulator Insensitive to Load. Summers, Short....67–70 1942
Power-Factor Correction of Resistance-Welding Machines by Series Capacitors. Levoy...1002–09; disc. 1102 1940
Power-Factor Improvement of Induction Motors, Application of Capacitors for. Bloomquist, Boice....274–8 1945
Power-Factor Meters, Crossed-Coil. Millar....294–301; disc. 460 1944
Power-Factor Method, Bushing and Associated Insulation Testing by the. Baltzly, Schlottere....308–12; disc. 744 1941
Power-Factor Method for Field Investigation of Electrical Insulation, The A-C Dielectric-Loss and. Doble....934–9; disc. 1348 1941
Power Factor of Unbalanced Sinusoidal 3-Phase Circuits, The Vector. Lamb, Brandt....507–09 1949
Power-Factor Testing of Transformer Insulation. Hodtum....28–30; disc. 647 1941
Power-Factor Testing of Transformer Insulation and Operating Experience, Field. Whitmer....605–11; disc. 741 1941
Power Factor, The Effect of Overexciting Transformers on System Voltage Wave Shapes and. Butler, Pope....49–53; disc. 656 1941
Power, Factors Involved in the Selection of Railroad Motive. Wiloox, Oehler....235–40; disc. 411 1943
Power-Flow Studies, Equivalent Circuits for. Ward..373–80; disc. 380 1949
Power for Aircraft, Ground. Blankenbuehler....1319–22; disc. 1322 1948
Power for Airplanes, Electric. Clardy....385–8; disc. 388 1940
Power for Operations in the Pacific Northwest, Comparison of Railway Motive. Martin....1054–65; disc. 1189 1946
Power for the Sorocabana Railway, Modern Motive. Chapman, Kjolseth....558–62 1944
Power Frequencies, A New Electronic Multiplier for. Overbeck...931–6 1940
Power Frequencies, An Improved Frequency Meter for Commercial. Knudsen....866–9; disc. 1334 1941
Power Fuse, A Double-Break Oil or Gas-Blast. Hill....402–07; disc. 646 1941
Power Fuse, A New Three-Element Current-Limiting. Rawlins, Fahnoe....156–9; disc. 451 1944
Power Fuse, Control of the Switching Surge Voltages Produced by the Current-Limiting. Williams, Schuck....214–17; disc. 678 1941
Power Fuse, The Current-Limiting. Prince, Williams...11–14; disc. 15 1939
Power Fuses, Performance Criteria for Current-Limiting:
Part I. Schuck..1028–34; disc. 1191 1946
Part II. Boehne....1034–45; disc. 1191 1946
Power Generation
A New Automatic Load Control for Turbine Generators. Ruud, Farnham....1337–42; disc. 1342 1949
A Power-System Governor Sensitive to Frequency and Load. Curtis....89–92; disc. 731 1941
A Turbine-Governor Performance Analyser. Osbon..963–7; disc. 1401 1941
An Electrical Governor. Morgan....80–4 1941
Application and Performance of Electronic Exciters for Large A-C Generators. Langstaff, Vaughan, Lawrence....256–53; disc. 515 1946
Automatic Control of Hydroelectric Generating Stations. Brown, Derr....343–55; disc. 355 1947
Automatic Load Control for Turbine Generators. Crever, Jackson....656–60 1945
Auxiliary-Power Supply for Generating Stations. McCallum....693–5; disc. 976 1945
Calculating Probability of Generating Capacity Outages. Lyman....1471–7; disc. 1477 1947
Central-Station Auxiliary-Drive Motors for Constant and Adjustable Speed. Gibson....746–50; disc. 976 1945
Conditions Controlling the Economic Selection of Prime Movers. Skrotzki....1099–1108; disc. 1360 1944
Control of Load, Frequency, and Time of Interconnected Systems. Duff....778–86; disc. 999 1945
Design and Operation of a Metropolitan Electrical System From the Viewpoint of Possible Major Shutdowns. Dean....575–9; disc. 1150 1940
Determining Incremental Regulation and Dead Band of Governors on Steam Turbine Generators Under System Load Conditions. Tornquist, Wade....1343–7 1949
Development of the 230-Kv Ring Bus for Grand Coulee Power Plant. Holmdahl, Killgore....1369–78; disc. 1378 1948
Electric Drives for Steam-Electric Generating - Station Auxiliaries. Brownlee, Elsi...741–5; disc. 976 1945
Electrical Design Features—Steam-Electric Generating Station P of the Pacific Gas and Electric Company. Benson....1013–20; disc. 1020 1949
Evaluation of Electric Distribution Losses in Terms of Generating-Station-Capacity Investment. Mortara....1–7; disc. 411 1945
Excitation Problems in Hydroelectric Generators Supplying Long Transmission Lines. Killgore....1277–82; disc. 1282 1947
Facilities for the Supply of Kilowatts and Kilovars. Sels, Seely....249–55; disc. 402 1942
Factors in the Economic Supply of Energy in Hydroelectric Systems. Frampton, Floyd....1117–24; disc. 1124 1947
Frequency Changers—Characteristics, Applications, and Economics. Crary, Easley....351–8; disc. 416 1945
Frequency Control of Load Swings. McCormack, Lombard....623–4; disc. 1043 1942
Full Utilization of Mexico's Hydraulic Resources Through Multiple Purposes. Alba....989–92 1948
Generating Reserve Capacity Determined by the Probability Method. Calabrese....1439–50 1947
Generator Damper Windings at Wilson Dam. George, Bessesen....166–71; disc. 171 1939
Generator Stability at Low Excitation. Michelson, Lischer....1–6; disc. 7 1948
Governors and the AIEE-ASME Governor Performance Specification. Schwendner, Astley....1334–6 1949
Harmonics and Load Balance of Multiphase Rectifiers. Evans....182–7; disc. 400 1943
Hydroelectric Potentiality of Mexico. Quintero....993–4 1948

Improvements in Performance of Hydroelectric Generating Units on the 2,000,000-Horsepower Saguenay System. Lawton.....900–10; disc. 1946
Increased Capacity and Interconnections of the Columbia Gas and Electric Corporation. DeForest. 451–8 1941
Lightning Protection for Rotating Machines. McCann, Beck, Finsi.....319–33; disc. 488 1944
Main Exciter Rototrol Excitation for Turbine Generators. Lynn, Valentine.....535–9; disc. 539 1948
Methods of System Control in a Large Interconnection. Wild.....232–6; disc. 737 1941
Modern Bearing Practice for Vertical Water Wheel Generators. Laffoon, Baudry.....363–9; disc. 369 1947
Modern Excitation Systems for Large Synchronous Machines. McClure, Whittlesey, Hartman.....939–45; disc. 1148 1946
Modern Trends in Hydraulic Turbine Design. Rheingans.....1075–80 1948
Modernisation of L Street Station Switch House, Boston Edison Company. Corney, Edson.....770–8; disc. 778 1939
Modernisation of Switch-House Design. Strang, Hanna.....747–51; disc. 778 1939
Modernisation of Switch-House Design, Consolidated Edison Company of New York, Inc. de Bellis.....752–60; disc. 778 1939
Motor-Driven Exciters for Turbine Alternators. Bodine, Crary, Rankin.....290–7; disc. 515 1946
Outage Expectancy as a Basis for Generator Reserve. Seelye. 1483–8 1947
Outage Rates of Steam Turbines and Boilers and of Hydro Units (Committee Report).....450–7 1949
Power Development in Mexico. Urquidi, Del Busto, Lozano. 841–2 1948
Precise Turbine Governor. Warren.....571–4; disc. 574 1948
Preliminary Consideration of System-Wide Load Divisions by Means of Accurate Time Control. Curtis, Pickslay.....1562–9; disc. 1569 1948
Prevention of Rotor-Winding Deformation on Turbogenerators. Noest.....514–19; disc. 1353 1944
Prime-Mover Speed Governors for Interconnected Systems. Caughey, McClure..147–51; disc. 728 1941
Probability Methods Applied to Generating Capacity Problems of a Combined Hydro and Steam System. Loane, Watchorn.....1645–54; disc. 1654 1947
Progress Report on AIEE-ASME Standard Large 3,000-RPM Turbine Generators. Mortensen, McClure, Laffoon....674–5; disc. 675 1948
Provisions for Re-energising the Electric System of the Consolidated Edison Company of New York, Inc. Milne, Otten..579–85; disc. 1155 1940
Reclosing of Single Tie Lines Between Systems. Parker, Travers.....119–22; disc. 470 1944
Reconstruction of Switching Facilities at Essex Generating Station. Taylor.....761–70; disc. 778 1939
Regulation of A-C Generators With Suddenly Applied Loads. Harder, Cheek.....310–18; disc. 490 1944
Restoration of Service From Large Metropolitan System After Complete Shutdown. Dryar, Bailey.....571–4; disc. 1154 1940
Restoration of Service on a Metropolitan Power System. Bryson, Hayward.....563–70; disc. 1153 1940
Resynchronising of Generators. Concordia, Temoshok.....1512–18 1947
Ring Busses for Generating and Transmission Stations. Michelson, Galassini...665–9; disc. 1372 1944
Rototrol Excitation Systems. Barkle, Valentine.....529–34; disc. 534 1948
Some Oscillographic Methods of Investigating Mechanical and Hydraulic Conditions During Operation of Hydroelectric Units. Engvall.....993–6 1949
Speed Governing Design Considerations for Multivalve Condensing Steam Turbine-Generators. Barnett.....1557–61; disc. 1561 1948
Steady-State Stability of Synchronous Machines as Affected by Voltage-Regulator Characteristics. Concordia.....215–20; disc. 489 1944
Suddenly Applied Loads Carried by a Variable-Ratio Synchronous-Induction Frequency Changer. Darling, Kaufman.....91–4 1948
Suddenly Applied Loads on a Variable-Ratio Frequency Changer. Carter, Maginniss, Rothe..1489–95 1947
Supervisory Control of 30,000-Kva Hydroelectric Plant. Bohner, Maness.....337–42 1946
Supplementary Control of Prime-Mover Speed Governors. Crary, McClure.....209–14; disc. 395 1942
Synthetic or Equivalent Load Curves. Hamilton.....369–81 1942
System Load Swings. Bauman, Mans, McCormack, Seeley.....541–7; disc. 735 1941
System Stability. Gay.....168–73; disc. 739 1941
Technique of Electrical and Hydraulic Testing of Hydroelectric Units. Floyd, Traill.....163–9; disc. 493 1946
Tennessee Valley Authority Hydroelectric Stations—Electrical and Mechanical Design. Hopkins, Petersen.....920–31; disc. 1132 1946
Tennessee Valley Authority Hydroelectric Stations—Electrical Design. Hopkins. 1281–93; disc. 1408 1941
Tensorial Analysis and Equivalent Circuit of a Variable-Ratio Frequency Changer. Kron..1503–06 1947
Testing Governor Performance on Electric Power Systems With Improved Instruments. Allen, Hess.....329–39; disc. 339 1947
The Design and Performance of the Vertical Generator Thrust Bearings at the Bonneville Plant of the Corps of Engineers, War Department. Lewis, Gordon..1231–7; disc. 1237 1947
The Development of Modern Excitation Systems for Synchronous Condensers and Generators. Porter, Kinghorn..1020–7; disc. 1156 1946
The Effect of Weather on the System Load. Dryar..1006–13; disc. 1364 1944
The German Electrical Utility Industry During World War II. Noest.....1037–47; disc. 1047 1947
The Maintenance of Hydroelectric Generating Units.....776–82 1947
The Summation of Load Curves. Hamilton.....729–35; disc. 1361 1944
The Transient Behavior of the Two-Stage Rototrol Main Exciter Voltage Regulating System as Determined by Electrical Analogy. Carleton.....59–63 1949
The Transient-Energy Method of Calculating Stability. Magnusson.....747–55; disc. 755 1947
Theoretical Approach to Speed and Tie Line Control. Brandt.....24–9; disc. 29 1947
Underexcited Operation of Turbogenerators. Adams, McClure.....521–6; disc. 526 1948
Use of Dielectric-Absorption Tests in Drying Out Large Generators. Marcroft.....56–60; disc. 415 1945
Vibration Protection for Rotating Machinery. Webb, Murray.....534–7; disc. 1355 1944
Power Generation and Other Applications, Two Gas Turbines for. Howard.....461–5; disc. 465 1949
Power Generation, Gas Turbines in Stationary. Hague.....467–8 1949
Power Generation, Progress in. (Committee Report):
1933–39.....1277–87 1940
1940–46.....1681–97 1947
Power Geometry of General Transmission Systems. Altar.....312–17; disc. 493 1945
Power in a Steel Plant, Electric. Graham.....816–18; disc. 994 1945
Power in Open-Pit Copper Mining, Utilisation of Electric. French, Speight.....956–66; disc. 966 1948
Power in the Colorado Rockies, Pumping for. Wilson.....1127–36 1948
Power, Irrigation Pumping with Grand Coulee. Denton.....1362–8; disc. 1368 1948
Power-Level Recorder, A Square-Law. Clark, Turner, Williams....476–82 1949
Power-Level Recorder, The Speedomax." Clark.....957–64 1940
Power Limits of Synchronous Machines, Static. Dalziel.....93–101; disc. 101 1939
Power-Line Carrier Channels. Brown.....246–51 1945
Power Line Carrier Channels, Operation of. Lensner.....888–93; disc. 893 1947
Power-Line Carrier Channels, The Combination of Supervisory Control With Other Functions on. Cheek, Derr.....241–6 1945
Power-Line Carrier-Current Equipment, Field Tests on. Miller, Prud'Homme....824–7; disc. 1177 1946
Power-Line Carrier Current, Frequency Modulation for. Kenefake.....616–20; disc. 953 1943
Power-Line Carrier Equipment, A Proposal for Broad-Band Coupling of. Miller.....1028–30; disc. 1030 1949
Power Line Carrier for Relaying and Joint Usage. Part I. Hampe, Storer.....864–7; disc. 871 1949
Power-Line-Carrier System, A Versatile. Lensner, Singel.....129–33; disc. 437 1944
Power-Line Carrier Transmission, A Comparison of the Amplitude-Modulation, Frequency-Modulation, and Single-Side-Band Systems for. Cheek.....215–20; disc. 450 1945
Power Line, Multichannel Carrier-Current Facilities for a. Sandstrom, Foster.....71–6; disc. 469 1942
Power Line Networks, The Use of Business Machines in Determining the Distribution of Load and Reactive Components in. Jennings, Quinan.....1045–6 1946
Power Lines, A New Single-Side-Band Carrier System for. Lenehan.....826–30; disc. 830 1947
Power Lines, Application of Carrier to. Rives.....835–44; disc. 945 1943
Power Lines, Line Tuning Equipment Used With Coaxial Cable for Carrier Current Installation on. Sutton.....44–8; disc. 48 1949
Power Measurements, A Direct Reading D-C Bridge for Microwave. Carlin, Blass.....311–15 1948
Power Network Analysis, General Solution Method of. Dunstan.....631–8; disc. 638 1948
Power Network Performance, Machine Computation of. Dunstan.....610–20; disc. 621 1947
Power, Oil Production by Electric. Taylor.....977–86; disc. 986 1948

Power on the Great Northern Railway Electrification, Comparative Operating Results of Steam, Diesel-Electric, and Electric Motive. Gaynor.....231–4; disc. 234 1948

Power on the Low-Voltage Side, Metering. Petzinger, Lenehan.....159–63; disc. 406 1943

Power Operation in the Pacific Northwest, The Present Competitive Position of Coal, Residual Oil, Diesel Oil, and Electricity as Energy Sources for Motive. Martin.....1664–9 1948

Power Oscillations in Interconnected Generating and Distribution Systems, The Frequencies of Natural. Rudenberg.....791–803 1943

Power Plant, A 3,000-Horsepower Gas Turbine. Haverstick.....458–60 1949

Power-Plant Auxiliary Equipment and Systems, Modern Practice in. Muller.....868–72; disc. 976 1945

Power Plant, Development of the Transmission System From the Grand Coulee. Hoard, Helwith.....1095–1100; disc. 1100 1948

Power Plant, Development of the 230-Kv Ring Bus for Grand Coulee. Holmdahl, Killgore.....1369–78; disc. 1378 1948

Power Plant, Field Tests for Development of 10,000,000-Kva, 230-Kv Oil Circuit Breakers for Grand Coulee. Killgore, Clagett.....271–83; disc. 283 1948

Power Plant on Sudden Load Reduction, The Performance of a Topped Steam. Noest.....1348–56 1949

Power Plant Regulating System for Diesel-Electric Locomotives, A. Lewis.....242–6; disc. 246 1947

Power-Plant Requirements, Auxiliary. O'Neil.....682–4 1944

Power Plants, Trends in the Design and Arrangement of Electrical Equipment in Hydraulic. Welchel.....78–82; disc. 82 1939

Power Production in California—Past, Present, and Future, Mingled Hydro and Steam. Markwart.....775–82; disc. 1077 1940

Power Protective Systems, Aircraft Electric. Austin.....1375–82 1947

Power Rating of Radio-Frequency Cables, The. Mildner.....289–98; disc. 298 1949

Power Ratings and Stability, Radio-Frequency-Cable. Biskeborn.....928–9 1945

Power-Recovery System of Testing Aircraft Engines, The. Cassidy, Mosteller, Wright.....240–6; disc. 416 1943

Power Rectifiers for A-C Aircraft Systems, Selenium. Embry...596–600 1945

Power Rectifiers, Watt-Hour-Meter Performance With. Weller, Trekell, Stebbins....449–57; disc. 1184 1940

Power Selsyns, Damping and Synchronising Torques of. Concordia, Kron.....366–71; disc. 490 1945

Power Service for Pipe Lines, The Capacitor—an Aid to Electric-. Hyde, Marbury .....387–95; disc. 476 1944

Power Service Versus Local Plant Generation in Industry, Central Utility. Frampton.....880–3; disc. 884 1948

Power Shovels and Draglines, Electric Equipment for. Schwedes, Stoetzel.....1498–1506; disc. 1507 1948

Power Supplies for Coaxial Systems. Spencer.....627–30 1949

Power Supplies for Microwave Relay Systems. Ward.....631–6 1949

Power Supplies of 600 Volts and Less, Thermal Co-ordination of Motors, Control, and Their Branch Circuits on. Jones.....483–7; disc. 975 1942

Power Supply, Alternating Versus Direct Current for Aircraft-Radio. Fritz, Hooper..1227–33; disc. 1466 1944

Power-Supply Developments on British Aircraft, Brief Survey of. Carter.....806–07; disc. 1503 1944

Power Supply for A-C Arc Welding. Welch, Wyer....116–20; disc. 435 1945

Power Supply for Generating Stations, Auxiliary-. McCallum..... 1945

Power Supply for Modern Aircraft, Ground. Owen, Murray, Rosenstein.....1296–1303 1947

Power Supply for Railroad Electrification and Fundamentals of Power Contracts. Hill.....560–2; disc. 1159 1940

Power Supply for Resistance Welding Machines. (Committee Report):
Parts I and II.....306–20 1940
Part III.....185–92 1941

Power Supply for Single-Phase Resistance Welders. Wright.....705–07; disc. 707 1939

Power Supply, Large Electric-Arc Furnaces—Performance and. Jones, Stearns.....763–9; disc. 1325 1941

Power Supply, Railway. Torchio.....550–3; disc. 1159 1940

Power Supply, Resistance Welding Machine and. Smith.....995–1003; disc. 1003 1948

Power-Supply System, Aircraft Electric. Yarmack...655–8; disc. 953 1943

Power Supply System, Pennsylvania Railroad New York-Washington-Harrisburg Electrification—Relay Protection of. Harder.....266–73; disc. 273 1939

Power Supply Systems of Steel-Mill Load Swings, Automatic Regulation of Turbine Generators to Relieve. Eberhardt, Harrison, Kohn, Darling.....751–8 1945

Power Supply to Distribution Substations in Wartime. St. Clair.....112–17; disc. 432 1942

Power Supply, When the Welding Load Outgrows the Distribution. Clark, Stearns.....645–8; disc. 964 1945

Power Swings, Control of Tie-Line. Concordia, Shott, Weygandt.....306–14; disc. 395 1942

Power Swings, Graphical Method for Estimating the Performance of Distance Relays During Faults and. Warrington.....608–20; disc. 620 1949

Power Swings With and Without Faults, Impedances Seen by Relays During. Clarke....372–84; disc. 471 1945

Power System, A Vertical-Flow Compressed-Air Circuit Breaker and Its Application on a 132-Kv. Langstaff, Baker.....188–92; disc. 436 1943

Power-System Analysis, Regulating Transformers in. Hobson, Lewis.....874–83; disc. 883 1939

Power-System Applications, A New Frequency Relay for. Carlin, Blackburn.....553–7; disc. 1421 1944

Power System Applications, Microwave Channels for. (Committee Report).....40–2; disc. 42 1949

(Power System Applications) Operation of Power Line Carrier Channels. Lensner.....888–93; disc. 893 1947

(Power System Applications) TVA Coordinated Communication System. Talmage.....1022–34; disc. 1034 1947

Power-System Cables, Electrolysis and Corrosion of Underground. Gorman.....329–36; disc. 479 1945

Power System Development for Service to Hanford Plutonium Plant. Hoard, Curtin.....773–8 1946

Power-System Faults, Overvoltages During. Clarke, Crary, Peterson.....377–85; disc. 385 1939

Power-System Frequency Variations and Tie-Line Power Swings, Effect of Prime-Mover Speed Governor Characteristics on. Concordia, Crary, Parker...559–67; disc. 733 1941

Power System Governing—the Problem. Dougherty, Hayward, Monteith, Griscom...547–58; disc. 731 1941

Power-System Interconnection in Quebec. Way.....841–7 1942

Power System on Radio-Receiving Systems, Effect of Radio Frequencies of a. Aggers, Pakala, Stickel.....169–72; disc. 459 1943

Power System Overvoltages Produced by Faults and Switching Operations. (Committee Report).....912–21; disc. 921 1948

Power System, Pressure-Arc-Interruption Circuit Breakers for 400-Cycle Aircraft Electric-. Austin.....58–60; disc. 487 1946

Power System, Transformer Audio Noise Problems on an Electric. Murray.....740–7; disc. 747 1949

Power-System Transients Caused by Switching and Faults. Evans, Monteith, Witzke.....386–94; disc. 394 1939

Power System Voltage Control Without Feeder Voltage Regulators. Smeloff.....1462–4; disc. 1465 1948

Power-System Voltage-Recovery Characteristics. Peterson.....405–11; disc. 411 1939

Power Systems, Arcing Faults in. Concordia, Peterson..340–6; disc. 614 1941

Power Systems, Continuous Load-Frequency Control for Interconnected. Dimond, Lunge.....1483–8; disc. 1488 1948

Power Systems, Control and Protection of Aircraft D-C. Austin.....741–5; disc. 1170 1946

Power Systems, Feeder Voltage Regulator Application on. Gosinski, Oberholtzer...1458–61; disc. 1461 1948

Power Systems for Aircraft Window Deicing, Control and. Mershon.....1400–05 1947

Power Systems for Auxiliary Drives in Steam-Electric Stations. McClure, Whittlesey.....844–51; disc. 976 1945

Power Systems for Industrial Plants, Combined Light and. Beeman.....76–83 1946

Power Systems in Large Military Aircraft, Basic Design Principles for A-C Electric-. Chappuis, Olmsted.....12–17; disc. 487 1946

Power Systems, Practical Calculation of Electrical Transients on. Evans, Witzke.....690–6; disc. 923 1943

Power Systems, Present-Day Grounding Practices on. (Committee Report).....1525–48; disc. 1548 1947

Power Systems, Protector Tubes for. Peterson, Rudge, Monteith, Ludwig.....282–8; disc. 288 1940

Power Systems, Selenium Rectifiers in Motor Vehicle. Ramsey.....149–53; disc. 153 1949

Power Systems, Superposition Methods for Calculating Effects of Additions to. Rettig.....396–401; disc. 648 1941

Power Systems, Transient Recovery-Voltage Characteristics of Electric-. St. Clair, Adams.666–9; disc. 1016 1942

Power Systems With Improved Instruments, Testing Governor Performance on Electric. Allen, Hess.....329–39; disc. 339 1947

Power Systems With Rectifier Load, A Short-Cut Method of Estimating Estimating Telephone-Influence Factor of. Frick.....91–6 1944

Power Tests on Wood-Pole Line Insulation, Lightning and 60-Cycle. Bellaschi.....838–47; disc. 847 1947

Power, The Electronic Converter for Exchange of. Cramer, Morton, Darling.....1059–69; disc. 1413 1944

Power, The Renaissance of Electric Motive. Candee.....138–44 1949

Power-Transformer Design, High-Voltage. Mallett:
Part I.....526–31; disc. 966 1943
Part II.....1086–91; disc. 1091 1947

Power Transformers Against Lightning Surges, Protection of. (Committee Report).....568–77; disc. 749 1941

Power Transformers as Determined by the War Emergency, The Rating of. Salsbury, Phillips.....255–60; disc. 452 1943

Power Transformers by Forced Circulation of Cooling Medium, Cooling. Paluev, Burnham.....215–21; disc. 445 1943

Power Transformers by Hot-Spot Temperatures, Emergency Overloading of Air-Cooled Oil-Immersed. Montsinger, Ketchum.....906–16; disc. 993 1942

Power Transformers by Temperature, Effect of Load Factor on Operation of. Montsinger..632–6; disc. 1224 1940

Power Transformers, Controlled Temperature and Insulation Protection in the Operation of. Satterlee, Reed.....753–8; disc. 759 1949

Power Transformers, High-Voltage Compressed-Gas. Hobart.....690–2; disc. 1448 1944

Power Transformers, Relay Protection of. (Committee Report).....911–15; disc. 915 1947

Power Transformers, Temperature Rise of Water-Cooled. Meador.....18–21 1946

Power Transformers, Use of Thyrite. Meador.....959–64; disc. 964 1949

Power Transmission as Influenced by Excitation Systems, Long-Distance. Concordia, Crary, Maginniss.....974–87; disc. 1175 1946

Power Transmission, Economics of Long-Distance A-C. Crary, Johnson.....1092–9; disc. 1099 1947

Power Transmission, Electronic Stabiliser for. Alexanderson, Prince.....950–3; disc. 953 1947

Power-Transmission Systems and Tie Lines, Cost Studies of 69- to 230-Kv Underground. Holm.....852–60 1945

Power-Transmission Systems, Costs Study of 69- to 345-Kv Overhead. Holm.....406–22 1944

Power-Transmission Systems, Stability Limitations of Long-Distance A-C. Clarke, Crary..1051–9; disc. 1299 1941

Power Transmission Systems, Stability Study of A-C. Holm.....893–905; disc. 1046 1942

Power Tubes, Amalgam-Cathode Materials for. Lyon, Williams.....627–30 1948

Power, Use of Propulsion Generators on Naval Vessels to Supply Shore. Anderson, Fifer.....1282–7; disc. 1287 1948

Powerhouse Auxiliaries, Protection of. (Committee Report).....746–51; disc. 1115 1946

Powerhouse Breaker, A 2,500,000-Kva Compressed-Air. Ludwig, Wilcox, Baker.....235–41; disc. 414 1942

Powerton-Crawford 220-Kv Line—Design and Construction Features. Oldacre, Wollaston.....1108–20; disc. 1297 1941

Powerton-Crawford 220-kv Line-System Operating Features and Terminal Design. Wulfing, LeClair.....1084–9; disc. 1304 1941

Practical Approach to Calculating Optimum Performance of Semiconductor Rectifiers. Wilson.....640–2; disc. 642 1948

Practical Approach to the Design of High-Voltage Cable Joints, A Theoretical and. Short.....1275–80; disc. 1280 1949

Practical Calculation of Circuit Transient Recovery Voltages. Adams, Skeats, Van Sickle, Sillers.....771–9; disc. 1017 1942

Practical Calculation of Electrical Transients on Power Systems. Evans, Witzke....690–6; disc. 923 1943

Practical Design of Counterpoise for Transmission-Line Lightning Protection. Hansson, Waldorf.....599–603; disc. 1010 1942

Practical Discussion of Problems in Transformer Differential Protection, A. Shill...854–8; disc. 1067 1942

Practical Laboratory Service, An Electron Microscope for. Zworykin, Hillier, Vance.....157–62 1941

Practical Radiography, Application of the Betatron to. Girard, Adams.....241–6; disc. 489 1946

Practice in Power-Plant Auxiliary Equipment and Systems, Modern. Muller.....868–72; disc. 976 1945

Practice, Substation-Transformer Emergency Overloading. Clark.....126–32; disc. 453 1943

Practices for Electric Control Devices for Aircraft, Preferred. Hottenroth.....197–200; disc. 444 1945

Practices for Shunt Capacitor Banks, Connection Arrangements and Protective. Clark, Farnham.....1226–30; disc. 1231 1949

Practices of Relaying in the United States, Principles and. Harder, Marter.....1005–22; disc. 1022 1948

Practices on Distribution System, Fusing. Parsons, Wallace:
Part I.....89–91; disc. 467 1944
Part II.....598–600; disc. 1429 1944

Practices on Power Systems, Present-Day Grounding. (Committee Report).....1525–48; disc. 1548 1947

Precipitation-Static Radio Interference, Aircraft. Starr.....363–70 1941

Precise Turbine Governor. Warren.....571–4; disc. 574 1948

Precision Dynamometer for Small Motor Measurements, A High. Duff.....1344–8; disc. 1348 1947

Precision Electrothermic Voltmeter for Measurements Between 20 and 20,000 Cycles, A. Hermach.1224–7 1948

Precision Radar, Shoran. Seeley.....232–40 1946

Precision Rotating Standard for the Measurement of Kilowatt-Hours, A. Goss, Hansen.412–15; disc. 415 1940

Precision, Snap-Acting Switches, The Characteristics and Application of. Riche.....1549–54; disc. 1554 1948

Precision Speed Control for World's Largest Induction Motor. Longwell, Reagan....634–8; disc. 1050 1942

Precision Testing of Electric Tachometers. Princi....504–08; disc. 946 1945

Predetermination of Temperatures in Resistance Welds. Johnson.....845–53; disc. 853 1939

Prediction of Ultimate Temperature Rise from Early Heat Run Data. Ryan.....1164–6 1949

Preference Lockout Circuits in Telephone Switching, Relay. Joel.....1720–5; disc. 1725 1948

Preferred Practices for Electric Control Devices for Aircraft. Hottenroth.....197–200; disc. 444 1945

Preliminary Consideration of System-Wide Load Divisions by Means of Accurate Time Control. Curtis, Pickslay.....1562–9; disc. 1569 1948

Preliminary Report on Laboratory Aging Tests on Class A Insulation. (Committee Report).....879–81; disc. 881 1947

Present Competitive Position of Coal, Residual Oil, Diesel Oil, and Electricity as Energy Sources for Motive Power Operation in the Pacific Northwest, The. Martin.....1664–9 1948

Present-Day Grounding Practices on Power Systems. (Committee Report).....1525–48; disc. 1548 1947

Present D-C Aircraft Electric-Supply Systems. Anderson, Crary, Schultz.....265–72; disc. 484 1944

Preservative Treatment of Various Species for Poles and Crossarms. MacLean.....549–54 1946

Pressure and Humidity, Reference Values for Temperature. Bellaschi, McAuley.....669–75; disc. 1227 1940

Pressure and Temperature, Dielectric Strength of Oil with Variations of. Hoover, Hixson.....1047–50 1949

Pressure - Arc - Interruption Circuit Breakers for 400-Cycle Aircraft Electric-Power System. Austin.....58–60; disc. 487 1946

Pressure Cable, Low-Gas. Shanklin.....307–15; disc. 315 and 912 1939

Pressure for Telephone Cables, Gas. Giese.....471–8 1947

Pressure Gas-Filled Cable Impregnated with Extra-High-Viscosity Oil, High-. Sticher, Doan, Atkinson, Meyerhoff.....336–45; disc. 345 1949

Pressure Gas-Filled Cable, Operation of Low-. Hatcher.....788–92; disc. 1399 1944

Pressure, The Electric Strength of Air at High:
Part I. Skilling....161–5; disc. 165 1939
Part II. Skilling & Brenner.....112–15; disc. 677 1941

Pressure, The Electrical Strength of Nitrogen and Freon Under. Skilling, Brenner.....191–5; disc. 441 1942

Pressures, An Electrical Engine Indicator for Measuring Static and Dynamic. Martin, Grinstead, Frawley.....513–23; disc. 725 1941

Pressures, D-C Breakdown Strength of Air and of Freon in a Uniform Field at High. Trump, Safford, Cloud.....132–5; disc. 676 1941

Prevention, Bridge Erosion in Electrical Contacts and Its. Pfann.....1528–33 1948

Prevention of Rotor-Winding Deformation on Turbogenerators. Noest.....514–19; disc. 1353 1944

Preventive-Coil Control for A-C Locomotives With Particular Reference to Resistor Transition, Improvements in. Hatch, Ogden.....727–32 1942

Preventive Lightning Protection on a Transmission System, An Eight-Year Investigation of Lightning Currents and. Hansson, Waldorf.....251–8; disc. 463, 1350 1944

Primary Capacitors, Secondary Versus. Starr.....228–42; disc. 242 1939

Primary Detectors for Measurements. Lynch, Corson.....843–53 1948

Primary Insulation for Withstanding Lightning, What Wood May Add to. Lusignan, Miller.....534–40; disc. 1177 1940

Primary Network, Improvements to Oklahoma City. Brady.....701–02; disc. 702 1949

Primary Network Systems in the Washington Area, Design and Experience With 4-Kv. Lank.....712–16; disc. 716 1949

Primary Networks on the Duquesne Light Company System. Holben, Lange.....704–09; disc. 709 1949

Primary Voltages, Control of Slip-Ring Motors by Means of Unbalanced. Schmitz....1103–1112; disc. 1112 1947

Prime-Mover Speed Governor Characteristics on Power-System Frequency Variations and Tie-Line Power Swings, Effect of. Concordia, Crary, Parker.....559–67; disc. 733 1941
Prime-Mover Speed Governors for Interconnected Systems. Caughey, McClure.....147–51; disc. 728 1941
Prime-Mover Speed Governors, Supplementary Control of. Crary, McClure.....209–14; disc. 395 1942
Prime Movers, Conditions Controlling the Economic Selection of. Skrotzki....1099–1108; disc. 1360 1944
Primitive Rotating Machine With Asymmetrical Stator and Rotor, Equivalent Circuit of the. Kron.....17–23; disc. 23 1947
Principle of Cable Design, A New. Del Mar.....206–10; disc. 705 1941
Principles and Practices of Relaying in the United States. Harder, Marter.....1005–22; disc. 1022 1948
Principles as Applied to D-C Aircraft Systems, Electric-Circuit Fault-Protective. Kaufmann.....333–44; disc. 482 1944
Principles for A-C Electric-Power Systems in Large Military Aircraft, Basic Design. Chappuis, Olmsted.....12–17; disc. 487 1946
Principles Involved in Its Design, A New Outdoor Air Switch and the. Graybill, Ferguson.....583–6; disc. 953 1945
Principles of Aircraft Electric-Motor Protection. Vaughan.....760–5 1943
Principles of Amplidyne Applications, Fundamental. Crever.....603–06; disc. 956 1943
Principles of the Variplex Telegraph, Basic. Holcomb.....1102–08 1941
Printing Ammeter, Automatic. LeClair.....93–9; disc. 757 1941
Printing, Electronic Register Control for Multicolor. Cockrell.....617–22; disc. 1117 1946
Probability Curves in Engineering, The Combination of. Wilkinson.953–63 1942
**Probability Method, Generating Reserve Capacity Determined by the Calabrese.....1439–50 1947
Probability Methods Applied to Generating Capacity Problems of a Combined Hydro and Steam System. Loane, Watchorn.....1645–54; disc. 1654 1947
Probability Problems in Electrical Engineering, A New Approach to. Adler, Miller....630–2; disc. 1118 1946
Probable Breakdown Voltage of Paper Dielectric Capacitors, The. Brooks.....1137–44; disc. 1144 1947
Problem, High-Altitude Brush. Ramadanoff, Glass.825–30; disc. 1489 1944
Problems, Application of Low Frequency to Industrial Control. Schmits.....1571–5; disc. 1575 1948
Problems, Courses to Develop Facility in the Use of Mathematics and Physics in the Solution of Engineering. Teare....40–1; disc. 43 1939
Problems, Diesel-Electric Synchronous Motor Ship Drives—Propulsion Control. Frisch.....660–6 1946
Problems, Electrical Analogy Methods Applied to Servomechanism. McCann, Herwald, Kirschbaum.....91–6; disc. 515 1946
Problems in Applying Protectors to Electric Aircraft Motors. Buell.....1250–8 1944
Problems in Electrical Engineering, A New Approach to Probability. Adler, Miller....630–2; disc. 1118 1946
Problems in Electrical Engineering, Analytical Methods of Solving Discrete Nonlinear. Keller.....1194–1200; disc. 1389 1941
Problems in Hydroelectric Generators Supplying Long Transmission Lines, Excitation. Killgore.....1277–82; disc. 1282 1947
Problems in Magnetic Recording, Application of Experimental Test Procedures and Methods of Analysis of Results to Research. Thompson.....407–17 1949
Problems in Rural Electrification and Electroagriculture, Specific Engineering. Samuels.....1065–73; disc. 1182 1946
Problems in Supplying Large Electric-Arc Furnaces During Wartime, Transmission-Line and System. Jones.....197–202; disc. 392 1943
Problems in the Case of Attentuating Transmission Line, The Solution of Transmission-Line. Glinski.....46–9 1946
Problems in the Development of the 12-Channel Open-Wire Carrier System, Line. Ilgenfritz, Hunter, Whitman.....658–64; disc. 664 1939
Problems in the Measurement of A-C Resistance and Reactance of Large Conductors. Salter.....1390–6; disc. 1396 1948
Problems in the Standardization of Temperature Ratings of Fractional-Horsepower Motors, Some. Veinott.....1055–61; disc. 1218 1940
Problems of a Combined Hydro and Steam System, Probability Methods Applied to Generating Capacity. Loane, Watchorn.....1645–54; disc. 1654 1947
Problems of Electrical Engineering in the Field of Transportation, Unsolved. Noertker..992–6; disc. 1173 1940
Problems of Two-Pole Turbine Generators, Special. Laffoon, Rose.....30–3; disc. 33 1940
Problems on an Electric Power System, Transformer Audio Noise. Murray.....740–7; disc. 747 1949
Problems, Summary of Transformations Useful in Constructing Analogs of Linear Vibration. Corbett..661–4 1949
Procedure for Low-Voltage A-C Systems, Short-Circuit Calculating. Darling.....1121–36; disc. 1294 1941
Procedures and Methods of Analysis of Results to Research Problems in Magnetic Recording, Application of Experimental Test. Thompson.....407–17 1949
(Proceedings) New AIEE Publication Policy Becomes Effective in January 1947.....1721–3 1947
Process of Scale Removal From Steel, Electrolytic. Neblett.....294–6; disc. 761 1941
Processing for Automobile Tire Fabrics, Continuous. Cassidy, Mosteller.....218–23 1939
Produced by Resistance Welders, Line Drop. Longini..619–23; disc. 963 1945
Production and Application of Light, Progress in the. Powell..1265–76 1940
Production by Electric Power, Oil. Taylor.....977–86; disc. 986 1948
Production, High-Potential Testing Equipment for Quantity. Summers.....289–92; disc. 756 1941
Production in California—Past, Present, and Future, Mingled Hydro and Steam Power. Markwart.....775–82; disc. 1077 1940
Program Transmission Circuits, Engineering Requirements for. Cowan, McCurdy, Lattimer.....142–7 1941
Progress in Coaxial Telephone and Television Systems. Abraham.....1520–7 1948
Progress in Design of Electric Equipment for Large Diesel-Electric Locomotives. Smith.....130–1; disc. 404 1942
Progress in Development of Trolley-Coach Overhead Reflected in Higher Service Standards. Birch.....185–91 1942
Progress in Impulse Testing of Transformers. Hagenguth.....999–1005; disc. 1440 1944
Progress in Power Generation. (Committee Report):
1933–39.....1277–87 1940
1940–46.....1681–97 1947
Progress in the Design of Traction Motors, Twenty-Five Years'. Baldwin.....132–7 1949
Progress in the Production and Application of Light. Powell....1265–76 1940
Progress in the Textile Industry, Electrical. Snyder..863–70; disc. 870 1948
Progress in the Use of Electronic Tubes, A Decade of:
Part I. In the Field of Communication. Ingram.....543–9 1940
Part II. Other Than Communication Field. White.....650–4 1940
Progress of the Art in Electrical Machinery—1934–39. (Committee Report).....103–06 1940
Progress Report of D-C Testing of Generators in the Field. Davis, Leftwich.....14–18; disc. 470 1942
Progress Report on AIEE-ASME Standard Large 3,000-RPM Turbine Generators. Mortensen, McClure. Laffoon....674–5; disc. 675 1948
Progress Report on AIEE Test Code for Electric Brushes. (Committee Report).....1126–8 1949
Prolonged Inrush Currents With Parallel Transformers Affect Differential Relaying. Hayward.....1096–1101; disc. 1305 1941
Propagation, The Role of the Ionosphere in Radio Wave. Dellinger.....803–22 1939
Propeller Milling Machine, Application of Electric Equipment for Ship-. Morton, Rutemiller.....205–08; disc. 453 1945
Propeller Milling Machine, Tracer-Controlled Position Regulator for. Hanna, Osbon, Hartley.....201–05; disc. 452 1945
Propeller Test-Cell Lighting, Aircraft Engine and. Tuck.....1264–70; disc. 1493 1944
Propellers, Damping Effect of D-C Marine Propulsion Motors on Vibrations Produced in Drive Shafts by Large. Litman....31–7 1945
Propellers, Development and Application of Electric Heating to Deicing of Aircraft. Sheets, Sand..1068–72 1949
Properties and Uses of Thermistors—Thermally Sensitive Resistors. Becker, Green, Pearson....711–25 1946
Properties at Ultrahigh Frequencies, A Resonant-Cavity Method for Measuring Dielectric. Works, Dakin, Boggs..1092–8; disc. 1452 1944
Properties by Use of Cathode-Ray Oscilloscope, Quantitative Determination of Magnetic. Zamsky.....783–7 1947
Properties of Cellulose Insulation Impregnated With Semiconducting Liquids, The Dielectric. Clark.....55–62; disc. 62 1947
Properties of Stainless Steel, The Magnetic. Stein.....1534–7 1948
Properties of the Vacuum Switch, Fundamental. Koller.....597–604; disc. 1141 1946
Proposal for Broad-Band Coupling of Power-Line Carrier Equipment, A. Miller.....1028–30; disc. 1030 1949
Proposed ASA Transformer Standards, A Discussion of. Henry.....289 1939
Proposed Circuit for Aircraft Reverse-Current Cutout. Marsolf.....1246–8 1948

Proposed Method for the Determination of Current-Transformer Errors, A. Camilli, Ten Broeck.....547–50; disc. 1138 1940
Proposed Rapid Transit System for Toronto. Duncan.....939–46 1947
Proposed Standards for Outdoor Bushings. (Committee Report).....590–1; disc. 1207 1940
Propulsion Control Problems, Diesel-Electric Synchronous Motor Ship Drives—. Frisch.....660–6 1946
Propulsion Generators on Naval Vessels to Supply Shore Power, Use of. Anderson, Fifer.....1282–7; disc. 1287 1948
Propulsion in Naval Surface Vessels, Electric. Jucarone.....1329–39; disc. 1340 1948
Propulsion Motors on Vibrations Produced in Drive Shafts by Large Propellers, Damping Effect of D-C Marine. Litman.....31–7 1945
Prospecting, Electrical Equipment Used in Reflection-Seismograph. Nash, Palmer.....855–60; disc. 860 1939
Protecting Case, Response Time and Lag of a Thermometer Element Mounted in a. Goodwin.....665–70; disc. 959 1945
Protection, A New-Type Carrier Relay. Wood, Haberl, Baily.....774–9; disc. 987 1943
Protection, A Practical Discussion of Problems in Transformer Differential. Shill.....854–8; disc. 1067 1942
Protection Afforded Small Low-Voltage A-C and D-C Starters by Means of Fuses and Circuit Breakers, The Degree of Short-Circuit. Jones.....611–12; disc. 1408 1944
Protection Against Conductor Burndown From That Cause, Power Arc-Over on Overhead Distribution Lines and Newly Developed Equipment for. Matthews.....596–604; disc. 684 1941
Protection and Tonnage Rating, Single-Phase A-C Electric Locomotives on the Pennsylvania Railroad—. Griffith.....224–8 1942
Protection for Complex Distribution Circuits, Sensitive Ground Relay. Hunt.....765–8; disc. 1180 1946
Protection for Distribution Circuits, Relative Expense for Service Restoration With Different Types of Overcurrent. Lincks, Craig.....813–21; disc. 980 1942
Protection for Distribution Circuits, Relative Value of Different Types of Overcurrent. Lincks.....19–26; disc. 426 1942
Protection for Generators, Loss-of-Field. Crossman, Lindemuth, Webb.....261–6; disc. 462 1942
Protection for Rotating Machinery, Vibration. Webb, Murray.....534–7; disc. 1355 1944
Protection for Rotating Machines, Lightning. McCann, Beck, Finsi.....319–33; disc. 488 1944
Protection for Rural Distribution Systems, Improved Fault. Van Ryan.....261–3 1945
Protection for Subtransmission Lines Made Economical, Distance Relay. Audlin, Warrington.....574–8; disc. 976 1943
Protection for Transformer Banks, Carrier-Current Differential. Cramer.....545–8; disc. 947 1943
Protection for Transmission Lines and Distribution Feeders, Sensitive Ground. Gross.....968–71 1941
Protection, Harmonic-Current-Restrained Relays for Transformer Differential. Hayward.....377–82; disc. 622 1941
Protection in a Modern Watt-Hour Meter, Surge. Busch, Williams.....74–7; disc. 77 1949
Protection in the Operation of Power Transformers, Controlled Temperature and Insulation. Satterlee, Reed.....753–8; disc. 759 1949
Protection Independent of Current-Transformer Characteristics, Bus. Steeb.....859–62; disc. 1365 1941
Protection, Interim Report on Application and Operation of Out-of-Step. (Committee Report).....567–73 1943
(Protection) Lightning Investigations on 33-Kv Wood-Pole Lines. Andrews, McCann.....768–77; disc. 954 1945
Protection, Linear Couplers for Bus. Harder, Klemmer, Sonnemann, Wents.....241–8; disc. 463 1942
Protection, New Current Transformer for Bus Differential. Kennedy, Sinks.....1180–7; disc. 1363 1941
Protection of Aircraft D-C Power Systems, Control and. Austin.....741–5; disc. 1170 1946
Protection of Current-Transformer Secondary Windings and Associated Circuits, Overvoltage. Kaufmann, Camilli.....467–72; disc. 919 1943
Protection of D-C Aircraft Motors, Inherent Overheating. Veinott..920–5 1944
Protection of Industrial Plants Against Insulation Breakdown and Consequential Damages. Vaughan.....592–6; disc. 1166 1946
Protection of Large D-C Machines by Means of High-Speed Circuit Breakers. Housley, Jensen.....637–40; disc. 1428 1944
Protection of Low-Voltage Circuits by Air Circuit Breakers in Cascade Arrangement. Anderson, Black..1151–60; disc. 1356 1941
Protection of Medium-Voltage Lines, Minimum Insulation Level for Lightning. Ekvall.128–32; disc. 719 1941
Protection of Modern Dry-Type Air-Cooled Transformers, Dielectric Strength and. Bellaschi, Beck.....759–63; disc. 997 1945
Protection of Pilot-Wire Circuits. Harder, Bostwick.....645–52; disc. 996 1942
Protection of Pilot Wires From Induced Potentials. Killen, Law...267–70 1946
Protection of Power Transformers Against Lightning Surges. (Committee Report)..568–77; disc. 749 1941
Protection of Power Transformers, Relay. (Committee Report).....911–15; disc. 915 1947
Protection of Powerhouse Auxiliaries. (Committee Report).....746–51; disc. 1115 1946
Protection of Silicone-Insulated Motors for Shipboard Use, Overload. Grigg, Watkins..1341–4; disc. 1344 1948
Protection of Solid Insulation by Lightning Arresters, The. MacCarthy, Carpenter.....912–15; disc. 1349 1941
Protection of Single-Phase Motors, The Inherent Overheating. Potter.....993–6; disc. 1400 1941
Protection of Stations, Development in Lightning. Whitehead.....898–900; disc. 1372 1941
Protection of Stations Without High-Voltage Switching. (Committee Report).....226–31; disc. 231 1949
Protection of Steel Water Tanks Using Aluminum Anodes, Cathodic. Sudrabin, Mears.....197–200 1947
Protection of Tapped Transmission Lines, Relay. Bostwick, Harder..645–50; disc. 969 1943
Protection of 10,000-Kva Series Capacitor for 66-Kv Transmission Line, Design and. Johnson, Marbury, Arthur.....363–7; disc. 368 1948
Protection of the Airplane Main Bus. Exner.....979–82 1949
Protection of Transformer Stations, Automatic Grounding and Air-Break Switches for. Ricker.....851–6; disc. 856 1949
Protection of Transformers Under Overload Conditions, Thermal. Montsinger, Camilli....160–4; disc. 444 1944
Protection of Wood-Pole Lines, Lightning. Sels, Gothberg.....328–31; disc. 331 1940
Protection on a Transmission System, An Eight-Year Investigation of Lightning Currents and Preventive Lightning. Hansson, Waldorf.....251–8; disc. 463, 1350 1944
Protection on Shipboard A-C Power-Distribution Systems, Fault. Rickover, Ross....1109–20; disc. 1429 1944
Protection on Transmission Lines, Experience With Preventive Lightning. Waldorf..249–54; disc. 701 1941
Protection, Practical Design of Counterpoise for Transmission-Line Lightning. Hansson, Waldorf.....599–603; disc. 1010 1942
Protection, Principles of Aircraft Electric-Motor. Vaughan.....760–5 1943
Protection, Rectifier Relay for Transformer. Michelson.....252–4 1945
Protection, Shipshaw Relay. Madill, Duffy.....50–5; disc. 55 1949
Protection Systems, Sensitive Relay Contact. Dallas, McCully.1204–07 1948
Protection, Typical Transformer Faults and Gas Detector Relay. Madill..1052–8; disc. 1058 1947
Protection Under Running Overload Conditions, Fundamental Theory of Inherent-Overheating. Veinott, Schaefer.....266–70; disc. 270 1949
Protection Using Bushing Current Transformers, Instantaneous Bus-Differential. Seeley, von Roeschlaub.....1709–18; disc. 1718 1948
Protection With Particular Reference to Offset Transient Currents, Current Transformers and Relays for High-Speed Differential. Wents, Sonnemann.....481–8; disc. 1144 1940
Protective Devices
A Compressed-Air Operating Mechanism for Oil Circuit Breakers. Cunningham, Hill.....695–8; disc. 1019 1942
A Conserved-Pressure Air-Blast Circuit Breaker for High-Voltage Service Breaker for High-Voltage Service. Rankin, Bennett.....193–7; disc. 673 1941
A Distance Relay With Adjustable Phase-Angle Discrimination. Goldsborough.....835–8; disc. 1471 1944
A Double-Break Oil- or Gas-Blast Power Fuse. Hill..402–07; disc. 646 1941
A Fast Circuit Breaker. Bohn, Jensen.....165–8; disc. 405 1942
A 500,000-Kva 7.5 Kv Air Circuit Breaker for Steel-Mill Service. Dickinson.....242–5; disc. 450 1944
A High-Capacity High-Voltage Three-Cycle Oil Circuit Breaker. Byrd, Riets.....160–3; disc. 463 1945
A High-Power Oilless Circuit Interrupter Using Water. Leeds.....85–8; disc. 625 1941
A High-Speed Differential Relay for Generator Protection. Sonnemann.....608–12; disc. 1250 1940
A Magnetic-Type Air-Circuit Breaker for 15,000-Volt Services. Linde, Wyman.....140–4; disc. 453 1944
A Multiorifice Interrupter for High-Voltage Oil Circuit Breakers. Ludwig, Leeds...119–25; disc. 437 1943
A New Air Circuit Breaker With 250,000-Kva Interrupting Capacity. Dickinson, Nau.....197–201; disc. 671 1941

A New Carrier Relaying System. Halman, Goldsborough, Lensner, Drompp.....568–72; disc. 1423 1944

A New Current-Limiting Fuse. Rawlins, Strom, Graybill.....77–80; disc. 657 1941

A New Electronic Timing Relay for Reducing Outages on Power Circuits. Dlouhy.....407–11 1946

A New 15-Kv Pneumatic Circuit Interrupter. Ludwig, Rawlins, Baker.....528–33; disc. 1123 1940

A New 50,000-Kva 5-Kv Oilless Circuit-Breaker and Metal-Clad Switchgear Unit. Dickinson, Hayford.....302–06; disc. 434 1943

A New Frequency Relay for Power-System Applications. Carlin, Blackburn.....553–7; disc. 1421 1944

A New Generator Differential Relay. McConnell.....11–13; disc. 381 1943

A New High-Interrupting-Capacity Fuse for Voltages Through 138 Kv. Fahnoe.....630–5; disc. 937 1943

A New High-Speed Balanced-Current Relay. Stewart..553–5; disc. 972 1943

A New Line of High-Voltage Outdoor Tank-Type Oil Circuit Breakers. Skeats, Rietz....224–31; disc. 502 1946

A New Multiple High-Speed Air Circuit Breaker for Mercury-Arc-Rectifier Anode Circuits and Its Relation to the Arc-Back Problem. Seaman, Morton.....788–96; disc. 1057 1942

A New One-Cycle Directional-Overcurrent Relay. Morris.....725–7; disc. 989 1943

A New Outdoor Air Switch and the Principles Involved in its Design. Graybill, Ferguson.....583–6; disc. 953 1945

A New Single-Phase-to-Ground Fault-Detecting Relay. Sonnemann.....677–80; disc. 995 1942

A New Single-Pole Service Restorer. Tugby.....889–92; disc. 1070 1942

A New Submersible Network Protector of Higher Rating. Grissinger, Johnson.....41–6 1946

A New Three-Element Current-Limiting Power Fuse. Rawlins, Fahnoe.....156–9; disc. 451 1944

A Novel Reclosing Relay. Bobo.....1041–5; disc. 1403 1941

A Pneumatic Mechanism for Outdoor Oil Circuit Breakers. Linde, Rietz.....543–6; disc. 1428 1944

A Simple Method for Determination of Ratio Error and Phase Angle in Current Transformers. Wents.....949–54; disc. 1369 1941

A Simple Method for the Determination of Bushing-Current-Transformer Characteristics. Moreton.....581–5; disc. 948 1943

A 2,500,000-Kva Compressed-Air Powerhouse Breaker. Ludwig, Wilcox, Baker...235–41; disc. 414 1942

A Vertical-Flow Compressed-Air Circuit Breaker and Its Application on a 132-Kv Power System. Langstaff, Baker.....188–92; disc. 436 1943

A Vertical-Flow Outdoor Compressed-Air Breaker. Ludwig, Baker.....217–22; disc. 672 1941

An Automatically Reclosing Breaker for Co-ordinating Distribution Systems. Rawlins, Wallace...1021–4 1941

An Improved A-C Pilot-Wire Relay. Neher, McConnell.12–17; disc. 638 1941

An Improved Automatic Circuit Recloser. Wallace..255–8; disc. 259 1947

An Improved Axial Air-Blast Interrupter for Severe Operating Duty. Taylor, Martin..323–33; disc. 431 1943

An Improved Overcurrent Tripping Device for Low-Voltage Circuit Breakers. Rawlins, Sandin.....1149–53; disc. 1153 1947

An Improved Polyphase Directional Relay. Hoard...246–8; disc. 681 1941

Analysis of Bushing-Current-Transformer Performance. Gebelein, Elsi.....541–6; disc. 1137 1940

Anode-Circuit-Breaker Design and Performance Criteria. Boehne, Atwood.....337–45; disc. 437 1945

Application of Capacitance Potential Devices. Clem.....1–8; disc. 8 1939

Application Ratings of Indoor Power Circuit Breakers. Vikoren.....768–73; disc. 1168 1946

Arcing Ground Tests on a Normally Ungrounded 13-Kv 3-Phase Bus. Allen, Waldorf..298–306; disc. 498 1946

Auto-Blast Interrupter Switch, The. Williams, Harlow.....176–81; disc. 437 1943

Bibliography on Circuit-Interrupting Devices—1928–1940. (Committee Report).....1077–1100 1942

Bus Protection. (Committee Report).....206–11; disc. 211 1939

Cause and Control of Some Types of Switching Surges, The. Schroeder.....696–700; disc. 933 1943

Circuit-Breaker Current Measurements During Reignitions and Recovery. Lewis..1253–7; disc. 1257 1947

Circuit Interruption by Air Blast. Edsall, Stubbs..503–09; disc. 1129 1940

Considerations in Applying Ratio Differential Relays for Bus Protection. Smith, Sonnemann, Dodds.....243–9; disc. 249 1939

Control of the Switching Surge Voltages Produced by the Current-Limiting Power Fuse. Williams, Schuck.....214–17; disc. 678 1941

Correlation of System Overvoltages and System-Grounding Impedance. (Committee Report).....17–24; disc. 383 1943

Criteria for Neutral Stability of Wye-Grounded-Primary Broken-Delta-Secondary Transformer Circuits. Shott, Peterson.....997–1002; disc. 1394 1941

Current- and Potential-Transformer Standardization. (Committee Report).....698–706; disc. 998 1942

Current-Transformer Output and Application Charts. Koller.....573–7; disc. 1422 1944

Current-Transformer Performance Based on Admittance-Vector Locus. Schwager.....26–30; disc. 465 1942

Design and Construction of High-Capacity Air-Blast Circuit Breakers. Strang, Boisseau.....522–7; disc. 1131 1940

Design and Operation of High-Voltage Axial Air-Blast Circuit Breakers. Leuthold.....869–75; disc. 1073 1942

Dethermalising Arc Quenchers. Hunt, Cole.....720–4; disc. 988 1943

Dielectric Recovery by an A-C Arc in an Air Blast. Browne.....169–76; disc. 507 1946

Dielectric Strength of Oil for High-Voltage Testing of Oil Circuit Breakers. Lingal, Skeats, Braley.....903–06 1941

Dielectric Strength of Water in Relation to Use in Circuit Interrupters. Slepian, Denault, Strom.....389–95; disc. 631 1941

D-C Machine Flashover and Bus Short-Circuit Protection. Montgomery, Sellers.1168–73; disc. 1370 1941

Displacement and Diffusion in Fluid-Flow Arc Extinction. Slepian.....162–7; disc. 643 1941

Distribution-Type Lightning-Arrester Performance Characteristics. (Committee Report).....132 1942

Effect of Restriking on Recovery Voltage. Concordia, Skeats.....271–5; disc. 375 1939

Enclosed Spark Gaps. Berkey.....429–33; disc. 1118 1940

Experience With Oil Circuit Reclosers on REA Systems. Moore, Watkins.....531–5; disc. 934 1943

Expulsion-Type Lightning Arresters' Impulse Spark-Over Volt-Time Characteristics. (Committee Report).....520 1948

Factors Contributing to Improving Electric Service by Means of High-Speed Switching and Utilisation of Stored Energy. Logan, Miles.....1012–16; disc. 1408 1941

Factors Which Influence the Behavior of Directional Relays. Graybeal..942–52 1942

Fault Location and Relay Performance Analysis by Automatic Oscillographs. Dupuis, Jacobs.....442–6; disc. 1125 1946

Field Determination of Current-Transformer Errors by the Secondary Voltage Method. Goodale, Holbeck.....879–82; disc. 1468 1944

Field Investigation of Lightning Surges at Substations. Gross, McCann.....569–74; disc. 574 1947

Field Investigation of the Characteristics of Lightning Currents Discharged by Arresters. Gross, McCann, Beck...266–71; disc. 461 1942

Field Investigations of Lightning. Wagner, McCann, Beck.....1222–30; disc. 1381 1941

Field Research on Lightning Arrester Discharges. McCann, Beck.....625–9; disc. 629 1947

Field Tests and Performance of a High-Speed 138-Kv Air-Blast Circuit Breaker. Sporn, Strang.....1–6; disc. 412 1942

Field Tests and Performance of Heavy-Duty High-Speed 138-Kv Circuit Breakers—Oil and Air-Blast. Sporn, St. Clair.....401–10; disc. 463 1945

Field Tests of Interrupting Capacity of 138-Kv Oil Circuit Breakers. Buchanan, Floyd.....199–204; disc. 503 1946

Field Tests on High-Capacity Air-Blast Station-Type Circuit Breakers. Strang, Skeats.....100–04; disc. 409 1942

Field Tests on High-Capacity Station Circuit Breakers. Braley.....31–5; disc. 408 1942

4,370,000-Kva Short-Circuit Tests on Grand Coulee 230-Kv Bus. Clagett, Leeds...729–35; disc. 1119 1946

Frequency Modulation for Power-Line Carrier Current. Kenefake..616–20; disc. 953 1943

Functions of Ground Preference in Carrier-Current Relay Schemes, The. Leyland, Goldsborough.....97–100; disc. 437 1944

Fusing Practices on Distribution Systems. Parsons, Wallace:
Part I.....89–91; disc. 470 1944
Part II.....598–600; disc. 1429 1944

Graphical Method of Calculating Fault Currents on Rural Distribution Systems. Linder.....16–19; disc. 446 1945

Grounding of Instrument Transformer Secondary Circuits. (Committee Report).....419–20 1947

High-Capacity Circuit-Breaker Testing Station. MacNeill, Batten.....49–53; disc. 406 1942

High-Capacity "Hydro-Blast" Circuit Breaker for Central-Station Service. Skeats, Saylor.....111–14; disc. 114 1940

High-Power "De-ion" Air Circuit Breaker for Central-Station Service. Dickinson.....421–25; disc. 425 1939

High-Speed-Relaying Experience and Practice. (Committee Report)... 588–91; disc. 591 1939
High-Speed Single-Pole Reclosing. Trainor, Hobson, Muller... 81–7; disc. 422 1942
High-Voltage Bushings Designed to Meet Modern Service. Brandt, Rorden... 255–60; disc. 696 1941
High-Voltage Fusing of Transformer Banks. Marsh, Dodds... 533–5; disc. 977 1942
High-Voltage Oil Circuit Breakers for Rapid Reclosing Duty. Hill, Leeds... 113–18; disc. 452 1944
Improved Selective Tripping of Low-Voltage Air Circuit Breakers. West... 608–10; disc. 1431 1944
Improvements in the Construction of Condenser Bushings. Peterson... 646–50; disc. 650 1939
Induced Current in Parallel Circuits and Its Effect Upon Relays. Bancker... 582–5; disc. 585 1939
Influence of Resistance on Switching Transients. VanSickle... 397–404; disc. 404 1939
Interim Report on Application and Operation of Circuit Breakers and Switchgear. (Committee Report)... 481–83 1943
Lightning and Lightning Protection on Distribution Systems. Bergvall, Beck... 442–9; disc. 1112 1940
Lightning Arresters for Distribution Apparatus. Beck, Forbes... 719–24; disc. 970 1945
Lightning Currents in Arresters at Stations. Gross, McMorris... 417–22; disc. 1110 1940
Lightning Investigation on a Rural Distribution System. MacCarthy, Stann, Edge, McKinley... 428–37; disc. 437 1949
Lightning Investigation on the 25-Kv System of the West Penn Power Company. Bowen, Beck... 831–6; disc. 836 1947
Lightning to the Empire State Building. McEachron. 885–90; disc. 1377 1941
Line-Type Lightning-Arrester Performance Characteristics. (Committee Report)... 982–3 1941
Linear Couplers—Field Tests and Experience at York and Middletown, Pa. Harder, Klemmer, Neidig... 107–13 1946
Loading Transformers by Copper Temperature. Putnam, Dann... 504–09; disc. 510 1939
Long 60-Cycle Arcs in Air. Strom... 113–18; disc. 504 1946
Low-Current-Secondary Current Transformers. (Committee Report)... 649–50 1946
"Magne-Blast" Air Circuit Breaker for 5,000-Volt Service. Boehne, Linde... 202–08; disc. 208 1940
Magnetic "De-ion" Air Breaker for 2,500–5,000 Volts. Ludwig, Nau... 518–22; disc. 1125 1940
Mechanical Simplicity of Air-Blast Circuit Breakers. Haberl, Jensen. 869–74; disc. 1355 1941
Medium-Capacity Air-Blast Circuit Breakers for Metal-Clad Switchgear. Bennett, Wyman... 383–8; disc. 627 1941
Metal-Clad Unit-Type Switchgear for 33-Kv Service. Kreger... 360–8; disc. 509 1946
Modern Impulse Generators for Testing Lightning Arresters. Brownlee... 539–44; disc. 984 1942
Modern Relaying for A-C Secondary Network Systems. Beeman... 237–41; disc. 683 1941
Modern Trends of Low-Voltage Air Circuit Breakers. Seaman... 24–29; disc. 29 1940
Multiple-Grid Breakers for High-Voltage Service. MacNeill, Hill... 427–31; disc. 431 1939
New High-Capacity Air Breaker, A. Ludwig, Grissinger... 414–18; disc. 418 1939
New Solenoid Mechanism for Magne-Blast Breaker. Wyman, Keagy... 268–74; disc. 448 1945
Nine Years' Experience With Ultra-high-Speed Reclosing of High-Voltage Transmission Lines. Sporn, Muller... 225–8; disc. 445 1945
Oil-Impregnated-Paper High-Voltage Condenser Bushings for Circuit Breakers and Transformers. Lingal, Cole, Watts.. 269–75; disc. 439 1943
Operating Experience With Distance Ground Relays. Wolfe... 458–62; disc. 1185 1946
Operating Experience With Petersen Coils on 66-Kv System of Metropolitan Edison Company. Rankin, Neidig... 568–73; disc. 573 1939
Operation of a Ground-Fault Neutralizer on a Regulated Distribution System. Tomlinson, Hunt... 1321–6; disc. 1326 1949
Out-of-Step Blocking and Selective Tripping With Impedance Relays. Vaughan, Sawyer... 637–45; disc. 645 1939
Overcurrent Performance of Bushing-Type Current Transformers. Woods, Bottonari... 554–60; disc. 1140 1940
Overvoltages During Power-System Faults. Clarke, Crary, Peterson... 377–85; disc. 385 1939
Pennsylvania Railroad New York-Washington-Harrisburg Electrification—Relay Protection of Power Supply System. Harder... 266–73; disc. 273 1939
Performance Criteria for Current-Limiting Power Fuses:
Part I. Schuck... 1028–34; disc. 1191 1946
Part II. Boehne... 1034–45; disc. 1191 1946
Performance Criteria of D-C Interrupters. Boehne, Jang... 1172–80; disc. 1180 1947
Performance of Ground-Relayed Distribution Circuits During Faults to Ground. Gilkeson, Jeanne, Davenport... 40–8; disc. 424 1942
Performance Requirements for Relays on Unusually Long Transmission Lines. Poage, Streifus, MacGregor, George... 275–83; disc. 422 1943
Phase-Comparison Carrier-Current Relaying. McConnell, Cramer, Seeley... 825–33; disc. 973 1945
Philosophy of Relaying. Knapp, Hicks... 735–41; disc. 1135 1946
Photographic Study of A-C Arcs in Flowing Liquids. Slepian, Browne. 823–8; disc. 1330 1941
Pilot-Wire Relaying on a Metropolitan System. LeClair, Michelson... 511–15; disc. 974 1943
Possibilities and Methods of Extending a Carrier Current Relay Channel to Other Uses. Smith, Goldsborough... 23–7; disc. 645 1941
Power-Circuit-Breaker Ratings. Van Sickle... 882–4; disc. 1353 1941
Power-System Transients Caused by Switching and Faults. Evans, Monteith, Witzke... 386–94; disc. 394 1939
Practical Calculation of Circuit Transient Recovery Voltages. Adams, Skeats, Van Sickle, Sillers... 771–9; disc. 1017 1942
Present-Day Grounding Practices on Power Systems. (Committee Report)... 1525–48; disc. 1548 1947
Prolonged Inrush Currents With Parallel Transformers Affect Differential Relaying. Hayward... 1096–1101; disc. 1305 1941
Rating of Potential Devices and Suggested Material for a Standard. Clem, Langguth. 676–80; disc. 1217 1940
Rectifier Fault Currents. Herskind, Kellogg... 145–50; disc. 441 1945
Relays and Breakers for High-Speed Single-Pole Tripping and Reclosing. Goldsborough, Hill... 77–81; disc. 429 1942
Report on Apparatus Bushings. (Committee Report). 266; disc. 695 1941
Report on Survey of Unbalanced Charging Currents on Transmission Lines as Affecting Ground-Fault Neutralisers. (Committee Report)... 1328; disc. 1329 1949
Resistors for 138-Kv Cable Switching. Sadler, Blakeslee... 39–46; disc. 46 1947
Sectionalising and Internal Transformer Fusing on Rural Power Circuits. Watkins.. 383–8; disc. 388 1947
Selective Tripping of Low-Voltage Air Circuit Breakers. Deans... 971–6; disc. 976 1947
Sensitive Ground Protection for Radial Distribution Feeders. Hunt, Vivian... 84–7; disc. 87 1940
Shielding of Substations. Wagner, McCann, Lear... 96–100; disc. 448 1942
Size Reduction and Rating Extension of Magnetic Air Circuit Breakers up to 500,000 Kva, 15 Kv. Dickinson, Frink... 220–3; disc. 510 1946
Some Air-Blast Circuit-Breaker Installations in Canada. Haberl, Moore... 859–63; disc. 1073 1942
Staged Fault Tests of Relaying and Stability on Kansas-Nebraska 270-Mile 154-Kv Interconnection. Minard, Gow, Wolfe, Swanson... 358–67; disc. 425 1943
Station-Type Lightning-Arrester Performance Characteristics. (Committee Report)... 347–8 1940
Surges on Chicago 12-Kv System. Wollaston, Plumley... 260–5; disc. 694 1941
Switching Overvoltage Hazard Eliminated in High-Voltage Oil Circuit Breakers. Hunt, Boehne, Peterson... 98–106; disc. 418 1943
System Short-Circuit Currents. Hanna, Travers, Wagner, Woodrow, Skeats... 877–81; disc. 1351 1941
System Voltages and Fault Currents Determined Easily on D-C Board. Asbury... 184–8; disc. 439 1944
Testing and Application of Lightning Arresters. (Committee Report)... 68–71 1939
Testing of Distribution Arresters. Halperin... 142–8; disc. 148 1940
Tests and Analysis of Circuit-Breaker Performance When Switching Large Capacitor Banks. Schroeder, Boehne, Butler.. 821–31; disc. 1020 1942
Tests of 230-Kv High-Speed Reclosing Oil Circuit Breaker. Schwager... 784–8; disc. 1468 1944
The Cross-Air-Blast Circuit Breaker. Prince, Henley, Rankin... 510–17; disc. 1121 1940
The Current-Limiting Power Fuse. Prince, Williams... 11–14; disc. 15 1939
The Development, Design, and Performance of Magnetic-Type Power Circuit Breakers. Linde, Wyman. 386–93; disc. 510 1946
The Effect of Current-Transformer Residual Magnetism on Balanced-Current or Differential Relays. Seeley... 164–9; disc. 384 1943
The Evolution of Standard Lines of Current Transformers for High Overcurrent Capacity. Wents... 658–62; disc. 1426 1944

The Geometry of Arc Interruption. Boehne:
Part I.....524–32; disc. 675 1941
Part II.....375–87; disc. 447 1944
The Interruption of Charging Current at High Voltage. Leeds, Van Sickle.....373–80; disc. 381 1947
The MHO-Carrier Relaying Scheme. Cordray, Warrington.....228–35; disc. 434 1944
The Mho Distance Relay. Hutchinson.....353–60 1946
The Next Step in Interrupting Capacity—5,000,000 Kva. Hill, Leeds.....317–23; disc. 463 1945
The Recovery-Voltage Analyzer for Determination of Circuit Recovery Characteristics. Dunlap.....958–62; disc. 1391 1941
Three-Cycle 3,500-Megavolt-Ampere Air-Blast Circuit Breaker for 138,000-Volt Service. Byrd, Beall.....229–32; disc. 463 1945
Transient and Steady-State Performance of Potential Devices. Harder, Langguth, Woods.....91–9; disc. 99 1940
Transient Characteristics of Current Transformers During Faults:
Part I. Concordia, Weygandt, and Shott.....280–5; disc. 469 1942
Part II. Concordia and Rothe.....731–4 1947
Transient Recovery-Voltage Characteristics of Electric-Power Systems. St. Clair, Adams.....666–9; disc. 1016 1942
Transient Recovery Voltages and Circuit-Breaker Performance. Van Sickle.....804–13; disc. 1014 1942
Transmission and Relaying Problems on the Fort Peck Project. Floor, Muller, Goldsborough.....209–14; disc. 466 1944
12-Kv Metal-Enclosed Bus and Switch Structure, Station "C", Oakland, Pacific Gas and Electric Company. Benson, Strang.....751–5; disc. 1080 1940
Vertical-Flow Interrupter and Its Application to "Oil-Poor" Circuit Breakers, The. Baker.....440–5; disc. 635 1941
Voltage-Recovery Characteristics of Distribution Systems. Witzke.....172–80; disc. 180 1949
Protective Devices in Wartime, Application of Lightning. Gross.....173–5; disc. 441 1943
Protective Devices in Wartime, Report on Application of Lightning. (Committee Report).....586–8; disc. 952 1943
Protective Device, New Series Capacitor. Marbury, Owens.....142–6; disc. 511 1946
Protective Devices, Performance Characteristics of Lightning. (Committee Report).....1330–6 1949
Protective Equipment for Rotating A-C Machines, Survey of Lightning. (Committee Report).....516–19; disc. 519 1948
Protective Link, The. Hodnette, Leonard.....226–9; disc. 679 1941
Protective Practices for Shunt Capacitor Banks, Connection Arrangements and. Clark, Farnham.....1226–30; disc. 1231 1949
Protective Principles as Applied to D-C Aircraft Systems, Electric-Circuit Fault-. Kaufmann.....333–44; disc. 482 1944
Protective Relaying—Experience and Practice, Pilot-Wire Circuits for. (Committee Report).....210–14; disc. 380 1943
Protective Relaying for Long Transmission Lines. Warrington.....261–8; disc. 427 1943
Protective Relaying, Simplicity of. Hunt.....995–1000; disc. 1121 1946
Protective Relays, Application of the Ohm and Mho Principles to. Warrington.....378–86; disc. 490 1946
Protective Relays, Electronic. MacPherson, Warrington, McConnell.....1702–07; disc. 1707 1948
Protective Relays, Novel Test Circuits for. Sonnemann.....1249–54 1949
Protective Systems, Aircraft Electric Power. Austin.....1375–82 1947
Protector of Higher Rating, A New Submersible Network. Grissinger, Johnson.....41–6 1946
Protector Tubes for Power Systems. Peterson, Rudge, Monteith, Ludwig.....282–8; disc. 288 1940
Protectors Based Upon Motor Design Information, A Method of Selecting Inherent Overheat. Vaughan.....1023–9; disc. 1030 1948
Protectors to Electric Aircraft Motors, Problems in Applying. Buell.....1250–8 1944
Provisions for Re-energising the Electric System of the Consolidated Edison Company of New York, Inc. Milne, Otten...579–85; disc. 1155 1940
Proximity Effect Factors of 3-Phase Coaxial Busses Comprised of Square Tubular Conductors. Higgins, Messinger.....1538–9 1948
Publication Policy Becomes Effective in January 1947, New AIEE..1721–3 1947
Pull in Synchronous and Induction Motors, The Calculation of Unbalanced Magnetic. Robinson.....620–24; disc. 924 1943
Pulling Loads on Single- and Multiple-Conductor Impregnated-Paper Lead-Encased Cable, Solid Type. Bellis.....138–48; disc. 403 1943
Pulp and Paper Industry, Electrical Developments. Baker.....827–34; disc. 834 1948
Pulse Code Modulation. Black, Edson.....895–9 1947
Pulse Count Modulation System, Distortion in a. Clavier, Panter, Grieg.....989–1005; disc. 1005 1947
Pulse Echo Measurements on Telephone and Television Facilities. Abraham, Lebert, Maggio, Schott.....541–8; disc. 548 1947
Pulse Modulation, Distortion and Band-Width Characteristics of. Krauss, Ordung.....984–8 1947
Pulse Transformers, A Method for Designing. Kirschbaum, Warren.....971–8 1949
Pulse Transformers, Applications of Thin Permalloy Tape in Wide-Band Telephone and. Gans.....177–83 1946
Pulsed Light Sources, Recent Research on. Whelan.....1303–07 1948
Pulsing in Switching, Application of Multifrequency. Dahlbom, Horton, Moody.....392–6 1949
Pump Applications, New NEMA Fractional-Horsepower Motor Standards; Their Effect on Refrigeration and. Potter.....508–10 1947
Pump From the Utility's Point of View, The Heat. Andrews.....562–4 1948
Pump—Its Significance as a Potential Residential Electric Load, The Heat. Bary.....1–8 1949
Pump Motors, Some Acceleration Tests on Large Synchronous. Ager.....416–22; disc. 649 1941
Pumped Ignitron Rectifiers, Performance of. Herskind, Remscheid.....215–18 1948
Pumping for Power in the Colorado Rockies. Wilson.....1127–36 1948
Pumping Station Over Power Cable, Carrier, Supervisory Control of. Derr, Keller, Hedke.....699–705; disc. 1124 1946
Pumping System of the Colorado River Aqueduct, The. Gaylord.....112–23; disc. 123 1939
Pumping with Grand Coulee Power, Irrigation. Denton.....1362–8; disc. 1368 1948
Pumps for Heating Homes, Possibilities of Heat. Berry.....619–22; disc. 1433 1944
Push Button Switching in Telegraph Systems. Blanchard, Blanton.....1733–40 1948
Push-Button-Tuned 50-Kw Broadcast Transmitter, A. Rockwell, Lepple.....1–3 1941

Q

Q Cavities at 10,000 Megacycles, Measurement of High. Lange...161–6 1947
Quadrature-Axis Equivalent Circuits of the Synchronous Machine, The Direct- and. Rankin.....861–8 1945
Quadrature Operation of Filamentary Thermionic Gas Tubes. Holdaway.....205–08 1948
Quadrature Synchronous Reactance of Salient-Pole Synchronous Machines, The. Shepherd, Kilbourne.....784–9; disc. 926 1943
Quality Control and Trouble Shooting of Induction-Motor Windings and Cores, Wound and Dummy-Rotor Methods of. Trickey.....842–4; disc. 998 1945
Quality Control in the Manufacture of Aircraft Generators, Aids to. Potter.....525–9; disc. 1358 1944
Quality Control to Resistance Welding, Application of. Hobson, Inglis, McCants.....573–5; disc. 951 1945
Quality Electrically, Judging Mica. Coutlee.....735–41 1945
Quality, Impulse Strength as a Measure of Cable. Komives.....929–34; disc. 1339 1941
Quality, Statistical Methods in the Development of Apparatus Life. Ferrell.....700–03; disc. 998 1945
Quality, Statistical Tools for Controlling. Manuele, Goffman.....524–8; disc. 949 1945
Quantitative Determination of Magnetic Properties by Use of Cathode-Ray Oscilloscope. Zamsky.....783–7 1947
Quantities, Inverse Functions of Complex. Dwight.....850–3 1942
Quantities, The Determination of Magnitude and Phase Angle of Electrical. Walker.....837–9; disc. 1333 1941
Quantity Production, High-Potential Testing Equipment for. Summers.....289–92; disc. 756 1941
Quartz, Crystal Filters Using Ethylene Diamine Tartrate in Place of. Willis.....552–6 1948
Quebec, Hydroelectric Power Development in. Lawton.....1006–21 1947
Quebec, Power-System Interconnection in. Way.....841–7 1942
Quenchers, Dethermalising Arc. Hunt, Cole.....720–4; disc. 988 1943
Quiet Train Ride, Acoustics and the. Jack.....382–92; disc. 417 1942
Quietness, Some Insulator Designs Require Special Features to Insure Radio. Miller....62–6; disc. 657 1941

R

Radar for Navigation and Obstacle Detection, Air-borne. Jensen, Arnett.....307–13; disc. 491 1946

Radar for Peacetime Use, Marine. Lynn, Winn....271–3 1946
Radar for Surveying, An Optical. Hansen....660–3 1948
Radar Sets, Factors Affecting the Range of. Quarles, Breaseale....546–8 1946
Radar, Shoran Precision. Seeley....232–40 1946
Radar Systems Considerations. Quarles....209–15 1946
Radar Technique in an Industrial Control. Cockrell....269–72 1947
Radar Testing, Techniques and Facilities for Microwave. Green, Fisher, Ferguson....274–90 1946
Radar to Increase Airline Safety, Using Airborne. Ayer....1387–95 1947
Radial Distribution Feeders, Sensitive Ground Protection for. Hunt, Vivian....84–7; disc. 87 1940
Radiant Heat—A Full-Fledged Industrial Tool. Goodell....464–71 1941
Radiation and Good Frequency Stability, FCC Diathermy Design for Low Harmonic. Chapin, Roberts, Mobley....42–6; disc. 46 1948
Radiation, Temperature Rise of Electrical Apparatus as Affected by. Penney....338–42; disc. 342 1940
Radio and Wire Applications, Frequency Shift Telegraphy—. Davey, Matte....479–93; disc. 493 1947
Radio Communication Equipment for Land-Mobile Services Operating on Frequencies Between 152–174 Megacycles, Design of Mobile. Beers, Harris, Zappacosta....1232–9 1949
Radio for Telephone Service in America. Romnes....1060–7 1948
Radio Frequencies, Measurements at. Meahl, Michel, Scheldorf, Dickinson....654–9 1940
Radio Frequencies of a Power System on Radio-Receiving Systems, Effect of. Aggers, Pakala, Stickel....169–72; disc. 459 1943
Radio-Frequency Cable, The S-Function Method of Measuring Attenuation of Coaxial. Stewart....616–19; disc. 966 1945
Radio-Frequency Cables, Heating of. Macalpine....283–8 1949
Radio-Frequency Cables, Report of Conference on....911–41 1945
Radio-Frequency Cables, The Power Rating of. Mildner....289–98; disc. 298 1949
Radio-Frequency Generator—Characteristics and Application to Induction-Heating Problems, Vacuum-Tube. Kinn....1290–1303; disc. 1500 1944
Radio-Frequency Heating Equipment, Measurement of Interference From. Brown....1102–06 1948
Radio-Frequency Heating Equipment, Reduction of Interference from. Klingaman....718–24; disc. 724 1949
Radio-Frequency Heating, Some Economic Aspects of. Duryee. 105–12 1948
Radio-Frequency High-Voltage Phenomena. Alford, Pickles....129–36; disc. 136 1940
Radio Influence from High-Voltage Corona. Slemon....198–204; disc. 204 1949
Radio Influence Voltage Generation, Commutation of D-C Machines and Its Effects on. Motter....491–5; disc. 495 1949
Radio Interference, Aircraft Precipitation-Static. Starr....363–70 1941
Radio Interference, Methods of Controlling. Aggers....193–9; disc. 199 1940
Radio, Mobile. Bailey....923–31; disc. 932 1948
Radio Noise Elimination in All-Metal Aircraft. Foulon....877–91; disc. 994 1943
Radio-Noise Elimination in Military Aircraft. Weinstein Howell, Lowe, Winter....793–5; disc. 1466 1944
Radio-Noise Elimination, Very High-Frequency. Owen....949–54 1944
Radio-Noise Filters Applied to Aircraft. Frick, Zimmerman....590–5; disc. 979 1943
Radio-Noise Influence of 230-Kv Lines. Rorden....677–81; disc. 682 1947
Radio Noise, Instruments and Methods of Measuring. Aggers, Foster, Young....178–87; disc. 187 1940
Radio-Noise-Meter Calibrations, A Study of Wave Shapes for. Frick. ....890–901; disc. 969 1945
Radio Power Supply, Alternating Versus Direct Current for Aircraft-. Frits, Hooper. .1227–33; disc. 1466 1944
Radio Quietness, Some Insulator Designs Require Special Features to Insure. Miller....62–6; disc. 657 1941
Radio Reception With Power Apparatus and Systems, Measurements Pertaining to the Co-ordination of. Foust, Frick....284–92; disc. 455 1943
Radio Relay Applications, A 150-Kc Carrier System for. Boughtwood. 577–82 1948
Radio Relay System, A Multichannel Microwave. Black, Beyer, Grieser, Polkinghorn....798–806 1946
Radio Systems, Vibrating Reed Selectors for Mobile. Keller, Bostwick. 383–6 1949
Radio Telemetering for Testing Aircraft in Flight. Frederick....861–70 1946
Radio, The Application of Western Union Multiplex to Navy. Hoover. 1478–82 1947
Radio, Upper-Air Weather Soundings by. Diamond, Hinman, Dunmore. Lapham....321–8 1940
Radio Wave Propagation, The Role of the Ionosphere in. Dellinger....803–22 1939
Radiobroadcasting in Canada. Frigon. ....896–8; disc. 1357 1941
Radiography, Application of the Betatron to Practical. Girard, Adams. ....241–6; disc. 489 1946
Radiosonde Recorder, Automatic Range-Adjusting. Beggs. .602–07 1949
Radiotelegraph Communications, Developments in the Field of Cable and. Pratt, Roosevelt....1044–7; disc. 1386 1944
Radiotelephone Experiment at Cheyenne Wells, Colo., Rural. Moore, Seyler, Wright....525–8 1947
Rail Transport, Modern. Wright....1306–12; disc. 1247 1940
Railroad and Urban Transit Equipment, Electric Braking for. Craton, Turner....489–94; disc. 1170 1940
Railroad, Circuit Breaker Modernisation and Faster Fault Clearing on Single-Phase Electrified. Brown, Travers, Wood...705–13; disc. 713 1948
Railroad Electrification and Fundamentals of Power Contracts, Power Supply. Hill...560–2; disc. 1159 1940
Railroad Electrification, Are the Overhead Distribution Costs Retarding? Birch....243–55; disc. 255 1948
Railroad Electrification Energy Conversion and Transmission Costs. Kimball, Holm. .219–26; disc. 227 1948
Railroad Motive Power, Factors Involved in the Selection of. Wilcox, Oehler....235–40; disc. 411 1943
Railroad New York-Washington-Harrisburg Electrification—Relay Protection of Power Supply System, Pennsylvania. Harder....266–73; disc. 273 1939
Railroad Passenger Cars, The Magnesium-Copper Sulphide Rectifier Battery Charger for. Kotterman. 260–5 1939
Railroad Service, Application Engineering on Diesel-Electric Locomotives in. Bevan....125–31 1949
Railroad Service, High Voltage Ignitron Rectifiers and Inverters for. Boyer, Hagensick....463–70 1946
Railroad Trains, The Application of Electricity for the Auxiliaries of. Gardner....34–6; disc. 632 1941
Railroads, Centralized Traffic Control for. Hailes....1167–73 1949
Railroads, Handling Suburban Traffic on Steam. Sloman....1670–4 1948
Railroads, Mercury-Arc Rectifiers for. Watkins....84–6; disc. 419 1945
Railroads, Power Costs and the Contribution of Existing Transmission Networks Towards Cost Reduction of Power for Electrification. Evans....596–8; disc. 599 1948
Railroads, Sleet Problems on Electrified. Brown....589–93; disc. 978 1942
Railway, A 3,000 Horsepower Diesel-Electric Locomotive for the Seaboard Air Line. Staples, Weybrew, Atwell....215–19 1947
Railway Company Steam Turbine-Electric Locomotives, Electric Equipment for Chesapeake and Ohio. Atwell, Baston....145–8 1949
Railway Electrification, Comparative Operating Results of Steam, Diesel-Electric, and Electric Motive Power on the Great Northern. Gaynor. ....231–4; disc. 234 1948
Railway Electrification, The Sorocabana. Muylaert 804–18; disc. 919 1943
Railway, Modern Motive Power for the Sorocabana. Chapman, Kjolseth. 558–62 1944
Railway Motive Power for Operations in the Pacific Northwest, Comparison of. Martin. 1054–65; disc. 1189 1946
Railway Motor, Investigation of Silicone Insulation on High-Temperature. Grant, Kauppi, Moses....305–10; disc. 310 1947
Railway-Motor Temperatures in Service, Measurement of. Teker....545–50 1945
Railway Passenger-Car Auxiliary-Power Equipment, Modern. MacLeod, Hause....930–8 1947
Railway Power Supply. Torchio....550–3; disc. 1159 1940
Railway Service, Compressed-Air-Circuit Breakers in A-C. Wilcox, Harker....141–5; disc. 419 1945
Railway Service, Shunt Capacitor Installation for Single-Phase. Brown, Witzke....258–65; disc. 265 1948
Railway, Signal System, Interlocking Plants, and Automatic Train Control on the San Francisco-Oakland Bay Bridge. Davis....158–64 1940
Railways Terminal, Montreal, Canada, Electrification and Signaling of the Canadian National. Gage....41–4; disc. 417 1945
Range Adjustable-Speed Drive, A Wide-. Conrad, Tribken. .789–90 1949
Range-Adjusting Radiosonde Recorder, Automatic. Beggs....602–07 1949
Range of Radar Sets, Factors Affecting the. Quarles, Breazeale....546–8 1946
Ranges, Electric Drives for Textile Finishing. Moore, Uhl....684–94 1947
Ranges, Electrical Drives for Wide Speed. Caldwell, Formhals. .54–6 1942
Rapid Closing of Bus-Tie Switches, Improving Stability by. Kimbark....61–4; disc. 456 1945
Rapid Reclosing Duty, High-Voltage Oil Circuit Breakers for. Hill, Leeds. ....113–18; disc. 452 1944
Rapid-Recording A-C Bridge. Mikelson, Bousman. .628–31; disc. 1232 1940
Rapid-Transit Cars, A Control System for Modern Multiple-Unit. Moore. 142–7 1942

Rapid Transit Division, Chicago Transit Authority, Three-Compartment Articulated Cars for Test on. Otis... 416–18 1948

Rapid Transit System for Toronto, Proposed. Duncan.....939–46 1947

Rate Phenomenon, Electrical Insulation Deterioration Treated as a Chemical. Dakin.....113–18; disc. 118 1948

Rates of Steam Turbines and Boilers and of Hydro Units, Outage. (Committee Report).....450–7 1949

Rating, A New Submersible Network Protector of Higher. Grissinger, Johnson.....41–6 1946

Rating and Application of Motors for Refrigeration and Air Conditioning, The. Rutherford..... 519–23; disc. 523 1939

Rating and Life of Cold-Cathode Tubes, Current. Rockwood..... 901–03; disc. 1390 1941

Rating, Duty Cycles and Motor. Hildebrand.....478–83; disc. 483 1939

Rating Extension of Magnetic Air Circuit Breakers up to 500,000 Kva, 15 Kv, Size Reduction and. Dickinson, Frink.....220–3; disc. 510 1946

Rating Methods for Intermittent Loads, Analysis of. Hellmund 4–7 1943

Rating of Aircraft Electric Machines, Effect of Altitude on Ventilation and. Veinott....84–90; disc. 488 1946

Rating of Arc-Welding Generators and Transformers, The Service Factor. Freeman, Welch..137–41; disc. 726 1941

Rating of Cables as Affected by Mutual Heating in Air or Conduit, Current. (IPCEA Committee Report)..... 354–65; disc. 424, 1352 1944

Rating of D-C Machines, Temperature Limits and Measurements for. Compton.....780–5 1943

Rating of Electric Apparatus, Altitude. Lebenbaum....955–60; disc. 1485 1944

Rating of Electric Equipment Under Intermittent Load. Zucker..... 778–83; disc. 1381 1944

Rating of Electrical Machinery and Apparatus, The. Hellmund..... 499–503; disc. 503 1939

Rating of General-Purpose Induction Motors. Alger, Johnson..... 445–56; disc. 456 1939

Rating of High-Temperature Induction Motors. Alger, Jones..... 300–02; disc. 458 1945

Rating of Overhead Line Wire, Thermal. Zucker....501–07; disc. 918 1943

Rating of Potential Devices and Suggested Material for a Standard. Clem, Langguth..... 676–80; disc. 1217 1940

Rating of Power Transformers as Determined by the War Emergency, The. Salsbury, Phillips..... 255–60; disc. 452 1943

Rating of Radio-Frequency Cables, The Power. Mildner..... 289–98; disc. 298 1949

Rating of Telephone Systems, Transmission. Codd..694–8; disc. 1123 1946

Rating, Single-Phase A-C Electric Locomotives on the Pennsylvania Railroad—Protection and Tonnage. Griffith.....224–8 1942

Ratings and Applications, Classification and Co-ordination of Short-Time and Intermittent. Hellmund..... 792–8; disc. 1323 1941

Ratings and Stability, Radio-Frequency-Cable Power. Biskeborn..... 928–9 1945

Ratings and Their Application to Intermittent Duty Cycles, A Study of Short-Time. Hellmund, McAuley. .....1050–5; disc. 1221 1940

Ratings for Aircraft Wire and Cable, Short-Time Current. Jones, Scott. .....644–8; disc. 1135 1946

Ratings for Overhead Line Conductors, Safe. Olmsted..845–53; disc. 938 1943

Ratings, Notes on Emergency. Kidder. .....599–607; disc. 607 1939

Ratings of Aircraft Cable. Current, Askew, McClinton.....988–92 1949

Ratings of Cable, Load. Halperin: Part I.....535–53; disc. 553 1939
Part II.....930–42; disc. 1040 1942

Ratings of Diesel-Electric Locomotives, Short Time. Campbell, Woods... .....1661–3 1948

Ratings of Electronic Devices for Intermittent Service, Current. Hellmund.....569–73 1942

Ratings of Fractional-Horsepower Motors, Some Problems in the Standardization of Temperature. Veinott.....1055–61; disc. 1218 1940

Ratings of Ignitrons, Analytical Treatment for Establishing Load-Cycle. Marshall, Arnott..545–8; disc. 1051 1942

Ratings of Indoor Power Circuit Breakers, Application. Vikoren..... .....768–73; disc. 1168 1946

Ratings, Power-Circuit-Breaker. Van Sickle.....882–4; disc. 1353 1941

Ratings, Standardization of Reactor. Kierstead, Thomason..... .....955–7; disc. 957 1949

Ratings, The Hysteresis Motor–Advances Which Permit Economical Fractional Horsepower. Roters.. .....1419–30; disc. 1430 1947

Ratio and Its Effect on Traction Motors, Gear. Woods.....65–8; disc. 433 1944

Ratio and Phase Angle of Potential Transformers, A Capacitance Bridge for Determining the. Bousman, Ten Broeck..541–5; disc. 944 1943

Ratio as a Design Parameter in Thermal Demand Meters, Heat Flow. Nelson.....885–90; disc. 890 1949

Ratio-Control Transformers, A New Control System for Automatic Parallel Operation of Load-. Minneci, Farnham.....488–93; disc. 916 1943

Ratio Control Transformers Operating in Parallel and in Networks, Operation of Load. Starr..... .....1274–80; disc. 1407 1941

Ratio Differential Relays for Bus Protection, Considerations in Applying. Smith, Sonnemann, Dodds.. .....243–9; disc. 249 1939

Ratio Error and Phase Angle in Current Transformers, A Simple Method for Determination of. Wents..... .....949–54; disc. 1369 1941

Ratio Frequency Changer, Suddenly Applied Loads on a Variable-. Carter, Maginniss, Rothe..1489–95 1947

Ratio Frequency Changer, Tensorial Analysis and Equivalent Circuit of a Variable-. Kron.....1503–06 1947

Ratio Instrument, A Unique Moving-Magnet. Sias, Fisk..... .....634–6; disc. 1420 1944

Ratio of the Capacitor Motor, Turn. McFarland.....892–8 1943

Ratio Synchronous-Induction Frequency Changer, Suddenly Applied Loads Carried by a Variable. Darling, Kaufman.....91–4 1948

Ratio Transmission Used in Developmental 400-Cycle Electric System for Large Aircraft, Governor for Variable-. Desch, Garr, Hutton.. .....194–8 1946

Ratio Watt-Hour Meter, A Variable-Register. Shuck.....76–8 1939

Rationalization of Transmission-System Insulation Strength. Part III. Sporn, Gross....591–5; disc. 1201 1940
(Part I—1928; Part II—1930)

Ray Spectrograph, The Cathode-. Feldt, Berkley.....105–10 1947

Reactance and Skin Effect of Concentric Tubular Conductors. Dwight.... .....513–18; disc. 976 1942

Reactance Distance Relay, A New. Dewey, McGlynn..... .....743–6; disc. 746 1948

Reactance Flexible Cable for Induction Heating, Low. Zucker....848–52 1946

Reactance Networks, A Method for Determining the Normal Modes of Foster's. LePage.....674–8 1943

Reactance of Induction Motors, Some Phases of Calculation of Leakage. Liwschits, Formhals..... .....1409–12; disc. 1412 1947

Reactance of Large Cables in Steel Pipe or Conduit. Del Mar..... .....1409–12; disc. 1412 1948

Reactance of Large Conductors, Problems in the Measurement of A-C Resistance and. Salter..... .....1390–6; disc. 1396 1948

Reactance of Polyphase Machines, The Air Gap. Alger, West....1331–43 1947

Reactance of Salient-Pole Synchronous Machines, The Quadrature Synchronous. Shepherd, Kilbourne.. .....684–9; disc. 926 1943

Reactance of the Squirrel Cage Rotor With Respect to the Stator Harmonics and the Equivalent Circuit of the Induction Motor, Leakage. Liwschits.....1407–8 1947

Reactance, Saturation Effect of Leakage. Chang, Lloyd.....1144–7 1949

Reactances by Test, Inherent Errors in the Determination of Synchronous-Machine. Concordia, Maginniss.. .....288–94; disc. 491 1945

Reactances of an Ideal Synchronous Machine, The Negative-Sequence. Duesterhoeft....510–13; disc. 513 1949

Reactances of Squirrel-Cage Induction Motors. Lloyd, Giusti, Chang... .....1349–55 1947

Reactive Components in Power Line Networks, The Use of Business Machines in Determining the Distribution of Load and. Jennings, Quinan.....1045–6 1946

Reactor Circuits, Negative Resistance Effects in Saturable. Manley, Peterson.....870–81 1946

Reactor Cores Operating Above Saturation Density, Peak Voltages Induced by Accelerated Flux Reversal in. Specht, Wents..254–63 1946

Reactor Ratings, Standardization of. Kierstead, Thomason..... .....955–7; disc. 957 1949

Reactors, A Balanced Amplifier Using Biased Saturable Core. Kirschbaum, Harder.....273–8 1947

Reactors, Analysis of Arc-Welding. Wheeler.....87–90; disc. 434 1945

Reactors and Transformers, Temperature Limits for Short-Time Overloads for Oil-Insulated Neutral Grounding. Part II. Montsinger, Clem.....966–73; disc. 1155 1946
(Part I by V. M. Montsinger—1938)

Reactors as Fault Limiting Means on High Interrupting Capacity Controllers, The Use of Air-Core. Leitch.....469–74; disc. 474 1949

Reactors for Rectifiers, Nonlinear Commutating. Schmidt.....654–6 1946

Reactors, Guides for Operation of Transformers, Regulators, and. (Committee Report)..797–806; disc. 957 1945

Reactors, Interim Report on Overloading Current-Limiting. (Committee Report).....611–12; disc. 968 1943

Reactors to Switching Surges, Equivalent Circuits of Transformers and. Bewley.....797–802 1939

Reactors, Universal Curves for D-C Controllable. Johnson, Merrell, Alley.....31–7; disc. 37 1949

Reactors with Resistive Load, Some Fundamentals of D-C Controlled. Storm.....188–94; disc. 194 1949

Reading D-C Bridge for Microwave Power Measurements, A Direct. Carlin, Blass....311–15 1948
Receiver Design, Postwar Television. Pugsley....453–8 1947
Receiver Design Trends, Frequency Modulation. Young....1514–19 1948
Receivers and Thrpat Microphones, Laboratory Method for Objective Testing of Bone. Greibach..184–7 1946
Receiving Systems, Effect of Radio Frequencies of a Power System on Radio-. Aggers, Pakala, Stickel....169–72; disc. 459 1943
Receiving Systems, Television. Sinnett....1544–8 1948
Recent Advances in Aircraft Tachometer Design. Ballard, Hall....646–8; disc. 1421 1944
Recent Developments in Generator Voltage Regulation. Hanna, Oplinger, Valentine..838–44; disc. 844 1939
Recent Developments in Impulse-Voltage Testing, Some. Foust, Rohats....257–62; disc. 262 1940
Recent Developments in Light Sources. Millar....1505–17 1944
Recent Developments in Speed Regulation. Hanna, Oplinger, Mikina....692–700 1940
Recent Developments in Telegraph Switching. d'Humy, Browne....71–8 1940
Recent Developments in the PCC Car, Some. Cooper..288–92; disc. 292 1947
Recent Developments in Track Brakes and Drum Brakes for PCC Cars. Vouch....302–04 1947
Recent Improvements in Loading Apparatus for Telephone Cables. Hale, Quinlan, Ranges....385–92 1948
Recent Research on Pulsed Light Sources. Whelan....1303–07 1948
Reception With Power Apparatus and Systems, Measurements Pertaining to the Co-ordination of Radio. Foust, Frick....284–91; disc. 455 1943
Recloser, An Improved Automatic Circuit. Wallace....255–8; disc. 259 1947
Recloser Substantiate Analytical Coordination Method, Field Tests of Oil Circuit. Auer, Branflick, Woodward, McKinley....801–08; disc. 808 1949
Reclosers on REA Systems, Experience With Oil Circuit. Moore, Watkins....531–5; disc. 934 1943
Reclosing Breaker for Co-ordinating Distribution Systems, An Automatically. Rawlins, Wallace....1021–4 1941
Reclosing Breakers to Transmission Systems, Analysis of the Application of High-Speed. Crary, Kennedy, Woodrow....339–48; disc. 423 1942
Reclosing Circuit Breaker, Performance Test of the Allgemeine Elektricitats Gesellschaft Free-Jet Air-Blast 220-Kv 2,500-Megavolt-Ampere. Dovjikov, Diemond....295–304; disc. 304 1948
Reclosing Circuit Breakers, Insulator Flashover Deionization Times as a Factor in Applying High-Speed. Boisseau, Wyman, Skeats....1058–66; disc. 1066 1949
Reclosing Duty, High-Voltage Oil Circuit Breakers for Rapid. Hill, Leeds....113–18; disc. 452 1944
Reclosing Equipment on Stub Feeders, Interim Report on Application and Operation of Automatic. (Committee Report)..536–40; disc. 934 1943
Reclosing, High-Speed Single-Pole. Trainor, Hobson, Muller....81–7; disc. 422 1942
Reclosing of High-Voltage Transmission Lines, Five Years' Experience With Ultrahigh-Speed. Sporn, Muller....241–6; disc. 690 1941
Reclosing of High-Voltage Transmission Lines, Nine Years' Experience With Ultrahigh-Speed. Sporn, Muller....225–8; disc. 445 1945
Reclosing of Line Sectionalising Circuit Breakers, A-C Tripping and. Winegartner, Bonheimer...1357–9 1949
Reclosing of Single Tie Lines Between Systems. Parker, Travers....119–22; disc. 470 1944
Reclosing Oil Circuit Breaker, Tests of 230-Kv High-Speed. Schwager....784–8; disc. 1468 1944
Reclosing on a Large 132-Kv System, Experience With Single-Pole Relaying and. Trainor, Parks....405–11; disc. 411 1947
Reclosing Relay, A Novel. Bobo....1041–5; disc. 1403 1941
Reclosing, Relays and Breakers for High-Speed Single-Pole Tripping and. Goldsborough, Hill....77–81; disc. 429 1942
Reclosing, Transient Shaft Torques in Turbine Generators Produced by Transmission-Line. Batchelor, Whitehead, Williams....159–64; disc. 164 1948
Recommendations for High-Voltage Testing. (Committee Report)....598–602; disc. 1207 1940
Reconditioning of Insulating Oils by Activated Alumina. Housley....172–6; disc. 176 1939
Reconstruction of Switching Facilities at Essex Generating Station. Taylor....761–70; disc. 778 1939
Recorder, A Square-Law Power-Level. Clark, Turner, Williams....476–82 1949
Recorder, Ampere-Squared-Second. Rich....839–42 1941
Recorder, Automatic Range-Adjusting Radiosonde. Beggs....602–07 1949
Recorder for Flight Testing and Spectroscopy, Electronically Balanced. Williams, Clark, Tarpley...205–08 1946
Recorder Head Design, A New Wire. Long....216–20; disc. 495 1946
Recorder, The "Speedomax" Power-Level. Clark....957–64 1940
Recorders Providing Intense High-Frequency Fields, A Turn-In-Gap Erase Head for Magnetic. Wiegand, Zenner....507–10 1948
Recording, A High-Gain D-C Amplifier for Bio-electric. Goldberg...60–4 1940
Recording A-C Bridge, Rapid. Mikelson, Bousman..628–31; disc. 1232 1940
Recording, Application of Experimental Test Procedures and Methods of Analysis of Results to Research Problems in Magnetic. Thompson....407–17 1949
Recording Continuously the Salinity, Temperature, and Depth of Sea Water, An Instrument for Recording. Jacobson....714–22 1948
Recording Instruments, Frequency Response Characteristics of. Graybeal....755–66 1948
Recording Lightning Currents, New Instruments for. Wagner, McCann....1061–8; disc. 1253 1940
Recording, Signal and Noise Levels in Magnetic Tape. Wooldridge....343–52; disc. 495 1946
Recording. Tapes, Magnetic. Camras....503–06 1948
Recording Transient Phenomena, A New Instrument for. Begun....175–7; disc. 418 1942
Recording Transient Recovery Voltages, An Oscillograph for. Hoover....1086–91; disc. 1174 1946
Recording Wire, A B-H Curve Tracer for Magnetic. Long, McMullen....146–50; disc. 494 1946
Records—Steel and Wood Transmission Lines, Comparative Performance. Booker....686–9; disc. 689 1949
Recovery by An A-C Arc in an Air Blast, Dielectric. Browne....169–76; disc. 507 1946
Recovery Characteristics of Distribution Systems, Voltage-. Witzke....172–80; disc. 180 1949
Recovery Characteristics of Large Air Gaps, Dielectric-. McCann, Clark....45–52; disc. 394 1943
Recovery Characteristics, Power-System Voltage-. Peterson....405–11; disc. 411 1939
Recovery, Circuit-Breaker Current Measurements During Reignitions and. Lewis....1253–7; disc. 1257 1947
Recovery System of Testing Aircraft Engines, The Power-. Cassidy, Mosteller, Wright..240–6; disc. 416 1943
Recovery-Voltage Analyzer for Determination of Circuit Recovery Characteristics, The. Dunlap....958–62; disc. 1391 1941
Recovery-Voltage Characteristics of Electric-Power Systems, Transient. St. Clair, Adams..666–9; disc. 1016 1942
Recovery Voltage, Effect of Restriking on. Concordia, Skeats....371–5; disc. 375 1939
Recovery Voltages, An Oscillograph for Recording Transient. Hoover....1086–91; disc. 1174 1946
Recovery Voltages and Circuit-Breaker Performance, Transient. Van Sickle....804–13; disc. 1014 1942
Recovery Voltages on Rural Distribution Systems, Short-Circuit Currents and. Eason, Johnson, Kalb, Peterson....930–7; disc. 937 1949
Recovery Voltages, Practical Calculation of Circuit Transient. Adams, Skeats, Van Sickle, Sillers....771–9; disc. 1017 1942
Rectangular Conductor, Current Distribution in a. Daley....687–90; disc. 690 1939
Rectangular Conductors, Effective Resistance of Isolated Nonmagnetic. Dwight....549–52 1947
Rectangular Conductors, Experimental Determination of the Capacitance of Heavy-Current Busses Comprised of Solid or Tubular. Teasdale, Higgins....653–9; disc. 659 1948
Rectangular Conductors, Geometric Mean Distances for. Dwight. 536–8 1946
Rectangular Cross Section, Formulas for Calculating Temperature Distribution in Transformer Cores and Other Electric Apparatus of. Higgins....190–4; disc. 493 1945
Rectangular Tubular Conductors, Formulas for Calculating Short-Circuit Stresses for Bus Supports for. Higgins....578–80 1942
Rectangular Tubular Conductors, Formulas for the Inductance of. Higgins....1046–50; disc. 1409 1941
Rectification With Inductive and Generative Loads, Voltage and Current Relations for Controlled. Puchlowski....255–60; disc. 442 1945
Rectifier Ailments, Diagnosis of. Dortort....1298–1304 1949
Rectifier Anode Circuits and Its Relation to the Arc-Back Problem, A New Multiple High-Speed Air Circuit Breaker for Mercury-Arc. Seaman, Morton....788–96; disc. 1057 1942
Rectifier Battery Charger for Railroad Passenger Cars, The Magnesium-Copper Sulphide. Kotterman....260–5 1939
Rectifier Calculus, The. Goodhue....687–91; disc. 1073 1940
Rectifier Capacity. Herskind, Steiner....667–70 1946
Rectifier Cell, Electrical Characteristics of the Junction in a Simplified Selenium. Angello....175–80 1947

Rectifier Cells, Characteristics and Applications of Selenium-. Harty. . . . . 624–9; disc. 956 1943

Rectifier-Circuit Duty. Herskind. 123–8 1944

Rectifier Circuits, A Graphical Analysis of the Voltage and Current Wave Forms of Controlled. Chin, Moyer 501–08 1944

Rectifier Circuits, Analysis of. Christensen, Willis, Herskind. . . . 1048–58 1944

Rectifier Circuits—Artificial Arc-Back Tests, Arc-Backs in. Evans, Maslin. . . . . 303–11; disc. 439 1945

Rectifier Circuits, Transient Response of Controlled. Chin, Walter. 208–14 1945

Rectifier Corrosion Problem, The Water-Cooled Steel-Tank. Remscheid. . . . . 173–8; disc. 753 1941

Rectifier, Development of Excitron-Type. Winograd. . . . . 969–78; disc. 1454 1944

Rectifier—D-C Motor Drive, Theory of. Vedder, Puchlowski. . . . . 863–70; disc. 960 1943

Rectifier-Driven D-C Motors, Behavior Factors of. Siegfried. . . . . 530–3; disc. 1357 1944

Rectifier, Electronically Controlled Dry-Disk. Rosenstein, Barnett. . . . . 21–3; disc. 474 1944

Rectifier Fault Currents:

Part I. Herskind and Kellogg. . . . . 145–50; disc. 441 1945

Part II. Herskind, Schmidt, Rettig. . . . . 243–51; disc. 251 1949

Rectifier Groups, Wave Shape of 30- and 60-Phase. Marti, Taylor. . . . . 218–24; disc. 224 1940

Rectifier in Electrochemical Work, The Copper-Oxide. Smith. . . . . 739–44; disc. 1438 1944

Rectifier Installaton, Alcoa. Housley, Winograd. . . . . 1266–74; disc. 1409 1941

Rectifier Installations, Inductive Coordination Aspects of. (Committee Report). . . . 416–36; disc. 1115 1946

Rectifier Load, A Short-Cut Method of Estimating Telephone Influence Factor of Power Systems With. Frick. 91–6 1944

Rectifier Load, Operation of Nonsalient-Pole Type Generators Supplying a. Ross, Batchelor. . 667–70; disc. 959 1943

Rectifier Relay for Transformer Protection. Michelson. 252–4 1945

Rectifier Terminology and Circuit Analysis. Willis, Herskind. . . . . 496–9; disc. 974 1942

Rectifier Transformer Characteristics. (Committee Report). 1305–11 1949

Rectifiers, A Practical Approach to Calculating Optimum Performance of Semiconductor Rectifiers. Wilson. . . . . 640–2; disc. 642 1948

Rectifiers and Inverters for Railroad Service, High Voltage Ignitron. Boyer, Hagensick. 463–70 1946

Rectifiers and Inverters, Harmonics in the A-C Circuits of Grid-Controlled. Evans, Muller. . . . 861–8; disc. 869 1939

Rectifiers and Their Design, Selenium. Yarmack. . . . . 488–95; disc. 975 1942

Rectifiers, Applications of Copper-Oxide. Morris. 103–06 1939

Rectifiers, Circuit Cushioning of Gas-Filled Grid-Controlled. Edwards, Smith. . . . . 640–3; disc. 1131 1946

Rectifiers, Excitation Circuits for Ignitron. Myers, Cox. . . . . 943–8; disc. 1358 1941

Rectifiers, "Excitron" Mercury-Arc. Marti. . . . . 927–31; disc. 1168 1940

Rectifiers for A-C Aircraft Systems, Selenium Power. Embry. 596–600 1945

Rectifiers for Electroplating and Anodising Applications, Automatically Controlled Copper-Oxide. Buckley. 181–4 1947

Rectifiers for Railroads, Mercury-Arc. Watkins. . . . . 84–6; disc. 419 1945

Rectifiers for Three-Wire Service, Design of Sealed Ignitron. Morack. 103–07 1945

Rectifiers for Traction Service, Glass-Bulb Mercury-Arc. Woolgar. . . . . 843–6; disc. 1383 1941

Rectifiers, Harmonics and Load Balance of Multiphase. Evans. . . . . 182–7; disc. 400 1943

Rectifiers, Higher Voltage Copper-Oxide. Smith. 220–2 1947

Rectifiers in Industry, Ignitron. Cox, Jones. . . . . 713–18; disc. 1065 1942

Rectifiers in Motor Vehicle Power Systems, Selenium. Ramsey. . . . . 149–53; disc. 153 1949

Rectifiers in Telephone Offices, Regulated. Trucksess. . . . . 613–17; disc. 985 1942

Rectifiers in the Coal-Mining Industry, Mercury-Arc. Renshaw. . . . . 242–4; disc. 244 1940

Rectifiers, Load Pickup by a Group of Ignitron. Morton, Bohn. . . . . 679–84; disc. 963 1943

Rectifiers, Nonlinear Commutating Reactors for. Schmidt. 654–6 1946

Rectifiers on Electrochemical Installations, Maintenance of. Housley, Hughes. . . . . 436–41; disc. 1115 1946

Rectifiers, Operation of Large D-C Motors from Controlled. Schmidt, Smith. 679–83 1948

Rectifiers, Performance of Pumped Ignitron. Herskind, Remscheid. 215–18 1948

Rectifiers, Phase Occurrence of Arc-Backs in High-Current Mercury-Arc. Pakala, Batten. 345–7 1940

Rectifiers, Sealed-Tube Ignitron. Morack, Steiner. . . . . 594–9; disc. 1052 1942

Rectifiers, The Shunt Tube Control of Thyratron. Potter. 421–4 1947

Rectifiers, The Testing of Mercury-Arc. Kellogg, Herskind. . . . . 765–73; disc. 960 1943

Rectifiers, Twenty-Five Years of Copper—Copper Oxide. Grondahl. 403–10 1948

Rectifiers Under Unbalanced Conditions, Operation of. Christensen, Morack. 628–31 1944

Rectifiers, Voltage Control of Mercury-Arc. McDonald. . . . . 563–6; disc. 566 1939

Rectifiers, Watt-Hour-Meter Performance With Power. Weller, Trekell, Stebbins. . . . . 449–57; disc. 1184 1940

Rectifying Circuits With Capacitance Filters, Diode. Waidelich. . . . . 1161–7; disc. 1388 1941

Redesign of a Carbon Pile Voltage Regulator for Aircraft Generators, Analysis and. Kouwenhoven, Thaler. . . . . 1197–1202; disc. 1202 1948

Reduced-Scale Models, Determination of Cable Temperatures by Means of. Gemant, Sticher:

Part I. . . . . 475–82; disc. 1128 1946

Part II. . . . . 28–33; disc. 34 1948

Reduction and Rating Extension of Magnetic Air Circuit Breakers up to 500,000 Kva, 15 Kv, Size. Dickinson, Frink. . . . . 220–3; disc. 510 1946

Reduction Mills, Electric Equipment for Cold Strip. Miller. . . . . 133–9; disc. 139 1948

Reduction of Interference from Radio-Frequency Heating Equipment. Klingaman. . . . . 718–24; disc. 724 1949

Reduction, The Performance of a Topped Steam Power Plant on Sudden Load. Noest. 1348–56 1949

Reduction Traction Motor, Modern Double. Greer. 471–4 1946

Reed Selective Signaling System for Mobile Telephone Use, Vibrating. Pruden, Hoth. 387–91 1949

Reed Selectors for Mobile Radio Systems, Vibrating. Keller, Bostwick. 383–6 1949

Reels, An Electronic Drive for Windup. Puchlowski. . . . 585–91; disc. 1155 1946

Re-energizing the Electric System of the Consolidated Edison Co. of New York, Inc., Provisions for. Milne, Otten. . . . . 579–85; disc. 1155 1940

Reference Frames, Stationary Networks and Transmission Lines Along Uniformly Rotating. Kron. 690–6 1949

Reference Values for Temperature, Pressure, and Humidity. Bellaschi, McAuley. . . . . 669–75; disc. 1227 1940

Refiner, Electrical Engineering and the Petroleum. Weeks, Giesecke, Lathrop. . . . . 106–09; disc. 109 1940

Reflection-Seismograph Prospecting, Electrical Equipment Used in. Nash, Palmer. . . 855–60; disc. 860 1939

Reflectoscope, Electronic Circuits of a Supersonic. DeLano. 128–37 1948

Refrigeration and Air Conditioning, The Rating and Application of Motors for. Rutherford. . . . . 519–23; disc. 523 1939

Refrigeration and Pump Applications, New NEMA Fractional-Horsepower Motor Standards; Their Effect on. Potter. 508–10 1947

Regeneration of Teleprinter Signals, Electronic. Wilder. 34–40 1946

Register Control for Multicolor Printing, Electronic. Cockrell. . . . . 617–22; disc. 1117 1946

Register-Ratio Watt-Hour Meter, A Variable. Shuck. 76–8 1939

Regulated Distribution System, Operation of a Ground-Fault Neutralizer on a. Tomlinson, Hunt. . . . . 1321–6; disc. 1326 1949

Regulated Rectifiers in Telephone Offices. Trucksess. . . . . 613–17; disc. 985 1942

Regulating Relay Plus Line-Drop Compensator, A New Voltage-. Carlin. . . . . 63–6; disc. 481 1942

Regulating System as Determined by Electrical Analogy, The Transient Behavior of the Two-Stage Rototrol Main Exciter Voltage. Carleton. 59–63 1949

Regulating System for Diesel-Electric Locomotives, A Power Plant. Lewis. . . . . 242–6; disc. 246 1947

Regulating Systems, Two-Stage Rototrol for Low-Energy. Kimball. 1507–11 1947

Regulating Transformers, Equivalent Circuit Impedance of. Clem. . . . . 871–3; disc. 873 1939

Regulating Transformers in Power-System Analysis. Hobson, Lewis. . . . . 874–83; disc. 883 1939

Regulation and Control, A New Mercury Rheostatic Element for. Oplinger. . . . . 846–9; disc. 1386 1941

Regulation and Dead Band of Governors on Steam Turbine Generators Under System Load Conditions, Determining Incremental. Tornquist, Wade. 1343–7 1949

(Regulation) Control of Load, Frequency, and Time of Interconnected Systems. Duff. . . . . 778–86; disc. 999 1945

(Regulation) Instability in D-C Aircraft Systems. Bunce, Cunningham, Davidson. 786–91 1945

Regulation of A-C Generators With Suddenly Applied Loads. Harder, Cheek. . . . . 310–18; disc. 490 1944

Regulation of Turbine Generators to Relieve Power-Supply Systems of Steel-Mill Load Swings, Automatic. Eberhardt, Harrison, Kohn, Darling. 751–8 1945

Regulation of 24-28-Volt D-C Generators in Multiengine Aircraft, Paralleling and. Siegal, DeCourcey....854–7 1944

Regulation, Recent Developments in Generator Voltage. Hanna, Oplinger, Valentine....838–44; disc. 844 1939

Regulation, Recent Developments in Speed. Hanna, Oplinger, Mikina....692–700 1940

Regulation, The Use of Multiwinding Transformers With Synchronous Condensers for System Voltage. St. Clair....212–17; disc. 217 1940

Regulator, A New Grinding Circuit Feed. Jones....1240–2 1947

Regulator Accuracy Standards, Feeder Voltage. Birchard....747–51; disc. 751 1948

Regulator, An Electronic Frequency Meter and Speed. Levin....779–86; disc. 1181 1946

Regulator and Cutout, Aircraft Voltage. Jones, Exner, Wright....334–9 1942

Regulator Application on Power Systems, Feeder Voltage. Gosinski, Oberholtzer...1458–61; disc. 1461 1948

Regulator Characteristics, Steady-State Stability of Synchronous Machines as Affected by Angle-. Concordia....687–90 1948

Regulator Characteristics, Steady-State Stability of Synchronous Machines as Affected by Voltage-. Concordia....215–20; disc. 489 1944

Regulator for Aircraft Generators, Analysis and Redesign of a Carbon Pile Voltage. Kouwenhoven, Thaler....1197–1202; disc. 1202 1948

Regulator for Arc Furnaces, Electronic. Reilly, Valentine....601–04 1944

Regulator for Arc Furnaces, Rotating. Geiselman, Levy, Harris....671–4; disc. 983 1943

Regulator for Propeller Milling Machine, Tracer-Controlled Position. Hanna, Osbon, Hartley....201–05; disc. 452 1945

Regulator for Rototrol Exciter, Static Voltage. Harder, Valentine....601–06 1945

Regulator for Speed Control, The Polyphase Commutator. Conrad, Brooks, Fellers...321–8; disc. 484 1946

Regulator Insensitive to Load Power Factor, A Static Voltage. Summers, Short....67–70 1942

Regulator Problem by Electrical Analogy, Solution of the General Voltage. Harder....815–25; disc. 825 1947

Regulator, The Direct-Acting Generator Voltage. Boice, Crary, Kron, Thompson....149–56; disc. 156 1940

Regulator Without Moving Parts Employing Ferroresonance, An Automatic Voltage. Craig....830–6; disc. 836 1939

Regulators, and Reactors, Guides for Operation of Transformers. (Committee Report). 797–806; disc. 957 1945

Regulators for Aircraft, Carbon-Pile Voltage. Neild....839–43; disc. 1460 1944

Regulators for Sectional Paper Machine Drive, Electronic Speed. Baker, Kovalsky....1636–42 1948

Regulators for Synchronous Motor Drives, Rotating Stability. Schaelchlin....884–7; disc. 887 1947

Regulators, Fundamentals, and Design Improvements, Aircraft Carbon-Pile Voltage. Austin, Richards....983–7 1949

Regulators in the L-1 Carrier System, Stability of Tandem. Kinzer....1179–86 1949

Regulators, Industrial Application of Rototrol. Harris....118–23 1946

Regulators, Interim Report on Guides for Overloading Transformers and Voltage. (Committee Report)....692–4; disc. 1063 1942

Regulators, Power System Voltage Control Without Feeder Voltage. Smeloff....1462–4; disc. 1465 1948

Regulators, Resonant-Circuit Constant-Current. Kevern....807–10; disc. 992 1945

Regulators, Resonant-Type Constant-Current. Miner..822–8; disc. 828 1939

Regulators to Aircraft Generators, The Application of Voltage. Thompson, Crever....363–5 1942

Regulators Under Impact Loads, General Analysis of Speed. McCann, Osbon, Kirschbaum. 1243–52 1947

Regulators, Use of Equivalent Annual Ambient Temperature in Overloading Transformers and Voltage. Oldacre....477–80; disc. 916 1943

Regulex Exciters, Arc-Furnace Control by. Montgomery, Bloodworth....650–4; disc. 980 1943

Reignitions and Recovery, Circuit-Breaker Current Measurements During. Lewis..1253–7; disc. 1257 1947

Rejection Filter, A Tunable. Taylor....263–7; disc. 490 1946

Relation Between Electrical and Mechanical Parameters of a Permanent-Magnet Movable-Coil Instrument Having a General Circuit. Goodwin....374–9 1948

Relations Between Short Cylindrical Conductors, Resistance and Capacitance. ReQua....724–30; disc. 962 1945

Relations for Controlled Rectification With Inductive and Generative Loads, Voltage and Current. Puchlowski....255–60; disc. 442 1945

Relationships for D-C Generators for Use in Aircraft, Design. Bergman....613–16; disc. 957 1943

Relationships of Electric-Service-Load Characteristics, Coincidence-Factor. Bary....623–9 1945

Relationships of the Adjustable-Speed A-C Brush Shifting Motor, Impedance. Baumann....1460–2 1947

Relative Accuracy of Three-Phase Metering Combinations. Weller....925–9; disc. 1336 1941

Relative Expense for Service Restoration With Different Types of Overcurrent Protection for Distribution Circuits. Lincks, Craig....813–21; disc. 980 1942

Relative Severity of Steep Front Waves and Chopped Waves on Transformers, A Study of the. Vogel....64–6; disc. 66 1947

Relative Surface Voltage Gradients of Grouped Conductors. Temoshok....1583–9; disc. 1589 1948

Relative Value of Different Types of Overcurrent Protection for Distribution Circuits. Lincks....19–26; disc. 426 1942

Relaxed Initial Conditions in Transient Problems, A New Method for Introducing. Johnson....178–81 1941

Relay, A New Distance Ground. Goldsborough....1442–6; disc. 1446 1948

Relay, A New Generator Differential. McConnell....11–13; disc. 381 1943

Relay, A New High-Speed Balanced-Current. Stewart....553–5; disc. 772 1943

Relay, A New One-Cycle Directional-Overcurrent. Morris....725–7; disc. 989 1943

Relay, A New Reactance Distance. Dewey, McGlynn....743–6; disc. 746 1948

Relay, A New Single-Phase-to-Ground Fault-Detecting. Sonnemann....677–80; disc. 995 1942

Relay, A Novel Reclosing. Bobo....1041–5; disc. 1403 1941

Relay, An Improve A-C Pilot-Wire. Neher, McConnell....12–17; disc. 638 1941

Relay, An Improved Polyphase Directional. Hoard...246–8; disc. 681 1941

Relay and Control Circuits, Insulation Level of. (Committee Report)....1255–7 1949

Relay Applications, A 150-Kc Carrier System for Radio. Boughtwood....577–82 1948

Relay as an Aircraft Control Element, A Polarized. Johnson, Glassow....1249–55 1948

Relay Channel to Other Uses, Possibilities and Methods of Extending a Carrier Current. Smith, Goldsborough....23–7; disc. 645 1941

Relay Circuits, Sequential Aspects of. Ritchie....577–81 1949

Relay Circuits, The Logic of. Keister....571–6 1949

Relay Contact Protection Systems, Sensitive. Dallas, McCully....1204–07 1948

Relay Control Circuits, Voltage Surges in. Halman, Harris....1693–9; disc. 1699 1948

Relay Developments, Electronic. Loving....233–40; disc. 240 1949

Relay Equipment, One Slip Cycle Out-of-Step. Morris....1246–8 1949

Relay for D-C Aircraft Electric Systems, Differential Generator Control. Crever....589–93 1944

Relay for Generator Protection, A High-Speed Differential. Sonnemann....608–12; disc. 1250 1940

Relay for Power-System Applications, A New Frequency. Carlin, Blackburn....553–7; disc. 1421 1944

Relay for Reducing Outages on Power Circuits, A New Electronic Timing. Dlouhy....407–11 1946

Relay for Synchronous Generators, A New Loss-of-Excitation. Mason....1240–5 1949

Relay for Transformer Protection, Rectifier. Michelson....252–4 1945

(Relay) Instantaneous Bus-Differential Protection Using Bushing Current Transformers, Seeley, von Roeschlaub....1709–18; disc. 1718 1948

Relay Literature, Bibliography of. (Committee Report):
1940–43....705–09 1944
1944–46....24–27 1948

Relay Performance Analysis by Automatic Oscillographs, Fault Location. Dupuis, Jacobs....442–6; disc. 1125 1946

Relay Plus Line-Drop Compensator, A New Voltage-Regulating. Carlin....63–6; disc. 481 1942

Relay Preference Lockout Circuits in Telephone Switching. Joel....1720–5; disc. 1725 1948

Relay Protection, A New-Type Carrier. Wood, Haberl, Bailey....774–9; disc. 987 1943

Relay Protection for Complex Distribution Circuits, Sensitive Ground. Hunt....765–8; disc. 1180 1946

Relay Protection for Subtransmission Lines Made Economical, Distance, Audlin, Warrington....574–8; disc. 976 1943

Relay Protection of Power Supply System, Pennsylvania Railroad New York-Washington-Harrisburg Electrification—. Harder....266–73; disc. 273 1939

Relay Protection of Power Transformers. (Committee Report)....911–15; disc. 915 1947

Relay Protection of Tapped Transmission Lines. Bostwick, Harder....645–50; disc. 969 1943

Relay Protection, Shipshaw. Madill, Duffy....50–5; disc. 55 1949
Relay Protection, Typical Transformer Faults and Gas Detector. Madill....1052–8; disc. 1058 1947
Relay Schemes, The Functions of Ground Preference in Carrier-Current. Leyland, Goldsborough....97–100; disc. 437 1944
(Relay) Service Restoration With Automatic Air-Break Switches. Reardon....64–71; disc. 71 1948
Relay Servomechanisms, An Analysis of. Kahn....1079–87; disc. 1087 1949
Relay System, A Microwave Communication. Boothroyd, Churchill....637–41 1949
Relay System, A Multichannel Microwave Radio. Black, Beyer, Grieser, Polkinghorn....798–806 1946
Relay Systems, Power Supplies for Microwave. Ward....631–6 1949
Relay, The Mho Distance. Hutchinson....353–60 1946
Relay Timing in Industrial Control, Capacitor. Stansbury, Jochem....65–9; disc. 69 1940
Relay "Trees" and Symmetric Circuits. Washburn....582–6 1949
Relay With Adjustable Phase-Angle Discrimination, A Distance. Goldsborough....835–8; disc. 1471 1944
Relayed Distribution Circuits During Faults to Ground, Performance of Ground-. Gilkeson, Jeanne, Davenport....40–8; disc. 424 1942
Relaying and Joint Usage, Power Line Carrier for. Part I. Hampe, Storer....864–7; disc. 871 1949
Relaying and Reclosing on a Large 132-Kv System, Experience With Single-Pole. Trainor, Parks....405–11; disc. 411 1947
Relaying and Stability on Kansas-Nebraska 270-Mile 154-Kv Interconnection, Staged Fault Tests of. Minard, Gow, Wolfe, Swanson....358–67; disc. 425 1943
Relaying Difficulties Disclosed by Staged-Fault Tests. Morgan, Evans....73–82 1948
Relaying Experience and Practice, High-Speed-. (Committee Report)....588–91; disc. 591 1939
Relaying—Experience and Practice, Pilot-Wire Circuits for Protective. (Committee Report)....210–14; disc. 380 1943
Relaying for A-C Secondary Network Systems, Modern. Beeman....237–41; disc. 683 1941
Relaying for Long Transmission Lines, Protective. Warrington....261–8; disc. 427 1943
Relaying in the United States, Principles and Practices of. Harder, Marter....1005–22; disc. 1022 1948
Relaying of Transmission Lines from the New Sunbury Generating Station. Green, Oewel, Ramsaur....873–7; disc. 877 1949
Relaying on a Metropolitan System, Pilot-Wire. LeClair, Michelson....511–15; disc. 974 1943
Relaying on 3-Phase Systems, Fundamental Basis for Distance. Lewis, Tippett....694–708; disc. 708 1947
Relaying, Phase-Comparison Carrier-Current. McConnell, Cramer, Seeley....825–33; disc. 973 1945
Relaying, Philosophy of. Knapp, Hicks....735–41; disc. 1135 1946
Relaying Problems on the Fort Peck Project, Transmission and. Floor, Muller, Goldsborough....209–14; disc. 466 1944
Relaying, Prolonged Inrush Currents With Parallel Transformers Affect Differential. Hayward....1096–1101; disc. 1305 1941
Relaying Scheme, The MHO-Carrier. Cordray, Warrington....228–35; disc. 434 1944
Relaying, Simplicity of Protective. Hunt....995–1000; disc. 1121 1946
Relaying System, A New Carrier. Halman, Goldsborough, Lensner, Drompp....568–72; disc. 1423 1944
Relays, A Frequency Modulation Telegraph Terminal Without. Cusack, Michon....1165–70; disc. 1170 1947
Relays and Breakers for High-Speed Single-Pole Tripping and Reclosing. Goldsborough, Hill....77–81; disc. 429 1942
Relays, Application of the Ohm and Mho Principles to Protective. Warrington....378–86; disc. 490 1946
Relays, Counting With. Frost..587–91 1949
Relays During Faults and Power Swings, Graphical Method for Estimating the Performance of Distance. Warrington....608–20; disc. 620 1949
Relays During Power Swings With and Without Faults, Impedances Seen by. Clarke....372–84; disc. 471 1945
Relays, Electronic Protective. MacPherson, Warrington, McConnell....1702–07; disc. 1707 1948
Relays, Factors Which Influence the Behavior of Directional. Graybeal....942–52 1942
Relays for Bus Protection, Considerations in Applying Ratio Differential. Smith, Sonnemann, Dodds....243–9; disc. 249 1939
Relays for High-Speed Differential Protection, With Particular Reference to Offset Transient Currents, Current Transformers and. Wents, Sonnemann....481–8; disc. 1144 1940
Relays for Transformer Differential Protection, Harmonic-Current-Restrained. Hayward....377–82; disc. 622 1941
Relays, Induced Current in Parallel Circuits and Its Effect Upon. Bancker....582–5; disc. 585 1939
(Relays) Interim Report on Application and Operation of Out-of-Step Protection. (Committee Report)....567–73 1943
Relays, Novel Test Circuits for Protective. Sonnemann....1249–54 1949
Relays on Unusually Long Transmission Lines, Performance Requirements for. Poage, Streifus, MacGregor, George....275–83; disc. 422 1943
Relays, Operating Experience With Distance Ground. Wolfe....458–62; disc. 1185 1946
Relays, Out-of-Step Blocking and Selective Tripping With Impedance. Vaughan, Sawyer....637–45; disc. 645 1939
(Relays) System Short-Circuit Currents. Hanna, Travers, Wagner, Woodrow, Skeats....877–81; disc. 1351 1941
Relays, The Application of Heterodyne Modulation to Wide-Band Frequency-Modulated Television. Boothroyd....1126–30 1947
Relays, The Effect of Current-Transformer Residual Magnetism on Balanced-Current or Differential. Seeley....164–9; disc. 384 1943
Release Interval Controls, An Interval and Dwell Tester for Bomb-. Long....648–51 1945
Reluctance Motors—Synchronous Motors Without Field Excitation, Performance Calculations on Polyphase. Trickey....191–3 1946
Remote Control of Coaxial Cable Stations, B-1 Alarm and Control System for. Hearn, Weber..622–6 1949
Remote-Control Toll Board. Sorber, Smith....696–704; disc. 704 1939
Remote Indication, Magnesyn. Childs....679–82 1944
Renaissance of Electric Motive Power, The. Candee....138–44 1949
Repeater for Teletypewriter Signals, An Electronic Regenerative. Hearn....904–11 1947
Report of a Survey on the Performance of Shunt Capacitors. (Committee Report)....1200–06; disc. 1206 1949
Report of Conference on Radio-Frequency Cables....911–41 1945
Report of D-C Testing of Generators in the Field, Progress. Davis, Leftwich....14–18; disc. 470 1942
Report of the Board of Directors:
....926–38 1939
....1313–26 1940
....1449–63 1941
....1136–49 1942
....1007–22 1943
....1518–31 1944
....1001–16 1945
....1197–1216 1946
....1698–1720 1947
....1762–83 1948
....1383–1408 1949
Report on AIEE Test Code for Electric Brushes, Progress. (Committee Report)....1126–8 1949
Report on Apparatus Bushings. (Committee Report)....266; disc. 695 1941
Report on Application and Operation of Automatic Reclosing Equipment on Stub Feeders, Interim. (Committee Report)....536–40; disc. 934 1943
Report on Application and Operation of Circuit Breakers and Switchgear, Interim. (Committee Report)....481–83 1943
Report on Application and Operation of Out-of-Step Protection, Interim. (Committee Report)....567–73 1943
Report on Application of Lightning Protective Devices in Wartime. (Committee Report)...586–8; disc. 952 1943
Report on Characteristics and Performance of Conductors for Supervisory Control and Telemetering, Interim. (Committee Report)....854–62 1943
Report on Emergency Overloads on Overhead Conductors, Interim. (Committee Report)....588–90; disc. 940 1943
Report on Guides for Overloading Transformers and Voltage Regulators, Interim. (Committee Report)....692–4; disc. 1063 1942
Report on Laboratory Aging Tests on Class A Insulation, Preliminary. (Committee Report)....879–81; disc. 881 1947
Report on Method of Measurements at Carrier-Current Frequencies. (Committee Report)....1429–32; disc. 1432 1948
Report on Overloading Distribution Transformers, Interim. (Committee Report)..516–17; disc. 968 1943
Report on Survey of Unbalanced Charging Currents on Transmission Lines as Affecting Ground-Fault Neutralisers. (Committee Report)....1328; disc. 1329 1949
Report on the Operation and Maintenance of Shunt Capacitors. (Committee Report)....1208–18 1949
Reproducer Design, Phonograph. Bachman....159–62 1946
Repulsion Motors, Performance Calculations on. Trickey....67–73; disc. 661 1941
Requirements for Aircraft Alternator Drives, Governor. Boice, Levoy....534–40; disc. 947 1945
Requirements for Aircraft Electric Motors. Siefkin....810–13 1944

Requirements for Low-Voltage Aircraft Cable. Hedges..808–10; disc. 1473 1944

Requirements for Program Transmission Circuits, Engineering. Cowan, McCurdy, Lattimer.....142–7 1941

Requirements for Relays on Unusually Long Transmission Lines, Performance. Poage, Streifus, MacGregor, George.....275–83; disc. 422 1943

Requirements for Transformers, Short-Circuit. Garin.....710–3 1947

Requirements of a 660-Horsepower Locomotive Diesel Engine, Investigation of Starting. Davidson, Lamborn.....31–4; disc. 632 1941

Research and Experience, Gas-Filled-Cable. Shanklin.....549–53; disc. 1399 1944

(Research) Breakdown Studies in Compressed Gases. Howell.....193–204; disc. 204 1939

(Research) Dielectric Strength and Life of Impregnated-Paper Insulation, The. Whitehead:
Part I.....715–20; disc. 1085 1940
Part II.....660–3; disc. 1233 1940
Part III.....618–22; disc. 1040 1942
Part IV. Whitehead and Kopper.....171–7; disc. 479, 942 1945

(Research) Dielectric Strength of Insulating Liquids in a Continuously Circulating System. Race..730–7 1940

(Research) Effect of Corona Discharge on Liquid Dielectrics. Sticher, Thomas.....709–19; disc. 719 1939

(Research) Importance of Gas in Electrodes for the Glow-to-Arc Transition. Maxfield, Hegbar, Eaton.....816–21; disc. 1095 1940

Research on Lightning Arrester Discharges, Field. McCann, Beck.....625–9; disc. 629 1947

Research on Pulsed Light Sources, Recent. Whelan.....1303–07 1948

Research, 150,000 Horsepower Applied to Aeronautical. White....833–9 1946

Research Problems in Magnetic Recording, Application of Experimental Test Procedures and Methods of Analysis of Results to. Thompson.....407–17 1949

Reserve, A Convenient Method for Determining Generator. Seelye.....1317–20 1949

Reserve Capacity Determined by the Probability Method, Generating. Calabrese.....1439–50 1947

Reserve, Outage Expectancy as a Basis for Generator. Seelye.....1483–8 1947

Residential Electric Load, The Heat Pump—Its Significance as a Potential. Bary.....1–8 1949

Residual Magnetism on Balanced-Current or Differential Relays, The Effect of Current-Transformer. Seeley.....164–9; disc. 384 1943

Resin-Treated Magnet Coils, Silicone. Moses, Torok..412–16; disc. 1184 1946

Resin-Treated Wood and Laminated Hydrolyzed-Wood and Paper-Base Plastics, The Electrical Resistivity of. Weatherwax, Stamm...833–8 1945

Resins to Insulation for Electric Machinery, The Application of Silicone. DeKiep, Hill, Moses.....94–8; disc. 460 1945

Resistance and Capacitance Relations Between Short Cylindrical Conductors. ReQua..724–30; disc. 962 1945

Resistance and Dielectric-Absorption Characteristics of Large A-C Stator Windings, Insulation. Askey, Johnson.....347–51; disc. 458 1945

Resistance and Inductance of 3-Conductor Shipyard Power Cables, Effective. Summers.....1345–50 1948

Resistance and Reactance of Large Conductors, Problems in the Measurement of A-C. Salter.....1390–6; disc. 1396 1948

Resistance at High Voltage, A Portable Instrument for Measuring Insulation. Atkinson, Taylor.....164–7; disc. 428 1945

Resistance-Coupled Amplifier, The. Cowles.....359–65 1945

Resistance-Coupled Amplifiers Using Pentode Tubes, Calculation and Design of. Terman, Hewlett, Palmer, Pan...879–84; disc. 1133 1940

Resistance Effects in Saturable Reactor Circuits, Negative. Manley, Peterson.....870–81 1946

Resistance Heating, Industrial Electric. Hynes.....1359–61 1948

Resistance in Spot Welding, Measurement and Effect of Contact. Wyant.....26–33; disc. 513 1946

Resistance, Interlamination. Barton.....670–2 1944

Resistance of Coils, Data on the High-Frequency. Witzig.....764–9 1947

Resistance Loss, Formulas for Conductor Size According to Cost of. Dwight.....22–5; disc. 497 1946

Resistance Networks, Methods for A-C Network Analysis Using. Enns.....875–80; disc. 1069 1942

Resistance of Isolated Nonmagnetic Rectangular Conductors, Effective. Dwight.....549–52 1947

Resistance of Large D-C Machines, Factors Affecting Insulation. Johnson, Weil..705–10; disc. 1194 1946

Resistance of Large Size Conductors in Steel Pipe or Conduit, A-C. Wiseman.....1745–52; disc. 1752 1948

Resistance of Multilayer Coils, Eddy-Current. Long.....712–18 1945

Resistance of Segmental Cables in Steel Pipe, A-C. Meyerhoff, Eager.....816–29; disc. 829 1949

Resistance of the Spot Weld. Ciganek.....997–1002 1940

Resistance on Switching Transients, Influence of. Van Sickle.....397–404; disc. 404 1939

Resistance to Alternating Currents of Multilayer Windings, Effective. Bennett, Larson.....1010–17; disc. 1262 1940

Resistance-Type Thermometer, Heat-Flow Effects in a. Millar..678–85 1945

Resistance-Welder Control, Simplified Precision. Roby..528–32; disc. 532 1939

Resistance Welders, An Electronic Control Circuit for. Gray, Breyer.....361–4; disc. 364 1939

Resistance Welders, Line Drop Produced by. Longini.....619–23; disc. 963 1945

Resistance Welders, Power Supply for Single-Phase. Wright.....705–07; disc. 707 1939

Resistance Welding, An Improved Electronic Control for Capacitor-Discharge. Bichsel, Hughes.....1150–7; disc. 1384 1944

Resistance Welding, Application of Quality Control to. Hobson, Inglis, McCants.....573–5, 951 1945

Resistance Welding Control, Automatic Voltage Compensator for. Callender, Phair....701–05; disc. 921 1943

Resistance Welding Control, Functionalized. Stadum, Large, Hartwig.....414–18 1947

Resistance-Welding Control, The Application of Ignitrons to. Bivens.....471–8; disc. 655 1941

Resistance Welding Loads, Voltage Changes Caused by. Johnson, Peterson, Rhoades..664–73; disc. 674 1947

Resistance-Welding Machine and Power Supply. Smith.....995–1003; disc. 1003. 1948

Resistance Welding Machine, Influence of Magnetic Materials on the Welding Characteristics of. Riley, Smith.....852–60; disc. 1160 1946

Resistance-Welding Machines by Series Capacitors, Power-Factor Correction of. Levoy.....1002–09; disc. 1102 1940

Resistance-Welding Machines, Power Supply for. (Committee Report):
Parts I and II.....306–20 1940
Part III.....185–92 1941

Resistance Welding Tools, Electrical Characteristics of. Callender.....393–404 1947

Resistance Welding Transformers, Characteristics of. Murray, Jones.....726–8; disc. 1152 1946

Resistance-Welding Transients. Kimberly.....94–5 1942

Resistance Welds, Predetermination of Temperatures in. Johnson.....845–53; disc. 853 1939

Resistant Wood-Pole Transmission Lines, Ten Years' Performance of Lightning. Schahfer, Knuts.....934–40; disc. 940 1948

Resistive Load, Some Fundamentals of D-C Controlled Reactors with. Storm.....188–94; disc. 194 1949

Resistivity of Resin-Treated Wood and Laminated Hydrolyzed-Wood and Paper-Base Plastics, The Electrical. Weatherwax, Stamm..833–8 1945

Resistor Transition, Improvements in Preventive-Coil Control for A-C Locomotives With Particular Reference to. Hatch, Ogden..727–32 1942

Resistors and Control for Diesel-Electric Locomotives, Braking. Weiser.....229–32 1947

Resistors for Motor Starting and Speed Control, Theory and Design of NEMA. Armstrong.....277–81 1940

Resistors for 138-Kv Cable Switching. Sadler, Blakeslee...39–46; disc. 46 1947

Resistors, Industrial Control: Heating of Shunt-Motor Starting. Leland, Rader.....695–9; disc. 961 1945

Resistors, Properties and Uses of Thermistors—Thermally Sensitive. Becker, Green, Pearson.....711–25 1946

Resonant-Cavity Method for Measuring Dielectric Properties at Ultrahigh Frequencies, A. Works, Dakin, Boggs.....1092–8; disc. 1452 1944

Resonant-Circuit Constant-Current Regulators. Kevern.....807–10; disc. 992 1945

Resonant Fatigue Machine, Self-Excited Electromagnetic Drive for a. Willson.....1073–8 1946

Resonant-Type Constant-Current Regulators. Miner...822–8; disc. 828 1939

Resources Through Multiple Purposes, Full Utilisation of Mexico's Hydraulic. Alba.....989–92 1948

Respiration, A Comparison of the Relative Efficiency of the Schafer and Pole-Top Methods of Artificial. Kouwenhoven, Hooker, Langworthy.....41–4; disc. 660 1941

Respiration on Anesthetized Men, Study of Artificial. Kouwenhoven, Hooker, York.....1–2; disc. 446 1944

Response Characteristics of Recording Instruments, Frequency, Graybeal.....755–66 1948

Response Curves, Control Chart Methods Applied to Frequency. Mundel.....424–7 1949

Response of Automatic Control Systems, The Frequency. Harris.....539–46; disc. 1131 1946

Response of Controlled Rectifier Circuits, Transient. Chin, Walter.....208–14 1945

Response Time and Lag of a Thermometer Element Mounted in a Protecting Case. Goodwin.....665–70; disc. 959 1945

Responsive Devices on Diesel-Electric Locomotives, Speed. Johansson.....336–8 1948

Restoration of Service From Large Metropolitan System After Complete Shutdown. Dryar, Bailey.....571–4; disc. 1154 1940

Restoration of Service on a Metropolitan Power System. Bryson, Hayward.....563–70; disc. 1153 1940

Restoration With Automatic Air-Break Switches, Service. Reardon.....64–71; disc. 71 1948

Restoration With Different Types of Overcurrent Protection for Distribution Circuits, Relative Expense for Service. Lincks, Craig..813–21; disc. 980 1942

Restorer, A New Single-Pole Service. Tugby.....889–92; disc. 1070 1942

Restricted Ionisation and Its Relation to Voids in Insulating Materials, Characteristics of. Dawes, Humphries.....701–08; disc. 1071 1940

Results of Steam, Diesel-Electric, and Electric Motive Power on the Great Northern Railway Electrification, Comparative Operating. Gaynor..231–4; disc. 234 1948

Results of Tests Carried Out at the 500-Kv Experimental Station of Chevilly (France), Especially on Corona Behavior of Bundle Conductors. Cahen.....1118–25; disc. 1125 1948

Results to Research Problems in Magnetic Recording, Application of Experimental Test Procedures and Methods of Analysis of. Thompson.....407–17 1949

Resynchronizing of Generators. Concordia, Temoshok.....1512–18 1947

Reversal in Reactor Cores Operating Above Saturation Density, Peak Voltages Induced by Accelerated Flux. Specht, Wentz.....254–63 1946

Reverse-Current Cutout, Proposed Circuit for Aircraft. Marzolf.....1246–8 1948

Reverse-Rotation Test for the Determination of Stray Load Loss in Induction Machines. Morgan, Brown, Schumer.....319–22; disc. 322 1939

Reversing Cycle of Modern Blooming Mills, The. Montgomery, Sellers.....1508–13; disc. 1513 1948

Reversing of Thyratron Motor Control, Inverter Action on. Palmer, Leigh.....175–84; disc. 494 1944

Review of Switchgear and Circuit Breaker Practice in the United States, A Brief. Hobbs.....893–7; disc. 897 1948

Revolving-Field Concepts, Single-Phase Motor Theory—a Correlation of the Cross-Field and. Button.....507–12; disc. 664 1941

Rewinding Commutator-Type Traction Armatures. Greene, Stafford, Gentilini.....563–9; disc. 943 1945

Rheostat for Speed Control of Wound Rotor Induction Motors, The Liquid. McFarland, Alvarez.....603–09; disc. 609 1948

Rheostatic Element for Regulation and Control, A New Mercury. Oplinger.....846–9; disc. 1386 1941

Rhode Island, Trackless Trolley Operation in. Blomquist.....397–402 1949

Ride, Acoustics and the Quiet Train. Jack.....382–92; disc. 417 1942

Riemann-Christoffel Curvature Tensor, Equivalent Circuits for Oscillating Systems and the. Kron.....25–32; disc. 372 1943

Rig Equipment, Modern Diesel-Electric Drilling. Rhea.....447–53 1946

Rig for Deep-Well Drilling, Performance of Diesel-Electric. Clark, Moore.....497–506 1949

Rigs, Variable-Voltage Equipment for Rotary Drilling. Lamberger.....248–55; disc. 255 1940

Ring-Bus Characteristics, Three-Winding Transformer. Bills, MacArthur.....848–9; disc. 1066 1942

Ring Bus for Grand Coulee Power Plant, Development of the 230-Kv. Holmdahl, Killgore.....1369–78; disc. 1378 1948

Ring Busses for Generating and Transmission Stations. Michelson, Galassini.....665–9; disc. 1372 1944

Rise, Complete Analysis of Motor Temperature. Felix, Jungk.....578–86; disc. 684 1941

Rise from Early Heat Run Data, Prediction of Ultimate Temperature. Ryan.....1164–6 1949

Rise in Transformers Due to Interruption of Exciting Current, Transient Voltage. Srinivasan, Vogel. 1632–6 1947

Rise of Aircraft Transformers, Effect of Altitude on Temperature. Montsinger.....251–2 1945

Rise of Buried Cables and Pipes, The Temperature. Neher.....9–17; disc. 17 1949

Rise of Cables in a Duct Bank, The Temperature. Neher.....540–6; disc. 546 1949

Rise of Electrical Apparatus as Affected by Radiation, Temperature. Penney.....338–42; disc. 342 1940

Rise of Water-Cooled Power Transformers, Temperature. Meador...18–21 1946

Rise Values for D-C Machines, Temperature. (Committee Report):
Part I.....206–12; disc. 212 1949
Part II.....1118–23; disc. 1123 1949

Risk of Operating Capacitors Without Individual Fuses, The Calculated. Brooks.....1219–25; disc. 1225 1949

Rockies, Pumping for Power in the Colorado. Wilson.....1127–36 1948

Rods and Counterpoise Wires in High-Resistance Soil on Consumers Power Company 140-Kv System, Study of Driven. Hemstreet, Lewis, Foust...628–34; disc. 1000 1942

Rods, Tubes, and Flat Surfaces, Diffusion of Electric Current into. Miller.....1496–1502 1947

Role of Frequency in Industrial Dielectric Heating, The. Scott.....558–62 1945

Role of the Ionosphere in Radio Wave Propagation, The. Dellinger.....803–22 1939

Rolled Strip Steel, X-Ray Thickness Gauge for Cold. Lundahl...83–90 1948

Rolling, Keep Them. Teker...107–12 1943

Rolling Mill Preset Screw-Down Controllers, Improvements in. Leitch, Schurr.....58–63 1948

Rolling-Mill Service, An Analysis of Motor Selection for Brass-Slab. Berkley.....185–9; disc. 189 1947

Rolling Mills, An X-Ray Thickness Gauge for Hot-Strip. Clapp, Pohl.....620–6 1948

Rooms, Electrically Charged Dust in. Penney, Hewitt.....278–82 1949

Roots, A Construction Theorem for Evaluating Operational Expressions Having a Finite Number of Different. Cromwell.....273–6; disc. 676 1941

Rotary Drilling Rigs, Variable-Voltage Equipment for. Lamberger.....248–55; disc. 255 1940

Rotary Magnetic Clutch and Its Associated Brake Used on Aircraft Electric Motors, One Type of. Andrews, Shanely.....893–5; disc. 1477 1944

Rotating A-C Machines, Survey of Lightning Protective Equipment for. (Committee Report).....516–19; disc. 519 1948

Rotating Amplifiers, An Analysis of. Litman.....1111–17 1949

Rotating Disk, On Eddy Currents in a. Smythe.....681–4 1942

Rotating-Drum Camera, A Cathode-Ray Oscillograph With. Downie..984–6 1941

Rotating Electric Machine Time Constants at Low Speeds. Concordia.....882–7 1946

Rotating Electrical Equipment on Shipboard, Ventilation of. Harrison...1263–9; disc. 1269 1948

Rotating Electrical Machinery, Effects of Temperature on Mechanical Performance of. Lynn.....514–7; disc. 517 1939

Rotating Machine With Asymmetrical Stator and Rotor, Equivalent Circuit of the Primitive. Kron.....17–23; disc. 23 1947

Rotating Machinery

A Design Method for Capacitor Start Motors. Chang.....1369–74 1947

A Method of Selecting Inherent Overheat Protectors Based Upon Motor Design Information. Vaughan.....1023–9; disc. 1030 1948

A Semiempirical Approach to Voltage Dip—with Suddenly Applied Loads on A-C Generators. Rosenberg...160–6; disc 166 1949

A Study of the 3-Phase Commutator Armature With Six Adjustable Brushes. Franklin.....197–204 1948

A Wide-Range Adjustable-Speed Drive. Conrad, Tribken...789–90 1949

An Induction Generator Used With the All-Electric Automatic Pilot for Airplanes. Vickers.....182–5 1948

Analysis of Unsymmetrical Machines. Burian.....643–6 1948

Armature Iron Losses in Series Motors. Chang, Karr.....262–4; disc. 264 1949

Balanced Fractional-Slot Wave Windings. Liwschitz.....676–8 1948

Calculation of Slot Constants. Puchstein.....1315–22; disc. 1322 1947

Design of Auxiliary Circuits of Single-Phase Induction Motors. Thacker, Gopalakrishna.....1373–9 1949

Die-Cast Rotors for Induction Motors. Packer...253–60; disc. 260 1949

Differential Leakage Patterns of a Fractional Slot Winding. Liwschitz.....1129–31; disc. 1131 1949

Doubly Chorded or Doubly Shifted Fractional-Slot Lap and Wave Windings. Liwschitz.....684–6 1948

Effects of Commutator Surface Film Conditions on Commutation. Lynn, Elsey.....106–12; disc. 112 1949

Effects of Silicone Vapor on Brush Wear. Marsden, Savage..1186–90 1948

Formation of Insulating Oxide Films on Electrical Steel. Schmidt.772–4 1948

Fundamental Theory of Inherent-Overheating Protection Under Running Overload Conditions. Veinott, Schaefer.....266–70; disc. 270 1949

General Theory of Multiple Cage Induction Motors. Chang.1139–43 1949

Impedance Relationships of the Adjustable-Speed A-C Brush-Shifting Motor. Baumann.....1460–2 1947

Leakage Reactance of the Squirrel Cage Rotor With Respect to the Stator Harmonics and the Equivalent Circuit of the Induction Motor. Liwschitz.....1407–8 1947

Limitations in Design of D-C Adjustable Speed Motors. Opel.....1095–8 1949

Measuring Commutation with an Indicating Instrument. Lundy.....1380–2 1949

Methods for Determining the Effects of Contaminants on Electrical Insulation. Mathes, Sieffert, Walker, Lindsey.....113–18; disc. 118 1949

Motor Tests Evaluate Thermal Endurance of Class-H Insulation and Silicone Varnish. Grant, Kauppi, Moses, Gibson....1133–8 1949

Operating Characteristics of Two-Phase Servomotors. Koopman....319–27; disc. 327 1949

Origin of the Electric Motor. Michalowics....1288–92 1948

Oscillographic Study of Synchronous Motor Hunting. Kurtz...647–52 1948

Oscillographing Commutation. Baldwin....100–05; disc. 105 1949

Performance Calculation of Induction-Type Frequency Converters. Latzko....691–4 1948

Performance Calculations on Shaded Pole Motors. Trickey....1431–8; disc. 1438 1947

Performance of the Single-Phase Synchronous Machine. Robertson, Rogers....194–6 1948

Reactances of Squirrel-Cage Induction Motors. Lloyd, Giusti, Chang....1349–55 1947

Saturation Effect of Leakage Reactance. Chang, Lloyd....1144–7 1949

Single-Phase Synchronous Machine. Terry, Robertson....186–93 1948

Solid Short Circuit of D-C Motors and Generators. Linville, Ward....119–23; disc. 123 1949

Some Phases of Calculation of Leakage Reactance of Induction Motors. Liwschitz, Formhals....1409–12; disc. 1412 1947

Steady-State Equivalent Circuits of Synchronous and Induction Machines. Kron....175–81 1948

Steady-State Stability of Synchronous Machines as Affected by Angle-Regulator Characteristics, Concordia....687–90 1948

Stray Load Losses Measured in D-C Motors. (Committee Report)....219–23; disc. 223 1949

The Air Gap Reactance of Polyphase Machines. Alger, West...1331–43 1947

The Application of Surge Comparison Testing Equipment to Fractional Horsepower A-C Stator Windings. Buchanan....1356–8 1947

The Circle Diagram of the Polyphase Brush-Shifting Commutator Motor (Schrage Type). Franklin....1667–72; disc. 1672 1947

The Design of D-C Motors for Use in Automatic Control Systems. Lebenbaum....1089–94 1949

The Dynamoelectric Amplifier—Class A Operation. Saunders....1368–73 1949

The Eccentric Pole Face—A Means to Better D-C Machine Performance. Baker....1107–10 1949

The Field Fluxes of the Shaded-Pole Motor. Kimberly....273–7 1949

The Geometric Loci of the Synchronous Tie. Finzi, Wellard...168–71 1949

The Magnetic Fluid Clutch. Rabinow....1308–15 1948

The Negative-Sequence Reactances of an Ideal Synchronous Machine. Duesterhoeft....510–13; disc. 513 1949

The "Superimposed Frequency Test" for Induction Motors, or S. F. Test. Romeira....952–3; disc. 953 1948

The Torques of the Synchronous Tie—A Steady-State Analysis. Finzi, McConnell....1147–52 1949

Transient Characteristics of D-C Motors and Generators. McClinton, Brancato, Panoff....1100–06 1949

Transient Shaft Torques in Turbine Generators Produced by Transmission Line Reclosing. Batchelor, Whitehead, Williams....159–64; disc. 164 1948

Transients in 2-Phase Synchronous Machines. Wilson....1360–7 1949

Two-Stage Rototrol for Low-Energy Regulating Systems. Kimball....1507–11 1947

Use of Cumulative and Differential Series Fields in the Parallel Operation of D-C Motors. Kimball....1098–1100 1949

Rotating Machinery, Vibration Protection for. Webb, Murray....534–7; disc. 1355 1944

Rotating Machines, Lighting Protection for. McCann, Beck, Finzi....319–33; disc. 488 1944

Rotating Machines, The Magnetomotive Force of 2-Layer Windings of. Stein....756–8 1947

Rotating Reference Frames, Stationary Networks and Transmission Lines Along Uniformly. Kron....690–6 1949

Rotating Regulator for Arc Furnaces. Geiselman, Levy, Harris....671–4; disc. 983 1943

Rotating Stability Regulators for Synchronous Motor Drives. Schaelchlin....884–7; disc. 887 1947

Rotating Standard for the Measurement of Kilowatt-Hours, A Precision. Goss, Hansen....412–15; disc. 415 1940

Rotation Test for the Determination of Stray Load Loss in Induction Machines, Reverse-. Morgan, Brown, Schumer....319–22; disc. 322 1939

Rotor-Bar Currents in Squirrel-Cage Induction Motors. Gault....784–91; disc. 1327 1941

Rotor, Equivalent Circuit of the Primitive Rotating Machine With Asymmetrical Stator and. Kron....17–23; disc. 23 1947

Rotor Induction Motors, The Liquid Rheostat for Speed Control of Wound. McFarland, Alvares....603–09; disc. 609 1948

Rotor, Magnetic Suspension of the Watt-Hour Meter. Trekell, Mendelsohn, Wright....1180–5; disc. 1185 1948

Rotor Testing by Test Stator Method, Die Cast. Trickey....139–41; disc. 483 1946

Rotor, The "Copperspun" Squirrel Cage. Anderson....1312–14 1947

Rotor Turbine Generators, Pole-Face Loss in Solid-. Kuyper....827–34; disc. 925 1943

Rotor-Winding Deformation on Turbogenerators, Prevention of. Noest....514–19; disc. 1353 1944

Rotor With Respect to the Stator Harmonics and the Equivalent Circuit of the Induction Motor, Leakage Reactance of the Squirrel Cage. Liwschitz....1407–08 1947

Rotors, Basic Concepts of Moving-Magnet-Instrument. Mendelsohn....529–34; disc. 947 1945

Rotors for Induction Motors, Die-Cast. Packer....253–60; disc. 260 1949

Rototrol Excitation for Turbine Generators, Main Exciter. Lynn, Valentine....535–9; disc. 539 1948

Rototrol Excitation Systems. Barkle, Valentine....529–34; disc. 534 1948

Rototrol Exciter, Static Voltage Regulator for. Harder, Valentine. 601–06 1945

Rototrol for Low-Energy Regulating Systems, Two-Stage. Kimball....1507–11 1947

Rototrol Main Exciter Voltage Regulating System as Determined by Electrical Analogy. The Transient Behavior of the Two-Stage. Carleton....59–63 1949

Rototrol, The Multistage. Liwschitz....564–8 1947

Rototrol Regulators, Industrial Application of. Harris....118–23 1946

Rubber Cables, Corona-Initiation Measurements on Polyethylene and. Depackh....939–40 1945

Rubber Calender Train, Co-ordinated Electric Drive for a. John, Knapp, Mosteller....128–34; disc. 492 1946

Rubber-Insulated Cables, Corona Discharge on. Paine, Brown....709–14; disc. 1070 1940

Rubber Insulated Cables, The Measurement and Investigation of Ionization Level of. Graham, Duffy, Foster....1107–16; disc. 1116 1948

Rubber-Insulated Wire, High Voltage D-C Testing of. Eddy, Fenn....576–8; disc. 1126 1946

Rubber Insulators for Pole Lines. Wheeler, Markley....195–7 1949

Rubber-Tired Vehicles, Generation of Electric Charges by Moving. Mackeown, Wouk....207–10; disc. 428 1943

Run Data, Prediction of Ultimate Temperature Rise from Early Heat. Ryan....1164–6 1949

Running Overload Conditions, Fundamental Theory of Inherent-Over heating Protection Under. Veinott, Schaefer....266–70; disc. 270 1949

Runway and Approach Lighting, Airport. Kevern....1396–9 1947

Rupturing Duty, A 230-Kv 3-Cycle Oil Circuit Breaker for Extra-Heavy Arc. Leeds, Cushing....236–42; disc. 242 1948

Rural Automatic Telephone Networks. Ffolliott....1079–83; disc. 1304 1941

Rural Carrier Telephone System, Application of. Bartelink, Cook, Cowan, Messmer....511–17; disc. 517 1947

Rural Distribution System, Lightning Investigation on a. MacCarthy, Stann, Edge, McKinley....428–37; disc. 437 1949

Rural Distribution System, Overcurrent Investigation on a. Lincks, Edge, McKinley, Leh....915–27; disc. 927 1949

Rural Distribution Systems, Graphical Method of Calculating Fault Currents on. Linder....16–19; disc. 446 1945

Rural Distribution Systems, Improved Fault Protection for. Van Ryan....261–3 1945

Rural Distribution Systems, Short-Circuit Currents and Recovery Voltages on. Eason, Johnson, Kalb, Peterson....930–7; disc. 937 1949

Rural Distribution Voltages. Edmunds, Roloson....1324–6; disc. 1326 1948

Rural Electrification and Electroagriculture, Specific Engineering Problems in. Samuels....1065–73; disc. 1182 1946

REA Distribution Systems and Telephone Systems, Inductive Co-ordination of. Plucknett, Smith, Taylor....586–95; disc. 723 1941

REA Systems, Experience With Oil Circuit Reclosers on. Moore, Watkins....531–5; disc. 934 1943

Rural Electrification Engineering and Electroagricultural Engineering. Samuels....193–7; disc. 459 1943

Rural Line Carrier, Coupling Capacitors and Traps for. (Committee Report)....1426–8 1948

Rural Power and Telephone Services, Joint Use of Pole Lines for. Campbell, Hill, Moore, Scholz....519–24; disc. 524 1947

Rural Power Circuits, Sectionalising and Internal Transformer Fusing on. Watkins....383–8; disc. 388 1947

Rural Radiotelephone Experiment at Cheyenne Wells, Colo. Moore, Seyler, Wright....525–8 1947

Rural Service, A Carrier Telephone System for. Barstow....501–07 1947

S

S-Function Method of Measuring Attenuation of Coaxial Radio-Frequency Cable. Stewart.....616–19, 938–9; disc. 966 1945

Safe Ratings for Overhead Line Conductors. Olmsted.....845–53; disc. 938 1943

Safety
A Comparison of the Relative Efficiency of the Schafer and Pole-Top Methods of Artificial Respiration. Kouwenhoven, Hooker, Langworthy.....41–4; disc. 660 1941
Dangerous Electric Currents. Dalziel.....579–85; disc. 1123 1946
Effect of Frequency on Let-Go Currents. Dalziel, Ogden, Abbott.....745–50; disc. 998 1943
Effect of Wave Form on Let-Go Currents. Dalziel..739–44; disc. 998 1943
Electric Shock. Dalziel, Lagen, Thurston.....1073–8; disc. 1295 1941
Hazards of Static Electricity in Hospital Operating Rooms. Williams.....1146–7; disc. 1147 1947

Safety—1930–1941, Bibliography on Electrical.....1101–10 1942

Safety, Using Airborne Radar to Increase Airline. Ayer.....1387–95 1947

Sag and Tension Calculations for Cable and Wire Spans Using Catenary Formulas. Nash, Nash.....685–92; disc. 984 1945

Sag on Transmission-Line Shielding, The Influence of Towers and Conductor. Sorensen, McMaster.....159–65; disc. 448 1942

Sags in Suspension Spans, Broken Conductor Effect on. Bissiri, Landau.....1181–8 1947

Saguenay System, Improvements in Performance of Hydroelectric Generating Units on the 2,000,000-Horsepower. Lawton.....900–10; disc. 1187 1946

Salient-Pole Synchronous Machines, The Quadrature Synchronous Reactance of. Shepherd, Kilbourne..684–9; disc. 926 1943

Salient-Pole Synchronous Motors, Starting Performance of. Liwschits...913–19; disc. 1215 1940

Samples of Low-Permeability Material, A 60-Cycle Hysteresis Loop Tracer for Small. Wiegand, Hansen.....119–31; disc. 131 1947

(**San** Francisco-Golden Gate Exposition) Color, Light, and Structure at Golden Gate Exposition (a 16-page insert) facing page 746..... 1940

San Francisco-Oakland Bay Bridge Railway, Signal System, Interlocking Plants, and Automatic Train Control on the. Davis.....158–64 1940

Sapphire-Crystal Orientation on the Wear of Watt-Hour-Meter Bearings, Effect of. Goss.....811–14; disc. 1336 1941

Saturable Core Reactors, A Balanced Amplifier Using Biased. Kirschbaum, Harder.....273–8 1947

Saturable Reactor Circuits, Negative Resistance Effects in. Manley, Peterson.....870–81 1946

Saturated Synchronous Machines Under Transient Conditions in the Pole Axis. Rudenberg.....297–306; disc. 444 1942

Saturation, Correction for. McFarland.....233–5 1942

Saturation Density, Peak Voltages Induced by Accelerated Flux Reversal in Reactor Cores Operating Above. Specht, Wents.....254–63 1946

Saturation Effect of Leakage Reactance. Chang, Lloyd.....1144–7 1949

Saturation in Magnetic Amplifiers, Self-. Dornhoefer.....835–46; disc. 846 1949

Saturation, Nonharmonic Oscillations as Caused by Magnetic. Rudenberg.....676–85 1949

Saving Time in Testing Life of Incandescent Lamps. Purcell.....730–2 1949

Scale A-C Voltmeter, A New Expanded. Millar.....641–3 1949

Scale General-Purpose Electric-Analog Computer, A Large. Harder, McCann.....664–73 1948

Scale Indicating Instruments, Advancements in the Design of Long-. Rowell, Millar.....155–60 1947

Scale Indicating Instruments, Design of Long-. Corson, Rowell, Hoare...318–27; disc. 476 1942

Scale Models, Determination of Cable Temperatures by Means of Reduced-. Gemant, Sticher:
Part I.....475–82; disc. 1128 1946
Part II.....28–33; disc. 34 1948

Scale Removal From Steel, Electrolytic Process of. Neblett.....294–6; disc. 761 1941

Schafer and Pole-Top Methods of Artificial Respiration, A Comparison of the Relative Efficiency of the. Kouwenhoven, Hooker, Langworthy.....41–4; disc. 660 1941

Schedules, Co-ordination of Fuel Cost and Transmission Loss by Use of the Network Analyzer to Determine Plant Loading. George, Page, Ward.....1152–60; disc. 1160 1949

(**Schrage** Type) The Circle Diagram of the Polyphase Brush-Shifting Commutator Motor. Franklin.....1667–72; disc. 1672 1947

Schwartz, A Derivation of Heaviside's Operational Calculus Based on the Generalised Functions of. Smith, Alger....939–44; disc. 944 1949

Scientific Basis for the New British System of Cockpit Lighting, The. Calvert.....869–70 1944

Screw-Down Controllers, Improvements in Rolling Mill Preset. Leitch, Schurr.....58–63 1948

Sea Water, Instrument for Recording Continuously the Salinity, Temperature and Depth of. Jacobson.....714–22 1948

Seaboard Air Line Railway, A 3,000 Horsepower Diesel-Electric Locomotive for the. Staples, Weybrew, Atwell.....215–19 1947

Sealed Ignitron, A 400-Ampere. Steiner, Price.....680–5; disc. 1161 1946

Sealed Ignitron Rectifiers for Three-Wire Service, Design of. Morack..103–07 1945

Sealed-Tube Ignitron Rectifiers. Morack, Steiner....594–9; disc. 1052 1942

Search and Survey, Air-Borne Magnetometers for. Felch, Means, Slonczewski, Parratt, Rumbaugh, Tickner.....640–50 1947

Second Recorder, Ampere-Squared-. Rich.....839–42 1941

Secondary Circuits, Grounding of Instrument Transformer. (Committee Report).....419–20 1947

Secondary Conductor Economics, Distribution Transformer and. Brady.....483–6; disc. 486 1949

Secondary Current Transformers, Low-Current-. (Committee Report)...649–50 1946

Secondary Network Systems, Modern Relaying for A-C. Beeman.....237–41; disc. 683 1941

Secondary Networks to Serve Industrial Plants. Powel, Barnett.....154–6; disc. 698 1941

Secondary Versus Primary Capacitors. Starr.....228–42; disc. 242 1939

Secondary-Voltage Method, Field Determination of Current-Transformer Errors by the. Goodale, Holbeck.....879–82; disc. 1468 1944

Secondary Winding, Oscillations of a High-Voltage. Boyajian..1010–20 1946

Secondary Windings and Associated Circuits, Overvoltage Protection of Current-Transformer. Kaufmann, Camilli.....467–72; disc. 919 1943

Sectional Paper Machine Drive, Electronic Speed Regulators for. Baker, Kovalsky.....1636–42 1948

Sectionalizing and Internal Transformer Fusing on Rural Power Circuits. Watkins.....383–8; disc. 388 1947

Sectionalising and Load Transfer, Automatic Control of Air Switches for Line. Rich, Kirwen.....293–9; disc. 299 1947

Sectionalising Circuit Breakers, A-C Tripping and Reclosing of Line. Winegartner, Bonheimer.....1357–9 1949

Segmental Cables in Steel Pipe, A-C Resistance of. Meyerhoff, Eager.....816–29; disc. 829 1949

Seismograph Prospecting, Electrical Equipment Used in Reflection-. Nash, Palmer....855–60; disc. 860 1939

Selection for Brass-Slab Rolling-Mill Service, An Analysis of Motor. Berkley.....185–9; disc. 189 1947

Selection of Electric Drives for Looms. Demartini, Lukens.....349–56 1949

Selection of Generators and Batteries for Aircraft, Basic Considerations in the. Cobb, Winters.....889–93; disc. 1494 1944

Selection of Prime Movers, Conditions Controlling the Economic. Skrotzki.....1099–1108; disc. 1360 1944

Selection of Railroad Motive Power, Factors Involved in the. Wilcox, Oehler.....235–40; disc. 411 1943

Selective Signaling System for Mobile Telephone Use, Vibrating Reed. Pruden, Hoth.....387–91 1949

Selective Tripping Arrangements for Protection of Ship's A-C Electric Distribution Systems. Cole.....1256–62; disc. 1262 1948

Selective Tripping of Low-Voltage Air Circuit Breakers. Deans.....971–6; disc. 976 1947

Selector Supervisory System, Space Code. Forrest, Schirmer.....1312–15; disc. 1315 1949

Selectors for Mobile Radio Systems, Vibrating Reed. Keller, Bostwick..383–6 1949

Selenium Power Rectifiers for A-C Aircraft Systems. Embry...596–600 1945

Selenium Rectifier Cell, Electrical Characteristics of the Junction in a Simplified. Angello.....175–80 1947

Selenium-Rectifier Cells, Characteristics and Applications of. Harty.....624–9; disc. 956 1943

Selenium Rectifiers and Their Design. Yarmack.....488–95; disc. 975 1942

Selenium Rectifiers in Motor Vehicle Power Systems. Ramsey.....149–53; disc. 153 1949

Self-Cooled Oil-Insulated Transformers, Hot-Spot Winding Temperatures in. Vogel, Narbutovskih.....133–6; disc. 418 1942

Self-Excitation of Induction Motors. Wagner.....47–51 1939

Self-Excitation of Induction Motors With Series Capacitors. Wagner..1241–7; disc. 1391 1941

Self-Excitation of Squirrel-Cage Motor, Dynamic Braking by. Srinivasan, Thomas.....145–8 1947

Self-Excited Electromagnetic Drive for a Resonant Fatigue Machine. Willson.....1073–8 1946

Self-Excited Oscillations of Capacitor-Compensated Long-Distance Transmission Systems. Bodine, Concordia, Kron...41–4; disc. 371 1943

Self-Inductance of a Toroidal Coil Without Iron, The. Dwight.....805–06; disc. 999 1945

Self-Propelled Vehicles, Grounding of Circuits on. Ewing.....48–50; disc. 417 1945

Self-Saturation in Magnetic Amplifiers. Dornhoefer.....835–46; disc. 846 1949

Selsyn Design and Application. Johnson.....703–08; disc. 960 1945

Selsyn for Aircraft, A D-C Telemeter or D-C. Jewell, Faus.....314–17 1942

Selsyn Generator-Control Transformer System, Electrical Accuracy of. Chestnut.....570–6; disc. 1118 1946

Selsyn System, Analysis and Design of a D-C. Manildi..512–16; disc. 946 1945

Selsyns, Damping and Synchronising Torques of Power. Concordia, Kron.....366–71; disc. 490 1945

Semiconducting Liquids, The Dielectric Properties of Cellulose Insulation Impregnated With. Clark.....55–62; disc. 62 1947

Semiconducting Shielding for A-C Power Cable. Merrell.....605–09; disc. 1145 1946

Semiconductor Rectifiers, A Practical Approach to Calculating Optimum Performance of. Wilson.....640–2; disc. 642 1948

Semiconductors, The Physics of Electronic. Pearson.....209–14 1947

Semiempirical Approach to Voltage Dip —with Suddenly Applied Loads on A-C Generators, A. Rosenberg.....160–6; disc. 166 1949

Sensing Element, A Magnetic Compass With Cathode-Ray. Kliever, Syrdal.....529–34 1947

Sensitive Ground Protection for Radial Distribution Feeders. Hunt, Vivian.....84–7; disc. 87 1940

Sensitive Ground Protection for Transmission Lines and Distribution Feeders. Gross.....968–71 1941

Sensitive Ground Relay Protection for Complex Distribution Circuits. Hunt.....765–8; disc. 1180 1946

Sensitive Relay Contact Protection Systems. Dallas, McCully.....1204–07 1948

Sensitive Resistors, Properties and Uses of Thermistors—Thermally. Becker, Green, Pearson....711–25 1946

Sensitive to Frequency and Load, A Power-System Governor. Curtis.....89–92; disc. 731 1941

Sensitivity of the Four-Arm Bridge. Seletsky, Zurcher..723–8; disc. 728 1939

Sequence Reactances of an Ideal Synchronous Machine, The Negative-. Duesterhoeft....510–13; disc. 513 1949

Sequential Aspects of Relay Circuits. Ritchie.....577–81 1949

Series, Arc-Backs in Ignitrons in. Slepian, Pakala.....292–4 1941

Series-Capacitor-Compensated Transmission System, Characteristics of a 400-Mile 230-Kv. Hoard.....1102–14; disc. 1178 1946

Series Capacitor for 66-Kv Transmission Line, Design and Protection of 10,000-Kva. Johnson, Marbury, Arthur.....363–7; disc. 368 1948

Series Capacitor Improves Voltage on 66-Kv Line Supplying Large Electric Furnace Load, A 10,000-Kva. Jones, Arthur, Stearns, Johnson.....345–51; disc. 351 1948

Series Capacitor Protective Device, New. Marbury, Owens.....142–6; disc. 511 1946

Series Capacitor Substation, Design and Layout of 66-Kv 10,000-Kva. Miller.....355–3 1948

Series Capacitors for Transmission Circuits. Starr, Evans.....963–73; disc. 1044 1942

Series Capacitors in Long Transmission Lines, Steady-State and Transient-Stability Analysis of. Butler, Paul, Schroeder...58–65; disc. 377 1943

Series Capacitors, Self-Excitation of Induction Motors With. Wagner.....1241–7; disc. 1391 1941

Series Capacitors to Flash Welders, The Application of. Deffenbaugh.....686–7 1946

Series Fields in the Parallel Operation of D-C Motors, Use of Cumulative and Differential. Kimball.....1098–1100 1949

Series Motor, Dynamic Braking of a Single D-C. Leitch.....149–54 1947

Series Motors, Armature Iron Losses in. Chang, Karr.....262–4; disc. 264 1949

Series Motors—Calculation of Stability Limit, Dynamic Braking Control of D-C. Heumann, Smith.....454–7; disc. 1130 1946

Series Motors, Dynamic Braking of Two D-C. Leitch.....787–91 1947

Series Motors—Experimental Study of Speed-Torques Curves, Dynamic Braking Control of D-C. Heumann.....560–4 1949

Service, An Analysis of Motor Selection for Brass-Slab Rolling-Mill. Berkley.....185–9; disc. 189 1947

Service by Means of High-Speed Switching and Utilization of Stored Energy, Factors Contributing to Improving Electric. Logan, Miles.....1012–16; disc. 1408 1941

Service, Current Ratings of Electronic Devices for Intermittent. Hellmund.....569–73 1942

Service, Design of Sealed Ignitron Rectifiers for Three-Wire. Morack.....103–07 1945

Service, Developments in Current Collectors for High-Speed. Langer.....51–4 1947

Service Factor Rating of Arc-Welding Generators and Transformers, The. Freeman, Welch..137–41; disc. 726 1941

Service From Large Metropolitan System After Complete Shutdown, Restoration of. Dryar, Bailey.....571–4; disc. 1154 1940

Service, High-Capacity "Hydro-Blast" Circuit Breaker for Central-Station. Skeats, Saylor...111–14; disc. 114 1940

Service, High-Voltage Bushings Designed to Meet Modern. Brandt, Rorden.....255–60; disc. 696 1941

Service in America, Radio for Telephone. Romnes.....1060–7 1948

Service-Load Characteristics, Coincidence-Factor Relationships of Electric-. Bary.....623–9 1945

Service, "Magne-Blast" Air Circuit Breaker for 5,000-Volt. Boehne, Linde.....202–08; disc. 208 1940

Service, Measurement of Railway-Motor Temperatures in. Teker 545–50 1945

Service, Metal-Clad Unit-Type Switchgear for 33-Kv Service. Kreger.....360–8; disc. 509 1946

Service on a Metropolitan Power System, Restoration of. Bryson, Hayward.....563–70; disc. 1153 1940

Service Restoration With Automatic Air-Break Switches. Reardon.....64–71; disc. 71 1948

Service Restoration With Different Types of Overcurrent Protection for Distribution Circuits, Relative Expense for. Lincks, Craig.....813–21; disc. 980 1942

Service Restorer, A New Single-Pole. Tugby.....889–92; disc. 1070 1942

Service, Shunt Capacitor Installation for Single-Phase Railway. Brown, Witzke.....258–65; disc. 265 1948

Service Standards, Progress in Development of Trolley-Coach Overhead Reflected in Higher. Birch.....185–91 1942

Service, The Communication Facilities of the U.S. Forest. Simson.....971–6 1941

Services Operating on Frequencies Between 152–174 Megacycles, Design of Mobile Radio Communication Equipment for Land-Mobile. Beers, Harris, Zappacosta..1232–9 1949

Servo System, Polarized-Light. Berry.....195–8; disc. 429 1944

Servomechanism Components and Systems, Graphical Determination of Transfer Function Loci for. Thomas, Easton..307–14; disc. 314 1949

Servomechanism Design, Considerations in. Herwald.....871–6 1944

Servomechanism Problems, Electrical Analogy Methods Applied to. McCann, Herwald, Kirschbaum.....91–6; disc. 515 1946

Servomechanism Types, A Comparison of Two Basic. Harris.....83–92; disc. 92 1947

Servomechanisms

General Analysis of Speed Regulators Under Impact Loads. McCann, Osbon, Kirschbaum.....1243–52 1947

Graphical Analysis of Control Systems. Evans.....547–51 1948

Instrument Inaccuracies in Feed-Back Control Systems with Particular Reference to Backlash. Marcy, Yachter, Zauderer..778–88 1949

Laboratory Aids for Electromechanical System Development. Newton, White..315–19; disc. 319 1947

Solution of the General Voltage Regulator Problem by Electrical Analogy. Harder...815–25; disc. 825 1947

The Application of Lead Networks and Sinusoidal Analysis to Automatic Control Systems. Schwarts.....69–76; disc. 76 1947

Servomechanisms, An Analysis of Relay. Kahn...1079–87; disc. 1087 1949

Servomechanisms, Application of the California Institute of Technology Electric Analog Computer to Nonlinear Mechanics and. McCann, Wilts, Locanthi.....652–60 1940

Servomechanisms by Electrical Analogy, Dimensionless Analysis of. Herwald, McCann:

Part I.....630–9; disc. 1132 1946

Part II.....111–18 1947

Servomechanisms, Comparison of Steady-State and Transient Performance of. Chestnut, Mayer.....765–77 1949

Servomechanisms, Damper Stabilized Instrument. Hall.....299–306; disc. 306 1949

Servomechanisms, Parallel Circuits in. Marcy.....521–9; disc. 1128 1946

Servomechanisms, The Analysis and an Optimum Synthesis of Linear. Herr, Gerst.....959–70 1947

Servomechanisms, The Effect of Coulomb Friction on the Performance of. McCann, Lindvall, Wilts.....540–6 1948

Servomotors, Operating Characteristics of Two-Phase. Koopman.....319–27; disc. 327 1949

Sets for Testing Aircraft Models, Electronic Control of Frequency Converter. Heumann, Strong..931–9 1946

720-Cycle Carrier to Power Distribution Circuit, Application of. Woodworth.....903–15; disc. 1003 1943

Severity of Steep Front Waves and Chopped Waves on Transformers, A Study of the Relative. Vogel.....64–6; disc. 66 1947

Shaded-Pole Motor, The Field Fluxes of the. Kimberly.....273–7 1949

Shaded Pole Motors, Performance Calculations on. Trickey.....1431–8; disc. 1438 1947

Shading Coil Calculations for Single-Phase Magnets. Evans.....134–7; disc. 137 1947

Shaft Torques in Turbine Generators Produced by Transmission-Line Reclosing, Transient. Batchelor, Whitehead, Williams.....159–64; disc. 164 1948

Shape of 30- and 60-Phase Rectifier Groups, Wave. Marti, Taylor....218–24; disc. 224 1940

Sheath Currents and Their Effect on Lead-Cable-Sheath Corrosion, Study of A-C. Sherer, Grandbois.....264–8; disc. 483 1945

Sheath Life, Cyclic Movement of Cable—Its Causes and Effects on Cable-. Schifreen.....1121–30; disc. 1388 1944

Sheathed Compression Cable—Pipe Line Type, A 138,000-Volt Polyethylene. McCormack, Hatcher, Wyatt, DelMar, Merrell, Palmer, DeTurk.....447–65; disc. 465 1948

Sheathing, A New Technique for Lead Cable. Reinits, Wiseman.....165–71; disc. 171 1940

Sheathing, F-3 Lead Alloy—An Improved Cable. Hickernell, Snyder.....563–9; disc. 1136 1946

Shielding Characteristics of Radio-Frequency Cables. Fluharty..929–30 1945

Shielding for A-C Power Cable, Semiconducting. Merrell.....605–09; disc. 1145 1946

Shielding of Permanent Magnets From Transient Magnetic Fields, The. Wey.....875–7; disc. 1338 1941

Shielding of Substations. Wagner, McCann, Lear...96–100; disc. 448 1942

Shielding of Transmission Lines. Wagner, McCann, MacLane.....313–28; disc. 612 1941

Shielding, The Influence of Towers and Conductor Sag on Transmission-Line. Sorensen, McMaster.....159–65; disc. 448 1942

Shift Telegraphy—Radio and Wire Applications, Frequency. Davey, Matte.....479–93; disc. 493 1947

Ship Drives—Propulsion Control Problems, Diesel-Electric Synchronous Motor. Frisch.....660–6 1946

Ship-Propeller Milling Machine, Application of Electric Equipment for. Morton, Rutemiller.....205–08; disc. 453 1945

Shipboard A-C Power-Distribution Systems, Fault Protection on. Rickover, Ross....1109–20; disc. 1429 1944

Shipboard Applications, Magnetic Amplifiers for Naval. Buechler.....1241–5; disc. 1245 1948

Shipboard Degaussing Installations for Protection Against Magnetic Mines. Michel.....1270–5; disc. 1275 1948

Shipboard Magnetic Compasses by Use of Compass-Compensating Coils, Compensation of Effects of Degaussing Coils on. Robinson.....1278–81 1948

Shipboard Use, Overload Protection of Silicone-Insulated Motors for. Grigg, Watkins.....1341–4; disc. 1344 1948

Shipboard, Ventilation of Rotating Electrical Equipment on. Harrison.....1263–9; disc. 1269 1948

Ship's A-C Electric Distribution Systems, Selective Tripping Arrangements for Protection of. Cole.....1256–62; disc. 1262 1948

Ships, Modern Cargo-Winch Control for Use on Victory. Holt.....623–8; disc. 1411 1944

Shipshaw Relay Protection. Madill, Duffy.....50–5; disc. 55 1949

Shipyard Power Cables, Effective Resistance and Inductance of 3-Conductor. Summers.....1345–50 1948

Shock, Electric. Dalziel, Lagen, Thurston.....1073–8; disc. 1295 1941

Shoran Precision Radar. Seeley.....232–40 1946

Shore Power, Use of Propulsion Generators on Naval Vessels to Supply. Anderson, Fifer.....1282–7; disc. 1287 1948

Short-Circuit Calculating Procedure for Low-Voltage A-C Systems. Darling.....1121–36; disc. 1294 1941

Short-Circuit Characteristics of D-C Generators, The. Frost.....394–402; disc. 484 1946

Short-Circuit Conditions, Heating of Transformers Under. Montsinger, Halsey.....947–52; disc. 952 1949

Short Circuit, Current and Torque of D-C Machines on. Linville.....956–65; disc. 1144 1946

Short-Circuit Currents and Recovery Voltages on Rural Distribution Systems. Eason, Johnson, Kalb, Peterson.....930–7; disc. 937 1949

Short-Circuit Currents in Low-Voltage Circuits, Fault Voltage Drop and Impedance at. Schurig.....479–87; disc. 654 1941

Short-Circuit Currents, System. Hanna, Travers, Wagner, Woodrow, Skeats....877–81; disc. 1351 1941

Short-Circuit Forces Between Channels Located Back to Back, Formulas for Calculating. Higgins.....710–12 1944

Short-Circuit Forces Between Conductors of Structural Shape, Formulas for Calculating. Higgins..659–63 1943

Short Circuit of D-C Motors and Generators, Solid. Linville, Ward.....119–23; disc. 123 1949

Short-Circuit Oscillograms, Analysis of. Kuyper.....151–3; disc. 752 1941

Short-Circuit Protection, D-C Machine Flashover and Bus. Montgomery, Sellers.....1168–73; disc. 1370 1941

Short-Circuit Requirements for Transformers. Garin.....710–13 1947

Short-Circuit Stresses for Bus Supports for Rectangular Tubular Conductors, Formulas for Calculating. Higgins.....578–80 1942

Short-Circuit Tests on Aircraft Cable, A-C and D-C. Cunningham, Davidson.....961–9; disc. 1359 1944

Short-Circuit Tests on Grand Coulee 230-Kv Bus, 4,370,000-Kva. Clagett, Leeds.....729–35; disc. 1119 1946

Short-Circuit Torques in Turbine Generators by Test, Determination of. Whitney, Criner..885–9; disc. 1195 1940

Short Circuits and Synchronising, Transient Electrical Torques of Turbine Generators During. Kirschbaum.....65–70; disc. 492 1945

Short Circuits for Distribution Systems, Analysis of. Dalziel.....757–64; disc. 1048 1942

Short Circuits in Synchronous-Machine Armatures. Galbraith.....1024–9 1941

Short-Cut Method of Estimating Telephone-Influence Factor of Power Systems With Rectifier Load, A. Frick.....91–6 1944

Short Cylindrical-Conductors, Resistance and Capacitance Relations Between. ReQua...724–30; disc. 962 1945

Short-Time Analog Computers, Comparison of Long-Time and. Paschkis.....70–3 1949

Short-Time and Intermittent Ratings and Applications, Classification and Co-ordination of. Hellmund.....792–8; disc. 1323 1941

Short-Time Current Ratings for Aircraft Wire and Cable. Jones, Scott.....644–8; disc. 1135 1946

Short Time Lags, Measurement of Very. Bryant, Newman.....812–16; disc. 1094 1940

Short-Time Ratings and Their Application to Intermittent Duty Cycles, A Study of. Hellmund, McAuley.....1050–5; disc. 1221 1940

Short-Time Ratings of Diesel-Electric Locomotives. Campbell, Woods.....1661–3 1948

Short-Wave Diathermy Apparatus and Frequency-Control Possibilities. Gieringer.....459–64 1941

Shovels and Draglines, Electric Equipment for Power. Schwedes, Stoetzel.....1498–1506; disc. 1507 1948

Shovels and Draglines, Evolution of Ward-Leonard Control for. Stevens.....1491–7 1948

Shunt Capacitor Banks, Connection Arrangements and Protective Practices for. Clark, Farnham.....1226–30; disc. 1231 1949

Shunt-Capacitor Equipments Switched in Large Banks, Analysis of Factors Which Influence the Application, Operation, and Design of. Butler.....795–800; disc. 1096 1940

Shunt Capacitor Installation for Single-Phase Railway Service. Brown, Witzke.....258–65; disc. 265 1948

Shunt Capacitors. (Committee Report).....222–30; disc. 372 1943

Shunt Capacitors by Means of Automatic Switching, Extending the Use of. Cuttino....674–8; disc. 1439 1944

Shunt Capacitors, Report of a Survey on the Performance of. (Committee Report).....1200–06; disc. 1206 1949

Shunt Capacitors, Report on the Operation and Maintenance of. (Committee Report).....1208–18 1949

Shunt Motor and Load, Industrial Control: Dynamic Braking of a D-C. Leland, Rader.....472–6 1943

Shunt-Motor Starting Resistors, Industrial Control: Heating of. Leland, Rader.....695–9; disc. 961 1945

Shunt Tube Control of Thyratron Rectifiers, The. Potter.....421–4 1947

Shunted-Armature Connection for a D-C Shunt Motor, Industrial Control-. Leland, Rader.....617–19; disc. 1410 9144

Shunted Type, An Improved Type of D-C Wattmeter of the. MacGahan.....4–7; disc. 633 1941

Shutdown, Restoration of Service From Large Metropolitan System After Complete. Dryar, Bailey.....571–4; disc. 1154 1940

Shutdown Versus Hot-Spot Temperatures in Polyphase Induction Motors. Potter, Frohardt.....56–8; disc. 483 1946

Shutdowns, The Design and Operation of a Metropolitan Electrical System From the Viewpoint of Possible Major. Dean...575–9; disc. 1150 1940

Shutter for Photographic Purposes, An Electro-Optical. Zarem, Marshall, Poole.....84–91 1949

Side-Band Carrier System for Power Lines, A New Single-. Lenehan.....826–30; disc. 830 1947

Siegfried 220-Kv Line of Pennsylvania Power and Light Company, Lightning Investigation on Wallenpaupack-. Bell, Packer.....196–201 1942

Signal Analyzer, A Telegraph. Erickson.....380–4; disc. 384 1948

Signal and Noise Levels in Magnetic Tape Recording. Wooldridge.....343–52; disc. 495 1946

Signal Generator, A Broad-Band. Hahn, Ebert, Lynch.....316–20 1948

Signal Synchronous Supervisory Control System, A New 2-. Derr.....857–63; disc. 863 1949

Signal System, Interlocking Plants, and Automatic Train Control on the San Francisco-Oakland Bay Bridge Railway. Davis.....158–64 1940

Signal Systems, Aircraft. Rugge.....3–5; disc. 455 1944

Signaling of the Canadian National Railways Terminal, Montreal, Canada, Electrification and. Gage.....41–4; disc. 417 1945

Signaling System for Mobile Telephone Use, Vibrating Reed Selective. Pruden, Hoth.....387–91 1949

Signals, An Electronic Regenerative Repeater for Teletypewriter. Hearn.....904–11 1947

Signals, Devices for Controlling Amplitude Characteristics of Telephonic. Norwine.....62–7 1939

Signals, Electronic Regeneration of Teleprinter. Wilder.....34–40 1946

Silicon Compounds for Insulating Electric Machines, Organo-. Kauppi, Moses.....90–3; disc. 457 1945

Silicone, Hystero-Viscosity in. Malti, Chatterjee.....369–73 1948

Silicone-Insulated Motors for Shipboard Use, Overload Protection of. Grigg, Watkins..1341–4; disc. 1344 1948

Silicone Insulation as Applied to Naval Electric Power Equipment. Walker.....977–80; disc. 980 1947

Silicone Insulation in Submarines—Toxicity. Walker, Shea...1232–5 1948

Silicone Insulation on High-Temperature Railway Motor, Investigation of. Grant, Kauppi, Moses.....305–10; disc. 310 1947

Silicone-Resin-Treated Magnet Coils. Moses, Torok.....412–16; disc. 1184 1946

Silicone Resins to Insulation for Electric Machinery, The Application of. DeKiep, Hill, Moses.....94–8; disc. 460 1945

Silicone Vapor on Brush Wear, Effects of. Marsden, Savage.....1186–90 1948

Silicone Varnish, Motor Tests Evaluate Thermal Endurance of Class-H Insulation and. Grant, Kauppi, Moses, Gibson.....1133–8 1949

Similitude of Critical Conditions in Ferroresonant Circuits. Thomson.....127–30; disc. 130 1939

Simple and Inexpensive Method for Accurately Measuring Steady-State and Transient High Voltages, A. Levinton.....1304–10; disc. 1310 1947

Simplicity of Air-Blast Circuit Breakers, Mechanical. Haberl, Jensen.....869–74; disc. 1355 1941

Simplicity of Protective Relaying. Hunt.....995–1000; disc. 1121 1946

Simplified Calculation of Fault Currents. (Committee Report):
Part I.....1133–35 1942
Part II.....1433–35 1948

Simplified Double-Film Klydonograph With an Improved Coupling Method, A. Waghorne.....1114–16; disc. 1116 1947

Simplified Graphical Method of Computing Thermal Transients. Narbutovskih.....78–81; disc. 82 1947

Simplified Precision Resistance-Welder Control. Roby.....528–32; disc. 532 1939

Simplified Selenium Rectifier Cell, Electrical Characteristics of the Junction in a. Angello....175–80 1947

Simulated-High-Altitude Testing of Aircraft Ignition Cables and Connectors. Race, Ross.....20–6 1945

Single- and Multiple-Conductor Impregnated-Paper Lead-Encased Cable, Solid Type, Pulling Loads on. Bellis.....138–48; disc. 403 1943

Single D-C Series Motor, Dynamic Braking of a. Leitch.....149–54 1947

Single-Phase A-C Electric Locomotives on the Pennsylvania Railroad—Protection and Tonnage Rating. Griffith.....224–8 1942

Single-Phase A-C Watt-Hour Meters at No Load, The Anomalous Behavior of the Moving Systems of. Holtz..116–21; disc. 121 1940

Single-Phase Electrified Railroad, Circuit Breaker Modernization and Faster Fault Clearing. Brown, Travers, Wood..705–13; disc. 713 1948

Single-Phase Induction Motor, Dynamic Characteristics of a. Kurtz.....801–06; disc. 1096 1940

Single-Phase Induction-Motor Performance Calculation. Himebrook.....55–8; disc. 666 1941

Single-Phase Induction Motor, Symmetrical Components as Applied to the. Suhr....651–6; disc. 958 1945

Single-Phase Induction Motors, Design of Auxiliary Circuits of. Thacker, Gopalakrishna.....1373–9 1949

Single-Phase Induction Motors, Starting Windings for. Veinott.....288–94; disc. 499 1944

Single-Phase Induction Motors, The Asymmetrical Stator as a Means of Starting. Baum.245–50; disc. 496 1944

Single-Phase Loads, A Unit for Balancing the Voltages of Three-Phase Aircraft Inverters Supplying Large. Wimpie.....532–3; disc. 1358 1944

Single-Phase Magnets, Shading Coil Calculations for. Evans.....134–7; disc. 137 1947

Single-Phase Motor, A Generalized Circle Diagram for a Four-Terminal Network and Its Application to the Capacitor. Tarboux.....881–9; disc. 943 1945

Single-Phase Motor Performance, The Apparent-Impedance Method of Calculating. Morrill.....1037–41 1941

Single-Phase Motor Theory—a Correlation of the Cross-Field and Revolving-Field Concepts. Button..507–12; disc. 664 1941

Single-Phase Motors, The Inherent Overheating Protection of. Potter.....993–6; disc. 1400 1941

Single-Phase Operation of Polyphase Induction Motors, The Use of Auxiliary Impedances in the. Ager.....494–9; disc. 660 1941

Single-Phase Operation of Synchronous Machines, Asynchronous and. Rankin.....1092–1102 1946

Single-Phase Operation, Overvoltages in Polyphase Induction Motors During. Macmillan, Carter.....819–23; disc. 1328 1941

Single-Phase Railway Service, Shunt Capacitor Installation for. Brown, Witzke.....258–65; disc. 265 1948

Single-Phase Resistance Welders, Power Supply for. Wright.....705–07; disc. 707 1939

Single-Phase Switching, Abnormal Voltage Conditions in Three-Phase Systems Produced by. Clarke, Peterson, Light.....329–39; disc. 618 1941

Single-Phase Synchronous Machine. Terry, Robertson.....186–93 1948

Single-Phase Synchronous Machine, Performance of the. Robertson, Rogers.....194–6 1948

Single-Phase-to-Ground Fault-Detecting Relay, A New. Sonnemann.....677–80; disc. 995 1942

Single-Pole Reclosing, High-Speed. Trainor, Hobson, Muller.....81–7; disc. 422 1942

Single-Pole Relaying and Reclosing on a Large 132-Kv System, Experience With. Trainor, Parks.....405–11; disc. 411 1947

Single-Pole Service Restorer, A New. Tugby.....889–92; disc. 1070 1942

Single-Pole Tripping and Reclosing, Relays and Breakers for High-Speed. Goldsborough, Hill.....77–81; disc. 429 1942

Single-Side-Band Carrier System for Power Lines, A New. Lenehan.....826–30; disc. 830 1947

Single-Side-Band Systems for Power-Line Carrier Transmission, A Comparison of the Amplitude-Modulation, Frequency-Modulation and. Cheek.....215–20; disc. 450 1945

Single Tie Lines Between Systems, Reclosing of. Parker, Travers.....119–22; disc. 470 1944

Sinusoidal Analysis to Automatic Control Systems, The Application of Lead Networks and. Schwartz.....69–76; disc. 76 1947

Sinusoidal 3-Phase Circuits, The Vector Power Factor of Unbalanced. Lamb, Brandt.....507–09 1949

Six-Component Wind-Tunnel Model Suspension System, Electric Equipment Required in a. Cox.....1258–66 1947

Six-Trace Cathode-Ray Oscillograph, The Naval Ordnance Laboratory. Edwards.....1220–23 1948

Six Years' Experience With Factory-Built Unit-Type Substations. Miller, Miller...751–6; disc. 1150 1946

Sixty-Cycle Arcs in Air, Long. Strom.....113–18; disc. 504 1946

Sixty-Cycle Characteristics of Driven Grounds, Impulse and:
Part I. Bellaschi...123–8; disc. 717 1941
Part II. Bellaschi, Armington, Snowden.....349–63; disc. 446 1942
Part III. Bellaschi and Armington.....123–8; disc. 717 1943

60-Cycle Hysteresis Loop Tracer for Small Samples of Low-Permeability Material, A. Wiegand, Hansen.....119–31; disc. 131 1947

Sixty-Cycle Power Tests on Wood-Pole Line Insulation, Lightning and. Bellaschi.....838–47; disc. 847 1947

60-Cycle Strength of Electrical Apparatus, Effect of Altitude on Impulse and. Bellaschi, Evans.....236–41; disc. 442 1944

66-Kv Subtransmission Plan for a Metropolitan Area, A. Smith, Michelson.....908–12; disc. 912 1949

Size According to Cost of Resistance Loss, Formulas for Conductor. Dwight.....22–5; disc. 497 1946

Size Reduction and Rating Extension of Magnetic Air Circuit Breakers up to 500,000 Kva, 15 Kv. Dickinson, Frink.....220–3; disc. 510 1946

Skin Effect in Bimetallic Conductors. Teare, Webb.....297–302 1943

Skin Effect of Concentric Tubular Conductors, Reactance and. Dwight.....513–18; disc. 976 1942

Sleet Problems on Electrified Railroads. Brown.....589–93; disc. 978 1942

Slip Cycle Out-of-Step Relay Equipment, One. Morris.....1246–8 1949

Slip, Induction-Motor Characteristics at High. Morgan, Brown, Schumer.....464–8; disc. 1208 1940

Slip-Ring Motors by Means of Unbalanced Primary Voltages, Control of. Schmitz.....1103–1112; disc. 1112 1947

Slot and Dead-Coil Windings, Fractional. Malti, Herzog.....782–94; disc. 1079 1940

Slot Constants, Calculation of. Puchstein.....1315–22; disc. 1322 1947

Slot Lap and Wave Windings, Doubly Chorded or Doubly Shifted Fractional-. Liwschitz.....684–6 1948

Slot Wave Windings, Balanced Fractional-. Liwschitz.....676–8 1948

Slot Winding, Differential Leakage of a Fractional-. Liwschitz....314–20 1946

Slot Winding, Differential Leakage of the Different Patterns of a Fractional. Liwschits.....1129–31; disc. 1131 1949
Small and Light, Aircraft Transformers—. Kiltie.....899–902; disc. 991 1942
Snap-Acting Switches, The Characteristics and Application of Precision. Riche.....1549–54; disc. 1554 1948
Sodium Highway Lighting Circuits, Inductive Co-ordination With Series. Kent, Blye.....325–32; disc. 332 1939
Soil on Consumers Power Company 140-Kv System, Study of Driven Rods and Counterpoise Wires in High-Resistance. Hemstreet, Lewis, Foust...628–34; disc. 1000 1942
Soil, The Thermal Movement of Moisture in. Mickley..330–3; disc. 333 1949
Soil Waters, Galvanic Corrosiveness of. Phelps, Kahn.....156–9; disc. 482 1945
Soldered Porcelain Potheads, A New Technique in the Manufacture of. Papp, Nicholas.....1258–60; disc. 1261 1949
Solderless Terminals. Wells, Balsbaugh.....933–8; disc. 1484 1944
Solenoid Mechanism for Magne-Blast Breaker, New. Wyman, Keagy.....268–74; disc. 448 1945
Solenoid-Operated Control Valves. Eckel, Wisegarver.....911–14 1944
Solenoid-Operated Hydraulic Valves for Aircraft Applications. Goepfrich.....866–8 1944
Solenoids, A Method for Correlating Duty-Cycle Tests on. Ryan.....579–81; disc. 945 1943
Solenoids, Formulas and Tables for the Calculation of the Magnetic Field Components of Circular Filaments and. Grover.....665–75 1949
Solid Insulation by Lightning Arresters, The Protection of. MacCarthy, Carpenter.....912–15; disc. 1349 1941
Solid Insulators in Compressed Nitrogen, High-Voltage D-C Flashover of. Trump, Andrias.....986–90; disc. 1393 1941
Solid-Rotor Turbine Generators, Pole-Face Loss in. Kuyper.....827–34; disc. 925 1943
Solid Short Circuit of D-C Motors and Generators. Linville, Ward.....119–23; disc. 123 1949
Solid Type, Pulling Loads on Single- and Multiple-Conductor Impregnated-Paper Lead-Encased Cable. Bellis.....138–48; disc. 403 1943
Solution for the Critical Conditions of the Ferroresonant Parallel Circuit, The Generalised. Thomson.....743–6; disc. 746 1939
Solution in High-Voltage Dielectric Liquids, Water. Clark.....433–41; disc. 1192 1940
Solution of Engineering Problems, Courses to Develop Facility in the Use of Mathematics and Physics in the. Teare.....40–1; disc. 43 1939
Solution of the General Voltage Regulator Problem by Electrical Analogy. Harder...815–25; disc. 825 1947
Solution of Transmission-Line Problems in the Case of Attenuating Transmission Line. Glinski.....46–9 1946
Solutions of the Mathieu Equation. Gray, Merwin, Brainerd...429–41 1948
Solving Discrete Nonlinear Problems in Electrical Engineering, Analytical Methods of. Keller.....1194–1200; disc. 1389 1941
Solving Systems of Linear Equations With Real or Complex Coefficients, A Short Method for Evaluating Determinants and. Crout...1235–41 1941
Some Air-Blast Circuit-Breaker Installations in Canada. Haberl, Moore.....859–63; disc. 1073 1942
Some Applications of the Type J Carrier System. Starbird, Mathis.....666–72; disc. 672 1939
Some Aspects of Electric-Motor Design—Polyphase-Induction-Motor Design to Meet Fixed Specifications. Lloyd.....14–20; disc. 498 1944
Some Aspects of Inductance When Iron Is Present. Rader, Litscher.....133–9; disc. 431 1944
Some Aspects of Polyphase Motor Design—The Design and Properties of the Magnetic Circuit. Lloyd, Stone.....812–18; disc. 1151 1946
Some Aspects of the Application of Induction Motors to Aircraft. Braun.....769–72; disc. 1476 1944
Some Economic Aspects of Radio-Frequency Heating. Duryee..105–12 1948
Some Fundamentals of D-C Controlled Reactors with Resistive Load. Storm.....188–94; disc. 194 1949
Some Impulse-Voltage Breakdown Tests on Oil-Treated Paper-Insulated Cables. Foust, Scott.....389–91; disc. 391 1940
Some Phases of Calculation of Leakage Reactance of Induction Motors. Liwschitz, Formhals.....1409–12; disc. 1412 1947
Some Practical Measuring Devices. Hunt.....765–8 1940
Some Problems in the Standardization of Temperature Ratings of Fractional-Horsepower Motors. Veinott.....1055–61; disc. 1218 1940
Some Recent Developments in Impulse-Voltage Testing. Foust, Rohats.....257–62; disc. 262 1940
Sonar, Bearing Deviation Indicator for. Schuck, Stedman, Hathaway, Buts.....1285–95 1947
Sonar, Submarine Detection by. Keller.....1217–30 1947
Sorocabana Railway Electrification, The. Muylaert..804–18; disc. 919 1943
Sorocabana Railway, Modern Motive Power for the. Chapman, Kjolseth.....558–62 1944
Sound Levels of Transformers, A Study of. Fahnoe.....277–83; disc. 748 1941
Soundings by Radio, Upper-Air Weather. Diamond, Hinman, Dunmore, Lapham.....321–8 1940
South, Electrification of the Cotton Industry in the. Bobe.....201–08; disc. 2–8 1947
Southern California Edison Company, Change of Frequency on the System of the. Tice, Kroneberg, Johnson, Enefer, Tugby, Sidway.....809–25; disc. 825 1948
Southern California Edison Co., Ltd., Engineering Features of the 230-Kv Boulder-Chino Transmission Line of the. Kroneberg, Hunter.....982–7; disc. 1176 1940
Space Charge Due to Corona, The. Smith.....1137–44; disc. 1144 1948
Space Code Selector Supervisory System. Forrest, Schirmer.....1312–15; disc. 1315 1949
Space Heating and Air Conditioning, Electrothermal. Krueger.....718–22; disc. 1434 1944
Space Heating, Load-Calculation Procedure for Electric-Panel. Raber, Hutchinson...1085–91; disc. 1432 1944
Spacing of Transmission Line Conductors, Co-ordination of Insulation and. Lewis.....690–4; disc. 1142 1946
Spans, Broken Conductor Effect on Sags in Suspension. Bissiri, Landau.....1181–8 1947
Spans Using Catenary Formulas, Sag and Tension Calculations for Cable and Wire. Nash, Nash.....685–92; disc. 984 1945
Spark Gaps, Enclosed. Berkey.....429–33; disc. 1118 1940
Spark-Over, Volt-Time Areas of Impulse. Hagenguth.....803–10; disc. 1312 1941
Spark-Over Volt-Time Characteristics, Expulsion-Type Lightning Arresters' Impulse. (Committee Report).....520 1948
Special 10-Car Train for the New York City Transit System. Sinclair.....251–4; disc. 254 1947
Species for Poles and Crossarms, The Preservative Treatment of Various. MacLean.....549–54 1946
Specific Engineering Problems in Rural Electrification and Electroagriculture. Samuels.....1065–73; disc. 1182 1946
Specification, Governors and the AIEE-ASME Governor Performance. Schwendner, Astley.....1334–6 1949
Specifications, Some Aspects of Electric-Motor Design—Polyphase-Induction-Motor Design to Meet Fixed. Lloyd.....14–20; disc. 498 1944
Specifications, Types of Radio-Frequency Cables and. Sheldon.....930–2 1945
Spectrograph, The Cathode-Ray. Feldt, Berkley.....105–110 1947
Spectrometer, High Vacuum Leak Testing With the Mass. Worcester, Doughty.....946–55; disc. 1170 1946
Spectroscopy, Electronically Balanced Recorder for Flight Testing and. Williams, Clark, Tarpley.....205–08 1946
Speed A-C Brush-Shifting Motor, Impedance Relationships of the Adjustable-. Baumann.....1460–2 1947
Speed and Tie Line Control, Theoretical Approach to. Brandt.....24–9; disc. 29 1947
Speed, Considerations on Facsimile Transmission. Burkhard.....418–23; disc. 423 1949
Speed Constant-Frequency Generator, A Variable-. Roys, Nader, Spotts.....1414–17; disc. 1417 1947
Speed Control for World's Largest Induction Motor, Precision. Longwell, Reagan....634–8; disc. 1050 1942
Speed Control of Wound Rotor Induction Motors, The Liquid Rheostat for. McFarland, Alvarez.....603–09; disc. 609 1948
Speed-Control System for an Aircraft Cabin-Supercharger Drive. Godsey, Miner, Walley.....37–40 1945
Speed Control, The Polyphase Commutator Regulator for. Conrad, Brooks, Fellers...321–8; disc. 484 1946
Speed Control, Theory and Design of NEMA Resistors for Motor Starting and. Armstrong.....277–81 1940
Speed-Controlled Electric Gun Turrets for Aircraft, The Amplidyne Generator Applied to. Zahorsky.....221–5; disc. 436 1945
Speed Drive, A Study of the Modified Kramer or Asynchronous-Synchronous Cascade Variable. Liwschitz, Kilgore.....255–60 1942
Speed Drive, A Wide-Range Adjustable-. Conrad, Tribken...789–90 1949
Speed Drive for A-C Systems, A New Type of Adjustable-. Conrad, Smith, Ordung:
Part I.....7–10; disc. 385 1943
Part II.....522–5; disc. 932 1943
Speed-Drop Analysis, An Extension of Impact.....191–6 1947
Speed Governing Design Considerations for Multivalve Condensing Steam Turbine-Generators. Barnett.....1557–61; disc. 1561 1948
Speed Governor, A Carbon-Pile. Button.....4–7 1946
Speed Governors for Interconnected Systems, Prime-Mover. Caughey, McClure.....147–51; disc. 728 1941

Speed Governors, Supplementary Control of Prime-Mover. Crary, McClure....209–14; disc. 395 1942
Speed Motors, Limitations in Design of D-C Adjustable. Opel....1095–8 1949
Speed Ranges, Electrical Drives for Wide. Caldwell, Formhals...54–6 1942
Speed Reclosing Breakers to Transmission Systems, Analysis of the Application of High-. Crary, Kennedy, Woodrow..339–48; disc. 423 1942
Speed Reclosing of High-Voltage Transmission Lines, Five Years' Experience With Ultrahigh. Sporn, Muller....241–6; disc. 690 1941
Speed Reclosing of High-Voltage Transmission Lines, Nine Years' Experience With Ultrahigh-. Sporn, Muller....225–8; disc. 445 1945
Speed Regulation, Recent Developments in. Hanna, Oplinger, Mikina....692–700 1940
Speed Regulator, An Electronic Frequency Meter and. Levin....779–86; disc. 1181 1946
Speed Regulators for Sectional Paper Machine Drive, Electronic. Baker, Kovalsky....1636–42 1948
Speed Regulators Under Impact Loads, General Analysis of. McCann, Osbon, Kirschbaum....1243–52 1947
Speed-Responsive Devices on Diesel-Electric Locomotives. Johansson....336–8 1948
Speed-Torque Curves, Dynamic Braking Control of D-C Series Motors—Experimental Study of. Heumann....560–4 1949
Speed Wind-Tunnel Drive, Large Adjustable. Clymer...156–8; disc. 456 1942
"Speedomax" Power-Level Recorder, The. Clark....957–64 1940
Speeds, Rotating Electric Machine Time Constants at Low. Concordia....882–7 1946
Sphere Gap, Polarity Limits of the. McMillan....56–9; disc. 59 1939
Spinning Frames, The Characteristics and Power Requirements of. Untersee:
Part I....1–4 1940
Part II....336–8 1940
Split-Phase Motors, Design of Starting Windings for. Lloyd, Karr..9–13 1944
Spot Weld, Resistance of the. Ciganek....997–1002 1940
Spot-Welding Current, The Measurement of. Hess, Wyant, Muller....349–53; disc. 353 1940
Spot Welding, Measurement and Effect of Contact Resistance in. Wyant....26–33; disc. 513 1946
Spring Mechanism for Medium Voltage Oilless Circuit Breakers, A Manually-Operated. Wyman, Casey....357–61; disc. 361 1949
Square-Law Power-Level Recorder, A. Clark, Turner, Williams....476–82 1949
Square Tubular Conductors, Formulas for the Inductance of Coaxial Busses Comprised of. Messinger, Higgins....328–36; disc. 501 1946
Square Tubular Conductors, Proximity Effect Factors for 3-Phase Coaxial Busses Comprised of. Higgins, Messinger....1538–9 1948
Square-Wave Generator, A Wide-Band. Bartelink....371–6 1941
Squared-Second Recorder, Ampere-. Rich....839–42 1941
Squirrel-Cage Induction Motors, Measurement of Temperature in General-Purpose. Potter....468–72; disc. 472 1939
Squirrel-Cage Induction Motors, Reactances of. Lloyd, Giusti, Chang....1349–55 1947
Squirrel-Cage Induction Motors, Rotar-Bar Currents in. Gault....784–91; disc. 1327 1941
Squirrel-Cage Induction Motors, With Special Reference to Plugging, Transient Torques in. Gilfillan, Kaplan....1200–09; disc. 1363 1941
Squirrel-Cage Motor, Dynamic Braking by Self-Excitation of. Srinivasan, Thomas....145–8 1947
Squirrel-Cage Motors, Dead Points in. Graham....637–42 1940
Squirrel Cage Rotor, The "Copperspun". Anderson....1312–14 1947
Squirrel Cage Rotor With Respect to the Stator Harmonics and the Equivalent Circuit of the Induction Motor, Leakage Reactance of the. Liwschitz....1407–08 1947
Stability Analysis of Series Capacitors in Long Transmission Lines, Steady-State and Transient-. Butler, Paul, Schroeder....58–65; disc. 377 1943
Stability at Low Excitation. Generator. Michelson, Lischer....1–6; disc. 7 1948
Stability by Rapid Closing of Bus-Tie Switches, Improving. Kimbark....61–4; disc. 456 1945
Stability, Capacitors, Condensers, and System. Butler, Schroeder, Ridgway....1130–8; disc. 1378 1944
Stability, FCC Diathermy Design for Low Harmonic Radiation and Good Frequency. Chapin, Roberts, Mobley....41–6; disc. 46 1948
Stability Limit, Dynamic Braking Control of D-C Series Motors—Calculation of. Heumann, Smith....454–7; disc. 1130 1946
Stability Limitations of Long-Distance A-C Power-Transmission Systems. Clarke, Crary..1051–9; disc. 1299 1941
Stability of Electrical Insulating Oils Under Limited Oxidation, Electrical. Balsbaugh, Assaf....311–22; disc. 397 1943
Stability of Synchronous Machines as Affected by Angle-Regulator Characteristics, Steady-State. Concordia....687–90 1948
Stability of Synchronous Machines as Affected by Voltage-Regulator Characteristics, Steady-State. Concordia....215–20; disc. 489 1944
Stability of Tandem Regulators in the L-1 Carrier System. Kinzer....1179–86 1949
Stability of the Welding Arc, Instrumentation for the Evaluation of the. Winsor, Schetky, Wyant...525–33 1949
Stability of Wye-Grounded-Primary Broken-Delta-Secondary Transformer Circuits, Criteria for Neutral. Shott, Peterson....997–1002; disc. 1394 1941
Stability on Kansas-Nebraska 270-Mile 154-Kv Interconnection, Staged Fault Tests of Relaying and. Minard, Gow, Wolfe, Swanson....358–67; disc. 425 1943
Stability, Radio-Frequency-Cable Power Ratings and. Biskeborn....928–9 1945
Stability Regulators for Synchronous Motor Drives, Rotating. Schaelchlin....884–7; disc. 887 1947
Stability Study of A-C Power-Transmission Systems. Holm....893–905; disc. 1046 1942
Stability, System. Gay....168–73; disc. 739 1941
Stability, The Transient-Energy Method of Calculating. Magnusson....747–55; disc. 755 1947
Stabilization of Arc-Welding Transformers, Capacitor. Blankenbuehler, Lester....54–5 1946
Stabilized for Zero and Gain, D-C Amplifier. Williams, Tarpley, Clark....47–57 1948
Stabilized Instrument Servomechanisms, Damper. Hall..299–306; disc. 306 1949
Stabilized Permanent Magnets. Cioffi....1540–3 1948
Stabilizer for Power Transmission, Electronic. Alexanderson, Prince....950–3; disc. 953 1947
Staged Fault Tests of Relaying and Stability on Kansas-Nebraska 270-Mile 154-Kv Interconnection. Minard, Gow, Wolfe, Swanson....358–67; disc. 425 1943
Staged-Fault Tests, Relaying Difficulties Disclosed by. Morgan, Evans....73–82 1948
Stainless Steels, The Magnetic Properties of. Stein....1534–7 1948
Standard, A New Time. Warren....137–41; disc. 141 1940
Standard Band Broadcasting, A New 150-Kilowatt Transmitter for. Boerner....943–51 1948
Standard for the Measurement of Kilowatt-Hours, A Precision Rotating. Goss, Hansen....412–15; disc. 415 1940
Standard of Attentuation for Microwave Measurements. Grantham, Freeman....329–35 1948
Standard, Rating of Potential Devices and Suggested Material for a. Clem, Langguth....676–80 1940
Standard 230-Kv Impulse and Tank-Type Oil Circuit Breakers on Field Tests, Unusual Performance of. Riets....267–70; disc. 270 1948
Standardization, Current- and Potential-Transformer. (Committee Report)....698–706; disc. 998 1942
Standardization, History of A-C Wave Form, Its Determination and. Bedell....864–8; disc. 1071 1942
Standardization in the United States. Osborne....782–3 1948
Standardization of Reactor Ratings. Kierstead, Thomason....955–7; disc. 957 1949
Standardization of Temperature Ratings of Fractional-Horsepower Motors, Some Problems in the. Veinott....1055–61; disc. 1218 1940
Standardized Load-Center Unit Substations for Low-Voltage A-C Systems. Hunter, Page....519–25 1942
Standards, A Discussion of Proposed ASA Transformer. Henry....289 1939
Standards
Analysis of Rating Methods for Intermittent Loads. Hellmund....4–7 1943
Analytical Treatment of Establishing Load-Cycle Ratings of Ignitrons. Marshall, Arnott..545–8; disc. 1051 1942
Application of Apparatus and Conductors Under Various Ambient-Temperature Conditions. Hellmund, McAuley..553–8; disc. 992 1942
Atmospheric Variations and Apparatus Flashover. McAuley....798–803; disc. 1319 1941
Bushing and Associated Insulation Testing by the Power-Factor Method. Baltsly, Schlottere....308–12; disc. 744 1941
Classification and Co-ordination of Short-Time and Intermittent Ratings and Applications. Hellmund....792–8; disc. 1323 1941
Factors Influencing the Mechanical Strength of Cellulose Insulation. Clark....778–83; disc. 1321 1941
Field Power-Factor Testing of Transformer Insulation and Operating Experience. Whitmer....605–11; disc. 741 1941
Field Testing of Generator Insulation. (Committee Report)....1003–11; disc. 1314 1941
Motor Insulation, Heat, and Moisture. McAuley....707–12 1942
Service Factor Rating of Arc-Welding Generators and Transformers. Freeman, Welch.137–41; disc. 726 1941

Statistical Methods as Applied to the Manufacture and Testing of Wire and Cable. Woolfson.....752–4; disc. 754 1948

Temperature Limits and Measurements for Rating of D-C Machines. Compton.....780–5 1943

Variations of Atmospheric Temperature With Altitude in the United States. Tenney..230–2; disc. 727 1941

Standards and Insulation Characteristics of Oil-Insulated Transformers. Vogel.....167–71; disc. 431 1945

Standards, Feeder Voltage Regulator Accuracy. Birchard.....747–51; disc. 751 1948

Standards for Industrial-Control Coils, Insulation Temperature. Erikson.....546–8; disc. 1408 1944

Standards for Outdoor Bushings, Proposed. (Committee Report).....590–1; disc. 1207 1940

Standards, Microwave Frequency Measurements and. Husten, Lyons.....321–8 1948

Standards, Progress in Development of Trolley-Coach Overhead Reflected in Higher Service. Birch...185–91 1942

Standards; Their Effect on Refrigeration and Pump Applications, New NEMA Fractional-Horsepower Motor. Potter.....508–10 1947

Standing-Wave Indicator, An Automatic. Allen.....1299–1302 1948

Starter and Its Relation to Maximum Utilisation of Power and Facilities, The Automatic Welding-Machine. Porter.....728–30; disc. 996 1943

Starter-Generator Control System for a Multijet Airplane. Hart.....1316–18 1948

Starters by Means of Fuses and Circuit Breakers, The Degree of Short-Circuit Protection Afforded Small Low-Voltage A-C and D-C. Jones.....611–12; disc. 1408 1944

Starting of Generator and Motor, Synchronous. Concordia, Crary, Kilbourne, Weygandt.....629–34; disc. 956 1945

Starting Performance of Salient-Pole Synchronous Motors. Liwschitz..913–19; disc. 1215 1940

Starting Requirements of a 660-Horsepower Locomotive Diesel Engine, Investigation of. Davidson, Lamborn.....31–4; disc. 632 1941

Starting Resistors, Industrial Control: Heating of Shunt-Motor. Leland, Rader.....695–9; disc. 961 1945

Starting Torques in Induction Motors, Transient. Wahl, Kilgore.....603–07; disc. 1263 1940

Starting Voltages for Nonuniform Fields in Air, Determination of Corona. Hutton.....1674–9; disc. 1680 1947

Starting Windings for Single-Phase Induction Motors. Veinott.....288–94; disc. 499 1944

Starting Windings for Split-Phase Motors, Design of. Lloyd, Karr.....9–13 1944

Static and Dynamic Pressures, An Electrical Engine Indicator for Measuring. Martin, Grinstead, Frawley.....513–23; disc. 725 1941

Static Electricity in Hospital Operating Rooms, Hazards of. Williams.....1146–7; disc. 1147 1947

Static Electronic Frequency Changers, Network Coupling by Means of Marti.....495–503; disc. 1163 1940

Static Polyphase Networks, Transformation Theory of General. Pipes.....123–8; disc. 128 1940

Static Power Limits of Synchronous Machines. Dalziel.....93–101; disc. 101 1939

Static Radio Interference, Aircraft Precipitation. Starr.....363–70 1941

Static Voltage Regulator for Rototrol Exciter. Harder, Valentine.601–06 1945

Static Voltage Regulator Insensitive to Load Power Factor, A. Summers, Short.....67–70 1942

Station and Line Insulation to Switching Surges, Dielectric Strength of. Bellaschi, Rademacher.....1047–54; disc. 1173 1946

Station "C," Oakland, Pacific Gas and Electric Company, 12-Kv Metal-Enclosed Bus and Switch Structure. Benson, Strang.....751–5; disc. 1080 1940

Station Circuit Breakers, Field Tests on High-Capacity. Braley.....31–6; disc. 408 1942

Station, High-Capacity Circuit-Breaker Testing. MacNeill, Batten.....49–53; disc. 406 1942

Station of Chevilly (France), Especially on Corona Behavior of Bundle Conductors, Results of Tests Carried Out at the 500-Kv Experimental. Cahen.....1118–25; disc. 1125 1948

Station P of the Pacific Gas and Electric Company, Electrical Design Features — Steam-Electric Generating. Benson.1013–20; disc. 1020 1949

Station, Reconstruction of Switching Facilities at Essex Generating. Taylor.....761–70; disc. 778 1939

Station, Relaying of Transmission Lines from the New Sunbury Generating. Green, Oewel, Ramsaur.....873–7; disc. 877 1949

Station Switch House, Boston Edison Company, Modernization of L Street. Corney, Edson.....770–8; disc. 778 1939

Station-Type Circuit Breakers, Field Tests on High-Capacity Air-Blast. Strang, Skeats..100–04; disc. 409 1942

Station-Type Lightning-Arrester Performance Characteristics. (Committee Report).....347–8 1940

Stationary Networks and Transmission Lines Along Uniformly Rotating Reference Frames. Kron...690–6 1949

Stationary Power Generation, Gas Turbines in. Hague.....467–8 1949

Stations, A New Transformer for Base-Load. Sporn, Putman.....916–18; disc. 1358 1941

Stations, Automatic Control of Hydroelectric Generating. Brown, Derr.....343–55; disc. 355 1947

Stations, Automatic Grounding and Air-Break Switches for Protection of Transformer. Ricker.....851–6; disc. 856 1949

Stations, Auxiliary-Power Supply for Generating. McCallum.....693–5; disc. 976 1945

Stations, B-1 Alarm and Control System for Remote Control of Coaxial Cable. Hearn, Weber.....622–6 1949

Stations, Development in Lightning Protection of. Whitehead.....898–900; disc. 1372 1941

Stations, Lightning Currents in Arresters at. Gross, McMorris...417–22; disc. 1110 1940

Stations, Power Systems for Auxiliary Drives in Steam-Electric. McClure, Whittlesey.....844–51; disc. 976 1945

Stations, Ring Busses for Generating and Transmission. Michelson, Galassini.....665–9; disc. 1372 1944

Stations, Television Equipment for Broadcast. Lawrence.....443–52 1947

Stations Without High-Voltage Switching, Protection of. (Committee Report).....226–31; disc. 231 1949

(Statistical Methods) Application of Quality Control to Resistance Welding. Hobson, Inglis, McCants.....573–5; disc. 951 1945

Statistical Methods Applied to Insulator Development and Manufacture. Taylor.....495–9; disc. 952 1945

Statistical Methods as Applied to the Manufacture and Testing of Wire and Cable. Woolfson.....752–4; disc. 754 1948

Statistical Methods in the Development of Apparatus Life Quality. Farrell.....700–03; disc. 998 1945

Statistical Tools for Controlling Quality. Manuele, Goffman.....524–8; disc. 949 1945

Statistics as an Aid to Engineering Judgment in the Manufacture of Lightning-Arrester Blocks. Goffman.....607–10; disc. 966 1945

Stator and Rotor, Equivalent Circuit of the Primitive Rotating Machine With Asymmetrical. Kron.....17–23; disc. 23 1947

Stator as a Means of Starting Single-Phase Induction Motors, The Asymmetrical. Baum.....245–50; disc. 496 1944

Stator Harmonics and the Equivalent Circuit of the Induction Motor, Leakage Reactance of the Squirrel Cage Rotor With Respect to the. Liwschitz.....1407–08 1947

Stator Method, Die Cast Rotor Testing by Test. Trickey.....139–41; disc. 483 1946

Stator Windings, Insulation Resistance and Dielectric-Absorption Characteristics of Large A-C. Askey, Johnson.....347–51; disc. 458 1945

Stator Windings, The Application of Surge Comparison Testing Equipment to Fractional Horsepower A-C. Buchanan.....1356–8 1947

Stators, Temperature-Aging Tests on Class-A-Insulated Fractional-Horsepower Motor. Scott, Thompson.....499–501; disc. 977 1942

Steady-State Analysis of Aircraft D-C Generators. Van Valkenburg, Matthews.....1351–8 1948

Steady-State Analysis, The Torques of the Synchronous Tie—A. Finzi, McConnell.....1147–52 1949

Steady-State and Transient High Voltages, A Simple and Inexpensive Method for Accurately Measuring. Levinton.....1304–10; disc. 1310 1947

Steady-State and Transient Performance of Servomechanisms, Comparison of. Chestnut, Mayer.....765–77 1949

Steady-State and Transient-Stability Analysis of Series Capacitors in Long Transmission Lines. Butler, Paul, Schroeder...58–65; disc. 377 1943

Steady-State Equivalent Circuits of Synchronous and Induction Machines. Kron.....175–81 1948

Steady-State Performance of Potential Devices, Transient and. Harder, Langguth, Woods.....91–9; disc. 99 1940

Steady-State Stability of Synchronous Machines as Affected by Angle-Regulator Characteristics. Concordia.....687–90 1948

Steady-State Stability of Synchronous Machines as Affected by Voltage-Regulator Characteristics. Concordia.....215–20; disc. 489 1944

Steady-State Theory of the Amplidyne Generator. Graybeal.....750–6; disc. 1049 1942

Steam Boilers on Diesel-Electric and Straight Electric Locomotives, Electric Control for. Burgess.....604–06; disc. 980 1942

Steam, Diesel-Electric, and Electric Motive Power on the Great Northern Railway Electrification, Comparative Operating Results of. Gaynor.....231–4; disc. 234 1948

Steam-Electric Generating-Station Auxiliaries, Electric Drives for. Brownlee, Elsi....741–5; disc. 976 1945

Steam-Electric Generating Station P of the Pacific Gas and Electric Company, Electrical Design Features—. Benson.....1013–20; disc. 1020 1949

Steam-Electric Locomotive, Electrical Equipment of the Union Pacific. Hanna, Tritle..756–64; disc. 1082 1940

Steam-Electric Stations, Power Systems for Auxiliary Drives in. McClure, Whittlesey.....844–51; disc. 976 1945

Steam Power Plant on Sudden Load Reduction, The Performance of a Topped. Noest.....1348–56 1949

Steam Power Production in California—Past, Present, and Future, Mingled Hydro and. Markwart.....775–82; disc. 1077 1940

Steam Railroads, Handling Suburban Traffic on. Sloman.....1670–4 1948

Steam System, Probability Methods Applied to Generating Capacity Problems of a Combined Hydro and. Loane, Watchorn.....1645–54; disc. 1654 1947

Steam Turbine-Electric Locomotives, Electric Equipment for Chesapeake and Ohio Railway Company. Atwell, Baston.....145–8 1949

Steam Turbine-Generators, Speed Governing Design Considerations for Multivalve Condensing. Barnett.....1557–61; disc. 1561 1948

Steam Turbine Generators Under System Load Conditions, Determining Incremental Regulation and Dead Band of Governors on. Tornquist, Wade.....1343–7 1949

Steam Turbines and Boilers and of Hydro Units, Outage Rates of. (Committee Report).....450–7 1949

Steel and Wood Transmission Lines, Comparative Performance Records—. Booker..686–9; disc. 689 1949

Steel, Electrolytic Process of Scale Removal From. Neblett.....294–6; disc. 761 1941

Steel, Formation of Insulating Oxide Films on Electrical. Schmidt.....772–4 1948

Steel Industry, Trends in Electrification of American. Umansky....784–95 1948

Steel-Mill Load Swings, Automatic Regulation of Turbine Generators to Relieve Power-Supply Systems of. Eberhardt, Harrison, Kohn, Darling.....751–8 1945

Steel-Mill Service, A 500,000-Kva 7.5-Kv Air Circuit Breaker for. Dickinson.....242–5; disc. 450 1944

Steel Mill, Supervisory Control for the World's Most Modern. Garrett, Reagan.....259–64 1944

Steel Pipe, A-C Resistance of Segmental Cables in. Meyerhoff, Eager.....816–29; disc. 829 1949

Steel Pipe or Conduit, A-C Resistance of Large Size Conductors in. Wiseman.....1745–52; disc. 1752 1948

Steel Pipe or Conduit, Reactance of Large Cables in. Del Mar.....1409–12; disc. 1412 1948

Steel Plant, Electric Power in a. Graham.....816–18; disc. 994 1945

Steel Water Tanks Using Aluminum Anodes, Cathodic Protection of. Sudrabin, Mears.....197–200 1947

Steel, X-Ray Thickness Gauge for Cold-Rolled Strip. Lundahl.83–90 1948

Steels, The Magnetic Properties of Stainless. Stein.....1534–7 1948

Steep Front Waves and Chopped Waves on Transformers, A Study of the Relative Severity of. Vogel.....64–6; disc. 66 1947

Storage Batteries in the Transportation Field, Lead. Whitehurst.....303–07; disc. 683 1941

Storage Batteries to the Control of Switchgear, The Application of. Hoxie.....1561–9; disc. 1569 1947

Storage-Battery Design, Aircraft. Rupp.....773–7; disc. 1381 1944

Stored Energy, Factors Contributing to Improving Electric Service by Means of High-Speed Switching and Utilization of. Logan, Miles.....1012–16; disc. 1408 1941

Stray Electric Currents in Coal Mines, Causes and Effects of. Harrison.....1759–61 1948

Stray Load Loss in Induction Machines, Reverse-Rotation Test for the Determination of. Morgan, Brown, Schumer.....319–22; disc. 322 1939

Stray-Load Loss in Induction Motors, Measurement of. Ware.....194–7; disc. 433 1945

Stray Load Losses Measured in D-C Motors. (Committee Report).....219–23; disc. 223 1949

Street Cars Provide Successful City Transportation, Trolley Coaches and PCC. Clardy.....925–9 1947

Strength and Life of Impregnated-Paper Insulation, The Dielectric. Whitehead:

Part I .....715–20; disc. 1085 1940
Part II .....660–3; disc. 1233 1940
Part III.....618–22; disc. 1039 1942
Part IV. Whitehead & Kopper.....171–7; disc. 477, 942 1945

Strength as a Measure of Cable Quality, Impulse. Komives.....929–34; disc. 1339 1941

Strength Near a Cylindrical Coil, Formulas for the Magnetic-Field. Dwight .....327–33; disc. 445 1942

Strength of Air and of Freon in a Uniform Field at High Pressures, D-C Breakdown. Trump, Safford, Cloud.....132–5; disc. 676 1941

Strength of Air at High Pressure, The:
Part I. Skilling....161–5; disc. 165 1939
Part II. Skilling and Brenner.....112–15; disc. 677 1941

Strength of Cable Insulation, Impulse. Davis, Eddy.....394–9; disc. 399 1940

Strength of Cellulose Insulation, Factors Influencing the Mechanical. Clark.....778–83; disc. 1321 1941

Strength of Electric-Cable Insulating Papers, The True Dielectric Breakdown. Cloke, Bates.....1191–5; disc. 1195 1948

Strength of Insulated-Power-Cable Circuits, Impulse. Halperin, Shanklin.....1190–7; disc. 1386 1944

Strength of Insulating Liquids in a Continuously Circulating System, Dielectric. Race.....730–7 1940

Strength of Nitrogen and Freon Under Pressure, The Electrical. Skilling, Brenner.....191–5; disc. 441 1942

Strength of Oil with Variations of Pressure and Temperature, Dielectric. Hoover, Hixson..1047–50 1949

Strength of Porcelain, Dielectric. Bellaschi, Manning..651–6; disc. 656 1939

Strength of Round Coils of Small Cross Section, The Computation of Magnetic Field. Dwight, Peters..684–5 1944

Strength of Station and Line Insulation to Switching Surges, Dielectric. Bellaschi, Rademacher.....1047–54; disc. 1173 1946

Strength of Water in Relation to Use in Circuit Interrupters, Dielectric. Slepian, Denault, Strom.....389–95; disc. 631 1941

Strength, Rationalization of Transmission System Insulation. Part III. Sporn, Gross....591–5; disc. 1201 1940 (Part I—1928; Part II—1930)

Stress in Impregnated-Paper Insulation, Temperature and Electric. Whitehead, MacWilliams.....10–13; disc. 458 1942

Stress Measurement by Electrical Means. Kern, Williams...100–07 1946

Stresses for Bus Supports for Rectangular Tubular Conductors, Formulas for Calculating Short-Circuit. Higgins.....578–80 1942

Stresses in Distribution Transformers Due to Lightning Currents in Low-Voltage Circuits, Voltage. Beardsley, McMorris, Stewart.....1632–5; disc. 1635 1948

Stresses in Impregnated-Paper Insulation, Oil. Whitehead.....555–7; disc. 955 1945

Strip, Induction Heating of Moving Magnetic. Baker.....184–9 1945

Strip Steel, X-Ray Thickness Gauge for Cold-Rolled. Lundahl.....83–90 1948

Stroke Damage to Aircraft, Lightning. Hagenguth....1036–44; disc. 1044 1949

Strokes in Field and Laboratory, Lightning. Part III. Bellaschi.....1248–56; disc. 1392 1941 (Part I—1935; Part II—1937)

Strokes, The Measurement of Lightning Currents in Direct. McCann.....1157–64; disc. 1370 1944

Strokes, Transmission Line Design and Performance Based on Direct Lightning. Harder, Clayton.....439–46; disc. 447 1949

Stromberg-Carlson XY Dial Telephone System, The. Reed.....432–8 1947

Structural Rubber, Vibration Insulation and. Connon.....324–9 1945

Structural Shape, Formulas for Calculating Short-Circuit Forces Between Conductors of. Higgins.....659–63 1943

Structural Shape, Formulas for the Calculation of the Inductance of Linear Conductors of. Higgins.....53–8 1943

Structure at Golden Gate Exposition, Color, Light, and. (A 16-page insert) facing page.....746 1940

Stub Feeders, Interim Report on Application and Operation of Automatic Reclosing Equipment on. (Committee Report).....536–40; disc. 934 1943

Studies, Equivalent Circuits for Power-Flow. Ward....373–80; disc. 380 1949

Studies in Compressed Gases, Breakdown. Howell.193–204; disc. 204 1939

Study of A-C Arc Behavior Near Current Zero by Means of Mathematical Models, A. Brown.....141–50; disc. 150 1948

Study of A-C Sheath Currents and Their Effect on Lead-Cable-Sheath Corrosion. Sherer, Granbois.....264–8; disc. 483 1945

Study of Artificial Respiration on Anesthetized Men. Kouwenhoven, Hooker, York.....1–2; disc. 446 1944

Study of Driven Rods and Counterpoise Wires in High-Resistance Soil on Consumers Power Company 140-Kv System. Hemstreet, Lewis, Foust.....628–34; disc. 1000 1942

Study of Lightning, Photographic. Hagenguth.....577–83; disc. 583 1947

Study of Short-Time Ratings and Their Application to Intermittent Duty Cycles, A. Hellmund, McAuley..1050–5; disc. 1221 1940

Study of 69- to 345-Kv Overhead Power-Transmission Systems, Costs. Holm.....406–22 1944

Study of Sound Levels of Transformers, A. Fahnoe.....277–83; disc. 748 1941

Study of the Modified Kramer or Asynchronous-Synchronous Cascade Variable-Speed Drive, A. Liwschits, Kilgore.....255–60 1942

Study of the Performance of the 3,600-Horsepower New Haven Electric Locomotives. Konn, Craton.....212–16; disc. 217 1939

Study of the Relative Severity of Steep Front Waves and Chopped Waves on Transformers, A. Vogel.....64–6; disc. 66 1947

Study of the 3-Phase Commutator Armature With Six Adjustable Brushes. Franklin.....197–204 1948

Study of Voltage Transients in Arc-Furnace Circuits, A. Hodtum, Rice.....556–62; disc. 921 1943

Study of Wave Shapes for Radio-Noise-Meter Calibrations, A. Frick.....890–901; disc. 969 1945

Subcenter Switching Systems for Teleprinter Tie Lines. Currie...635–41 1943

Subharmonic Currents, An Experimental Investigation of. McCrumm.....533–40; disc. 722 1941

Subharmonic Currents in a Nonlinear Series Circuit, The Effect of Initial Conditions on. Angello....625–7 1942

Subharmonics in Circuits Containing Iron-Cored Inductors. Part II. Travis.....735–42 1939
(Part I—1938)

Submarine-Cable Depthometer, The. Nelson.....691–5 1939

Submarine Cable, Picture Transmission by. Milnor.....105–08; disc. 756 1941

Submarine Cable Plow, The. Lawton.....675–85; disc. 685 1939

Submarine Detection by Sonar. Keller.....1217–30 1947

Submarines—Toxicity, Silicone Insulation in. Walker, Shea.....1232–5 1948

Submersible Network Protector of Higher Rating, A New. Grissinger, Johnson.....41–6 1946

(Substation) Channels for Operation of Supervisory Control Equipment. Derr, Brown.....1654–60 1948

Substation, Design and Layout of 66-Kv 10,000-Kva Series Capacitor. Miller.....355–9 1948

(Substation) Service Restoration With Automatic Air-Break Switches. Reardon.....64–71; disc. 71 1948

Substation-Transformer Emergency Overloading Practice. Clark.....126–32; disc. 453 1943

(Substations) A New 2-Signal Synchronous Supervisory Control System. Derr..857–63; disc. 863 1949

Substations and Wartime Necessities, Distribution. Poage, Reid.....117–22; disc. 432 1942

(Substations) Automatic Grounding and Air-Break Switches for Protection of Transformer Stations. Ricker..851–6; disc. 856 1949

Substations, Field Investigation of Lightning Surges at. Gross, McCann.....569–74; disc. 574 1947

Substations for Low-Voltage A-C Systems, Standardized Load-Center Unit. Hunter, Page.....519–25 1942

Substations in Wartime, Power Supply to Distribution. St. Clair.....112–17; disc. 432 1942

Substations, Shielding of. Wagner, McCann, Lear...96–100; disc. 448 1942

Substations, Six Years' Experience With Factory-Built Unit-Type. Miller, Miller.....751–6; disc. 1150 1946

(Substations) Space Code Selector Supervisory System. Forrest, Schirmer.....1312–15; disc. 1315 1949

Subtransient Impedances of Synchronous Machines, Measurement of the. Tracy, Tice.....70–6; disc. 429 1945

Subtransmission Lines Made Economical, Distance Relay Protection for. Audlin, Warrington.....574–8; disc. 976 1943

Subtransmission Plane for a Metropolitan Area, A 66-Kv. Smith, Michelson.....908–12; disc. 912 1949

Suburban Traffic on Steam Railroads, Handling. Sloman.....1670–4 1948

Subway Cars, Motor Control for Latest New York Transit System. Riley.....900–03 1947

Subway, Electric Facilities and Operating Plan for the First Chicago. DeLeuw.....780–7; disc. 980 1942

Subway Motors for Dynamic Braking, The Design of New York. Widell.....808–10 1947

(Subway) Special 10-Car Train for the New York City Transit System. Sinclair.....251–4; disc. 253 1947

Subway, Supervisory Control for New Chicago. Derr, Buck, Stoos.....10–16; disc. 457 1945

Subway System, Modern Car Equipment for New York City's. Cordts.....247–9; disc. 250 1947

Subway Systems, Economical Loading of High-Voltage Cables Installed in Underground. Thomas.....611–15; disc. 615 1939

Suddenly Applied Loads Carried by a Variable-Ratio Synchronous-Induction Frequency Changer. Darling, Kaufman.....91–4 1948

Suddenly Applied Loads on a Variable-Ratio Frequency Changer. Carter, Maginniss, Rothe.....1489–95 1947

Suddenly Applied Loads on A-C Generators, A Semiempirical Approach to Voltage Dip—with. Rosenberg.....160–6; disc. 166 1949

Summary of Transformations Useful in Constructing Analogs of Linear Vibration Problems. Corbett.....661–4 1949

Summation of Load Curves, The. Hamilton.....729–35; disc. 1361 1944

Sunbury Generating Station, Relaying of Transmission Lines from the New. Green, Oewel, Ramsaur.....873–7; disc. 877 1949

Supercalenders in Paper Mills, Electric Drives for. Smith.....338–41; disc. 341 1939

Supercharger Drive, Speed-Control System for an Aircraft Cabin-. Godsey, Miner, Walley.....37–40 1945

"Superimposed Frequency Test" for Induction Motors, or S. F. Test, The. Romeira.....952–3; disc. 953 1948

Superposed Direct Current, Optimum Air Gap for Various Magnetic Materials in Cores of Coils Subject to. Legg.....709–12; disc. 969 1945

Superposition Methods for Calculating Effects of Additions to Power Systems. Rettig..396–401; disc. 648 1941

Supersonic Flaw Detectors, Design and Application of. Erdman..1271–6 1947

Supersonic Reflectoscope, Electronic Circuits of a. DeLano....128–37 1948

Supervisory Control and Telemetering, Interim Report on Characteristics and Performance of Conductors for. (Committee Report).....854–62 1943

Supervisory Control Equipment, Channels for Operation of. Derr, Brown.....1654–60 1948

Supervisory Control for New Chicago Subway. Derr, Buck, Stoos.....10–16; disc. 457 1945

Supervisory Control for the World's Most Modern Steel Mill. Garrett, Reagan.....259–64 1944

Supervisory Control of Pumping Station Over Power Cable, Carrier. Derr, Keller, Hedke.....699–705; disc. 1124 1946

Supervisory Control of 30,000-Kva Hydroelectric Plants. Bohner, Maness.....337–42 1946

Supervisory Control System, A New 2-Signal Synchronous. Derr.....857–63; disc. 863 1949

Supervisory Control With Other Functions on Power-Line Carrier Channels, The Combination of. Cheek, Derr.....241–6 1945

Supervisory System, Space Code Selector. Forrest, Schirmer.....1312–15; disc. 1315 1949

Supplementary Control of Prime-Mover Speed Governors. Crary, McClure.....209–14; disc. 395 1942

Supplies for Coaxial Systems, Power. Spencer.....627–30 1949

Supplies for Microwave Relay Systems, Power. Ward.....631–6 1949

Supplies for Services in Large Aircraft—a British View, A-C. Earnshaw, Shearer.....1314–20 1944

Supply for A-C Arc Welding, Power. Welch, Wyer....116–20; disc. 435 1945

Supply for Generating Stations, Auxiliary-Power. McCallum.....693–5; disc. 976 1945

Supply for Modern Aircraft, Ground Power. Owen, Murray, Rosenstein.....1296–1303 1947

Supply for Railroad Electrification and Fundamentals of Power Contracts, Power. Hill....560–2; disc. 1159 1940

Supply for Resistance-Welding Machines, Power.....306–20 1940

Supply of Energy in Hydroelectric Systems, Factors in the Economic. Frampton, Floyd.....1117–24; disc. 1124 1947

Supply, Railway Power. Torchio.....550–3; disc. 1159 1940

Supply Systems, Present D-C Aircraft Electric-. Anderson, Crary, Schultz.....265–72; disc. 484 1944

Supply to Distribution Substations in Wartime, Power. St. Clair.....112–17; disc. 432 1942

Supply, When the Welding Load Outgrows the Distribution Power. Clark, Stearns....645–8; disc. 964 1945

Suppression of Magnetic Vibration and Noise of Two-Pole Turbine Generators. Penniman, Taylor.....283–8; disc. 745 1941

Surface Contamination, Insulator. Frey.....1420–4; disc. 1424 1948

Surface Film Conditions on Commutation, Effects of Commutator. Lynn, Elsey.....106–12; disc. 112 1949

Surface Heating by Induction. Storm.....749–55 1944

Surface Vessels, Electric Propulsion in Naval. Jucarone.....1329–39; disc. 1340 1948

Surface Voltage Gradients of Grouped Conductors, Relative. Temoshok.....1583–9; disc. 1589 1948

Surfaces, Accuracy of Temperature Measurements on Coil. Beede, Cain.....586–90; disc. 590 1947

Surfaces, Diffusion of Electric Current into Rods, Tubes, and Flat. Miller.....1496–1502 1947

Surfaces, Effect of Lightning on Thin Metal. McEachron, Hagenguth..559–64; disc. 1013 1942

Surge Characteristics of a Buried Bare Wire. Sunde.....987–91; disc. 1180 1940

Surge Characteristics of Two-Winding Transformers. Rudenberg.....1136–44; disc. 1333 1941

Surge Comparison Testing Equipment to Fractional Horsepower A-C Stator Windings, The Application of. Buchanan.....1356–8 1947

Surge-Comparison Testing, Winding-Fault Detection and Location by. Moses, Harter.....499–503; disc. 945 1945

Surge-Crest Voltages, Electronic Measurement of. Bryant, Newman.....807–11; disc. 1093 1940

Surge Protection in a Modern Watt-Hour Meter. Busch, Williams.....74–7; disc. 77 1949

Surge-Voltage Breakdown Characteristics for Electrical Gaps in Oil. Sorensen.....78–81; disc. 81 1940

Surges, A Transmission Line Fault Locator Using Fault-Generated. Stevens, Stringfield.....1168–78; disc. 1178 1948
Surges at Substations, Field Investigation of Lightning. Gross, McCann.....569–74; disc. 574 1947
Surges, Dielectric Strength of Station and Line Insulation to Switching. Bellaschi, Rademacher.....1047–54; disc. 1173 1946
Surges, Equivalent Circuits of Transformers and Reactors to Switching. Bewley.....797–802 1939
Surges in Relay Control Circuits, Voltage. Halman, Harris.....1693–9; disc. 1699 1948
Surges on Chicago 12-Kv System. Wollaston, Plumley.....260–5; disc. 694 1941
Surges, Protection of Power Transformers Against Lightning. (Committee Report).....568–77; disc. 749 1941
Surges, The Cause and Control of Some Types of Switching. Schroeder.....696–700; disc. 933 1943
Surges Transferred From One Circuit to Another Through Transformers. Lightning. Bellaschi.....731–8; disc. 1002 1943
Survey, Air-Borne Magnetometers for Search and. Felch, Means, Slonczewski, Parratt, Rumbaugh, Tickner.....640–50 1947
Survey of Lightning Protective Equipment for Rotating A-C Machines. (Committee Report).....516–19; disc. 519 1948
Survey of Power-Supply Developments on British Aircraft, Brief. Carter.....806–07; disc. 1503 1944
Survey of the United States, Temperature. Smith, Tenney.....769–75; disc. 1090 1940
Survey of Unbalanced Charging Currents on Transmission Lines as Affecting Ground-Fault Neutralizers, Report on. (Committee Report).....1328; disc. 1329 1949
Survey on the Performance of Shunt Capacitors, Report of a. (Committee Report).....1200–06; disc. 1206 1949
Surveying, An Optical Radar for. Hansen.....660–3 1948
Suspension Insulators Due to Contamination, Flashovers of. Adler, Wickham, Oldacre.....1680–3; disc. 1683 1948
Suspension of the Watt-Hour Meter Rotor, Magnetic. Trekell, Mendelsohn, Wright...1180–5; disc. 1185 1948
Suspension Spans, Broken Conductor Effect on Sags in. Bissiri, Landau.....1181–8 1947
Suspension System, Electric Equipment Required in a Modern 6-Component Wind-Tunnel Model. Cox.....1258–66 1947
Sustained Voltages in Ground-Fault Neutraliser Systems, An Analysis of Transient and. Farnham, Hunter, Peterson..1257–66; disc. 1394 1941
Swings, Control of Tie-Line Power. Concordia, Shott, Weygandt.....306–14; disc. 395 1942
Swings, Effect of Prime-Mover Speed Governor Characteristics on Power-System Frequency Variations and Tie-Line Power. Concordia, Crary, Parker.....559–67; disc. 733 1941
Swings, Frequency Control of Load. McCormack, Lombard.....623–4; disc. 1043 1942
Swings, Graphical Method for Estimating the Performance of Distance Relays During Faults and Power. Warrington.....608–20; disc. 620 1949
Swings, System Load. Bauman, Mans, McCormack, Seeley.....541–7; disc. 735 1941
Switch and a New Concept of Contact Performance, A New Outdoor Air. Killian.....1382–7; disc. 1387 1948
Switch and the Principles Involved in Its Design, A New Outdoor Air. Graybill, Ferguson.....583–6; disc. 953 1945
Switch, Development of the Glow. Hays.....223–6; disc. 723 1941
Switch, Fundamental Properties of the Vacuum. Koller.....597–604; disc. 1141 1946
Switch House, Boston Edison Company, Modernisation of L Street Station. Corney, Edson...770–8; disc. 778 1939
Switch-House Design, Consolidated Edison Company of New York, Inc., Modernisation of. de Bellis.....752–60; disc. 778 1939
Switch-House Design, Modernisation of. Strang, Hanna.....747–51; disc. 778 1939
Switch Structure, Station "C," Oakland, Pacific Gas and Electric Company, 12-Kv Metal-Enclosed Bus and. Benson, Strang..751–5; disc. 1080 1940
Switch, The Auto-Blast Interrupter. Williams, Harlow.....176–81; disc. 437 1943
Switches for Aircraft, Manual. Millermaster.....596–8 1943
Switches for Line Sectionalising and Load Transfer, Automatic Control of Air. Rich, Kirwen.....293–9; disc. 299 1947
Switches for Protection of Transformer Stations, Automatic Grounding and Air-Break. Ricker.....851–6; disc. 856 1949
Switches, Improving Stability by Rapid Closing of Bus-Tie. Kimbark.....61–4; disc. 456 1945
Switches, Service Restoration With Automatic Air-Break. Reardon.....64–71; disc. 71 1948
Switches, The Characteristics and Application of Precision, Snap-Acting. Riche.....1549–54; disc. 1554 1948
Switchgear
A Compressed Air Circuit Breaker for 23-Kv Arc Furnace Duty. Wilcox, Baker.....154–8 1948
A Manually-Operated Spring Mechanism for Medium Voltage Oilless Circuit Breakers. Wyman, Casey.....357–61; disc. 361 1949
A New Isolated-Phase Metal-Enclosed Bus Designed for High-Capacity Generating Stations. Wyman, Shores.....699–703; disc. 703 1948
A New Line of Oil-Filled Apparatus Bushings. Bowers, Johnston.....729–32; disc. 733 1948
A New Outdoor Air Switch and a New Concept of Contact Performance. Killian.....1382–7; disc. 1387 1948
A New 69-Kv Compressed-Air Circuit Breaker. Baker, Frisch.....363–8; disc. 369 1949
A Study of A-C Arc Behavior Near Current Zero by Means of Mathematical Models. Browne.....141–50; disc. 150 1948
A 230-Kv 3-Cycle Oil Circuit Breaker for Extra-Heavy Arc Rupturing Duty. Leeds, Cushing.....236–42; disc. 242 1948
A-C Tripping and Reclosing of Line Sectionalising Circuit Breakers. Winegartner, Bonheimer...1357–9 1949
An Improved Design of Low-Voltage Panel-Mounted Air Circuit Breaker. Sperow, Favre.....695–8; disc. 698 1948
Circuit Breaker Modernization and Faster Fault Clearing on Single-Phase Electrified Railroad. Brown, Travers, Woods..705–13; disc. 713 1948
Electrical Properties of Ceramics as Influenced by Temperature. Lindsay, Berberich...734–41; disc. 741 1948
Field Tests for Development of 10,000,000-Kva, 230-Kv Oil Circuit Breakers for Grand Coulee Power Plant. Killgore, Clagett.....271–83; disc. 283 1948
Field Tests of Oil Circuit Recloser Substantiate Analytical Co-ordination Method. Auer, Branflick, Woodward, McKinley.....801–08; disc. 808 1949
Gaseous Insulation for High-Voltage Apparatus. Camilli, Chapman.....1463–9; disc. 1469 1947
Insulator Flashover Deionization Times as a Factor in Applying High-Speed Reclosing Circuit Breakers. Boisseau, Wyman, Skeats.....1058–66; disc. 1066 1949
Large Indoor Power Air-Blast Circuit Breakers. Jansson.....1675–8; disc. 1679 1948
Performance Test of the Allgemeine Elektricitats Gesellschaft Free-Jet Air-Blast 220-Kv 2,500-Megavolt-Ampere Reclosing Circuit Breaker. Dovjikov, Diemond.....295–304; disc. 304 1948
Simplified Calculation of Fault Currents. (Committee Report).....1433–35 1948
Unusual Performance of Standard 230-Kv Impulse and Tank-Type Oil Circuit Breakers on Field Tests.....267–70; disc. 270 1948
Switchgear and Circuit Breaker Practice in the United States, A Brief Review of. Hobbs.893–7; disc. 897 1948
Switchgear and Control for an Electronic Power Converter. Gittings, Bateman.....585–8; disc. 1413 1944
Switchgear Equipment for Tidd High-Voltage Test Lines. Lane, Wyman.....1619–21; disc. 1621 1947
Switchgear for 33-Kv Service, Metal-Clad Unit-Type. Kreger.....360–8; disc. 509 1946
Switchgear, Interim Report on Application and Operation of Circuit Breakers and. (Committee Report).....481–83 1943
Switchgear, Medium-Capacity Air-Blast Circuit Breakers for Metal-Clad. Bennett, Wyman.....383–8; disc. 627 1941
Switchgear, The Application of Storage Batteries to the Control of. Hoxie.....1561–9; disc. 1569 1947
Switchgear Unit, A New 50,000-Kva 5-Kv Oilless Circuit-Breaker and Metal-Clad. Dickinson, Hayford.....302–06; disc. 434 1943
Switching, Abnormal Voltage Conditions in Three-Phase Systems Produced by Single-Phase. Clarke, Peterson, Light..329–39; disc. 618 1941
Switching and Faults, Power-System Transients Caused by. Evans, Monteith, Witzke.386–94; disc. 394 1939
Switching and Utilization of Stored Energy, Factors Contributing to Improving Electric Service by Means of High-Speed. Logan, Miles.....1012–16; disc. 1408 1941
Switching, Application of Multi-frequency Pulsing in. Dahlbom, Horton, Moody.....392–6 1949
Switching Circuits, Contact Phenomena in Telephone. Curtis.....360–8; disc. 368 1940
Switching Equipment for Capacitor Banks and Its Application, Automatic Control and. Schroeder, Bloomquist....649–54; disc. 1440 1944

Switching, Extending the Use of Shunt Capacitors by Means of Automatic. Cuttino.....674–8; disc. 1439 1944
Switching Facilities at Essex Generating Station, Reconstruction of. Taylor.....761–70; disc. 778 1939
Switching High-Voltage Transmission Lines. Johnson, Wilson.....1552–60; disc. 1560 1947
Switching in Telegraph Systems, Push Button. Blanchard, Blanton.....1733–40 1948
Switching Large Capacitor Banks, Tests and Analysis of Circuit-Breaker Performance When. Schroeder, Boehne, Butler.821–31; disc. 1020 1942
Switching-Locomotive Application by Means of Nomographic Charts, Diesel-Electric. Millan, Perkinson.....45–7 1944
Switching Locomotives, Industrial Plants Prefer Diesel-Electric. Woods.....697–700 1949
Switching Operations, Power System Overvoltages Produced by Faults and. (Committee Report).....912–21; disc. 921 1948
Switching Overvoltage Hazard Eliminated in High-Voltage Oil Circuit Breakers. Hunt, Boehne, Peterson.....98–106; disc. 418 1943
Switching, Protection Stations Without High-Voltage. (Committee Report).....226–31; disc. 231 1949
Switching, Recent Developments in Telegraph. d'Humy, Browne.....71–8 1940
Switching, Relay Preference Lockout Circuits in Telephone. Joel.....1720–5; disc. 1725 1948
Switching, Resistors for 138-Kv Cable. Sadler, Blakeslee..39–46; disc. 46 1947
Switching Schemes for Capacitors, Automatic. Cuttino.....311–14 1947
Switching Surge Voltages Produced by the Current-Limiting Power Fuse, Control of the. Williams, Schuck.....214–17; disc. 678 1941
Switching Surges, Dielectric Strength of Station and Line Insulation to. Bellaschi, Rademacher.....1047–54; disc. 1173 1946
Switching Surges, Equivalent Circuits of Transformers and Reactors to. Bewley.....797–802 1939
Switching Surges, The Cause and Control of Some Types of. Schroeder.....696–700; disc. 933 1943
Switching System, Crossbar Dial Telephone. Scudder, Reynolds.....179–192 1939
Switching System, Crossbar Toll. Abraham, Busch, Shipley.....302–09; disc. 473 1944
Switching Systems for Teleprinter Tie Lines, Suboenter. Currie..635–41 1943
Switching Systems, The "Director" for Automatic Telephone. Smith.....611–19 1948
Switching, The Economies of Using Capacitors in Amounts to Require Automatic. Butler.322–7; disc. 327 1947
Switching Transients, Influence of Resistance on. Van Sickle.....397–404; disc. 404 1939
Switching Transients, The Cathode-Ray Oscillograph Applied to Long-Time. Dunlap, Rohats.....231–4; disc. 445 1943
Switching, Traveling Waves Initiated by. Bewley.....18–26; disc. 26 1939
Symmetric Circuits, Relay "Trees" and. Washburn.....582–6 1949
Symmetrical-Components Analysis of the Four-Phase System. Boyajian.....48–51; disc. 426 1944
Symmetrical Components as Applied to the Single-Phase Induction Motor. Suhr.....651–6; disc. 958 1945
Symmetrical Components Using Ladder Networks, An Extension of the Method of. Lyon.....1025–30; disc. 1263 1940
Symmetrical Networks by the Method of Symmetrical Components, Transient Analysis of. Pipes.....457–9; disc. 1107 1940
Symmetrical Nomenclature of Three-Phase Circuits. Brady.....955–7; disc. 1402 1941
(Symposium) Carrier-Current Equipment. Laughlin..147–51; disc. 156 1939
(Symposium) Corona Experience on Transmission Line. Cozzens, Peterson.....137–40; disc. 156 1939
(Symposium) General Operation of Transmission Line. Peterson.....131–7; disc. 156, 911 1939
(Symposium) Insulation and Lightning Protection. Cozzens.....140–6; disc. 156, 911 1939
(Symposium) Transmission Line Relay Protection. Draper.....151–6; disc. 156 1939
Synchronism Indicator for Aircraft, A Unique Engine-. Pearson..650–3 1946
Synchronizing Torque of the Double-Fed Asynchronous Machine, Damping and. Liwschitz...923–4 1941
Synchronizing Torques of Power Selsyns, Damping and. Concordia, Kron.....366–71; disc. 490 1945
Synchronizing, Transient Electrical Torques of Turbine Generators During Short Circuits and. Kirschbaum.....65–70; disc. 492 1945
Synchronizing Transients and Synchronizers for Large Machines. Evans, Gulliksen, Myhre.....965–73; disc. 1104 1940
Synchronous and Induction Machines, Steady-State Equivalent Circuits of. Kron.....175–81 1948
Synchronous and Induction Motors, The Calculation of Unbalanced Magnetic Pull in. Robinson.....620–24; disc. 924 1943
Synchronous and Induction Motors to Chippers, The Application of. Baker, Lory.....1070–7 1947
Synchronous Cascade Variable-Speed Drive, A Study of the Modified Kramer or Asynchronous-. Liwschitz, Kilgore.....255–60 1942
Synchronous Condensers and Alternators, Application of an Operating Experience With Hydrogen-Cooled. Sporn, Porter.....890–907; disc. 1187 1940
Synchronous Condensers and Generators, The Development of Modern Excitation Systems for. Porter, Kinghorn.....1020–7; disc. 1156 1946
Synchronous Condensers, Automatic Control of Large. Brown...609–16 1946
Synchronous Condensers for System Voltage Regulation, The Use of Multiwinding Transformers With. St. Clair.....212–17; disc. 217 1940
Synchronous Generators, A New Loss-of-Excitation Relay for. Mason.....1240–5 1949
Synchronous - Induction Frequency Changer, Suddenly Applied Loads Carried by a Variable-Ratio. Darling, Kaufman.....91–4 1948
Synchronous - Machine Armatures, Short Circuits in. Galbraith.....1024–9 1941
Synchronous Machine, Performance of the Single-Phase. Robertson, Rogers.....194–6 1948
Synchronous-Machine Reactances by Test, Inherent Errors in the Determination of. Concordia, Maginniss.....288–94; disc. 491 1945
Synchronous Machine, Single-Phase. Terry, Robertson.....186–94 1938
Synchronous Machine, The Direct- and Quadrature-Axis Equivalent Circuits of the. Rankin.....861–8 1945
Synchronous Machine, The Negative-Sequence Reactances of an Ideal. Duesterhoeft....510–13; disc. 513 1949
Synchronous Machines as Affected by Angle - Regulator Characteristics, Steady-State Stability of. Concordia.....687–90 1948
Synchronous Machines as Affected by Voltage-Regulator Characteristics, Steady-State Stability of. Concordia.....215–20; disc. 489 1944
Synchronous Machines, Asynchronous and Single-Phase Operation of. Rankin.....1092–1102 1946
Synchronous Machines, Measurement of the Subtransient Impedances of. Tracy, Tice.....70–6; disc. 429 1945
Synchronous Machines, Modern Excitation Systems for Large. McClure, Whittlesey, Hartman.....939–45; disc. 1148 1946
Synchronous Machines, Per-Unit Impedances of. Rankin:
Part I.....569–73 1945
Part II.....839–41 1945
Synchronous Machines, Positive and Negative Damping in. Liwschitz.....210–13 1941
Synchronous Machines, Static Power Limits of. Dalziel.....93–101; disc. 101 1939
Synchronous Machines, Transients in 2-Phase. Wilson.....1360–7 1949
Synchronous Machines Under Transient Conditions in the Pole Axis, Saturated. Rudenberg.....297–306; disc. 444 1942
Synchronous Motor Drives, Rotating Stability Regulators for. Schaelchlin.....884–7; disc. 887 1947
Synchronous Motor Hunting, Oscillographic Study of. Kurtz.....647–52 1948
Synchronous Motor Ship Drives-Propulsion Control Problems, Diesel-Electric. Frisch.....660–6 1946
Synchronous Motors, Starting Performance of Salient-Pole. Liwschitz.....913–19; disc. 1215 1940
Synchronous Motors With Controlled Excitation for Suddenly Applied Loads. Boice, Caldwell, Halberg.....113–19; disc. 416 1943
Synchronous Motors Without Field Excitation, Performance Calculations on Polyphase Reluctance Motors—. Trickey.....191–3 1946
Synchronous Pump Motors, Some Acceleration Tests on Large. Ager.....416–22; disc. 649 1941
Synchronous Reactance of Salient-Pole Synchronous Machines, The Quadrature. Shepherd, Kilbourne.....684–9; disc. 926 1943
Synchronous Starting of Generator and Motor. Concordia, Crary, Kilbourne, Weygandt.....629–34; disc. 956 1945
Synchronous Supervisory Control System, A New 2-Signal. Derr.....857–63; disc. 863 1949
Synchronous Tie—A Steady-State Analysis, The Torques of the. Finzi, McConnell.....1147–52 1949
Synchronous Tie, The Geometric Loci of the. Finzi, Wellard.....168–71 1949
Synthesis of Linear Servomechanisms, The Analysis and an Optimum. Herr, Gerst.....959–70 1947
Synthetic or Equivalent Load Curves. Hamilton.....369–81 1942
System, A Microwave Communication Relay. Boothroyd, Churchill.....637–41 1949
System, A New Carrier Relaying. Halman, Goldsborough, Lensner, Drompp.....568–72; disc. 1423 1944

System, A New 2-Signal Synchronous Supervisory Control. Derr.....857–63; disc. 863 1949
System, A 120-Volt D-C Aircraft Electric. Cobb....1327–34; disc. 1495 1944
System, A Time Division Multiplexing. Boothroyd, Creamer.....92–7 1949
System, A Universal Telemetering. Harris.....1151–4; disc. 1154 1948
System, A Vertical-Flow Compressed-Air Circuit Breaker and Its Application on a 132-Kv Power. Langstaff, Baker.....188–92; disc. 436 1943
System After Complete Shutdown, Restoration of Service From Large Metropolitan. Dryar, Bailey.....571–4; disc. 1154 1940
System, Aircraft Electric Power-Supply. Yarmack.....655–8; disc. 953 1943
System, An Electroacoustical. Walker.....35–40; disc. 40 1948
System, An Improved Cable Carrier. Black, Brooks, Wier, Wilson.....741–6; disc. 746 1947
System, Application of Rural Carrier Telephone. Bartelink, Cook, Cowan, Messmer.....511–18; disc. 517 1947
System Applications, Microwave Channels for Power. (Committee Report).....40–2; disc. 42 1949
System as Determined by Electrical Analogy, The Transient Behavior of the Two-Stage Rototrol Main Exciter Voltage Regulating. Carleton.....59–63 1949
System at Indianapolis, The Development of the Civil Aeronautics Authority Instrument Landing. Jackson, Alford, Byrne, Fischer.....849–58; disc. 1120 1940
System Control in a Large Interconnection, Methods of. Wild.....232–6; disc. 737 1941
System Costs, A Method of Approach to the Consideration of Power-Distribution-. Falls.....1078–84; disc. 1377 1944
System, Crossbar Dial Telephone Switching. Scudder, Reynolds.....179–192 1939
System, Dielectric Strength of Insulating Liquids in a Continuously Circulating. Race.....730–7 1940
System, Distortion in a Pulse Count Modulation. Clavier, Panter, Grieg.....989–1005; disc. 1005 1947
System, Economic Loading of a Transformer. Levine, Smith.....733–8; disc. 738 1949
System, Electrical Accuracy of Selsyn Generator - Control Transformer. Chestnut.....570–6; disc. 1118 1946
System, Electrification of an Ore Haulage. Corfield.....1155–61 1948
System, Electronic Telemetering. Foster, Kiefer.....802–07 1947
(System Engineering) The General Solution Method of Power Network Analysis. Dunstan.....631–8; disc. 638 1948
System, Filters for a 150-Kc Carrier. Taylor.....583–8 1948
System for a Multijet Airplane, Starter-Generator Control. Hart.....1316–18 1948
System for Aircraft, A Capacitance-Type Fuel-Measurement. Pearson.....1363–8 1947
System for Aircraft, An Electric Deicing. Giloy.....1051–7 1949
System for Aircraft D-C Generators, An Integrated Control. McClinton.....94–8 1947
System for A-C Crane Hoists, A Thrustor Lowering Control. Schwarz-Kast...139–44; disc. 144 1947
System for an 18-Cylinder Aircraft Engine, Design of an Ignition. Harkness.....1321–7; disc. 1467 1944
System for Animated Line Images, Narrow-Band Transmission, Skellett.....124–7 1939
System for Automatic Parallel Operation of Load-Ratio-Control Transformers, A New Control. Minneci, Farnham.....488–93; disc. 916 1943
System for Diesel-Electric Locomotives, A Power Plant Regulating. Lewis.....242–6; disc. 246 1947
System for Mobile Telephone Use, Vibrating Reed Selective Signaling. Pruden, Hoth.....387–91 1949
System for Modern Multiple-Unit Rapid-Transit Cars, A Control. Moore.....142–7 1942
System for Radio Relay Applications, A 150-Kc Carrier. Boughtwood.....577–82 1948
System for Remote Control of Coaxial Cable Stations, B-1 Alarm and Control. Hearn, Weber....622–6 1949
System for Rural Service, A Carrier Telephone. Barstow.....501–07 1947
System for Toronto, Proposed Rapid Transit. Duncan.....939–46 1947
System for Wind Tunnel Drives, A Control. Heidenreich.....1637–43; disc. 1643 1947
System, Frequency-Modulated Carrier Telegraph. Bramhall, Boughtwood.....36–9 1942
System From the Grand Coulee Power Plant, Development of the Transmission. Hoard, Helwith.....1095–1100; disc. 1100 1948
System From the Viewpoint of Possible Major Shutdowns, The Design and Operation of a Metropolitan Electrical. Dean....575–9; disc. 1150 1940
System, General Mobile Telephone. Romnes, O'Connor.....1658–66 1947
System Governing — the Problem, Power. Dougherty, Hayward, Monteith, Griscom..547–58; disc. 731 1941
System Governor Sensitive to Frequency and Load, A Power-. Curtis.....89–92; disc. 731 1941
System, High-Speed Voice-Frequency Carrier Telegraph. Bramhall.....873–9; disc. 1132 1940
System Insulation Strength, Rationalisation of Transmission. Part III. Sporn, Gross....591–5; disc. 1201 1940 (Part I—1938; Part II—1930)
System Interconnection in Quebec, Power. Way.....841–7 1942
System Interconnections, Phase-Angle Control of System. Pierce, Hamilton.....83–91; disc. 91 1939
System Investments, Kilowatts, Kilovars, and. Butler.133–7; disc. 368 1943
System, Lightning Investigation on a Rural Distribution. MacCarthy, Stann, Edge, McKinley.....428–37; disc. 437 1949
System, Lightning Investigation on a 220-Kv. Part III. Bell.....822–8; disc. 1098 1940 (Part I—1934; Part II—1936)
System Load Swings. Bauman, Mans, McCormick, Seeley.....541–7; disc. 735 1941
System Load, The Effect of Weather on the. Dryar...1006–13; disc. 1364 1944
System Loads, Emergency Control of. Comly, Kelley, McCormack, Phillips, Schroeder.....1474–81; disc. 1482 1948
System Matching Electrical Characteristics of McNary Generators and Transformers with Bonneville Power Administration Transmission. Hoard, Weiner.....1022–5; disc. 1026 1949
System of the American Gas and Electric Company, Lightning Investigation on 132-Kv Transmission. Gross, Lippert.....178–85; disc. 450, 974 1942
System of the Colorado River Aqueduct, The Pumping. Gaylord.....112–23; disc. 123 1939
System of the Consolidated Edison Company of New York, Inc., Provisions for Reenergising the Electric. Milne, Otten.....579–85; disc. 1155 1940
System of the Hydro-Electric Power Commission of Ontario, The 220,000-Volt. Part II. Frampton, Wood.....1215–21; disc. 1373 1941 (Part I by Brandon—1930)
System of the Southern California Edison Company, Change of Frequency on the. Tice, Kroneberg, Johnson Enefer, Tugby, Sidway.....809–25; disc. 825 1948
System of Testing Aircraft Engines, The Power-Recovery. Cassidy, Mosteller, Wright....240–6; disc. 416 1943
System Operation Improved With Carrier Telemetering and Load Control. Walton, Lensner.....1643–7; disc. 1647 1948
System; Operation of a Ground-Fault Neutralizer on a Regulated Distribution. Tomlinson, Hunt.....1321–6; disc. 1326 1949
System Operation, Transformer Magnetizing Inrush Currents and Influence on. Blume, Camilli, Farnham, Peterson...366–75; disc. 423 1944
System, Overcurrent Investigation on a Rural Distribution. Lincks, Edge, McKinley, Leh..915–27; disc. 927 1949
System Overvoltages and System-Grounding Impedance, Correlation of. (Committee Report).....17–24; disc. 383 1943
System Overvoltages Produced by Faults and Switching Operations, Power. (Committee Report).....912–21; disc. 921 1948
System, Pilot-Wire Relaying on a Metropolitan. LeClair, Michelson.....511–15; disc. 974 1943
System, Planning the Development of a Metropolitan Electric. Waring.....1467–72; disc. 1472 1948
System, Primary Networks on the Duquesne Light Company, Holben, Lange.....704–09; disc. 709 1949
System, Probability Methods Applied to Generating Capacity Problems of a Combined Hydro and. Loane, Watchorn.....1645–54; disc. 1654 1947
System Problems in Supplying Large Electric-Arc Furnaces During Wartime, Transmission-Line and. Jones.....197–202; disc. 392 1943
System, Restoration of Service on a Metropolitan Power. Bryson, Hayward.....563–70; disc. 1153 1940
System Short-Circuit Currents. Hanna, Travers, Wagner, Woodrow, Skeats.....877–81; disc. 1351 1941
System, Space Code Selector Supervisory. Forrest, Schirmer.....1312–15; disc. 1315 1949
System Stability. Gay.....168–73; disc. 739 1941
System Stability, Capacitors, Condensers, and. Butler, Schroeder, Ridgway.....1130–8; disc. 1378 1944
System, Stability of Tandem Regulators in the L-1 Carrier. Kinzer.1179–86 1949
System, Surges on Chicago 12-Kv. Wollaston, Plumley.....260–5; disc. 694 1941
System, Symmetrical - Components Analysis of the Four-Phase. Boyajian.....48–51; disc. 426 1944
System, Telegraphy in the Bell. Duncan, Parker, Pierce.....1032–44; disc. 1386 1944
System, The CAA-MIT Microwave Instrument Landing. Bowles, Barrow, Hall, Lewis, Kerr.....859–65; disc. 1120 1940

System, Transformer Audio Noise Problems on an Electric Power. Murray. ....740–7; disc. 747 1949
System, Trolley Coach Distribution. McDonald....393–402; disc. 402 1948
System Voltage Control Without Feeder Voltage Regulators, Power. Smeloff....1462–4; disc. 1465 1948
System Voltage Wave Shapes and Power Factor, The Effect of Overexciting Transformers on. Butler, Pope....49–53; disc. 656 1941
System Voltages and Fault Currents Determined Easily on D-C Board. Asbury....184–8; disc. 439 1944
System-Wide Load Divisions by Means of Accurate Time Control, Preliminary Consideration of. Curtis, Pickslay....1562–9; disc. 1569 1948
Systems, A New Crystal Channel Filter for Broad Band Carrier. Willis.. ....134–8; disc. 490 1946
Systems, A New Type of Adjustable-Speed Drive for A-C. Conrad, Smith, Ordung....7–10; disc. 385 1943
Systems, A New Type of Adjustable-Speed Drive for A-C. Conrad, Smith, Ordung:
Part I....7–10; disc. 385 1943
Part II....522–5; disc. 932 1943
Systems, Aircraft Electric Power Protective. Austin....1375–82 1947
Systems, Aircraft Signal. Rugge.... ....3–5; disc. 455 1944
Systems, An Automatically Reclosing Breaker for Co-ordinating Distribution. Rawlins, Wallace.... ....1021–4 1941
Systems, Analysis of the Application of High-Speed Reclosing Breakers to Transmission. Crary, Kennedy, Woodrow....339–48; disc. 423 1942
Systems Considerations, Radar. Quarles....209–15 1946
Systems, Continuous Load-Frequency Control for Interconnected Power. Dimond, Lunge. 1483–8; disc. 1488 1948
Systems, Control of Inductive Interference to Telegraph. Milnor.... ....469–74; disc. 1134 1940
Systems, Control of Load, Frequency, and Time of Interconnected. Duff. ....778–86; disc. 999 1945
Systems, Copper-Oxide Modulators in Carrier Telephone. Caruthers.... ....253–60 1939
Systems Development of Military Communications. Putnam.... ....757–61; disc. 1160 1946
Systems, Experience With Oil Circuit Reclosers on REA. Moore, Watkins....531–5; disc. 934 1943
Systems, Feeder Voltage Regulator Application on Power. Gosinski, Oberholtzer...1458–61; disc. 1461 1948
Systems for Aircraft Window Deicing, Control and Power. Mershon.... ....1400–05 1947
Systems for Large Aircraft, Basic Considerations in Selection of Electric. Beice, Levoy....279–87; disc. 478 1944
Systems for Large Synchronous Machines, Modern Excitation. McClure, Whittlesey, Hartman.... ....939–45; disc. 1148 1946
Systems for Teleprinter Tie Lines, Subcenter Switching. Currie..635–41 1943
Systems, Graphical Analysis of Control. Evans....547–51 1948
Systems, Graphical Determination of Transfer Function Loci for Servomechanism Components and. Thomas, Easton..307–14; disc. 314 1949
Systems, Improved Fault Protection for Rural Distribution. Van Ryan... ....261–3 1945
Systems in the Washington Area, Design and Experience with 4-Kv Primary Network. Lank.... ....712–16; disc. 716 1949
Systems in Wartime, Electric-Power Distribution. Sporn.... ....105–07; disc. 432 1942
Systems in Wartime, Overhead Distribution. Cole....123–6; disc. 432 1942
Systems in Wartime, Underground Distribution. Gaty..107–12; disc. 432 1942
Systems, Lightning and Lightning Protection on Distribution. Bergvall, Beck....442–9; disc. 1112 1940
Systems, Long-Distance Power Transmission as Influenced by Excitation. Concordia, Crary, Maginniss....974–87; disc. 1175 1946
Systems, Measurements Pertaining to the Coordination of Radio Reception With Power Apparatus and. Foust, Frick.... ....284–91; disc. 455 1943
Systems, Modern Motors Serve City Transit. Clardy, Atwell....850–4 1941
Systems, New Test Equipment and Testing Methods for Cable Carrier. Tidd, Rosen, Wenk....726–30 1947
Systems of World War II, Military Teletypewriter. Singer..1398–1408 1948
Systems, Power Supplies for Coaxial. Spencer....627–30 1949
Systems, Power Supplies for Microwave Relay....631–6 1949
Systems, Practical Calculation of Electrical Transients on Power. Evans, Witzke...690–6; disc. 923 1943
Systems, Present-Day Grounding Practices on Power. (Committee Report)....1525–48; disc. 1548 1947
Systems, Prime-Mover Speed Governors for Interconnected. Caughey, McClure....147–51; disc. 728 1941
Systems, Progress in Coaxial Telephone and Television. Abraham..1520–7 1948
Systems, Protector Tubes for Power. Peterson, Rudge, Monteith, Ludwig....282–8; disc. 288 1940
Systems, Push Button Switching in Telegraph. Blanchard, Blanton.. ....1733–40 1948
Systems, Rototrol Excitation. Barkle, Valentine....529–34; disc. 534 1948
Systems, Selective Tripping Arrangements for Protection of Ship's A-C Electric Distribution. Cole.... ....1256–62; disc. 1262 1948
Systems, Selenium Rectifiers in Motor Vehicle Power. Ramsey.... ....149–53; disc. 153 1949
Systems, Self-Excited Oscillations of Capacitor-Compensated Long-Distance Transmission. Bodine, Concordia, Kron...41–4; disc. 371 1943
Systems, Short-Circuit Calculating Procedure for Low-Voltage A-C. Darling....1121–36; disc. 1294 1941
Systems, Short-Circuit Currents and Recovery Voltages on Rural Distribution. Eason, Johnson, Kalb, Peterson....930–7; disc. 937 1949
Systems, Stability Limitations of Long-Distance A-C Power-Transmission. Clarke, Crary..1051–9; disc. 1299 1941
Systems, Stability Study of A-C Power-Transmission. Holm.... ....893–905; disc. 1046 1942
Systems, Standardized Load-Center Unit Substations for Low-Voltage A-C. Hunter, Page....519–25 1942
Systems, Television Receiving. Sinnett. 1544–8 1948
Systems, Television Terminals for Coaxial. Morrison....1193–9 1949
Systems, The Design of D-C Motors for Use in Automatic Control. Lebenbaum....1089–94 1949
Systems, The "Director" for Automatic Telephone Switching. Smith. 611–19 1948
Systems, The Frequencies of Natural Power Oscillations in Interconnected Generating and Distribution. Rudenberg....791–803 1943
Systems, The Frequency Response of Automatic Control Systems. Harris....539–46; disc. 1131 1946
Systems, The Fundamentals of Industrial Distribution. Beeman, Kaufmann....272–9; disc. 477 1942
Systems—The Vi Energy-Flow Postulate, Energy Flow in Electric. Slepian....835–41; disc. 1054 1942
Systems, Transient Recovery-Voltage Characteristics of Electric-Power. St. Clair, Adams.... ....666–9; disc. 1016 1942
Systems, Trends and Practices in Modern Industrial Power Distribution. Bloomquist.... ....872–9; disc. 879 1948
Systems, Two-Stage Rototrol for Low-Energy Regulating. Kimball.... ....1507–11 1947
Systems, Vibrating Reed Selectors for Mobile Radio. Keller, Bostwick.. ....383–6 1949
Systems, Voltage-Recovery Characteristics of Distribution. Witzke.... ....172–80; disc. 180 1949
Systems with Particular Reference to Backlash, Instrument Inaccuracies in Feed-Back Control. Marcy, Yachter, Zauderer....778–88 1949

T

Table of the Bessel Function $I_n(x)$, A Five-Figure. Dwight....135–6 1941
Tables for the Calculation of the Magnetic Field Components of Circular Filaments and Solenoids, Formulas and. Grover....665–75 1949
Tachometer— Accelerometer — Vibrometer for Instrument-Gyroscope Testing, A. Laurenson, Long.... ....593–6; disc. 960 1945
Tachometer Design, Recent Advances in Aircraft. Ballard, Hall.... ....646–8; disc. 1421 1944
Tachometer, The Magnetic-Drag. Ballard....366–9 1942
Tachometers, Precision Testing of Electric. Princi....504–08; disc. 946 1945
Tandem Regulators in the L-1 Carrier System, Stability of. Kinzer.... ....1179–86 1949
Tank Rectifier Corrosion Problem, The Water-Cooled Steel. Remscheid.. ....173–8; disc. 753 1941
Tank-Type Oil Circuit Breakers, A New Line of High-Voltage Outdoor. Skeats, Rietz....224–31; disc. 502 1946
Tank-Type Oil Circuit Breakers on Field Tests, Unusual Performance of Standard 230-Kv Impulse and. Rietz....267–70; disc. 270 1948
Tanks, Totalising Contents of Aircraft Fuel. Macintyre.... ....663–65; disc. 1419 1944
Tanks Using Aluminum Anodes, Cathodic Protection of Steel Water. Sudrabin, Mears....197–200 1947
Tape in Wide-Band Telephone and Pulse Transformers, Applications of Thin Permalloy. Gans..177–83 1946
Tape Recording, Signal and Noise Levels in Magnetic. Wooldridge.. ....343–52; disc. 495 1946
Tapered-Thickness Bimetal. Elmer... ....661–5; disc. 962 1945
Tapered Transmission Line, The. Milnor....345–6 1945
Tapes, Magnetic Recording. Camras.. ....503–06 1948
Tapped Transmission Lines, Relay Protection of. Bostwick, Harder.... ....645–50; disc. 969 1943
Tapped-Winding Capacitor Motors, Performance Calculations on. Trickey....1–3 1943

Tartrate Crystal Units, Design and Performance of Ethylene Diamine. Griffin, Pennell.....557–61 1948
Tartrate, Growing Crystals of Ethylene Diamine. Walker, Kohman.....565–70; disc. 570 1948
Tartrate in Place of Quarts, Crystal Filters Using Ethylene Diamine. Willis.....552–6 1948
Teaching Electricity and Magnetism. Hessler.....828–33 1946
Technique for Lead Cable Sheathing, A New. Reinits, Wiseman.....165–71; disc. 171 1940
Technique, Improvement in Modern Meter-Testing. Lynch, Princi.....218–23 1942
Technique in an Industrial Control, Radar. Cockrell.....269–72 1947
Technique in the Manufacture of Soldered Porcelain Potheads, A New Papp, Nicholas.1258–60; disc. 1261 1949
Technique of Electrical and Hydraulic Testing of Hydroelectric Units. Floyd, Traill.....163–9; disc. 493 1946
Technique of Lightning Measurements, Advances in. Brownlee...515–19 1949
Techniques and Facilities for Microwave Radar Testing. Green, Fisher, Ferguson.....274–90 1946
Techniques, Cable Accessory Design Utilizing New Laboratory. Bosworth, Farr..1268–73; disc. 1273 1949
Techniques for a Coaxial Cable Network, Frequency Division. Crane, Dixon, Huber.....1451–9 1947
Techniques in Ocean Cable Telegraphy, Some Modern. Cramer.....494–500; disc. 500 1947
Techniques, Thermal-Demand-Meter Testing. Lynch, Douglass.....124–8; disc. 514 1946
Telegrams, Facsimile Transmission for Pickup and Delivery of. Ridings.....1293–8 1948
Telegraph, Basic Principles of the Varioplex. Holcomb.....1102–08 1941
Telegraph Signal Analyzer, A. Erickson.....380–4; disc. 384 1948
Telegraph Switching, Recent Developments in. d'Humy, Browne..71–8 1940
Telegraph System, Frequency-Modulated Carrier. Bramhall, Boughtwood.....36–9 1942
Telegraph System, High-Speed Voice-Frequency Carrier. Bramhall.....873–9; disc. 1132 1940
Telegraph Systems, Control of Inductive Interference to. Milnor.....469–74; disc. 1134 1940
Telegraph Systems, Push Button Switching in. Blanchard, Blanton.....1733–40 1948
Telegraph Terminal Without Relays, A Frequency Modulation. Cusack, Michon.....1165–70; disc. 1170 1947
Telegraphy After 100 Years, American. D'Humy, Howe.....1014–32; disc. 1386 1944
(Telegraphy) Developments in the Field of Cable and Radiotelegraph Communications. Pratt, Roosevelt.....1044–7; disc. 1386 1944
Telegraphy in the Bell System. Duncan, Parker, Pierce.....1032–44; disc. 1386 1944
Telegraphy—Radio and Wire Applications, Frequency Shift. Davey, Matte.....479–93; disc. 493 1947
Telegraphy, Some Modern Techniques in Ocean Cable. Cramer.....494–500; disc. 500 1947
Telegraphy, The Varioplex—A New Development in. Shute....181–4 1941
Telemeter for Carrier-Current Channels, A Faster. Lynch, Thomas, Lunge.....288–94; disc. 294 1948
Telemeter, New Devices Derived From a Torque Balance. Burnham.....307–10 1948
Telemeter of D-C Selsyn for Aircraft, A D-C. Jewell, Faus.....314–17 1942
Telemetering, A Modulated-Frequency System of. Renfro, Peterson..45–7 1945
Telemetering and Load Control, Characteristics of New Carrier-Current Equipment for. Beckwith.....1649–52; disc. 1652 1948
Telemetering and Load Control, System Operation Improved With Carrier. Walton, Lensner.....1653–7; disc. 1647 1948
Telemetering and Totalising, A Thermal Converter for. Downing.....879–84; disc. 884 1949
Telemetering, Carrier Channels for. Talmage.....1448–56; disc. 1456 1948
Telemetering Circuits—Metallic and Carrier. Bostwick.....1081–6; disc. 1086 1948
Telemetering for Testing Aircraft in Flight, Radio. Frederick..861–70 1946
Telemetering, Interim Report on Characteristics and Performance of Conductors for Supervisory Control and. (Committee Report)..854–62 1943
Telemetering System, A Universal. Harris.....1151–4; disc. 1154 1948
Telemetering System, Electronic. Foster, Kiefer.....802–7 1947
Telephone and Pulse Transformers, Applications of Thin Permalloy Tape in Wide-Band. Gans.....177–83 1946
Telephone and Television Facilities, Pulse Echo Measurements on. Abraham, Lebert, Maggio, Schott..541–8; disc. 548 1947
Telephone and Television Systems, Progress in Coaxial. Abraham.....1520–7 1948
Telephone Cables, Gas Pressure for. Giese.....471–8 1947
Telephone Cables, Recent Developments in Burying. Fisher, Smith.....169–74 1942
Telephone Cables, Recent Improvements in Loading Apparatus for. Hale, Quinlan, Ranges.....385–92 1948
Telephone Calls, Automatic Ticketing of. Friend.....81–8; disc. 472 1944
Telephone Circuits, Application of Compandors to. Carter, Dickieson, Mitchell.....1079–86 1946
Telephone-Influence Factor of Power Systems With Rectifier Load, A Short-Cut Method of Estimating. Frick.....91–6 1944
Telephone Networks, Rural Automatic. Ffolliott.....1079–83; disc. 1304 1941
Telephone Offices, Regulated Rectifiers in. Trucksess..613–17; disc. 985 1942
Telephone Service in America, Radio for. Romnes.....1060–7 1948
Telephone Services, Joint Use of Pole Lines for Rural Power and. Campbell, Hill, Moore, Schols.....519–24; disc. 524 1947
Telephone Switching Circuits, Contact Phenomena in. Curtis.....360–8; disc. 368 1940
Telephone Switching, Relay Preference Lockout Circuits in. Joel.....1720–5; disc. 1725 1948
Telephone Switching System, Crossbar Dial. Scudder, Reynolds.....179–192 1939
Telephone Switching Systems, The "Director" for Automatic. Smith.....611–19 1948
Telephone System, Application of Rural Carrier. Bartelink, Cook, Cowan, Messmer.....511–17; disc. 517 1947
Telephone System for Open-Wire Lines, A 12-Channel Carrier. Kendall, Affel.....351–60; disc. 360 1939
Telephone System for Rural Service, A Carrier. Barstow.....501–07 1947
Telephone System, General Mobile. Romnes, O'Connor.....1658–66 1947
Telephone System, The Stromberg Carlson XY Dial. Reed....432–8 1947
Telephone Systems, Copper-Oxide Modulators in Carrier. Caruthers.....253–60 1939
Telephone Systems, Inductive Co-ordination of REA Distribution Systems and. Plucknett, Smith, Taylor.....586–95; disc. 723 1941
Telephone Systems, Mica Capacitors for Carrier. Christopher, Kater.....670–4; disc. 1116 1946
Telephone Systems, Transmission Rating of. Codd...694–8; disc. 1123 1946
Telephone Use, Vibrating Reed Selective Signaling System for Mobile. Pruden, Hoth.....387–91 1949
Telephonic Signals, Devices for Controlling Amplitude Characteristics of. Norwine.....62–7 1939
Teleprinter Signals, Electronic Regeneration of. Wilder.....34–40 1946
Teleprinter Tie Lines, Subcenter Switching Systems for. Currie.....635–41; disc. 1943
Teletape Facsimile, Western Union. Pollard.....511–15 1948
Teletypewriter Signals, An Electronic Regenerative Repeater for. Hearn.....904–11 1947
Teletypewriter Systems of World War II, Military. Singer...1398–1408 1948
Television Equipment for Broadcast Stations. Lawrence.....443–52 1947
Television Facilities, Pulse Echo Measurements on Telephone and. Abraham, Lebert, Maggio, Schott.....541–8; disc. 548 1947
Television Network Facilities. Abraham, Romnes.....459–64 1947
Television Receiver Design, Postwar. Pugsley.....453–8 1947
Television Receiving Systems. Sinnett.....1544–8 1948
Television Relays, The Application of Heterodyne Modulation to Wide-Band Frequency-Modulated. Boothroyd.....1127–30 1947
Television System, A New Microwave. Wentz, Smith.....465–70 1947
Television Systems, Progress in Coaxial Telephone and. Abraham.1520–7 1948
Television Terminals for Coaxial Systems. Morrison.....1193–9 1949
Television Transmission Over Wire Lines. Strieby, Wentz.....1090–6; disc. 1311 1941
Temperature Aging Characteristics of Class A Insulation. Smith, Scott.....435–42; disc. 442 1939
Temperature, Aging Characteristics of Dry-Type Transformer Insulation at High. Stewart, Whitman.....1600–06; disc. 1067 1948
Temperature-Aging Tests on Class-A-Insulated Fractional-Horsepower Motor Stators. Scott, Thompson.....499–501; disc. 977 1942
Temperature and Depth of Sea Water, An Instrument for Recording Continuously the Salinity. Jacobson.....714–22 1948
Temperature and Electric Stress in Impregnated-Paper Insulation. Whitehead, MacWilliams.....10–13; disc. 458 1942
Temperature and Insulation Protection in the Operation of Power Transformers, Controlled. Satterlee, Reed.....753–8; disc. 759 1949
Temperature and Movement of Cables in Ducts, An Investigation of the Relationship Between. Nicholson, Brosnan.....723–8; disc. 1388 1944
Temperature Conditions, Application of Apparatus and Conductors Under Various Ambient-. Hellmund, McAuley.....553–8; disc. 992 1942
Temperature Control for Aircraft, Automatic. Gund.....730–4 1945

Temperature Control for Transport Airplanes, Automatic. Hedges.....1197 1947

Temperature, Dielectric Heating—The Measurement of Loss Under Rising. Whitehead.....947–9 1947

Temperature, Dielectric Strength of Oil with Variations of Pressure and. Hoover, Hixson.....1047–50 1949

Temperature Distribution in Transformer Cores and Other Electric Apparatus of Rectangular Cross Section, Formulas for Calculating. Higgins.....190–4; disc. 493 1945

Temperature, Effect of Load Factor on Operation of Power Transformers by. Montsinger..632–6; disc. 1224 1940

Temperature, Electrical Properties of Ceramics as Influenced by. Lindsay, Berberich..734–41; disc. 741 1948

Temperature for 15-Kv Paper-Insulated Cables, Maximum Safe Operating. Franklin, Thomas.....556–60; disc. 560 1939

Temperature in General-Purpose Squirrel-Cage Induction Motors, Measurement of. Potter.....468–72; disc. 472 1939

Temperature in Overloading Transformers and Voltage Regulators, Use of Equivalent Annual Ambient. Oldacre.....477–80; disc. 916 1943

Temperature Induction Motors, Rating of High-. Alger, Jones.....300–02; disc. 458 1945

Temperature Limits and Characteristics of Mica as Used in Conjunction With Class "B" Insulation. Spry.....287–9 1939

Temperature Limits and Measurements for Rating of D-C Machines. Compton.....780–5 1943

Temperature Limits for Short-Time Overloads for Oil-Insulated Neutral Grounding Reactors and Transformers. Part II. Montsinger, Clem.....966–73; disc. 1155 1946 (Part I by V. M. Montsinger—1938)

Temperature Limits Set by Oil and Cellulose Insulation. Hill.....484–7; disc. 487 1939

Temperature, Loading Transformers by Copper. Putman, Dann.....504–09; disc. 510 1939

Temperature Measurements on Coil Surfaces, Accuracy of. Beede, Cain.....586–90; disc. 590 1947

Temperature on Mechanical Performance of Rotating Electrical Machinery, Effects of. Lynn.....514–7; disc. 518 1939

Temperature Phenomena of 3-Conductor Cables, Transient. Wollaston.....1284–95; disc. 1295 1949

Temperature, Pressure, and Humidity, Reference Values for. Bellaschi, McAuley.....669–75; disc. 1227 1940

Temperature Railway Motor, Investigation of Silicone Insulation on High-. Grant, Kauppi, Moses.....305–10; disc. 310 1947

Temperature Ratings of Fractional-Horsepower Motors, Some Problems in the Standardisation of. Veinott.....1055–61; disc. 1218 1940

Temperature Rise, Complete Analysis of Motor. Felix, Jungk.....578–86; disc. 684 1941

Temperature Rise from Early Heat Run Data, Prediction of Ultimate. Ryan.....1164–6 1949

Temperature Rise of Aircraft Transformers, Effect of Altitude on. Montsinger.....251–2 1945

Temperature Rise of Buried Cables and Pipes, The. Neher..9–17; disc. 17 1949

Temperature Rise of Cables in a Duct Bank, The. Neher.....540–6; disc. 546 1949

Temperature Rise of Electrical Apparatus as Affected by Radiation. Penney.....338–42; disc. 342 1940

Temperature Rise of Induction Motors, Determination of. Summers.....459–67; disc. 472 1939

Temperature Rise of Water-Cooled Power Transformers. Meador.....18–21 1946

Temperature Rise Values for D-C Machines. (Committee Report):
Part I.....206–12; disc. 212 1949
Part II.....1118–23; disc. 1123 1949

Temperature Standards for Industrial-Control Coils, Insulation. Erikson.....546–8; disc. 1408 1944

Temperature Survey of the United States. Smith, Tenney.....769–75; disc. 1090 1940

Temperature, The Measurement of Dielectric Loss at High Frequencies and Under Changing. Whitehead, Rueggeberg.....520–4 1949

Temperature With Altitude in the United States, Variations of Atmospheric. Tenney.....230–2; disc. 727 1941

Temperatures by Means of Reduced-Scale Models, Determination of Cable. Gemant, Sticher:
Part I.....475–82; disc. 1128 1946
Part II.....28–33; disc. 34 1948

Temperatures Continuously with the Transformer Carrying Load, Measuring Transformer Winding. Lockie, Stein..1608–16; disc. 1616 1948

Temperatures, Emergency Overloading of Air-Cooled Oil-Immersed Power Transformers by Hot-Spot. Montsinger, Ketchum..906–16; disc. 993 1942

Temperatures for Loading Transformers, Equivalent Ambient. Sealey.....87–93; disc. 449 1943

Temperatures for Power Cables in Service, Guide for Wartime Conductor. (Committee Report).....606–10; disc. 942 1943

Temperatures in Dry-Type Transformer Windings, Hot-Spot. Stewart, Whitman.....763–8; disc. .1445 1944

Temperatures in Fractional-Horsepower Motors, Investigation of Hot-Spot. Hirsch, Munier, Schmidt, Wightman, Himebrook, Lloyd, Coffman, Potter.....128–36; disc. 421 1945

Temperatures in Integral-Horsepower Motors, Investigation of Hot-Spot. Hildebrand, Cain, Phillips, Hough, Rosswog, Potter..124–8; disc. 421 1945

Temperatures in Polyphase Induction Motors, Shutdown Versus Hot-Spot. Potter, Frohardt.....56–8; disc. 483 1946

Temperatures in Resistance Welds, Predetermination of. Johnson.....845–53; disc. 853 1939

Temperatures in Self-Cooled Oil-Insulated Transformers, Hot-Spot Winding. Vogel, Narbutovskih.....133–6; disc. 418 1942

Temperatures in Service, Measurement of Railway-Motor. Teker..545–50 1945

Temperatures, The Electrical Performance of Ceramic Dielectrics at Elevated. Frey, Jesatko.....911–20; disc. 1126 1946

Ten Years' Performance of Lightning-Resistant Wood-Pole Transmission Lines. Schahfer, Knuts.....934–40; disc. 940 1948

TVA Co-ordinated Communication System. Talmage.....1022–34; disc. 1034 1947

Tennessee Valley Authority Hydroelectric Stations—Electrical and Mechanical Design. Hopkins, Peterson.....920–31; disc. 1132 1946

Tennessee Valley Authority Hydroelectric Stations—Electrical Design. Hopkins.....1281–93; disc. 1408 1941

Tension Calculations for Cable and Wire Spans Using Catenary Formulas, Sag and. Nash, Nash.....685–92; disc. 984 1945

Tensor, Equivalent Circuits for Oscillating Systems and the Riemann-Christoffel Curvature. Kron.....25–32; disc. 372 1943

Tensorial Analysis and Equivalent Circuit of a Variable-Ratio Frequency Changer. Kron.....1503–06 1947

Terminal Design, Powerton-Crawford 220-Kv Line-System Operating Features and. Wulfing, LeClair..1084–9; disc. 1304 1941

Terminal Without Relays, A Frequency Modulation Telegraph. Cusack, Michon.....1165–70; disc. 1170 1947

Terminals for Coaxial Systems, Television. Morrison.....1193–9 1949

Terminals, Solderless. Wells, Balsbaugh.....933–8; disc. 1484 1944

Termination for Ladder Networks, A Fractional. LePage.....530–6 1946

Terminations for Microwaves, Attenuator Materials, Attenuators and. Teal, Rigterink, Frosch....419–28 1948

Terminology and Circuit Analysis, Rectifier. Willis, Herskind.....496–9; disc. 974 1942

"Terratex"—A Thin Flexible Inorganic Insulation. Walters.....123–7 1948

Test-Cell Lighting, Aircraft Engine and Propeller. Tuck.....1264–70; disc. 1493 1944

Test Chambers for Aircraft Electric Apparatus With Particular Reference to Carbon Brushes, New. Summers, Settle.....1205–12; disc. 1491 1944

Test Circuits for Protective Relays, Novel. Sonnemann.....1249–54 1949

Test Code for Electric Brushes, Progress Report on AIEE. (Committee Report).....1126–8 1949

Test, Determination of Short-Circuit Torques in Turbine Generators by. Whitney, Criner..885–9; disc. 1195 1940

Test Equipment and Testing Methods for Cable Carrier Systems, New. Tidd, Rosen, Wenk.....726–30 1947

Test" for Induction Motors, or S. F. Test, The "Superimposed Frequency. Romeira.952–3; disc. 953 1948

Test for the Determination of Stray Load Loss in Induction Machines, Reverse-Rotation. Morgan, Brown, Schumer.....319–22; disc. 322 1939

Test Lines, Corona Considerations on High-Voltage Lines, and Design Features of Tidd 500-Kv. Wagner, Wagner, Peterson, Gross.....1583–90; disc. 1590 1947

Test Lines, Instrumentation and Measurement—Tidd 500-Kv. Tremaine, Lippert.....1624–30; disc. 1630 1947

Test Lines, Insulators and Line Hardware for Tidd 500-Kv. Gross, McCoy, Sheadel.....1592–1602; disc. 1602 1947

Test Lines, Line Conductors—Tidd 500-Kv. Peterson, Simmons, Hickernell, Noyes...1603–11; disc. 1611 1947

Test Lines, Switchgear Equipment for Tidd High-Voltage. Lane, Wyman.....1619–21; disc. 1621 1947

Test Lines, Transformers and Lighting Arresters—Tidd 500-Kv. Lane, Hodnette, Bellachi, Beck.....1613–18; disc. 1618 1947

Test Methods to the Determination of Induction-Motor Performance, An Application of Deceleration. Ager.....72–6 1939

Test of the Allgemaine Elektricitats Gesellschaft Free-Jet Air-Blast 220-Kv 2,500-Megavolt-Ampere Reclosing Circuit Breaker, Performance. Dovjikov, Diemond.....295–304; disc. 304 1948

Test on Rapid Transit Division, Chicago Transit Authority, Three-Compartment Articulated Cars for. Otis....416–18 1948

Test Procedures and Methods of Analysis of Results to Research Problems in Magnetic Recording, Application of Experimental. Thompson....407–17 1949

Tester for Bomb-Release Interval Controls, An Interval and Dwell. Long....648–51 1945

Testing, A Tachometer—Accelerometer—Vibrometer for Instrument Gyroscope. Laurenson, Long....593–6; disc. 960 1945

Testing Aircraft Engines, The Power-Recovery System of. Cassidy, Mosteller, Wright....240–6; disc. 416 1943

Testing Aircraft Generators. Keneipp....105–09 1944

Testing Aircraft in Flight, Radio Telemetering for. Frederick...861–70 1946

Testing Aircraft Models, Electronic Control of Frequency Converter Sets for. Heumann, Strong 931–9 1946

Testing and Application of Lightning Arresters. (Committee Report)....68–71 1939

Testing and Spectroscopy, Electronically Balanced Recorder for Flight. Williams, Clark, Tarpley...205–08 1946

Testing by Test Stator Method, Die Cast Rotor. Trickey....139–41; disc. 483 1946

Testing by the Power-Factor Method, Bushing and Associated Insulation. Baltsly, Schlottere....308–12; disc. 744 1941

Testing Equipment for Quantity Production, High-Potential. Summers....289–72; disc. 756 1941

Testing Equipment to Fractional Horsepower A-C Stator Windings, The Application of Surge Comparison. Buchanan....1356–8 1947

Testing Governor Performance on Electric Power Systems With Improved Instruments. Allen, Hess....329–39; disc. 339 1947

Testing of Aircraft Ignition Cables and Connectors, Simulated-High-Altitude. Race, Ross....20–6 1945

Testing of Bone Receivers and Throat Microphones, Laboratory Method for Objective. Greibach....184–7 1946

Testing of Brushes for Life and Performance Under Various Altitude Conditions, The. Herman....929–33; disc. 1491 1944

Testing of Distribution Arresters. Halperin....142–8; disc. 148 1940

Testing of Electric Tachometers, Precision. Princi...504–08; disc. 946 1945

Testing of Electric Windings, Insulation. Foust, Rohats...203–06; disc. 454 1943

Testing of Elevator Buffers by Electrical Means. Kimberly....53–4 1941

Testing of Generator Insulation, Field. (Committee Report)....1003–11; disc. 1314 1941

Testing of Generators in the Field, Progress Report of D-C. Davis, Leftwich....14–18; disc. 470 1942

Testing of Graphite, Arc-Back. Pakala, Cucullu....439–42 1947

Testing of Hydroelectric Units, Technique of Electrical and Hydraulic. Floyd, Traill....163–9; disc. 493 1946

Testing of Insulating Equipment, An Automatic A-C Potentiometer and Its Application to the Non-Destructive. Keinath..887–90; disc. 890 1939

Testing of Insulation, The Basis for the Nondestructive. Field....890–5; disc. 1347 1941

Testing of Mercury-Arc Rectifiers, The. Kellogg, Herskind....765–73; disc. 960 1943

Testing of Oil Circuit Breakers, Dielectric Strength of Oil for High-Voltage. Lingal, Skeats, Braley.903–06 1941

Testing of Radio-Frequency Cables at the Naval Research Laboratory, Methods of Electrical and Mechanical. Miller....934–5 1945

Testing of Rubber-Insulated Wire, High Voltage D-C. Eddy, Fenn....576–8; disc. 1126 1946

Testing of Transformer Insulation and Operating Experience, Field Power-Factor. Whitmer....605–11; disc. 741 1941

Testing of Transformer Insulation, Power-Factor. Hodtum....28–30; disc. 647 1941

Testing of Transformers, Progress in Impulse. Hagenguth....999–1005; disc. 1440 1944

Testing of Wire and Cable, Statistical Methods as Applied to the Manufacture and. Woolfson....752–4; disc. 754 1948

Testing, Recommendations for High-Voltage. (Committee Report)....598–602; disc. 1207 1940

Testing, Some Recent Developments in Impulse-Voltage. Foust, Rohats....257–62; disc. 262 1940

Testing Station, High-Capacity Circuit-Breaker. MacNeill, Batten....49–53; disc. 406 1942

Testing Technique, Improvement in Modern Meter-. Lynch, Princi...218–23 1942

Testing, Techniques and Facilities for Microwave Radar. Green, Fisher, Ferguson....274–90 1946

Testing Techniques, Thermal-Demand-Meter. Lynch, Douglass....124–8; disc. 514 1946

Testing, Winding-Fault Detection and Location by Surge-Comparison. Moses, Harter..499–503; disc. 945 1945

Testing With the Mass Spectrometer, High Vacuum Leak. Worcester, Doughty....946–55; disc. 1170 1946

Tests and Analysis of Circuit-Breaker Performance When Switching Large Capacitor Banks. Schroeder, Boehne, Butler..821–31; disc. 1020 1942

Tests and Developments in Connection With Hot-Line Insulator Washing. Hill....1203–16 1947

Tests and Experience at York and Middletown, Pa., Linear Couplers—Field. Harder, Klemmer, Neidig..107–13 1946

Tests and Performance of a High-Speed 138-Kv Air-Blast Circuit Breaker, Field. Sporn, Strang....1–6; disc. 412 1942

Tests and Performance of Heavy-Duty High-Speed 138-Kv Circuit Breakers—Oil and Air-Blast, Field. Sporn, St. Clair..401–10; disc. 463 1945

Tests, Arc-Backs in Rectifier Circuits—Artificial Arc-Back. Evans, Maslin....303–11; disc. 439 1945

Tests, Bushing. Brownlee, Wickham..940–2; disc. 1344 1941

Tests Carried Out at the 500-Kv Experimental Station of Chevilly (France), Especially on Corona Behavior of Bundle Conductors, Results of. Cahen....1118–25; disc. 1125 1948

Tests Evaluate Thermal Endurance of Class H Insulation and Silicone Varnish, Motor. Grant, Kauppi, Moses, Gibson....1133–8 1949

Tests for Development of 10,000,000 Kva 230-Kv Oil Circuit Breakers for Grand Coulee Power Plant, Field. Killgore, Clagett....271–83; disc. 283 1948

Tests in Drying Out Large Generators, Use of Dielectric-Absorption. Marcroft....56–60; disc. 415 1945

Tests of Interrupting Capacity of 138-Kv Oil Circuit Breakers, Field. Buchanan, Floyd....199–204; disc. 503 1946

Tests of Oil Circuit Recloser Substantiate Analytical Co-ordination Method, Field. Auer, Branflick, Woodward, McKinley....801–08; disc. 808 1949

Tests of Relaying and Stability on Kansas-Nebraska 270-Mile 154-Kv Interconnection, Staged Fault. Minard, Gow, Wolfe, Swanson....358–67; disc. 425 1943

Tests of 230-Kv High-Speed Reclosing Oil Circuit Breaker. Schwager...784–8; disc. 1468 1944

Tests on a Normally Ungrounded 13-Kv 3-Phase Bus, Arcing Ground. Allen, Waldorf..298–306; disc. 498 1946

Tests on Aircraft Cable, A-C and D-C Short-Circuit. Cunningham, Davidson....961–9; disc. 1359 1944

Tests on Class-A-Insulated Fractional-Horsepower Motor Stators, Temperature-Aging. Scott, Thompson....499–501; disc. 977 1942

Tests on Class A Insulation, Preliminary Report on Laboratory Aging. (Committee Report)....879–81; disc. 881 1947

Tests on Grand Coulee 230-Kv Bus, 4,370,000-Kva Short-Circuit. Clagett, Leeds....729–35; disc. 1119 1946

Tests on High-Capacity Air-Blast Station-Type Circuit Breakers, Field. Strang, Skeats...100–04; disc. 409 1942

Tests on High-Capacity Station Circuit Breakers, Field. Braley....31–6; disc. 408 1942

Tests on Large Synchronous Pump Motors, Some Acceleration. Ager....416–22; disc. 649 1941

Tests on Oil-Impregnated Paper. Part IV. Race....721–9; disc. 1083 1940 (Part I—1936; Part II—1937; Part III—1938)

Tests on Oil-Treated Paper-Insulated Cables, Some Impulse-Voltage Breakdown. Foust, Scott....389–91; disc. 391 1940

Tests on Power-Line Carrier-Current Equipment, Field. Miller, Prud'Homme....824–7; disc. 1177 1946

Tests on Solenoids, A Method for Correlating Duty-Cycle. Ryan....579–81; disc. 945 1943

Tests on Wood-Pole Line Insulation, Lightning and 60-Cycle Power. Bellaschi....838–47; disc. 847 1947

Tests Over a Range of Frequencies, Electrical. Fleming....935–7 1945

Tests, Relaying Difficulties Disclosed by Staged-Fault. Morgan, Evans...73–82 1948

Tests, Unusual Performance of Standard 230-Kv Impulse and Tank-Type Oil Circuit Breakers on Field. Rietz....267–70; disc. 270 1948

Textile Finishing Ranges, Electric Drives for. Moore, Uhl...684–94 1947

Textile Industry, Electrical Progress in the. Snyder....863–70; disc. 870 1948

Textile Plants, Power Distribution in. McConnell....659–62 1947

Textile-Range Drives, Turbine-Electric. Richardson....57–60 1940

Theater Lighting, A Thyratron Circuit for. Wischmeyer....1067–72 1941

Theorem for Evaluating Operational Expressions Having a Finite Number of Different Roots, A Construction. Cromwell..273–6; disc. 676 1941

Theoretical and Practical Approach to the Design of High-Voltage Cable Joints, A. Short....1275–80; disc. 1280 1949

Theoretical Approach to Speed and Tie Line Control. Brandt....24–9; disc. 29 1947

Theoretical Possibilities in an Internally Heated Bimetal Type of Thermal Watt-Demand Meter. Lynch....764–70; disc. 986 1942

Theory—a Correlation of the Cross-Field and Revolving-Field Concepts, Single-Phase Motor. Button.....507–12; disc. 664 1941

Theory and Application of Complex Logarithmic and Geometric Mean Distances. Higgins.....12–16 1947

Theory and Design of NEMA Resistors for Motor Starting and Speed Control. Armstrong.....277–81 1940

Theory and Experimental Confirmation of the Moving Coil Fluxmeter, General. Higgins, Robertson.....897–907; disc. 907 1949

Theory for Multichannel Amplifiers, Load-Rating. Holbrook, Dixon..265–72 1940

Theory of General Static Polyphase Networks, Transformation. Pipes.....123–8; disc. 128 1940

Theory of Hysteresis-Motor Torque. Teare.....907–12; disc. 1208 1940

Theory of Inherent-Overheating Protection Under Running Overload Conditions, Fundamental. Veinott, Schaefer.....266–70; disc. 270 1949

Theory of Multiple Cage Induction Motors, General. Chang.1139–43 1949

Theory of Noise in Induction Motors, Harmonic. Morrill.....474–80; disc. 1148 1940

Theory of Polyphase Commutator Motors, A Generalized Equivalent Circuit in the. Coulthard....423–31 1941

Theory of Rectifier—D-C Motor Drive. Vedder, Puchlowski.....863–70; disc. 960 1943

Theory of the Amplidyne Generator, Steady-State. Graybeal.....750–6; disc. 1049 1942

Theory of the Brush-Shifting A-C Motor. Conrad, Zweig, Clarke:
Part I.....829–34 1941
Part II.....834–36 1941
Part III.....502–06 1942
Part IV.....507–13 1942

Theory of the Capacitor Motor, The Cross-Field. Puchstein, Lloyd....58–62; disc. 667 1941

Theory of the Transductor or Magnetic Amplifier, Some Fundamentals of a. Lamm.....1078–85 1947

Theory of Torsional Dampers, Conductor Vibration—. Speight.....907–11; disc. 1376 1941

Thermal Ampere-Demand Meter, A Polyphase. Petsinger.....167–74 1947

Thermal Characteristics of a 120-Kv High-Pressure, Gas-Filled Cable Installation. Sanderson, Sticher, McGrath.....487–98; disc. 499 1948

Thermal Characteristics of Aircraft Generators on Load Analysis, Effects of. Rogers.....819–24 1946

Thermal Converter for Telemetering and Totalising, A. Downing.....879–84; disc. 884 1949

Thermal Co-ordination of Motors, Control, and Their Branch Circuits on Power Supplies of 600 Volts and Less. Jones.....483–7; disc. 975 1942

Thermal-Demand-Meter Testing Techniques. Lynch, Douglass.....124–8; disc. 514 1946

Thermal Demand Meters, Heat Flow Ratio as a Design Parameter in. Nelson.....885–90; disc. 890 1949

Thermal Endurance of Class H Insulation and Silicone Varnish, Motor Tests Evaluate. Grant, Kauppi, Moses, Gibson.....1133–8 1949

Thermal Movement of Moisture in Soil, The. Mickley...330–3; disc. 333 1949

Thermal Protection of Transformers Under Overload Conditions. Montsinger, Camilli....160–4; disc. 444 1944

Thermal Rating of Overhead Line Wire. Zucker.....501–07; disc. 918 1943

Thermal Transients, Simplified Graphical Method of Computing. Narbutovskih.....78–81; disc. 82 1947

Thermal Volt-Ampere Demand Meter, A New. Douglass, Morong.....79–83; disc. 83 1949

Thermal Watt-Demand Meter, Theoretical Possibilities in an Internally Heated Bimetal Type of. Lynch..764–70; disc. 986 1942

Thermal Wattmeter, A New High-Speed. Miller...37–40; disc. 633 1941

Thermionic Gas Tubes, Quadrature Operation of Filamentary. Holdaway.....205–08 1948

Thermistors—Thermally Sensitive Resistors, Properties and Uses of. Becker, Green, Pearson....711–25 1946

Thermometer Element Mounted in a Protecting Case, Response Time and Lag of a. Goodwin.....665–70; disc. 959 1945

Thermometer, Heat-Flow Effects in a Resistance-Type. Millar..678–85 1945

Thickness Bimetal, Tapered-. Elmer..661–5; disc. 962 1945

Thickness Gauge for Cold-Rolled Strip Steel, X-Ray. Lundahl....83–90 1948

Thickness Gauge for Hot-Strip Rolling Mills, An X-Ray. Clapp, Pohl...620–6 1948

Thickness Indicator for Journal Bearings, Oil Film. Greenough.....589–95; disc. 595 1948

Thin Metal Surfaces, Effect of Lightning on. McEachron, Hagenguth.....559–64; disc. 1013 1942

Thin Permalloy Tape in Wide-Band Telephone and Pulse Transformers. Applications of. Gans....177-83 1946

33-Kv Service, Metal-Clad Unit-Type Switchgear. Kreger.....360–8; disc. 509 1946

Three-Compartment Articulated Cars for Test on Rapid Transit Division, Chicago Transit Authority. Otis..416–18 1948

Three-Cycle Oil Circuit Breaker, A High-Capacity High-Voltage. Byrd, Rietz.....160–3; disc. 463 1945

Three-Cycle 3,500-Megavolt-Ampere-Air-Blast Circuit Breaker for 138,000-Volt Service, A. Byrd, Beall..229–32; disc. 463 1945

Three-Element Current-Limiting Power Fuse, A New. Rawlins, Fahnoe...156–9; disc. 451 1944

Three-Phase Aircraft Inverters Supplying Large Single-Phase Loads, A Unit for Balancing the Voltages of. Wimpie.....532–3; disc. 1358 1944

Three-Phase Circuit, Two-Phase Coordinates of a. Kimbark.....894–904; disc. 904 1939

Three-Phase Circuits, Linear Transformations in. Pipes.....351–6; disc. 619 1941

Three-Phase Circuits, Symmetrical Nomenclature of. Brady.....955–7; disc. 1402 1941

Three-Phase Circuits, The Vector Power Factor of Unbalanced Sinusoidal. Lamb, Brandt.....507–09 1949

Three-Phase Coaxial Busses Comprised of Square Tubular Conductors, Proximity Effect Factors for. Higgins, Messinger.....1538–9 1948

Three-Phase Metering Combinations, Relative Accuracy of. Weller.....925–9; disc. 1336 1941

Three-Phase Power Circuits on Large Aircraft and Its Application to Fault-Current Calculations, Impedance of 400-Cycle. Chappuis, Olmsted.....1213–20; disc. 1496 1944

Three-Phase Systems, Fundamental Basis for Distance Relaying on. Lewis, Tippett..694–708; disc. 708 1947

Three-Phase Systems Produced by Single-Phase Switching, Abnormal Voltage Conditions in. Clarke, Peterson, Light..329–39; disc. 618 1941

Three-Pole 400-Cycle Electrically Operated Aircraft Circuit Breaker, A 208Y/20-Volt 120-Ampere. Titus, Reifschneider.....551–5 1945

3,000 Horsepower Diesel-Electric Locomotive for the Seaboard Air Line Railway, A. Staples, Weybrew, Atwell.....215–19 1947

Three-Winding Transformer Banks, Asymmetrical Loading of Three-Phase. Denissov.....27–9; disc. 444 1944

Three-Winding Transformer Ring-Bus Characteristics. Bills, McArthur.....848–9; disc. 1066 1942

Three-Wire Service, Design of Sealed Ignitron Rectifiers for. Morack..103–07 1945

Throat Loaded With Ferromagnetic Materials, The Voltage Drop in the Welder. Stein.....356–62 1947

Throat Microphones, Inertia. Greibach, Pacent.....187–91 1946

Throat Microphones, Laboratory Method for Objective Testing of Bone Receivers and. Greibach...184–7 1946

Thrust Bearings at the Bonneville Plant of the Corps of Engineers, War Department, The Design and Performance of the Vertical Generator. Lewis, Gordon..1231–7; disc. 1237 1947

Thrustor Lowering Control System for A-C Crane Hoists, A. Schwarz-Kast.....139–44; disc. 144 1947

Thyratron Circuit for Theater Lighting, A. Wischmeyer.....1067–72 1941

Thyratron Motor Control. Moyer, Palmer.....706–12; disc. 962 1943

Thyratron Motor Control, Inverter Action on Reversing of. Palmer, Leigh.....175–82; disc. 494 1944

Thyratron Rectifiers, The Shunt Tube Control of. Potter.....421–4 1947

Thyratron Tubes, A Method for the Measurement of the Ionisation and Deionisation Times of. Birnbaum.....209–14 1948

Thyratrons, A New Line of. Coolidge.....723–7; disc. 727 1948

Thyratrons, Frequency Performance of. Wittenberg.....843–8 1946

Thyratrons, Ionisation Time of. Harrison.....737–50; disc. 1079 1940

Thyrite in Power Transformers, Use of. Meador.....959–64; disc. 964 1949

Ticketing of Telephone Calls, Automatic. Friend....81–8; disc. 472 1944

Tidd 500-Kv Test Lines, Corona Considerations on High-Voltage Lines and Design Features of. Wagner, Wagner, Peterson, Gross.....1583–90; disc. 1590 1947

Tidd 500-Kv Test Lines, Instrumentation and Measurement—. Tremaine, Lippert..1624–30; disc. 1630 1947

Tidd 500-Kv Test Lines, Insulators and Line Hardware for. Gross, McCoy, Sheadel.....1592–1602; disc. 1602 1947

Tidd 500-Kv Test Lines, Line Conductors—. Peterson, Simmons, Hickernell, Noyes..1603–11; disc. 1611 1947

Tidd 500-Kv Test Lines, Transformers and Lightning Arresters—. Lane, Hodnette, Bellaschi, Beck.....1613–18; disc. 1618 1947

Tidd High-Voltage Test Lines, Switchgear Equipment for. Lane, Wyman.....1619–21; disc. 1621 1947

Tie—A Steady-State Analysis, The Torques of the Synchronous. Finzi, McConnell.....1147–52 1949

Tie Line Control, Theoretical Approach to Speed and. Brandt.....24–9; disc. 29 1947

Tie-Line Power Swings, Control of. Concordia, Shott, Weygandt.....306–14; disc. 395 1942

Tie-Line Power Swings, Effect of Prime-Mover Speed Governor Characteristics on Power-System Frequency Variations and. Concordia, Crary, Parker.....559–67; disc. 733 1941

Tie Lines Between Systems, Reclosing of Single. Parker, Travers.....119–22; disc. 470 1944

Tie Lines, Cost Studies of 69- to 230-Kv Underground Power-Transmission Systems and. Holm.....852–60 1945

Tie Lines, Subcenter Switching Systems for Teleprinter. Currie....635–41 1943

Tie, The Geometric Loci of the Synchronous. Finzi, Wellard.....168–71 1949

Time, An Instrument for the Determination of Contact Making and Breaking. Richter, Elliot.....14–16; disc. 459 1943

Time and Lag of a Thermometer Element Mounted in a Protecting Case, Response. Goodwin.....665–70; disc. 959 1945

Time Constants at Low Speeds, Rotating Electric Machine. Concordia.....882–7 1946

Time Control, Preliminary Consideration of System-Wide Load Divisions by Means of Accurate. Curtis, Pickslay.....1562–9; disc. 1569 1948

Time Division Multiplexing System, A. Boothroyd, Creamer.....92–7 1949

Time in Testing Life of Incandescent Lamps, Saving. Purcell....730–2 1949

Time Lags, Measurement of Very Short. Bryant, Newman.....812–16; disc. 1094 1940

Time of High-Voltage Fault-Arc Paths, Deionization. Harrington, Starr..997–1003; disc. 1003 1949

Time of Interconnected Systems, Control of Load, Frequency, and. Duff.....778–86; disc. 999 1945

Time of Thyratrons, Ionization. Harrison.....737–50; disc. 1079 1940

Time Periods, Demand-Meter. Lincoln, Sprole.....728–33; disc. 733 1939

Time Ratings of Diesel-Electric Locomotives, Short. Campbell, Woods.....1661–3 1948

Time Standard, A New. Warren.....137–41; disc. 141 1940

Timer for Arc Duration, An Interval. Quill.....237–40 1945

Times as a Factor in Applying High-Speed Reclosing Circuit Breakers, Insulator Flashover Deionization. Boisseau, Wyman, Skeats.....1058–66; disc. 1066 1949

Timing in Industrial Control, Capacitor Relay. Stansbury, Jochem.....65–9; disc. 69 1940

Timing Relay for Reducing Outages on Power Circuits, A New Electronic. Dlouhy.....407–11 1946

Tire Fabrics, Continuous Processing for Automobile. Cassidy, Mosteller..218–23 1939

Toll Board, Remote-Control. Sorber, Smith.....696–704; disc. 704 1939

Toll Switching System, Crossbar. Abraham, Busch, Shipley.....302–09; disc. 473 1944

Topped Steam Power Plant on Sudden Load Reduction, The Performance of a. Noest.....1348–56 1949

Tonnage Rating, Single-Phase A-C Electric Locomotives on the Pennsylvania Railroad—Protection and. Griffith.....224–8 1942

Tool, Radiant Heat—A Full-Fledged Industrial. Goodell.....464–71 1941

Tool, The Carbon Arc—a Valuable Industrial. Kalb.....581–5 1942

Tools, Electrical Characteristics of Resistance Welding. Callender.....393–404 1947

Tools, Electrical Equipment on Machine. Graves....18–22; disc. 22 1940

Tools for Controlling Quality, Statistical. Manuele, Goffman.....524–8; disc. 949 1945

Toroidal Coil Without Iron, The Self-Inductance of a. Dwight.....805–06; disc. 999 1945

Toronto, Proposed Rapid Transit System for. Duncan.....939–46 1947

Torque Balance Telemeter, New Devices Derived From a. Burnham.....307–10 1948

Torque Curves, Dynamic Braking Controlof D-C Series Motors—Experimental Study of Speed-. Heumann.....560–4 1949

Torque Instruments, Aircraft-Engine. Godsey, Langer..686–90; disc. 1457 1944

Torque Measurement, The Acceleration-Oscillogram Method of Motor-Atkinson, Downie.....7–9; disc. 473 1942

Torque of D-C Machines on Short Circuit, Current and. Linville.....956–65; disc. 1144 1946

Torque of the Double-Fed Asynchronous Machine, Damping and Synchronising. Liwschits.....923–4 1941

Torque, Theory of Hysteresis-Motor. Teare.....907–12; disc. 1208 1940

Torques, Eddy Currents in Disks: Driving and Damping Forces and. Moore.....1–10; disc. 10 1947

Torques in Induction Motors, Transient Starting. Wahl, Kilgore.....603–07; disc. 1263 1940

Torques in Squirrel-Cage Induction Motors, With Special Reference to Plugging, Transient. Gilfillan, Kaplan.....1200–09; disc. 1363 1941

Torques in Turbine Generators by Means of the Electrical-Mechanical Analogy, Determination of Transient Shaft. McCann, Warren, Criner.....51–6; disc. 492 1945

Torques in Turbine Generators by Test, Determination of Short-Circuit. Whitney, Criner..885–9; disc. 1195 1940

Torques in Turbine Generators Produced by Transmission-Line Reclosing, Transient Shaft. Batchelor, Whitehead, Williams.....159–64; disc. 164 1948

Torques of Power Selsyns, Damping and Synchronising. Concordia, Kron.....366–71; disc. 490 1945

Torques of the Synchronous Tie—A Steady-State Analysis, The. Finzi, McConnell.....1147–52 1949

Torques of Turbine Generators During Short Circuits and Synchronising, Transient Electrical. Kirschbaum.....65–70; disc. 492 1945

Torsional Dampers, Conductor Vibration—Theory of. Speight.....907–11; disc. 1376 1941

Totalizing, A Thermal Converter for Telemetering and. Downing.....879–84; disc. 884 1949

Totalising Contents of Aircraft Fuel Tanks. Macintyre.....663–65; disc. 1419 1944

Towers and Conductor Sag on Transmission-Line Shielding, The Influence of. Sorensen, McMaster..159–65; disc. 448 1942

Toxicity, Silicone Insulation in Submarines—. Walker, Shea..1232–5 1948

Tracer-Controlled Position Regulator for Propeller Milling Machine. Hanna, Osbon, Hartley.....201–05; disc. 452 1945

Tracer for Magnetic-Recording Wire, A B-H Curve. Long, McMullen..146–50; disc. 494 1946

Tracer for Small Samples of Low-Permeability Material, A 60-Cycle Hysteresis Loop. Wiegand, Hansen.....119–31; disc. 131 1947

Track Brakes and Drum Brakes for PCC Cars, Recent Developments in. Vouch.....302–04 1947

Trackless Trolley Operation in Rhode Island. Blomquist.....397–402 1949

Traction Armatures, Rewinding Commutator-Type. Greene, Stafford, Gentilini.....563–9; disc. 943 1945

Traction Generator Comes of Age, The Locomotive. Lamborn.....767–71 1948

Traction-Generator Excitation Control Systems, Developments in Diesel-Electric. Brancke, Adams.....223–8; disc. 228 1947

Traction Motor, Modern Double-Reduction. Greer.....471–4 1946

Traction Motors, Advantages of High-Speed. Atwell.....508–10 1943

Traction Motors, Dynamic Braking With. Riley, Woods.....517–19 1945

Traction Motors, Gear Ratio and Its Effect on. Woods..65–8; disc. 433 1944

Traction Motors, The Application of. Wynne, Woods.....369–74 1940

Traction Motors, Twenty-Five Years' Progress in the Design of. Baldwin.....132–7 1949

Traction Service, Glass-Bulb Mercury-Arc Rectifiers for. Woolgar.....843–6; disc. 1383 1941

Traffic Control for Railroads, Centralised. Hailes.....1167–73 1949

Traffic on Steam Railroads, Handling Suburban. Sloman.....1670–4 1948

Traffic, Power Costs and the Contribution of Existing Transmission Networks Towards Cost Reduction of Power for Electrification of Main Line Railroads. Evans.....596–8; disc. 599 1948

Train Braking, A Unique Application of the Wheatstone Bridge to High-Speed. Hines.....360–2 1948

Train Communication. Grondahl, Bossart.....493–500 1943

Train Control on the San Francisco-Oakland Bay Bridge Railway, Signal System, Interlocking Plants, and Automatic. Davis....158–64 1940

Train, Co-ordinated Electric Drive for a Rubber Calender. John, Knapp, Mosteller.....128–34; disc. 492 1946

Train for the New York City Transit System, Special 10-Car. Sinclair..251–4; disc. 254 1947

Train Ride, Acoustics and the Quiet. Jack.....382–92; disc. 417 1942

Training Bases, Federal Housing, and Other Wartime Projects, Estimating Electric Loads for Military-. Potts.....246–54; disc. 463 1943

Training of the Engineer, Cultural. Boyajian.....6–9; disc. 478 1944

Trains, The Application of Electricity for the Auxiliaries of Railroad. Gardner.....34–6; disc. 632 1941

Trains With Particular Reference to Their Electrical Features, Electropneumatic Brakes for High-Speed. McCune.....137–42 1942

Transductor or Magnetic Amplifier, Some Fundamentals of a Theory of the. Lamm.....1078–85 1947

Transfer, Automatic Control of Air Switches for Line Sectionalising and Load. Rich, Kirwen.....293–9; disc. 299 1947

Transfer Function Loci for Servomechanism Components and Systems, Graphical Determination of. Thomas, Easton.....307–14; disc. 314 1949

Transferred From One Circuit to Another Through Transformers, Lightning Surges. Bellaschi.....731–8; disc. 1002 1943

Transformation Theory of General Static Polyphase Networks. Pipes.....123–8; disc. 128 1940

Transformations in Three-Phase Circuits, Linear. Pipes.....351–6; disc. 619 1941
Transformations Useful in Constructing Analogs of Linear Vibration Problems, Summary of. Corbett.....661–4 1949
Transformer
A Small High-Voltage Bushing Design for High Altitudes. Vogel, Hart.....761–4 1949
Electrical Insulation Deterioration Treated as a Chemical Rate Phenomenon. Dakin.113–18; disc. 118 1948
Feeder Voltage Regulator Accuracy Standards. Birchard.....747–51; disc. 751 1948
Feeder Voltage Regulator Application on Power Systems. Gosinski, Oberholtzer...1458–61; disc. 1461 1948
Preliminary Report on Laboratory Aging Tests on Class A Insulation. (Committee Report).....879–81; disc. 881 1947
Some Fundamentals of D-C Controlled Reactors with Resistive Load. Storm...188–94; disc. 194 1949
Standardization of Reactor Ratings. Kierstead, Thomason.....955–7; disc. 957 1949
"Terratex"—A Thin Flexible Inorganic Insulation. Walters..123–7 1948
The Protective Link. Hodnette, Leonard.....226–9; disc. 679 1941
Universal Curves for D-C Controllable Reactors, Johnson, Merrell, Alley.....31–7; disc. 37 1949
Transformer, A Useful Equivalent Circuit for a Five-Winding. Aicher..66–70; disc. 385 1943
Transformer and Secondary Conductor Economics, Distribution. Brady.483–6; disc. 486 1949
Transformer Audio Noise Problems on an Electric Power System. Murray.....740–7; disc. 747 1949
Transformer Banks—Analysis of Circuit, Open-Delta. Clem.....292–7; disc. 374 1943
Transformer Banks, Asymmetrical Loading of Three-Phase Three-Winding. Denissov.....27–9; disc. 444 1944
Transformer Banks, Carrier-Current Differential Protection for. Cramer.....545–8; disc. 947 1943
Transformer Banks, High-Voltage Fusing of. Marsh, Dodds.....533–5; disc. 977 1942
Transformer Characteristics, A Simple Method for the Determination of Bushing-Current-. Moreton.....581–5; disc. 948 1943
Transformer Characteristics, Bus Protection Independent of Current-. Steeb.....859–62; disc. 1365 1941
Transformer Characteristics, Rectifier. (Committee Report).....1305–11 1949
Transformer Circuits, Criteria for Neutral Stability of Wye-Grounded-Primary Broken-Delta-Secondary. Shott, Peterson.....997–1002; disc. 1394 1941
Transformer Condenser Bushings, Flashover Characteristics of. Cole.27–32; disc. 32 1939
Transformer Cores and Other Electric Apparatus of Rectangular Cross Section, Formulas for Calculating Temperature Distribution in. Higgins.....190–4; disc. 493 1945
Transformer Design, High-Voltage Power. Mallett:
Part I.....526–31; disc. 966 1943
Part II.....1086–91; disc. 1091 1947
Transformer Design Method, Biased-Core-Current-. Specht....635–40 1945
Transformer Design, New Developments in Current-. Camilli.....835–42; disc. 1099 1940
Transformer Design, New Developments in Potential-. Camilli.....483–7; disc. 920 1943
Transformer Differential Protection, A Practical Discussion of Problems in. Shill.....854–8; disc. 1067 1942
Transformer Differential Protection, Harmonic-Current-Restrained Relays for. Hayward.....377–82; disc. 622 1941
Transformer Emergency Overloading Practice, Substation-. Clark.....126–32; disc. 453 1943
Transformer Errors, A Proposed Method for the Determination of Current-. Camilli, Ten Broeck...547–50; disc. 1138 1940
Transformer Errors by the Secondary-Voltage Method, Field Determination of Current-. Goodale, Holbeck.....879–82; disc. 1468 1944
Transformer Faults and Gas Detector Relay Protection, Typical. Madill.....1052–8; disc. 1058 1947
Transformer for Base-Load Stations, A New. Sporn, Putman.....916–18; disc. 1358 1941
Transformer for Bus Differential Protection, New Current. Kennedy, Sinks.....1180–7; disc. 1363 1941
Transformer for Metering, Orthomagnetic Bushing Current. Boyajian, Camilli.....137–40; disc. 427 1945
Transformer Fusing on Rural Power Circuits, Sectionalising and Internal. Watkins....383–8; disc. 388 1947
Transformer Impulse Failure Detection Methods, Experience with. Aicher.....1621–7; disc. 1627 1948
Transformer Insulation and Operating Experience, Field Power-Factor Testing of. Whitmer.....605–11; disc. 741 1941
Transformer Insulation at High Temperature, Aging Characteristics of Dry-Type. Stewart, Whitman...1600–06; disc. 1607 1948
Transformer Insulation, Power-Factor Testing of. Hodtum.....28–30; disc. 647 1941
Transformer-Loss Compensators, Metering With. Schleicher.....851–61; disc. 861 1947
Transformer Magnetising Currents in Long Transmission Lines, Abnormal Overvoltages Caused by. Peterson, Schroeder...32–40; disc. 1943
Transformer Magnetising Inrush Currents and Influence on System Operation. Blume, Camilli, Farnham, Peterson.....366–75; disc. 423 1944
Transformer Manholes and Vaults: Design and Ventilation. Porter...534–9 1949
Transformer Output and Application Charts, Current-. Koller.....573–7; disc. 1422 1944
Transformer Performance, Analysis of Bushing-Current-. Gebelein, Elsi.541–6; disc. 1137 1940
Transformer Performance Based on Admittance-Vector Locus, Current-. Schwager.....26–30; disc. 465 1942
Transformer Protection, Rectifier Relay for. Michelson.....252–4 1945
Transformer Residual Magnetism on Balanced-Current or Differential Relays, The Effect of Current-. Seeley.....164–9; disc. 384 1943
Transformer Ring-Bus Characteristics, Three-Winding. Bills, MacArthur.848–9; disc. 1066 1942
Transformer Secondary Circuits, Grounding of Instrument. (Committee Report).....419–20 1947
Transformer Secondary Windings and Associated Circuits, Overvoltage Protection of Current-. Kaufmann, Camilli...467–72; disc. 919 1943
Transformer Standardization, Current- and Potential-. (Committee Report).....698–706; disc. 998 1942
Transformer Standards, A Discussion of Proposed ASA. Henry.....289 1939
Transformer Stations, Automatic Grounding and Air-Break Switches for Protection of. Ricker.....851–6; disc. 856 1949
Transformer System, Economic Loading of a. Levine, Smith.....733–8; disc. 738 1949
Transformer System, Electrical Accuracy of Selsyn Generator-Control. Chestnut.....570–6; disc. 1118 1946
Transformer Winding Temperatures Continuously With the Transformer Carrying Load, Measuring. Lockie, Stein..1608–16; disc. 1616 1948
Transformer Windings, Hot-Spot Temperatures in Dry-Type. Stewart, Whitman.....763–8; disc. 1445 1944
Transformers, A Capacitance Bridge for Determining the Ratio and Phase Angle of Potential. Bousman, Ten Broeck..541–5; disc. 944 1943
Transformers, A Method for Designing Pulse. Kirschbaum, Warren.....971–8 1949
Transformers, A New Control System for Automatic Parallel Operation of Load-Ratio-Control. Minneci, Farnham.....488–93; disc. 916 1943
Transformers, A Simple Method for Determination of Radio Error and Phase Angle in Current. Wents..949–54; disc. 1369 1941
Transformers, A Study of Sound Levels of. Fahnoe.....277–83; disc. 748 9141
Transformers, A Study of the Relative Severity of Steep Front Waves and Chopped Waves on. Vogel.....64–6; disc. 66 1947
Transformers Affect Differential Relaying. Prolonged Inrush Currents With Parallel. Hayward.....1096–1101; disc. 1305 1941
Transformers Against Lightning Surges, Protection of Power. (Committee Report).....568–77; disc. 749 1941
Transformers and Lightning Arresters—Tidd 500-Kv Test Lines. Lane, Hodnette, Bellaschi, Beck.....1613–18; disc. 1618 1947
Transformers and Reactors to Switching Surges, Equivalent Circuits of. Bewley.....797–802 1939
Transformers and Relays for High-Speed Differential Protection, With Particular Reference to Offset Transient Currents, Current. Wents, Sonnemann.....481–8; disc. 1144 1940
Transformers and Voltage Regulators, Interim Report on Guides for Overloading. (Committee Report).....692–4; disc. 1063 1942
Transformers and Voltage Regulators, Use of Equivalent Annual Ambient Temperature in Overloading. Oldacre.....477–80; disc. 916 1943
Transformers, Applications of Thin Permalloy Tape in Wide-Band Telephone and Pulse. Gans...177–83 1946
Transformers as Determined by the War Emergency, The Rating of Power. Salsbury, Phillips.....255–60; disc. 452 1943
Transformers by Copper Temperature, Loading. Putman, Dann.....504–09; disc. 510 1939
Transformers by Forced Circulation of Cooling Medium, Cooling Power. Paluev, Burnham.....215–21; disc. 445 1943
Transformers by Hot-Spot Temperatures, Emergency Overloading of Air-Cooled Oil-Immersed Power. Montsinger, Ketchum.....906–16; disc. 993 1942

Transformers by Temperature, Effect of Load Factor on Operation of Power. Montsinger.....632–6; disc. 1224 1940

Transformers, Capacitor Stabilization of Arc-Welding. Blankenbuehler, Lester.....54–5 1946

Transformers—Cases Not Covered by the General Rules, Overloading of. Sealey, Hodtum.....149–53; disc. 443 1944

Transformers, Characteristics of Resistance Welding. Murray, Jones.....726–8; disc. 1152 1946

Transformers, Computation of Accuracy of Current. Sinks.....663–8; disc. 1252 1940

Transformers, Controlled Temperature and Insulation Protection in the Operation of Power. Satterlee, Reed.....753–8; disc. 759 1949

Transformers, Design and Measurements of Capacitor Discharge Welding. Dietz, Stein.....154–9; disc. 512 1946

Transformers, Design and Operating Characteristics of Modern Dry-Type Air-Cooled. Satterlee.....701–04; disc. 1445 1944

Transformers, Design of Variac. Karplus.....508–13 1944

Transformers, Dielectric Strength and Protection of Modern Dry-Type Air-Cooled. Bellaschi, Beck.....759–63; disc. 997 1945

Transformers Due to Interruption of Exciting Current, Transient Voltage Rise in. Srinivasan, Vogel.....1632–6 1947

Transformers Due to Lightning, Abnormal Currents in Distribution. Bryant, Newman.....564–8; disc. 1003 1942

Transformers Due to Lightning Currents in Low-Voltage Circuits, Voltage Stresses in Distribution. Beardsley, McMorris, Stewart.....1632–5; disc. 1635 1948

Transformers During Faults, Transient Characteristics of Current:
Part I. Concordia, Weygandt, and Shott.....280–6; disc. 469 1942
Part II. Rothe & Concordia..731–4 1947

Transformers, Effect of Altitude on Temperature Rise of Aircraft. Montsinger.....251–2 1945

Transformers, Emergency Overloads for Oil-Insulated. Vogel, Sloat.....669–73; disc. 988 1942

Transformers, Equivalent Ambient Temperatures for Loading. Sealey.....87–93; disc. 449 1943

Transformers, Equivalent Circuit Impedance of Regulating. Clem.....871–3; disc. 873 1939

Transformers, Extremes in the Insulation Co-ordination of Oil Insulated. Vogel.....965–8; disc. 968 1949

Transformers for High Overcurrent Capacity, The Evolution of Standard Lines of Current. Wentz.....658–62; disc. 1426 1944

Transformers, High-Voltage Compressed-Gas Power. Hobart.....690–2; disc. 1448 1944

Transformers, Hot-Spot Winding Temperatures in Self-Cooled Oil-Insulated. Vogel, Narbutovskih.....133–6; disc. 418 1942

Transformers, Impulse-Failure-Detection Methods as Applied to Distribution. Stewart, Holcomb.....640–44; disc. 956 1945

Transformers in Open Delta, Mobile Capacitor Units for Emergency Loading of. Wolf, Mattison.....83–6; disc. 373 1943

Transformers in Power-System Analysis, Regulating. Hobson, Lewis.....874–83; disc. 883 1939

Transformers, Influence of the Core Form Upon the Iron Losses of Transformers. Stein.....95–103; disc. 103 1948

Transformers, Instantaneous Bus-Differential Protection Using Bushing Current. Seeley, von Roeschlaub...1709–18; disc. 1718 1948

Transformers, Interim Report on Overloading Distribution. (Committee Report).....516–17; disc. 968 1943

Transformers, Lightning Surges Transferred From One Circuit to Another Through. Bellaschi.....731–8; disc. 1002 1943

Transformers, Lightweight Aircraft. Stephens.....1073–8 1949

Transformers, Low-Current-Secondary Current. (Committee Report).....649–50 1946

Transformers, Oil-Impregnated-Paper High-Voltage Condenser Bushings for Circuit Breakers and. Lingal, Cole, Watts.....269–75; disc. 439 1943

Transformers on System Voltage Wave Shapes and Power Factor, The Effect of Over-Exciting. Butler, Pope.....49–53; disc. 656 1941

Transformers Operating in Parallel and in Networks, Operation of Load Ratio Control. Starr.....1274–80; disc. 1407 1941

Transformers, Overcurrent Performance of Bushing-Type Current. Woods, Bottonari.....554–60; disc. 1140 1940

Transformers, Progress in Impulse Testing of. Hagenguth.....999–1005; disc. 1440 1944

Transformers, Regulators, and Reactors, Guides for Operation of. (Committee Report).....797–806; disc. 957 1945

Transformers, Relay Protection of Power. (Committee Report).....911–15; disc. 915 1947

Transformers, Short-Circuit Requirements for. Garin.....710–3 1947

Transformers—Small and Light, Aircraft. Kiltie...899–902; disc. 991 1943

Transformers, Standards and Insulation Characteristics of Oil-Insulated. Vogel.....167–71; disc. 431 1945

Transformers, Surge Characteristics of Two-Winding. Rudenberg.....1136–44; disc. 1333 1941

Transformers, Temperature Limits for Short-Time Overloads for Oil-Insulated Neutral Grounding Reactors and. Part II. Montsinger, Clem.....966–73; disc. 1155 1946
(Part I by V. M. Montsinger—1938)

Transformers, Temperature Rise of Water-Cooled Power. Meador.....18–21 1946

Transformers, The Audio Noise of. Sealey.....109–12; disc. 745 1941

Transformers, The Service Factor Rating of Arc-Welding Generators and. Freeman, Welch.....137–41; disc. 726 1941

Transformers Under Overload Conditions, Thermal Protection of. Montsinger, Camilli.....160–4; disc. 444 1944

Transformers Under Short-Circuit Conditions, Heating of. Montsinger, Halsey.....947–52; disc. 952 1949

Transformers, Use of Thyrite in Power. Meador.....959–64; disc. 964 1949

Transformers with Bonneville Power Administration Transmission System, Matching Electrical Characteristics of McNary Generators and. Hoard, Weiner.....1022–5; disc. 1026 1949

Transformers With Synchronous Condensers for System Voltage Regulation, The Use of Multiwinding. St. Clair.....212–17; disc. 217 1940

Transient Analysis of Completely Transposed Multiconductor Transmission Lines. Pipes.....346–51; disc. 621 1941

Transient Analysis of Symmetrical Networks by the Method of Symmetrical Components. Pipes.....457–9; disc. 1107 1940

Transient and Steady-State Performance of Potential Devices. Harder, Langguth, Woods.....91–9; disc. 99 1940

Transient and Sustained Voltages in Ground-Fault Neutraliser Systems, An Analysis of. Farnhan, Hunter, Peterson.....1257–66; disc. 1394 1941

Transient Behavior of the Two-Stage Rototrol Main Exciter Voltage Regulating System as Determined by Electrical Analogy, The. Carleton.....59–63 1949

Transient Characteristics of Current Transformers During Faults:
Part I. Concordia, Weygandt, and Shott.....280–5; disc. 469 1942
Part II. Rothe and Concordia.731–4 1947

Transient Characteristics of D-C Motors and Generators. McClinton, Brancato, Panoff.....1100–06 1949

Transient Conditions in the Pole Axis, Saturated Synchronous Machines Under. Rudenberg.....297–306; disc. 444 1942

Transient Currents, Current Transformers and Relays for High-Speed Differential Protection, With Particular Reference to Offset. Wentz, Sonnemann.....481–8; disc. 1144 1940

Transient Electrical Torques of Turbine Generators During Short Circuits and Synchronizing. Kirschbaum.....65–70; disc. 492 1945

Transient-Energy Method of Calculating Stability, The. Magnusson.....747–55; disc. 755 1947

Transient Fault Locator for High-Voltage Transmission Lines, A. Spaulding, Diemond.....1005–10; disc. 1010 1949

Transient Heat Flow, The Accuracy of Measurements in Lumped R-C Cable Circuits as Used in the Study of. Paschkis, Heisler.....165–71; disc. 426 1944

Transient High Voltages, A Simple and Inexpensive Method for Accurately Measuring Steady-State and. Levinton.....1304–10; disc. 1310 1947

Transient Magnetic Fields, The Shielding of Permanent Magnets From. Wey.....875–7; disc. 1338 1941

Transient Overspeeding of Induction Motors. Ager.....1030–2 1941

Transient Performance of Induction Motors. Maginniss, Schultz.....641–6; disc. 1458 1944

Transient Performance of Induction Motors, Electromechanical. Weygandt, Charp..1000–09; disc. 1167 1946

Transient Performance of Servomechanisms, Comparison of Steady-State and. Chestnut, Mayer.....765–77 1949

Transient Phenomena, A New Instrument for Recording. Begun.....175–7; disc. 418 1942

Transient Problems, A New Method for Introducing Relaxed Initial Conditions in. Johnson...178–81 1941

Transient Recovery-Voltage Characteristics of Electric Power Systems. St. Clair, Adams.....666–9; disc. 1016 1942

Transient Recovery Voltages, An Oscillograph for Recording. Hoover.....1086–91; disc. 1174 1946

Transient Recovery Voltages and Circuit-Breaker Performance. Van Sickle.....804–13; disc. 1014 1942

Transient Recovery Voltages, Practical Calculation of Circuit. Adams, Skeats, Van Sickle, Sillers.....771–9; disc. 1017 1942

Transient Response of Controlled Rectifier Circuits. Chin, Walter.....208–14 1945

Transient Shaft Torques in Turbine Generators by Means of the Electrical-Mechanical Analogy, Determination of. McCann, Warren, Criner.....51–6; disc. 492 1945

Transient Shaft Torques in Turbine Generators Produced by Transmission-Line Reclosing. Batchelor, Whitehead, Williams.....159–64; disc. 164 1948

Transient-Stability Analysis of Series Capacitors in Long Transmission Lines, Steady-State and. Butler, Paul, Schroeder..58–65; disc. 377 1943

Transient Starting Torques in Induction Motors. Wahl, Kilgore.....603–07; disc. 1263 1940

Transient Temperature Phenomena of 3-Conductor Cables. Wollaston.....1284–95; disc. 1295 1949

Transient Torques in Squirrel-Cage Induction Motors, With Special Reference to Plugging. Gilfillan, Kaplan.....1200–09; disc. 1363 1941

Transient Voltage Rise in Transformers Due to Interruption of Exciting Current. Srinivasan, Vogel.1632–6 1947

Transient Voltages in Networks, Analysis of. Bellaschi, Palermo..973–81 1940

Transients and Synchronizers for Large Machines, Synchronizing. Evans, Gullibsen, Myhre.....965–73; disc. 1104 1940

Transients Caused by Switching and Faults, Power-System. Evans, Monteith, Witzke.386–94; disc. 394 1939

Transients in A-C Motors and Generators, Smith.....61–9 1946

Transients in Arc-Furnace Circuits, A Study of Voltage. Hodtum, Rice.....556–62; disc. 921 1943

Transients in Arc-Furnace Circuits, Voltage. (Committee Report).....563–8; disc. 1435 1944

Transients in 2-Phase Synchronous Machines. Wilson.....1360–7 1949

Transients, Influence of Resistance on Switching. Van Sickle.....397–404; disc. 404 1939

Transients on Power Systems, Practical Calculation of Electrical. Evans, Witzke.....690–6; disc. 923 1943

Transients, Resistance-Welding. Kimberly.....94–5 1942

Transients, Simplified Graphical Method of Computing Thermal. Narbutovskih.....78–81; disc. 82 1947

Transients, The Cathode-Ray Oscillograph Applied to Long-Time Switching. Dunlap, Rohats.....231–4; disc. 445 1943

Transit Division, Chicago Transit Authority, Three-Compartment Articulated Cars for Test on Rapid. Otis.....416–18 1948

Transit System—Factors That Determine the Choice of Vehicle, Modernization of a. Hoard.....292–303; disc. 303 1940

Transit System for Toronto, Proposed Rapid. Duncan.....939–46 1947

Transit System, Special 10-Car Train for the New York City. Sinclair..251–4; disc. 254 1947

Transit System Subway Cars, Motor Control for Latest New York. Riley.....900–03 1947

Transit Systems, Modern Motors Serve City. Clardy, Atwell.....850–4 1941

Transition, Importance of Gas in Electrodes for the Glow-to-Arc. Maxfield, Hegbar, Eaton.....816–21; disc. 1095 1940

Translations, Codes and. Myers.....592–7 1949

Transmission

A Large-Scale General-Purpose Electric Analog Computer. Harder, McCann.....664–73 1948

A Practical Discussion of Problems in Transformer Differential Protection. Shill...854–8; disc. 1067 1942

A 66-Kv Subtransmission Plan for a Metropolitan Area. Smith, Michelson.....908–12; disc. 912 1949

A Study of Voltage Transients in Arc-Furnace Circuits. Hodtum, Rice.....556–62; disc. 921 1943

A 10,000-Kva Series Capacitor Improves Voltage on 66-Kv Line Supplying Large Electric Furnace Load. Jones, Arthur, Stearns, Johnson.....345–51; disc. 351 1948

Abnormal Voltage Conditions in Three-Phase Systems Produced by Single-Phase Switching. Clarke, Peterson, Light.....329–39; disc. 618 1941

Ampere Load Limits for Copper in Overhead Lines. Kidder, Woodward.....148–52; disc. 388 1943

An Analysis of Transient and Sustained Voltages in Ground-Fault Neutralizer Systems. Farnham, Hunter, Peterson.....1257–66; disc. 1394 1941

An Experimental Investigation of the Electrical Performance of Bolted Aluminum-to-Copper Connections. Bonwitt.....1208–18; disc. 1218 1948

Application of Carrier to Power Lines. Rives...835–44; disc. 945 1943

Arcing Faults in Power Systems. Concordia, Peterson.....340–6; disc. 614 1941

Arcing Ground Tests on a Normally Ungrounded 13-Kv 3-Phase Bus. Allen, Waldorf.298–306; disc. 498 1946

Basic Impulse Insulation Levels. Sporn, Powel....596–8; disc. 1197 1940

Broken Conductor Effect on Sags in Suspension Spans. Bissiri, Landau.....1181–8 1947

Burning of Wood Structures by Leakage Currents. Ross.....279–84; disc. 285 1947

Capacitor Installation at Newport News. Parrack, Harder.....1165–73; disc. 1378 1944

Capacitors and Automatic Boosters for Economical Correction of Voltage on Distribution Circuits. Olmsted.....491–6; disc. 496 1939

Capacitors and Circuit Performance. Butler.....408–15; disc. 646 1941

Capacitors, Condensers, and System Stability. Butler, Schroeder, Ridgway.....1130–8; disc. 1378 1944

Carrier-Current Equipment. Laughlin.....147–51; disc. 156 1939

Cause and Control of Some Types of Switching Surges, The. Schroeder.....696–700; disc. 933 1943

Change of Frequency on the System of the Southern California Edison Company. Tice, Kroneberg, Johnson, Enefer, Tugby, Sidway.....809–25; disc. 825 1948

Channels for Operation of Supervisory Control Equipment. Derr, Brown.....1654–60 1948

Conductor Vibration—Theory of Torsional Dampers. Speight.....907–11; disc. 1376 1941

Connection Arrangements and Protective Practices for Shunt Capacitor Banks. Clark, Farnham.....1226–30; disc. 1231 1949

Corona Considerations on High-Voltage Lines and Design Features of Tidd 500-Kv Test Lines. Wagner, Peterson, Gross.....1583–90; disc. 1590 1947

Corona Experience on Transmission Line. Cozzens, Peterson.....137–40; disc. 156 1939

Deionization Time of High-Voltage Fault-Arc Paths. Harrington, Starr.....997–1003; disc. 1003 1949

Design and Experience With 4-Kv Primary Network Systems in the Washington Area. Lank.....712–16; disc. 716 1949

Design and Layout of 66-Kv 10,000-Kva Series Capacitor Substation. Miller.....355–9 1948

Design and Operation of High-Voltage Axial Air-Blast Circuit Breakers. Leuthold.....869–75; disc. 1073 1942

Dielectric-Recovery Characteristics of Large Air Gaps. McCann, Clark.....45–52; disc. 394 1943

Dielectric Strength of Porcelain. Bellaschi, Manning.....651–6; disc. 656 1939

Distance Relay Protection for Subtransmission Lines Made Economical. Audlin, Warrington.....574–8; disc. 976 1943

Economical Loading of High-Voltage Cables Installed in Underground Subway System. Thomas.....611–15; disc. 615 1939

Effect of Altitude on Impulse and 60-Cycle Strength of Electrical Apparatus. Bellaschi, Evans.....236–41; disc. 442 1944

Effect of Corona on Coupling Factors Between Ground Wires and Phase Conductors, The. McCann.....818–26; disc. 940 1943

Effect of Lightning on Thin Metal Surfaces. McEachron, Hagenguth.....559–64; disc. 1013 1942

Effect of Radio Frequencies of a Power System on Radio-Receiving Systems. Aggers, Pakala, Stickel.....169–72; disc. 459 1943

Effect of Restriking on Recovery Voltage. Concordia, Skeats.....371–5; disc. 375 1939

Electrical Properties of Ceramics as Influenced by Temperature. Lindsay, Berberich.....734–41; disc. 741 1948

Electromagnetic Horn Design. Chu, Barrow.....333–8 1939

Equivalent Circuits for Oscillating Systems and the Riemann-Christoffel Curvature Tensor. Kron.....25–32; disc. 372 1943

Equivalent Circuits of Transformers and Reactors to Switching Surges. Bewley.....797–802 1939

Experience With Single-Pole Relaying and Reclosing on a Large 132-Kv System. Trainor, Parks.....405–11; disc. 411 1947

Facilities for the Supply of Kilowatts and Kilovars. Sels, Seely.....249–55; disc. 402 1942

Factors Affecting Arc Extinction on a Petersen-Coil System.....576–81; disc. 581 1939

Field Disturbances Produced by Lightning. McCann, Morgan.....345–57; disc. 427 1943

Field Investigation of Lightning Surges at Substations. Gross, McCann.....569–74; disc. 574 1947

Field Investigation of the Characteristics of Lightning Currents Discharged by Arresters. Gross, McCann, Beck.....266–71; disc. 461 1942

Field Investigations of Lightning. Wagner, McCann, Beck.....1222–30; disc. 1381 1941

Field Tests for Development of 10,000,000-Kva, 230-Kv Oil Circuit Breakers for Grand Coulee Power Plant. Killgore, Clagett.....271–83; disc. 283 1948

Field Tests on High-Capacity Air-Blast Station-Type Circuit Breakers. Strang, Skeats.....100–04; disc. 409 1942

Field Tests on High-Capacity Station Circuit Breakers. Braley.....31–5; disc. 408 1942

Flashover Characteristics of Transformer Condenser Bushings. Cole.....27–32; disc. 32 1939

Flashovers of Suspension Insulators Due to Contamination. Adler, Wickham, Oldacre.....1680–3; disc. 1683 1948

Formulas for Conductor Size According to Cost of Resistance Loss. Dwight.....22–5; disc. 497 1946

Frequency Modulation for Power-Line Carrier Current. Kenefake.....616–20; disc. 953 1943

Galloping Conductors and a Method for Studying Them. Tornquist, Becker.....1154–61; disc. 1161 1947

Galvanic Corrosiveness of Soil Waters. Phelps, Kahn.....156–9; disc. 482 1945

General Operation of Transmission Line. Peterson.....131–7; disc. 156 and 911 1939

Harmonics in the A-C Circuits of Grid-Controlled Rectifiers and Inverters. Evans, Muller.....861–8; disc. 869 1939

High-Speed Single-Pole Reclosing. Trainor, Hobson, Muller.....81–7; disc. 422 1942

High Voltage D-C Testing of Rubber-Insulated Wire. Eddy, Fenn.....576–8; disc. 1126 1946

High-Voltage Fusing of Transformer Banks. Marsh, Dodds.....533–5; disc. 977 1942

Hy-Therm Copper—An Improved Overhead-Line Conductor. Hickernell, Jones, Snyder..22–7; disc. 27 1949

Impedances Seen by Relays During Power Swings With and Without Faults. Clarke.....372–84; disc. 471 1945

Improvements to Oklahoma City Primary Network. Brady.....701–02; disc. 702 1949

Improving Stability by Rapid Closing of Bus-Tie Switches. Kimbark.....61–4; disc. 456 1945

Impulse and 60-Cycle Characteristics of Driven Grounds:
Part I. Bellaschi.123–8; disc. 717 1941
Part II. Bellaschi, Armington, Snowden.....349–63; disc. 446 1942
Part III. Bellaschi, Armington.....334–45; disc. 396 1943

Inductive Co-ordination With Series Sodium Highway Lighting Circuits. Kent, Blye.....325–32; disc. 332 1939

Influence of Resistance on Switching Transients. Van Sickle.....397–404; disc. 404 1939

Instrumentation and Measurement—Tidd 500-Kv Test Lines. Tremaine, Lippert.....1624–30; disc. 1630 1947

Instruments and Methods of Measuring Radio Noise. Aggers, Foster, Young.....178–87; disc. 187 1940

Insulation and Lightning Protection. Cossens..140–6; disc. 156 and 911 1939

Insulator Surface Contamination. Frey.....1420–4; disc. 1424 1948

Insulators and Line Hardware for Tidd 500-Kv Test Lines. Gross, McCoy, Sheadel.....1592–1602; disc. 1602 1947

Insulators to Withstand Air-Borne Deposits. Taylor.....1436–41; disc. 1441 1948

Interim Report on Emergency Overloads on Overhead Conductors. (Committee Report).....588–90; disc. 940 1943

Internal Corona Discharges in Insulated Cables. Greenfield.....591–600; disc. 600 1947

Joints and Clamps for Aluminum Conductors. Tebo.....1145–50; disc. 1150 1948

Kilowatts, Kilovars, and System Investments. Butler.....133–7; disc. 368 1943

Lightning and 60-Cycle Power Tests on Wood-Pole Line Insulation. Bellaschi.....838–47; disc. 847 1947

Lightning Investigation at High Altitudes in Colorado. Robertson, Lewis, Foust....201–08; disc. 453 1942

Lightning Investigation on a 220-Kv System. Part III. Bell.....822–8; disc. 1098 1940
(Part I—1934; Part II—1936)

Lightning Investigation on 132-Kv System of American Gas and Electric Company. Gross, Lippert.....76–84; disc. 474 1945

Lightning Investigation on the 25-Kv System of the West Penn Power Company. Bowen, Beck.....831–6; disc. 836 1947

Lightning Investigation on Wallenpaupack-Siegfried 220-Kv Line of Pennsylvania Power and Light Company. Bell, Packer..196–201 1942

Lightning Investigations on 33-Kv Wood-Pole Lines. Andrews, McCann.....768–77; disc. 954 1945

Lightning Protection of Wood-Pcle Lines. Sels, Gothberg.....328–31; disc. 331 1940

Lightning Strokes in Field and Laboratory. Part III. Bellaschi.....1248–56; disc. 1392 1941
(Part I—1935; Part II—1937)

Lightning Surges Transferred From One Circuit to Another Through Transformers. Bellaschi.....731–8; disc. 1002 1943

Line Conductors—Tidd 500-Kv Test Lines. Peterson, Simmons, Hickernell, Noys...1603–11; disc. 1611 1947

Linear Couplers—Field Tests and Experience at York and Middletown, Pa. Harder, Klemmer, Neidig.....107–13 1946

Low-Gas-Pressure Cable. Shanklin.....307–15; disc. 315 and 912 1939

Low-, Medium-, and High-Pressure Gas-Filled Cable. Shanklin.....719–26; disc. 1021 1942

Maximum Safe Operating Temperature for 15-Kv Paper-Insulated Cables. Franklin, Thomas.....556–60; disc. 560 1939

Measurement and Control of Conductor Vibration. Tebo.....1188–93; disc. 1380 1941

Metal-Clad Unit-Type Switchgear for 33-Kv Service. Kreger.....360–8; disc. 509 1946

Metering Power on the Low-Voltage Side. Petsinger, Lenehan.....159–63; disc. 406 1943

Method for A-C Network Analysis Using Resistance Networks. Enns.....875–80; disc. 1069 1942

Minimum Insulation Level for Lightning Protection of Medium Voltage Lines. Ekvall.....128–32; disc. 719 1941

Modern Impulse Generators for Testing Lightning Arresters. Brownlee.....539–44; disc. 984 1942

Moisture Equilibrium Between Gas Space and Fibrous Materials in Enclosed Electric Equipment. Piper.....791–7; disc. 1152 1946

Multichannel Carrier-Current Facilities for a Power Line. Sandstrom, Foster.....71–6; disc. 469 1942

Negative Damping of Electrical Machinery. Concordia, Carter.....116–19; disc. 752 1941

Notes on Emergency Ratings. Kidder.....599–607; disc. 607 1939

Open-Delta Transformer Banks—Analysis of Circuit. Clem.....292–7; disc. 374 1943

Operating Experience With Petersen Coils on 66-Kv System of Metropolitan Edison Company. Rankin, Neidig.....568–73; disc. 573 1939

Operation of Load Ratio Control Transformers Operating in Parallel and in Networks. Starr.....1274–80; disc. 1407 1941

Overvoltages During Power-System Faults. Clarke, Crary, Peterson.....377–85; disc. 385 1939

Performance of Dust-Contaminated Insulators in Fog. Cossens, Blakeslee.....1686–91; disc. 1691 1948

Phase-Angle Control of System Interconnections. Pierce, Hamilton.....83–91; disc. 91 1939

Photographic Study of Lightning. Hagenguth.....577–83; disc. 583 1947

Pole Fires Due to Insulator Contamination. Wickham, Adler, Oldacre.....1741–4 1948

Poles and Pole Treatment. Colley.....685–91 1942

Power-Line Carrier Channels. Brown.....246–51 1945

Power System Development for Service to Hanford Plutonium Plant. Hoard, Curtin.....773–8 1946

Power-System Interconnection in Quebec. Way.....841–7 1942

Power System Overvoltages Produced by Faults and Switching Operations. (Committee Report).....912–21; disc. 921 1948

Power-System Transients Caused by Switching and Faults. Evans, Monteith, Witzke....386–94; disc. 394 1939

Power System Voltage Control Without Feeder Voltage Regulators. Smeloff.....1462–4; disc. 1465 1948

Power-System Voltage-Recovery Characteristics. Peterson.....405–11; disc. 411 1939

Powerton-Crawford 220-Kv Line—Design and Construction Features. Oldacre, Wollaston.....1108–20; disc. 1297 1941

Practical Calculation of Electrical Transients on Power Systems. Evans, Witzke....690–6; disc. 923 1943

Primary Networks on the Duquesne Light Company System. Holben, Lange.....704–09; disc. 709 1949

Proposed Standards for Outdoor Bushings. (Committee Report).....590–1; disc. 1207 1940

Protection of Pilot Wires From Induced Potentials. Killen, Law.....267–70 1946

Protector Tubes for Power Systems. Peterson, Rudge, Monteith, Ludwig.....282–8; disc. 288 1940

Radio-Noise Influence of 230-Kv Lines. Rorden..677–81; disc. 682 1947

Reclosing of Single Tie Lines Between Systems. Parker, Travers.....119–22; disc. 470 1944

Regulating Transformers in Power-System Analysis. Hobson, Lewis.....874–83; disc. 883 1939

Regulation of A-C Generators With Suddenly Applied Loads. Harder, Cheek.....310–18; disc. 490 1944

Relative Surface Voltage Gradients of Grouped Conductors. Temoshok.....1583–9; disc. 1589 1948

Relays and Breakers for High-Speed Single-Pole Tripping and Reclosing. Goldsborough, Hill.....77–81; disc. 429 1942

Report of a Survey on the Performance of Shunt Capacitors. (Committee Report).....1200–06; disc. 1206 1949

Report on Apparatus Bushings. (Committee Report).....266; disc. 695 1941

Report on the Operation and Maintenance of Shunt Capacitors. (Committee Report).....1208–18 1949

Results of Tests Carried Out at the 500-Kv Experimental Station of Chevilly (France), Especially on Corona Behavior of Bundle Conductors. Cahen.....1118–25; disc. 1125 1948

Safe Ratings for Overhead Line Conductors. Olmsted.....845–53; disc. 938 1943

Shielding of Substations. Wagner, McCann, Lear...96–100; disc. 448 1942

Shunt Capacitor Installation for Single-Phase Railway Service. Brown, Witzke..258–65; disc. 265 1948

Shunt Capacitors. (Committee Report).....222–30; disc. 372 1943

Six Years' Experience With Factory-Built Unit-Type Substations. Miller, Miller.....751–6; disc. 1150 1946

Staged Fault Tests of Relaying and Stability on Kansas-Nebraska 270-Mile 154-Kv Interconnection. Minard, Gow, Wolfe, Swanson.....358–67; disc. 425 1943

Study of Driven Rods and Counterpoise Wires in High-Resistance Soil on Consumers Power Company 140-Kv System. Hemstreet, Lewis, Foust.....628–34; disc. 1000 1942

Superposition Methods for Calculating Effects of Additions to Power Systems. Rettig.....396–401; disc. 648 1941

Surge Characteristics of a Buried Bare Wire. Sunde.....987–91; disc. 1180 1940

Surges on Chicago 12-Kv System. Wollaston, Plumley.....260–5; disc. 694 1941

Switchgear Equipment for Tidd High-Voltage Test Lines. Lane, Wyman.....1619–21; disc. 1621 1947

Symmetrical Nomenclature of Three-Phase Circuits. Brady.....955–7; disc. 1402 1941

Synthetic or Equivalent Load Curves. Hamilton.....369–81 1942

System Lower-Harmonic Voltages—Methods of Calculation and Control by Capacitors. Feaster, Harder.....1060–6; disc. 1310 1941

Temperature and Electric Stress in Impregnated - Paper Insulation. Whitehead, MacWilliams.....10–13; disc. 458 1942

Tennessee Valley Authority Hydroelectric Stations—Electrical Design. Hopkins.1281–93; disc. 1408 1941

Tests and Developments in Connection With Hot-Line Insulator Washing. Hill.....1203–16 1947

Tests on Oil-Impregnated Paper. Part IV. Race..721–9; disc. 1083 1940 (Part I—1936; Part II—1937; Part III—1938)

The Calculated Risk of Operating Capacitors Without Individual Fuses. Brooks.....1219–25; disc. 1225 1949

The Combination of Supervisory Control With Other Functions on Power-Line Carrier Channels. Cheek, Derr.....241–6 1945

The Co-ordination of Electrical Equipment With Basic Insulation Levels. Foote, North....585–9; disc. 1204 1940

The Effect of Overexciting Transformers on System Voltage Wave Shapes and Power Factor. Butler, Pope.....49–53; disc. 656 1941

The Electrical Performance of Ceramic Dielectrics at Elevated Temperatures. Frey, Jesatko.....911–20; disc. 1126 1946

The Interruption of Charging Current at High Voltage. Leeds, Van Sickle.....373–80; disc. 381 1947

The "Linascope"—An Echo-Ranging Type Fault Locator for High-Voltage Lines. Leslie, Kidd.....1162–6; disc. 1166 1948

The Measurement of Lightning Currents in Direct Strokes. McCann..1157–64; disc. 1370 1944

The Preservative Treatment of Various Species for Poles and Crossarms. MacLean.....549–54 1946

The Probable Breakdown Voltage of Paper Dielectric Capacitors. Brooks.....1137–44; disc. 1144 1947

The 220,000-Volt System of the Hydro-Electric Power Commission of Ontario. Part II. Frampton, Wood....1215–21; disc. 1373 1941 (Part I by Brandon—1930)

Thermal Rating of Overhead Line Wire. Zucker...501–07; disc. 918 1943

Three-Winding Transformer Ring-Bus Characteristics. Bills, MacArthur.....848–9; disc. 1066 1942

Transformer Magnetising Inrush Currents and Influence on System Operation. Blume, Camilli, Farnham, Peterson...366–75; disc. 423 1944

Transformers and Lightning Arresters—Tidd 500-Kv Test Lines. Lane, Hodnette, Bellaschi, Beck.....1613–18; disc. 1618 1947

Traveling Waves Initiated by Switching. Bewley.....18–26; disc. 26 1939

Utilization Voltages. Seelye.....147–51; disc. 430 1942

Wave Shape of 30- and 60-Phase Rectifier Groups. Marti, Taylor..218–24; disc. 224 1940

What Wood May Add to Primary Insulation for Withstanding Lightning. Lusignan, Miller.....534–40; disc. 1177 1940

Transmission and Relaying Problems on the Fort Peck Project. Floor, Muller, Goldsborough.....209–14; disc. 466 1944

Transmission as Influenced by Excitation Systems, Long-Distance Power. Concordia, Crary, Maginniss.....974–87; disc. 1175 1946

Transmission by Submarine Cable, Picture. Milnor...105–08; disc. 756 1941

Transmission Capabilities at Grand Coulee, An Analysis to Determine the Optimum Bussing Arrangements and. Hoard, Bills.....1259–64; disc. 1478 1944

Transmission Circuits, Engineering Requirements for Program. Cowan, McCurdy, Lattimer.....142–7 1941

Transmission Circuits, Series Capacitors for. Starr, Evans.....963–73; disc. 1044 1942

Transmission Costs, Railroad Electrification Energy Conversion and. Kimball, Holm..219–26; disc. 227 1948

Transmission, Economics of Long-Distance A-C Power. Crary, Johnson.....1092–9; disc. 1099 1947

Transmission, Economics of Long-Distance Energy. Pierce, George.....1089–94; disc. 1094 1948

Transmission, Electronic Stabilizer for Power. Alexanderson, Prince.....950–3; disc. 953 1947

Transmission for Pickup and Delivery of Telegrams, Facsimile. Ridings.....1293–8 1948

Transmission-Line and System Problems in Supplying Large Electric-Arc Furnaces During Wartime. Jones.....197–202; disc. 392 1943

Transmission Line at Carrier Current Frequencies, Loss Measurements Made on Underground-Cable Overhead-Conductor 132-Kv. Cornelius, Storer.....597–601 1949

Transmission Line Clamps, Magnetic Heating of. Crabb, Sheadel.....1032–5 1949

Transmission Line Conductors, Coordination of Insulation and Spacing of. Lewis...690–4; disc. 1142 1946

Transmission Line Design and Performance Based on Direct Lightning Strokes. Harder, Clayton.....439–46; disc. 447 1949

Transmission Line, Design and Protection of 10,000-Kva Series Capacitor for 66-Kv. Johnson, Marbury, Arthur.....363–7; disc. 368 1948

Transmission-Line Diagrams, New. Schwager, Wang.....610–15; disc. 955 1945

Transmission-Line Electric Loadings. Crary.....1198–1204; disc. 1373 1944

Transmission Line Fault Locator Using Fault-Generated Surges, A. Stevens, Stringfield.....1168–78; disc. 1178 1948

Transmission Line Joints by Means of a Bolometer, Detection of Overheated. Leslie, Wait.....64–8; disc. 68 1949

Transmission-Line Lightning Protection, Practical Design of Counterpoise for. Hansson, Waldorf.....599–603; disc. 1010 1942

Transmission Line, Measured Electrical Constants of 270-Mile 154-Kv. Streifus, Roadhouse, Gow.....538–42; disc. 1351 1944

Transmission Line of the Southern California Edison Co., Ltd., Engineering Features of the 230-Kv Boulder-Chino. Kroneberg, Hunter.....982–7; disc. 1176 1940

Transmission-Line Problems in the Case of Attenuating Transmission Line, The Solution of. Glinski....46–9 1946

Transmission-Line Reclosing, Transient Shaft Torques in Turbine Generators Produced by. Batchelor, Whitehead, Williams.....159–64; disc. 164 1948

Transmission Line Relay Protection. Draper.....151–6; disc. 156 1949

Transmission-Line Shielding, The Influence of Towers and Conductor Sag on. Sorensen, McMaster.....159–65; disc. 448 1942

Transmission Line, The Tapered. Milnor.....345–6 1945

Transmission Lines, A Transient Fault Locator for High-Voltage. Spaulding, Diemond..1005–10; disc. 1010 1940

Transmission Lines, Abnormal Overvoltages Caused by Transformer Magnetising Currents in Long. Peterson, Schroeder.....32–40 1943

Transmission Lines Along Uniformly Rotating Reference Frames, Stationary Networks and. Kron.....690–6 1949

Transmission Lines and Distribution Feeders, Sensitive Ground Protection for. Gross.....968–71 1941

Transmission Lines and Its Effect on the Application of Petersen Coils, The Electrostatic Unbalance of. Lyon.....107–12; disc. 112 1939

Transmission Lines, Arc-Furnace Loads on Long. LeClair.....234–9; disc. 239 1940

Transmission Lines as Affecting Ground-Fault Neutralizers, Report on Survey of Unbalanced Charging Currents on. (Committee Report).....1328; disc. 1329 1949

Transmission Lines, Carrier-Current Losses Measured and Interference Minimized on Boulder-Los Angeles. Laughlin, Pakala, Reagan.....4–9; disc. 9 1940

Transmission Lines, Comparative Performance Records—Steel and Wood. Booker..686–9; disc. 689 1949

Transmission Lines, Excitation Problems in Hydroelectric Generators Supplying Long. Killgore.....1277–82; disc. 1282 1947

Transmission Lines, Experience With Preventive Lightning Protection on. Waldorf...249–54; disc. 701 1941

Transmission Lines, Experience With Ultrahigh-Speed Reclosing of High-Voltage. Sporn, Muller.....625–31; disc. 631 1939

Transmission Lines, Five Years' Experience With Ultrahigh-Speed Reclosing of High-Voltage. Sporn, Muller.....241–6; disc. 690 1941

Transmission Lines from the New Sunbury Generating Station, Relaying of. Green, Oewel, Ramsaur.....873–7; disc. 877 1949

Transmission Lines, Induced Voltages on. Wagner, McCann.....916–30; disc. 1007 1942

Transmission Lines, Lightning Investigation on. Lewis, Foust:
Part VII.....227–32; disc. 233 1940
Part VIII.....107–15; disc. 474 1945
(Part I—1930; Part II—1931; Part III—1933; Part IV—1934; Part V—1935; Part VI—1937)

Transmission Lines, Lightning Performance of 110- to 165-Kv. (Committee Report)..294–304; disc. 304 1939

Transmission Lines, Lightning Performance of 220-Kv. Part II. (Committee Report).....70–6; disc. 499 1946
(Part I—1934)

Transmission Lines, Nine Years' Experience With Ultrahigh-Speed Reclosing of High-Voltage. Sporn, Muller.....225–8; disc. 445 1945

Transmission Lines on Current Flow to Ground Faults, The Effects of Mutual Induction Between Parallel. Holbeck, Lantz.....712–15; disc. 1002 1943

Transmission Lines, Performance of 161-Kv and 115-Kv. Hapgood, Almon.....863–9; disc. 869 1947

Transmission Lines, Performance Requirements for Relays on Unusually Long. Poage, Streifus, MacGregor, George..275–83; disc. 422 1943

Transmission Lines, Protective Relaying for Long. Warrington.....261–8; disc. 427 1943

Transmission Lines, Relay Protection of Tapped. Bostwick, Harder.....645–50; disc. 969 1943

Transmission Lines, Shielding of. Wagner, McCann, MacLane.....313–28; disc. 612 1941

Transmission Lines, Steady-State and Transient-Stability Analysis of Series Capacitors in Long. Butler, Paul, Schroeder...58–65; disc. 377 1943

Transmission Lines, Switching High-Voltage. Johnson, Wilson.....1552–60; disc. 1560 1947

Transmission Lines, Ten Years' Performance of Lightning-Resistant Wood-Pole. Schahfer, Knutz.....934–40; disc. 940 1948

Transmission Lines, The Frequency of Occurrence and the Distribution of Lightning Flashes to. Golde.....902–10; disc. 982 1945

Transmission Lines, Transient Analysis of Completely Transposed Multiconductor. Pipes.....346–51; disc. 621 1941

Transmission Lines, Wood-Pole 230-Kv. Clark.....94–7 1943

Transmission Loss by Use of the Network Analyzer to Determine Plant Loading Schedules, Co-ordination of Fuel Cost and. George, Page, Ward.....1152–60; disc. 1160 1949

Transmission Losses, Intrasystem. George.....153–8; disc. 387 1943

Transmission Networks, Power Costs and the Contribution Towards Cost Reduction of Power for Electrification of Main Line Railroads with Moderate Traffic. Evans.....596–8; disc. 599 1948

Transmission of Electric Power at Extra High Voltages. Sporn, Monteith.....1571–7; disc. 1577 1947

Transmission Over Wire Lines, Television. Strieby, Wentz.....1090–6; disc. 1311 1941

Transmission Rating of Telephone Systems. Codd....694–8; disc. 1123 1946

Transmission Speed, Considerations on Facsimile. Burkhard.....418–23; disc. 423 1949

Transmission Stations, Ring Busses for Generating and. Michelson, Galassini.....665–9; disc. 1372 1944

Transmission System, An Eight-Year Investigation of Lightning Currents and Preventive Lightning Protection on a. Hansson, Waldorf.....251–8; disc. 463, 1350 1944

Transmission System, Characteristics of a 400-Mile 230-Kv Series-Capacitor-Compensated. Hoard.....1102–14; disc. 1178 1946

Tranamission System for Animated Line Images, Narrow-Band. Skellett.....124–7 1939

Transmission System From the Grand Coulee Power Plant, Development of the. Hoard, Helwith.....1095–1100; disc. 1100 1948

Transmission-System Insulation Strength, Rationalization of. Part III. Sporn, Gross.....591–5; disc. 1201 1940
(Part I—1928; Part II—1930)

Transmission System, Matching Electrical Characteristics of McNary Generators and Transformers with Bonneville Power Administration. Hoard, Weiner..1022–5; disc. 1026 1949

Transmission System of the American Gas and Electric Company, Lightning Investigation on 132-Kv. Gross, Lippert.....178–85; disc. 450, 974 1942

Transmission Systems, Analysis of the Application of High-Speed Reclosing Breakers to. Crary, Kennedy, Woodrow.....339–48; disc. 423 1942

Transmission Systems and Tie Lines, Cost Studies of 69- to 230-Kv Underground Power-. Holm.....852–60 1949

Transmission Systems, Costs Study of 69- to 345-Kv Overhead Power-. Holm.....406–22 1944

Transmission Systems, Power Geometry of General. Altar 312–17; disc. 493 1945

Transmission Systems, Self-Excited Oscillations of Capacitor-Compensated Long-Distance. Bodine, Concordia, Kron....41–4; disc. 371 1943

Transmission Systems, Stability Limitations of Long-Distance A-C Power-. Clarke, Crary.....1051–9; disc. 1299 1941

Transmission Systems, Stability Study of A-C Power-. Holm.....893–905; disc. 1046 1942

Transmission Used in Developmental 400-Cycle Electric System for Large Aircraft, Governor for Variable-Ratio. Desch, Garr, Hutton.....194–8 1946

Transmitter, A Push-Button-Tuned 50-Kw Broadcast. Rockwell, Lepple.....1–3 1941

Transmitter for Standard Band Broadcasting, A New 150-Kilowatt. Boerner.....943–51 1948

Transmitting Electric Energy in Airplanes, Cables Used for. Peters, Phillips, Kronstein, Jealous.....1270–82; disc. 1474 1944

Transport Airplanes, Automatic Temperature Control for. Hedges.....1197 1947

Transport, Modern Rail. Wright.....1306–12; disc. 1247 1940

Transportation

A Control System for Modern Multiple-Unit Rapid-Transit Cars. Moore.....142–7 1942

A Unique Application of the Wheatstone Bridge to High-Speed Train Braking. Hines.....360–2 1948

Application of Traction Motors, The. Wynne, Woods.....369–74 1940

Application of Voltage Regulators to Aircraft Generators, The. Thompson, Crever.....363–5 1942

Are the Overhead Distribution Costs Retarding Railroad Electrification? Birch.....243–55; disc. 255 1948

Comparative Operating Results of Steam, Diesel-Electric, and Electric Motive Power on the Great Northern Railway Electrification. Gaynor.....231–4; disc. 234 1948

Electric Braking for Railroad and Urban Transit Equipment. Craton, Turner....489–91; disc. 1170 1940

Electric Locomotives With Identical Basic Components. Brecht, Kerr.....339–43; disc. 343 1948

Electric Power for Airplanes. Clardy.....385–8; disc. 388 1940

Electrical Equipment of the Union Pacific Steam-Electric Locomotive. Hanna, Tritle..756–64; disc. 1082 1940

Electrification of an Ore Haulage System. Corfield.....1155–61 1948

"Electrogear"—A New Electromechanical Vehicle Drive, The. Weber.....770–7; disc. 1308 1941

Electropneumatic Brakes for High-Speed Trains With Particular Reference to Their Electrical Features. McCune.....137–42 1942

Glass-Bulb Mercury-Arc Rectifiers for Traction Service. Woolgar.....843–6; disc. 1383 1941

Network Coupling by Means of Static Electronic Frequency Changers. Marti...495–503; disc. 1163 1940

New Type of D-C to A-C Vibrator Inverter. Kiltie..245–7; disc. 247 1940

Voltage Control of Mercury-Arc Rectifiers. McDonald.....563–6; disc. 566 1939

Transportation, Adequate Electrical Maintenance Essential to. Clardy.....517–21; disc. 945 1943

Transportation Field, Lead Storage Batteries in the. Whitehurst.....303–07; disc. 683 1941

Transportation Industry, Ignitrons for the. Cox, Jones..618–22; disc. 622 1939

Transportation, The Increasing Uses for Electricity in Land. Kerr..775–81 1948

Transportation, Trolley Coaches and PCC Street Cars Provide Successful City. Clardy.....925–9 1947

Transportation, Unsolved Problems of Electrical Engineering in the Field of. Noertker...992–6; disc. 1173 1940

Transportation, Air

A Capacitance-Type Fuel-Measurement System for Aircraft. Pearson.....1363–8 1947

A Carbon-Pile Speed Governor. Button.....4–7 1946

A Current-Limiting Fuse for Aircraft Applications. Powell.....541–5 1945

A D-C Telemeter or D-C Selsyn for Aircraft. Jewell, Faus.....314–17 1942

A 40-Kva 400-Cycle Aircraft Alternator. Keneipp, Veinott.....816–21; disc. 1460 1944

A 400-Cycle Aircraft Motor. Schwandt.....508–12; disc. 948 1945

A New High-Frequency Capacitor. Allison, Beverly.....915–16; disc. 1464 1944

A 120-Volt D-C Aircraft Electric System. Cobb...1327–34; disc. 1495 1944

A Polarised Relay as an Aircraft Control Element. Johnson, Glassow 1249–55 1948

A 208Y/120-Volt 120-Ampere Three-Pole 400-Cycle Electrical Operated Aircraft Circuit Breaker. Titus, Reifschneider.....551–5 1945

A Unique Engine-Synchroism Indicator for Aircraft. Pearson..650–3 1946

A Unique Moving-Magnet Ratio Instrument. Sias, Fisk..... .....634–6; disc. 1420 1944

A Unit for Balancing the Voltages of Three-Phase Aircraft Inverters Supplying Large Single-Phase Loads. Wimpie..532–3; disc. 1458 1944

Aids to Quality Control in the Manufacture of Aircraft Generators. Potter.....525–9; disc. 1358 1944

Aircraft Carbon-Pile Voltage Regulators, Fundamentals, and Design Improvements. Austin, Richards. 983–7 1949

Aircraft Circuit Breakers. Kuhn... .....642–5; disc. 1943

Aircraft Conductors. Russell, Charbonneau.....563–6; disc. 980 1943

Aircraft-Electric-Accessory-Vibration Investigations. Miller..... .....1283–90; disc. 1486 1944

Aircraft Electric Power Protective Systems. Austin.....1375–82 1947

Aircraft Electric Power-Supply System. Yarmack...655–8; disc. 953 1943

Aircraft Electrical Horizons. Godsey, Berry, Holliday..... .....821–4; disc. 1503 1944

Aircraft-Engine-Accessory Vibration. Tyler.....1334–49; disc. 1487 1944

Aircraft-Engine Torque Instruments. Godsey, Langer..686–90; disc. 1457 1944

Aircraft Fuses Must Protect. Lebens. .....581–5; disc. 1368 1944

Aircraft Illumination. Davies..26–30 1945

Aircraft Inverter Construction. Button.....598–602 1943

Aircraft Signal Systems. Rugge.... .....3–5; disc. 455 1944

Aircraft Storage-Battery Design. Rupp.....773–7; disc. 1381 1944

Aircraft Transformers—Small and Light. Kiltie..899–902; disc. 991 1943

Aircraft Voltage Regulator and Cut-out. Jones, Exner, Wright..334–9 1942

Airline Aircraft Electric-Equipment Maintenance. Petrasek...900–05 1944

Airport Runway and Approach Lighting. Kevern.....1396–9 1947

All-Electric Gun Charging. Rohn.. .....1–4; disc. 1946

A-C and D-C Short-Circuit Tests on Aircraft Cable. Cunningham, Davidson.....961–9; disc. 1359 1944

A-C Contactors for Aircraft. Russell, Charbonneau...613–16; disc. 1364 1944

A-C Supplies for Services in Large Aircraft—a British View. Earnshaw, Shearer.....1314–20 1944

Alternating Versus Direct-Current for Aircraft-Radio Power Supply. Frits, Hooper..1227–33; disc. 1466 1944

Altitude Rating of Electric Apparatus. Lebenbaum..... .....955–60; disc. 1485 1944

An Aircraft Differential-Voltage Cut-out. Walley....632–4; disc. 1365 1944

An Electric Deicing System for Aircraft. Giloy.....1051–7 1949

An Integrated Control System for Aircraft D-C Generators. McClinton.....94–8 1947

An Interval and Dwell Tester for Bomb-Release Interval Controls. Long.....648–51 1945

Analysis and Redesign of a Carbon Pile Voltage Regulator for Aircraft Generators. Kouwenhoven, Thaler.....1197–1202; disc. 1202 1948

Analysis of High-Frequency Ignition Circuits. Robinson.....916–19 1944

Application of Electronics to Aircraft Flight Control. Gille, Kutsler.... .....849–53; disc. 1501 1944

Automatic Temperature Control for Aircraft. Gund.....730–4 1945

Automatic Temperature Control for Transport Airplanes. Hedges.... .....1197 1947

Auxiliary-Power-Plant Requirements. O'Neil.....682–4 1944

Basic Considerations in Selection of Electric Systems for Large Aircraft. Boice, Levoy..... .....279–87; disc. 478 1944

Basic Considerations in the Selection of Generators and Batteries for Aircraft. Cobb, Winters..... .....889–93; disc. 1494 1944

Basic Design Principles for A-C Electric-Power Systems in Large Military Aircraft. Chappuis, Olmsted. .....12–17; disc. 487 1946

Battery Booster Coils for Airplane-Engine Ignition Systems. Alvino. .....672–3; disc. 1381 1944

Blast-Tube Cooling for Aircraft Generators. Veinott..520–5; disc. 1463 1944

Brief Survey of Power-Supply Developments on British Aircraft. Carter.....806–07; disc. 1503 1944

Cables Used for Transmitting Electric Energy in Airplanes. Peters, Phillips, Kronstein, Jealous..... .....1270–82; disc. 1474 1944

Carbon-Pile Voltage Regulators for Aircraft. Neild..... .....839–43; disc. 1460 1944

Characteristics and Applications of Selenium-Rectifier Cells. Harty.. .....624–9; disc. 956 1943

Considerations in Servomechanism Design. Herwald.....871–6 1944

Constant-Speed Drives for Aircraft Alternators. Breitwieser..... .....763–8; disc. 991 1945

Control and Power Systems for Aircraft Window Deicing. Mershon. 1400–05 1947

Corona in Aircraft Electric Systems as a Function of Altitude. Wilson. .....189–94; disc. 457 1944

Current Ratings of Aircraft Cable. Askew, McClinton.....988–92 1949

Damping Cylinders for Aircraft Gyroscopes. Sias, Wright.....979–85 1944

Design Considerations for D-C Aircraft Generators. Miner..... .....1234–40; disc. 1459 1944

Design Considerations in Aircraft Instruments to Meet War Service. Savage, Whittenton..... .....992–8; disc. 1419 1944

Design Considerations of 400-Cycle Aircraft Motors. Sawyer..... .....877–9; disc. 1464 1944

Design of an Ignition System for an 18-Cylinder Aircraft Engine. Harkness.....1321–7; disc. 1467 1944

Development and Application of Electric Heating to Deicing of Aircraft Propellers. Sheets, Sand..1068–72 1949

Differential Generator Control Relay for D-C Aircraft Electric Systems. Crever.....589–93 1944

Dimensional Studies of Lightweight Motors for Aircraft. Morrill..... .....698–701 1944

D-C Aircraft Generator Power Center. Bottemiller.....1267–70 1947

D-C Arc Interruption for Aircraft. Quill, Rader....883–8; disc. 1472 1944

Effect of Altitude on Electric Breakdown and Flashover of Aircraft Insulation. Berberich, Moses, Stiles, Veinott.....345–54; disc. 458 1944

Effect of Altitude on Temperature Rise of Aircraft Transformers. Montsinger.....251–2 1945

Effect of Altitude on Ventilation and Rating of Aircraft Electric Machines. Veinott..84–90; disc. 488 1946

Electric Automatic Pilots for Aircraft. Halpert, Esval..... .....861–6; disc. 1501 1944

Electric-Circuit Burning-Clear and Damage Phenomena on Aircraft Structures. Foust, Hutton..... .....198–204; disc. 457 1944

Electric-Circuit Fault-Protective Principles as Applied to D-C Aircraft Systems. Kaufmann..... .....333–44; disc. 482 1944

Electric Circuits and the Magnetic Compass. Burt, Beck.....24–6 1944

Electric Connections on Aircraft. Stebbins, Taylor..... .....906–11; disc. 1473 1944

Electric Drive for Aircraft. Crom... .....1359–62 1947

Electric Equipment Required in a Modern 6-Component Wind Tunnel Model Suspension System. Cox.....1258–66 1947

Electric Gun Turrets for Aircraft. Thompson....799–802; disc. 1475 1944

Electric-Wiring Installations in British Aircraft. Horn.....896–900 1944

Electrical Control in Automatic Pilots. Young, Lynch, Boynton.. .....939–43; disc. 1500 1944

Electrical Measurements on Aircraft-Engine Ignition Circuits. Berkey. 49–53 1946

Electrically Driven Gyroscopes for Aircraft. Witherow, Hansen..... .....204–08 1944

Electrically Heated Clothing. Wotring.....1304–13 1944

Electrically Operated Gyroscopic Instruments. Konet.....735–8 1944

Electrolytic Corrosion—Methods of Evaluating Insulating Materials Used in Tropical Service. Thompson, Mathes.....295–9; disc. 443 1945

400-Cycle Inverters for Military Aircraft. Hayes, Ray.....233–7 1945

Functional Design of Aircraft Electric Actuator Equipment. Gagnier... .....813–15; disc. 1464 1944

Fundamental Principles of Amplidyne Applications. Crever..... .....603–06; disc. 956 1943

Gaseous-Discharge Lamps for Airplane Lighting Service. Beggs... .....760–2; disc. 1456 1944

Governor Requirements for Aircraft Alternator Drives. Boice, Levoy. .....534–40; disc. 947 1945

Ground Power for Aircraft. Blankenbuehler.....1319–22; disc. 1322 1948

Ground Power Supply for Modern Aircraft. Owen, Murray, Rosenstein.....1296–1303 1947

High-Altitude Brush Problem. Ramadanoff, Glass..... .....825–30; disc. 1489 1944

High-Voltage Ignition Cable Design for Aircraft. Wermine..... .....716–19; disc. 993 1943

Higher-Voltage D-C Aircraft Electric Systems. Berry, Dallas..... .....843–9; disc. 1497 1944

Historical Development of Electric Connectors. Neifing.....925–8 1944

Impedance of 400-Cycle Three-Phase Power Circuits on Large Aircraft and Its Application to Cault-Current Calculations. Chappuis, Olmsted.....1213–20; disc. 1496 1944

Influence of Electricity on Aircraft Instrumentation. Savage..... .....802–05; disc. 1501 1944

Inherent Overheating Protection of D-C Aircraft Motors. Veinott... .....920–5 1944

Instability in D-C Aircraft Systems. Bunce, Cunningham, Davidson... .....786–91 1945

Instrumentation of 400-Cycle Aircraft Electric Systems. Corson, Stimson, Soley.....830–5; disc. 1501 1944
Investigation of Porcelain Insulators at High Altitudes. Fields, Cadwell.....656–60 1946
Lighting Required for Commercial-Airline Aircraft. Petrasek.....593–8; disc. 1456 1944
Lightning Stroke Damage to Aircraft. Hagenguth....1036–44; disc. 1044 1949
Lightweight Aircraft Transformers. Stephens.....1073–8 1949
Magnesyn Remote Indication. Childs.....679–82 1944
Magnetic-Drag Tachometer, The. Ballard.....366–9 1942
Manual Switches for Aircraft. Millermaster.....596–8 1943
New Test Chambers for Aircraft Electric Apparatus With Particular Reference to Carbon Brushes. Summers, Settle...1205–12; disc. 1491 1944
One Type of Rotary Magnetic Clutch and Its Associated Brake Used on Aircraft Electric Motors. Andrews, Shanely...893–5; disc. 1477 1944
Parallel Operation of Aircraft Alternators Using Electronic Frequency Changers. Bowlus, Nims....31–8 1947
Parallel Operation of Airplane Alternators. Exner..755–60; disc. 992 1943
Parallel Operation of Main-Engine-Driven 400-Cycle Aircraft Generators. Levoy....811–16; disc. 987 1945
Paralleling and Regulation of 24–28-Volt D-C Generators in Multiengine Aircraft. Siegal, DeCourcey.....854–7 1944
Peak Voltages With D-C Arc Interruption for Aircraft. Phillips, Mitchel.....944–9 1944
Plastics in Aircraft Electricity. Cooper.....1220–6 1944
Potential Breakdown of Small Gaps Under Simulated High-Altitude Conditions. DeLerno.....109–12; disc. 456 1944
Power-Recovery System of Testing Aircraft Engines, The. Cassidy, Mosteller, Wright.240–6; disc. 416 1943
Precision Speed Control for World's Largest Induction Motor. Longwell, Reagan....634–8; disc. 1050 1942
Preferred Practices for Electric Control Devices for Aircraft. Hottenroth.....197–200; disc. 444 1945
Present D-C Aircraft Electric-Supply Systems. Anderson, Crary, Schults.....265–72; disc. 484 1944
Pressure-Arc-Interruption Circuit Breakers for 400-Cycle Aircraft Electric-Power System. Austin..58–60; disc. 487 1946
Principles of Aircraft Electric-Motor Protection. Vaughan.....760–5 1943
Proposed Circuit for Aircraft Reverse-Current Cutout. Marsolf..1246–8 1948
Protection of the Airplane Main Bus. Exner.....979–82 1949
Radio Noise Elimination in All-Metal Aircraft. Foulon.877–91; disc. 994 1943
Radio-Noise Elimination in Military Aircraft. Weinstein, Howell, Lowe, Winter...793–5; disc. 1466 1944
Radio-Noise Filters Applied to Aircraft. Frick, Zimmerman.....590–5; disc. 979 1943
Recent Advances in Aircraft Tachometer Design. Ballard, Hall.....646–8; disc. 1421 1944
Requirements for Aircraft Electric Motors. Siefkin.....810–13 1944
Requirements for Low-Voltage Aircraft Cable. Hedges.....808–10; disc. 1473 1944
Resonant-Circuit Constant-Current Regulators. Kevern.....807–10; disc. 992 1945
Selenium Power Rectifiers for A-C Aircraft Systems. Embry.596–600 1945
Sensitive Relay Contact Protection Systems. Dallas, McCully.....1204–07 1948
Short-Time Current Ratings for Aircraft Wire and Cable. Jones, Scott.....644–8; disc. 1135 1946
Simulated-High-Altitude Testing of Aircraft Ignition Cables and Connectors. Race, Ross.....20–6 1945
Solderless Terminals. Wells, Balsbaugh.....933–8; disc. 1484 1944
Solenoid-Operated Control Valves. Eckel, Wisegarver.....911–14 1944
Solenoid-Operated Hydraulic Valves for Aircraft Applications. Goepfrich.....866–8 1944
Some Aspects of the Application of Induction Motors to Aircraft. Braun.....769–72; disc. 1476 1944
Speed-Control System for an Aircraft Cabin-Supercharger Drive. Godsey, Miner, Walley.....37–40 1945
Starter-Generator Control System for a Multijet Airplane. Hart.1316–18 1948
Steady-State Analysis of Aircraft D-C Generators. Van Valkenburg, Matthews.....1351–8 1948
Testing Aircraft Generators. Keneipp.....105–09 1944
The Amplidyne Generator Applied to Speed-Controlled Electric Gun Turrets for Aircraft. Zahorsky.....221–5; disc. 436 1945
The Calibration of Ignition Crest Voltmeters. Davis, Warren.....99–104; disc. 104 1947
The Development of Aircraft Position Lights. Vitol...796–8; disc. 1493 1944
The Electrical Resistivity of Resin-Treated Wood and Laminated Hydrolyzed-Wood and Paper-Base Plastics. Weatherwax, Stamm.....833–8 1945
The Gyrosyn Compass. Esval.....857–60; disc. 1502 1944
The Scientific Basis for the New British System of Cockpit Lighting. Calvert.....869–70 1944
The Testing of Brushes for Life and Performance Under Various Altitude Conditions. Herman.....929–33; disc. 1491 1944
Totalising Contents of Aircraft Fuel Tanks. Macintyre.....663–65; disc. 1419 1944
Treatment of High-Altitude Brushes by Application of Metallic Halides. Elsey.....576–9 1945
Using Airborne Radar to Increase Airline Safety. Ayer.....1387–95 1947
Variable-Speed Drive for United States Army Air Corps Wind Tunnel at Wright Field, Dayton, Ohio. Dickey, Laffoon, Kilgore.....126–30; disc. 456 1942
Very High-Frequency Radio-Noise Elimination. Owen.....949–54 1944
Vibration Insulation and Structural Rubber. Connon.....324–9 1945

Transportation, Land

A Power Plant Regulating System for Diesel-Electric Locomotives. Lewis.....242–6; disc. 246 1947
A 3,000 Horsepower Diesel-Electric Locomotive for the Seaboard Air Line Railway. Staples, Weybrew, Atwell.....215–19 1947
Advantages of High-Speed Traction Motors. Atwell.....508–10 1943
Aircraft Engine and Propeller Test-Cell Lighting. Tuck.....1264–70; disc. 1493 1944
Application Engineering on Diesel-Electric Locomotives in Railroad Service. Bevan.....125–31 1949
Braking Resistors and Control for Diesel-Electric Locomotives. Weiser.....229–32 1947
Can the Trolley Coach Compete Economically With the Gas or Diesel Bus Where No Overhead Facilities Exist. Gauss....264–8; disc. 268 1947
Centralised Traffic Control for Railroads. Hailes.....1167–73 1949
Complete Analysis of Motor Temperature Rise. Felix, Jungk.....578–86; disc. 684 1941
Compressed-Air Circuit Breakers in A-C Railway Service. Wilcox, Harker.....141–5; disc. 419 1945
Design Features of Generators for Diesel-Electric Switcher Locomotives. Atwell.....41–5; disc. 433 1944
Developments in Control Systems for Diesel-Electric Locomotives. Henshaw.....233–41 1947
Developments in Current Collectors for High-Speed Service. Langer..51–4 1947
Developments in Diesel-Electric Traction-Generator Excitation Control Systems. Brancke, Adams.....223–8; disc. 228 1947
Diesel-Electric Switching-Locomotive Application by Means of Nomographic Charts. Millan, Perkinson.....45–7 1944
Dynamic Braking With Traction Motors. Riley, Woods.....517–19 1945
Economics of Trolley-Coach-Operation. Woods..578–81; disc. 1451 1944
Electric Control for Steam Boilers on Diesel-Electric and Straight Electric Locomotives. Burgess.....604–06; disc. 980 1942
Electric Equipment for Chesapeake and Ohio Railway Company Steam Turbine-Electric Locomotives. Atwell, Baston.....145–8 1949
Electric Facilities and Operating Plan for the First Chicago Subway. DeLeuw.....780–7; disc. 980 1942
Electric Locomotive Application. Brandenstein, MacLeod.....1210–15; disc. 1382 1941
Electrification and Signaling of the Canadian National Railways Terminal, Montreal, Canada. Gage..41–4; disc. 417 1945
Electrification of Large Open-Pit Copper Mines. Birch.....30–8; disc. 433 1944
Factors Involved in the Selection of Railroad Motive Power. Wilcox, Oehler.....235–40; disc. 411 1943
Fault Protection on Shipboard A-C Power-Distribution Systems. Rickover, Ross.1109–20; disc. 1429 1944
Gear Ratio and Its Effect on Traction Motors. Woods...65–8; disc. 433 1944
Grounding of Circuits on Self-Propelled Vehicles. Ewing.....48–50; disc. 417 1945
Handling Suburban Traffic on Steam Railroads. Sloman.....1670–4 1948
High Voltage Ignitron Rectifiers and Inverters for Railroad Service. Boyer, Hagensick.....463–70 1946
Improvements in Preventive-Coil Control for A-C Locomotives With Particular Reference to Resistor Transition. Hatch, Ogden.727–32 1942
Industrial Plants Prefer Diesel-Electric Switching Locomotives. Woods.....697–700 1949
Investigation of Silicone Insulation on High-Temperature Railway Motor. Grant, Kauppi, Moses.....305–10; disc. 310 1947
Investigation of Starting Requirements of a 660-Horsepower Locomotive Diesel Engine. Davidson, Lamborn.....31–4; disc. 632 1941
Keep Them Rolling. Teker..107–12 1943
Magnesium-Copper Sulphide Rectifier Battery Charger for Railroad Passenger Cars, The. Kotterman.....260–5 1939

Measurement of Railway-Motor Temperatures in Service. Teker.. .....545–50 1945
Mercury-Arc Rectifiers for Railroads. Watkins.....84–6; disc. 419 1945
Modern Car Equipment for New York City's Subway System. Cordts.....247–9; disc. 250 1947
Modern Double-Reduction Traction Motor. Greer.....471–4 1946
Modern Electric Locomotives in Open-Pit Mine Haulage. Borland, Riley.....52–8; disc. 433 1944
Modern Electrical Equipment for Industrial Diesel-Electric Locomotives. Greer....229–32; disc. 400 1942
Modern Motive Power for the Sorocabana Railway. Chapman, Kjolseth.....558–62 1944
Modern Motors Serve City Transit Systems. Clardy, Atwell...850–4 1941
Modern Railway Passenger-Car Auxiliary-Power Equipment. MacLeod, Hause.....930–8 1947
Modernization of a Transit System—Factors That Determine the Choice of Vehicle.....292–303; disc. 303 1940
Motor Control for Latest New York Transit System Subway Cars. Riley.....900–03 1947
Pennsylvania Railroad New York-Washington-Harrisburg Electrification—Relay Protection of Power Supply System. Harder..... .....266–73; disc. 273 1939
PCC Car Operating Results in Pittsburgh. Clardy..214–17; disc. 400 1942
Power Costs and the Contribution of Existing Transmission Networks Towards Cost Reduction of Power for Electrification of Main Line Railroads with Moderate Traffic. Evans.....596–8; disc. 599 1948
Power Supply for Railroad Electrification and Fundamentals of Power Contracts. Hill..560–2; disc. 1159 1940
Progress in Design of Electrical Equipment for Large Diesel-Electric Locomotives. Smith..... .....130–1; disc. 404 1942
Progress in Development of Trolley-Coach Overhead Reflected in Higher Service Standards. Birch. 185–91 1942
Proposed Rapid Transit System for Toronto. Duncan.....939–46 1947
Railroad Electrification Energy Conversion and Transmission Costs. Kimball, Holm..219–26; disc. 227 1948
Railway Power Supply. Torchio... .....550–3; disc. 1159 1940
Recent Developments in Track Brakes and Drum Brakes for PCC Cars. Vouch.....302–04 1947
Rewinding Commutator-Type Traction Armatures. Greene, Stafford, Gentilini.....563–9; disc. 943 1945
Selenium Rectifiers in Motor Vehicle Power Systems. Ramsey..... .....149–53; disc. 153 1949
Short Time Ratings of Diesel-Electric Locomotives. Campbell, Woods.. .....1661–3 1948
Shunt Capacitor Installation for Single-Phase Railway Service. Brown, Witzke..258–65; disc. 265 1948
Signal System, Interlocking Plants, and Automatic Train Control on the San Francisco-Oakland Bay Bridge Railway. Davis. 158–64 1940
Single-Phase A-C Electric Locomotives on the Pennsylvania Railroad—Protection and Tonnage Rating. Griffith.....224–8 1942
Sleet Problems on Electrified Railroads. Brown..589–93; disc. 978 1942
Some Recent Developments in the PCC Car. Cooper..... .....288–92; disc. 292 1947
Sorocabana Railway Electrification, The. Muylaert..804–18; disc. 919 1943
Special 10-Car Train for the New York City Transit System. Sinclair.....251–4; disc. 254 1947
Speed-Responsive Devices on Diesel-Electric Locomotives. Johansson. 336–8 1948
Study of the Performance of the 3,600-Horsepower New Haven Electric Locomotives. Konn, Craton.....212–16; disc. 217 1939
The Application of Electricity for the Auxiliaries of Railroad Trains. Gardner.....34–6; disc. 632 1941
The Design of New York Subway Motors for Dynamic Braking. Widell.....808–10 1947
The Locomotive Traction Generator Comes of Age. Lamborn..767–71 1948
The Present Competitive Position of Coal, Residual Oil, Diesel Oil, and Electricity as Energy Sources for Motive Power Operation in the Pacific Northwest. Martin..... .....1664–9 1948
The Renaissance of Electric Motive Power. Candee.....138–44 1949
Three-Compartment Articulated Cars for Test on Rapid Transit Division, Chicago Transit Authority. Otis. 416–18 1948
Trackless Trolley Operation in Rhode Island. Blomquist.....397–402 1949
Train Communication. Grondahl, Bossart.....493–500 1943
Trolley Coach Distribution System. McDonald.....393–402; disc. 402 1948
Trolley Coaches Replace Busses. McMillon.....403–06 1949
Twenty-Five Years' Progress in the Design of Traction Motors. Baldwin.....132–7 1949
Transportation, Marine
Compensation of Effects of Degaussing Coils on Shipboard Magnetic Compasses by Use of Compass-Compensating Coils. Robinson.. .....1278–81 1948
Damping Effect of D-C Marine Propulsion Motors on Vibrations Produced in Drive Shafts by Large Propellers. Litman.....31–7 1945
Diesel-Electric Synchronous Motor Ship Drives—Propulsion Control Problems.. Frisch.....660–6 1946
Effective Resistance and Inductance of 3-Conductor Shipyard Power Cables. Summers.....1345–50 1948
Electric Propulsion in Naval Surface Vessels. Jucarone..... .....1329–39; disc. 1340 1948
Functional Evaluation of Insulating Materials. Mathes..... .....1236–9; disc. 1240 1948
Magnetic Amplifiers for Naval Shipboard Applications. Buechler.... .....1241–5; disc. 1245 1948
Overload Protection of Silicone-Insulated Motors for Shipboard Use. Grigg, Watkins..1341–4; disc. 1344 1948
Selective Tripping Arrangements for Protection of Ship's A-C Electric Distribution Systems. Cole..... .....1256–62; disc. 1262 1948
Shipboard Degaussing Installations for Protection Against Magnetic Mines. Michel.1270–5; disc. 1275 1948
Silicone Insulation in Submarines—Toxicity. Walker, Shea...1232–5 1948
Use of Propulsion Generators on Naval Vessels to Supply Shore Power. Anderson, Fifer..... .....1282–7; disc. 1287 1948
Ventilation of Rotating Electrical Equipment on Shipboard. Harrison.....1263–9; disc. 1269 1948
Traps for Rural Line Carrier, Coupling Capacitors and. (Committee Report).....1426–8 1948
Traveling Waves in Coils and Windings, Performance of. Rudenberg..... .....1031–40; disc. 1257 1940
Traveling Waves Initiated by Switching. Bewley.....18–26; disc. 26 1939
(Treasure Island) Color, Light, and Structure at Golden Gate Exposition (a 16-page insert) facing page 746..... 1940
(Treasure Island) Painting the Golden Gate International Exposition With Light. Dickerson, Mahan..738–46 1940
Treated Magnet Coils, Silicone-Resin. Moses, Torok...412–16; disc. 1184 1946
Treatment and Casting of Metals by Electromagnetic Forces. Hoke... .....986–92 1944
Treatment for Establishing Load-Cycle Ratings of Ignitrons, Analytical. Marshall, Arnott..... .....545–8; disc. 1051 1942
Treatment of High-Altitude Brushes by Application of Metallic Halides. Elsey.....576–9 1945
Treatment of Various Species for Poles and Crossarms. MacLean.549–54 1946
Treatment, Poles and Pole. Colley... .....685–91 1942
"Trees" and Symmetric Circuits, Relay. Washburn.....582–6 1949
Trends and Practices in Modern Industrial Power Distribution Systems. Blomquist.....872–9; disc. 879 1948
Trends, Frequency Modulation Receiver Design. Young....1514–19 1948
Trends in Electrification of American Steel Industry. Umansky..784–95 1948
Trends in Electron Tube Design. White.....796–808 1948
Trends in Electronic Engineering. Fink. 835–40 1948
Trends in Hydraulic Turbine Design, Modern. Rheingans.....1075–80 1948
Trends in the Design and Arrangement of Electrical Equipment in Hydraulic Power Plants. Welchel... .....78–82; disc. 82 1939
Trends of Low-Voltage Air Circuit Breakers, Modern. Seaman..... .....24–29; disc. 29 1940
Tripping and Reclosing of Line Sectionalising Circuit Breakers, A-C. Winegartner, Bonheimer...1357–9 1949
Tripping and Reclosing, Relays and Breakers for High-Speed Single-Pole. Goldsborough, Hill..... .....77–81; disc. 429 1942
Tripping Arrangements for Protection of Ship's A-C Electric Distribution Systems, Selective. Cole..... .....1256–62; disc. 1262 1948
Tripping Device for Low-Voltage Circuit Breakers, An Improved Overcurrent. Rawlins, Sandin..... .....1149–53; disc. 1153 1947
Tripping of Low-Voltage Air Circuit Breakers, Improved Selective. West.....608–10; disc. 1431 1944
Tripping of Low-Voltage Air Circuit Breakers, Selective. Deans..... .....971–6; disc. 976 1947
Tripping With Impedance Relays, Out-of-Step Blocking and Selective. Vaughan, Sawyer.637–45; disc. 645 1939
Trolley Coach Compete Economically With The Gas or Diesel Bus Where No Overhead Facilities Exist?, Can the. Gauss.....264–8; disc. 268 1947
Trolley Coach Distribution System. McDonald.....393–402; disc. 402 1948
Trolley-Coach Operation, Economics of. Woods.....578–81; disc. 1451 1944
Trolley-Coach Overhead Reflected in Higher Service Standards, Progress in Development of. Birch..185–91 1942
Trolley Coaches and PCC Street Cars Provide Successful City Transportation. Clardy.....925–9 1947
Trolley Coaches Replace Busses. McMillon.....403–06 1949

Trolley Operation in Rhode Island, Trackless. Blomquist....397–402 1949

Tropical Service, Electroytic Corrosion —Methods of Evaluating Insulating Materials Used in. Thompson, Mathes.....295–9; disc. 443 1945

Trouble Shooting of Induction-Motor Windings and Cores, Wound and Dummy-Rotor Methods of Quality Control and. Trickey.....842–4; disc. 998 1945

True Dielectric Breakdown Strength of Electric-Cable Insulating Papers, The. Cloke, Bates.....1191–5; disc. 1195 1948

Tube Control of Thyratron Rectifiers, The Shunt. Potter.....421–4 1947

Tube Ignitron Rectifiers, Sealed-. Morack, Steiner....594–9; disc. 1052 1942

Tube Radio-Frequency Generator—Characteristics and Application to Induction-Heating Problems, Vacuum-. Kinn.....1290–1303; disc. 1500 1944

Tube, The Measurement of Acceleration With a Vacuum. Ramberg.735–40 1947

Tube, The Permatron—A Magnetically Controlled Industrial. Overbeck.....224–8; disc. 228 1939

Tube, Trends in Electron Design. White.....796–808 1948

Tubes, A Decade of Progress in the Use of Electronic:

Part I. In the Field of Communication. Ingram.....543–9 1940

Part II. Other than Communication Field. White.....650–4 1940

Tubes, A Method for the Measurement of the Ionization and Deionization Times of Thyratron. Birnbaum.....209–14 1948

Tubes, Amalgam-Cathode Materials for. Lyon, Williams.....627–30 1948

Tubes, and Flat Surfaces, Diffusion of Electric Current into Rods. Miller.....1496–1502 1947

Tubes as Circuit Elements, Cold-Cathode Gas-Filled. Ingram....342–7 1939

Tubes, Calculation and Design of Resistance-Coupled Amplifiers Using Pentode. Terman, Hewlett, Palmer, Pan.....879–84; disc. 1133 1940

Tubes, Condensation of Mercury in Mercury-Arc. Slepian, Brubaker.....381–4 1940

Tubes, Current Rating and Life of Cold-Cathode. Rockwood.....901–03; disc. 1390 1941

Tubes, Excitation, Control, and Cooling of Ignitron. Herskind, Remscheid.....632–5 1946

Tubes for Power Systems, Protector. Peterson, Rudge, Monteith, Ludwig.....282–8; disc. 288 1940

Tubes, Quadrature Operation of Filamentary Thermionic Gas. Holdaway.....205–08 1948

Tubular Conductors, Formulas for Calculating Short-Circuit Stresses for Bus Supports for Rectangular. Higgins.....578–80 1942

Tubular Conductors, Formulas for the Inductance of Coaxial Busses Comprised of Square. Messinger, Higgins .....328–36; disc. 501 1946

Tubular Conductors, Formulas for the Inductance of Rectangular. Higgins.....1046–50; disc. 1409 1941

Tubular Conductors, Proximity Effect Factors for 3-Phase Coaxial Busses Comprised of Square. Higgins, Messinger.....1538–9 1948

Tubular Conductors, Reactance and Skin Effect of Concentric. Dwight.....513–18; disc. 976 1942

Tunable Rejection Filter. A, Taylor.....263–7; disc. 490 1946

Tuned 50-Kw Broadcast Transmitter, A Push-Button Rockwell, Lepple.....1–3 1941

Tuning Equipment Used With Coaxial Cable for Carrier Current Installation on Power Lines, Line. Sutton.....44–8; disc. 48 1949

Tunnel at Wright Field, Ohio, Variable-Speed Drive for United States Army Air Corps, Wind. Dickey, Laffoon, Kilgore..126–30; disc. 456 1942

Tunnel Drive, Large Adjustable-Speed Wind-. Clymer..156–8; disc. 456 1942

Tunnel Drives, A Control System for Wind. Heidenreich.....1637–43; disc. 1643 1947

Tunnel, Electric Equipment for Cornell Variable Density Wind. Clymer, de Ferranti.....554–63 1946

Tunnel Model Suspension System, Electric Equipment Required in a Modern 6-Component Wind-. Cox.....1258–66 1947

Turbine Alternators, Motor-Driven Exciters for. Bodine, Crary, Rankin.....290–7; disc. 515 1946

Turbine Design, Modern Trends in Hydraulic. Rheingans.....1075–80 1948

Turbine-Electric Locomotives, Electric Equipment for Chesapeake and Ohio Railway Company Steam. Atwell, Baston.....145–8 1949

Turbine-Electric Textile-Range Drives. Richardson.....57–60 1940

Turbine Generator, The Hydrogen-Cooled. Snell.....35–45; disc. 45 1940

Turbine Generators, A New Automatic Load Control for. Ruud, Farnham.....1337–42; disc. 1342 1949

Turbine Generators, Automatic Load Control for. Crever, Jackson.656–60 1945

Turbine Generators by Means of the Electrical-Mechanical Analogy, Determination of Transient Shaft Torques in. McCann, Warren, Criner.....51–6; disc. 492 1945

Turbine Generators by Test, Determination of Short-Circuit Torques in. Whitney, Criner..885–9; disc. 1195 1940

Turbine Generators During Short Circuits and Synchronizing, Transient Electrical Torques of. Kirschbaum.....65–70; disc. 492 1945

Turbine Generators, Hydrogen-Cooled. Ross, Sterrett.....11–16; disc. 16 1940

Turbine Generators, Liquid Cooling of A-C. Fechheimer.....553–61 1947

Turbine Generators, Main Exciter Rototrol Excitation For. Lynn, Valentine.....535–9; disc. 539 1948

Turbine Generators, Pole-Face Loss in Solid-Rotor. Kuyper.....827–34; disc. 925 1943

Turbine Generators Produced by Transmission-Line Reclosing, Transient Shaft Torques in. Batchelor, Whitehead, Williams.....159–64; disc. 164 1948

Turbine Generators, Progress Report on AIEE-ASME Standard Large 3,000-RPM. Mortensen, McClure, Laffoon....674–5; disc. 675 1948

Turbine Generators, Special Problems of Two-Pole. Laffoon, Rose.....30–3; disc. 33 1940

Turbine-Generators, Speed Governing Design Considerations for Multivalve Condensing Steam. Barnett.....1557–61; disc. 1561 1948

Turbine Generators, Suppression of Magnetic Vibration and Noise of Two-Pole. Penniman, Taylor.....283–8; disc. 745 1941

Turbine Generators to Relieve Power-Supply Systems of Steel-Mill Load Swings, Automatic Regulation of. Eberhardt, Harrison, Kohn, Darling.....751–8 1945

Turbine Generators Under System Load Conditions, Determining Incremental Regulation and Dead Band of Governors on Steam. Tornquist, Wade.....1343–7 1949

Turbine-Governor Performance Analyser, A. Osbon..963–7; disc. 1401 1941 .....disc. 393 1942

Turbine Governor, Precise. Warren.....571–4; disc. 574 1948

Turbine Power Plant, A 3,000-Horsepower Gas. Haverstick...458–60 1949

Turbines and Boilers and of Hydro Units, Outage Rates of Steam. (Committee Report).....450–7 1949

Turbines for Power Generation and Other Applications, Two Gas. Howard.....461–5; disc. 465 1949

Turbines in Stationary Power Generation, Gas. Hague.....467–8 1949

Turbogenerators, Prevention of Rotor-Winding Deformation on. Noest.....514–19; disc. 1353 1944

Turbogenerators, Some Factors in the Mechanical Design of High-Speed. Mortensen, Ryan...51–6; disc. 56 1940

Turbogenerators, Underexcited Operation of. Adams, McClure.....521–6; disc. 526 1948

Turn-In-Gap Erase Head for Magnetic Recorders Providing Intense High-Frequency Fields, A. Wiegand, Zenner.....507–10 1948

Turn Ratio of the Capacitor Motor. McFarland.....892–8 1943

Turrets for Aircraft, Electric Gun. Thompson....799–802; disc. 1475 1944

Turrets for Aircraft, The Amplidyne Generator Applied to Speed-Controlled Electric Gun. Zahorsky.....221–5; disc. 436 1945

Twelve-Channel Open-Wire Carrier System, Line Problems in the Development of the. Ilgenfritz, Hunter, Whitman...658–64; disc. 664 1939

25-Kv System of the West Penn Power Company, Lightning Investigation on the. Bowen, Beck.....831–6; disc. 836 1947

Twenty-Five Years of Copper—Copper Oxide Rectifiers. Grondahl.403–10 1948

Twenty-Five Years' Progress in the Design of Traction Motors. Baldwin.....132–7 1949

Twin-Conductor Cable, Design Considerations of High-Frequency. Greenfield.....932–3 1945

Twister, Electric Equipment for 2-for-1. Gwaltney, Burnham.....811–4 1947

Two Basic Servomechanism Types, A Comparison of. Harris.....83–92; disc. 92 1947

2-for-1 Twister, Electric Equipment for. Gwaltney, Burnham.....811–4 1947

Two Gas Turbines for Power Generation and Other Applications. Howard.....461–5; disc. 465 1949

208Y/120-Volt 120-Ampere Three-Pole 400-Cycle Electrically Operated Aircraft Circuit Breaker, A. Titus, Reifschneider.....551–5 1945

230-Kv Lines, Radio-Noise Influence of. Rorden.....677–81; disc. 682 1947

220,000-Volt System of the Hydro-Electric Power Commission of Ontario, The. Part II. Frampton, Wood.....1215–21; disc. 1373 1941 (Part I by Brandon—1930)

2-Layer Windings of Rotating Machines, The Magnetomotive Force of. Stein.....756–8 1947

2,500,000-Kva Compressed-Air Powerhouse Breaker, A. Ludwig, Wilcox, Baker.....235–41; disc. 414 1942

Two New Methods of Accelerating Electric Motors Automatically. Leitch.....487–93; disc. 655 1941

Two-Phase Co-ordinates of a Four-Phase Network. Kimbark....7–9 1945

Two-Phase Co-ordinates of a Three-Phase Circuit. Kimbark.....894–904; disc. 904 1939

Two-Phase Servomotors, Operating Characteristics of. Koopman.....319–27; disc. 327 1949

Two-Pole Turbine Generators, Special Problems of. Laffoon, Rose.....30–3; disc. 33 1940

Two-Pole Turbine Generators, Suppression of Magnetic Vibration and Noise of. Penniman, Taylor.....283–8; disc. 745 1941

Two-State Rototrol for Low-Energy Regulating Systems. Kimball.....1507–11 1947

Two-State Rototrol Main Exciter Voltage Regulating System as Determined by Electrical Analogy, The Transient Behavior of the. Carleton.....59–63 1949

Two-Winding Transformers, Surge Characteristics of. Rudenberg.....1136–44; disc. 1333 1941

Type CB Impregnated-Paper Cable, The. Rosch.....1041–50; disc. 1235 1940

Type J Carrier System, Some Applications of the. Starbird, Mathis.....666–72; disc. 672 1939

Type Rectifier, Development of Excitron-. Winograd.....969–78; disc. 1454 1944

Types of Overcurrent Protection for Distribution Circuits, Relative Value of Different. Lincks.....19–26; disc. 426 1942

Types of Radio-Frequency Cables and Specifications. Sheldon....930–2 1945

(Typewriter) Military Teletypewriter Systems of World War II. Singer.....1398–1408 1948

Typical Transformer Faults and Gas Detector Relay Protection. Madill.....1052–8; disc. 1058 1947

U

Ultrahigh Frequencies, A Resonant-Cavity Method for Measuring Dielectric Properties at. Works, Dakin, Boggs.....1092–8; disc. 1452 1944

Ultrahigh-Frequency Loop Antennas. Alford, Kandoian.....843–8 1940

Ultrahigh-Speed Reclosing of High-Voltage Transmission Lines, Experience With. Sporn, Muller.....625–31; disc. 631 1939

Ultrahigh-Speed Reclosing of High-Voltage Transmission Lines, Five Years' Experience With. Sporn, Muller.....241–6; disc. 690 1941

Ultrahigh-Speed Reclosing of High-Voltage Transmission Lines, Nine Years' Experience With. Sporn, Muller.....225–8; disc. 445 1945

Unbalanced Charging Currents on Transmission Lines as Affecting Ground-Fault Neutralizers, Report on Survey of. (Committee Report).....1328; disc. 1329 1949

Unbalanced Conditions, Operation of Rectifiers Under. Christensen, Morack.....628–31 1944

Unbalanced Magnetic Pull in Synchronous and Induction Motors, The Calculation of. Robinson.....620–24; disc. 924 1943

Unbalanced Sinusoidal 3-Phase Circuits, The Vector Power Factor of. Lamb, Brandt.....507–09 1949

Unbalanced-Voltage Control, Variable-. Wickerham.....98–102; disc. 449 1945

Unbalanced Voltage Drops in Distribution Circuits With Particular Reference to Multigrounded Neutrals. Calculation of. Bullard, Lowe, Wahlquist.....145–8 1944

Underexcited Operation of Turbogenerators. Adams, McClure.....521–6; disc. 526 1948

Underground-Cable Overhead-Conductor 132-Kv Transmission Line at Carrier Current Frequencies, Loss Measurements Made on. Cornelius, Storer.....597–601 1949

Underground Distribution Systems in Wartime. Gaty.....107–12; disc. 432 1942

Underground Power-System Cables, Electrolysis and Corrosion of. Gorman.....329–36; disc. 479 1945

Underground Power-Transmission Systems and Tie Lines, Cost Studies of 69- to 230-Kv. Holm...852–60 1945

Underground Subway Systems, Economical Loading of High-Voltage Cables Installed in. Thomas.....611–15; disc. 615 1939

Ungrounded 13-Kv 3-Phase Bus, Arcing Ground Tests on a Normally. Allen, Waldorf...298–306; disc. 498 1946

Uniform Field at High Pressures, D-C Breakdown Strength of Air and of Freon in a. Trump, Safford, Cloud.....132–5; disc. 676 1941

Union Pacific Steam-Electric Locomotive, Electrical Equipment of the. Hanna, Tritle..756–64; disc. 1082 1940

Union Teletape Facsimile, Western. Pollard.....511–15 1948

Unique Application of the Wheatstone Bridge to High-Speed Train Braking. Hines.....360–2 1948

Unique Engine-Synchronism Indicator for Aircraft, A. Pearson....650–3 1946

Unique Moving-Magnet Ratio Instrument, A. Sias, Fisk.....634–6; disc. 1420 1944

Unit, A New 50,000-Kva 5-Kv Oilless Circuit-Breaker and Metal-Clad Switchgear. Dickinson, Hayford..302–06; disc. 434 1943

Unit for Balancing the Voltages of Three-Phase Aircraft Inverters Supplying Large Single-Phase Loads, A. Wimpie.....532–3; disc. 1358 1944

Unit Rapid-Transit Cars, A Control System for Modern Multiple-. Moore.....142–7 1942

Unit-Type Substations, Six Years' Experience With Factory-Built. Miller, Miller...751–6; disc. 1150 1946

Unit-Type Switchgear for 33-Kv Service, Metal-Clad. Kreger.....360–8; disc. 509 1946

United States, A Brief Review of Switchgear and Circuit Breaker Practice in the. Hobbs...893–7; disc. 897 1948

United States Army Air Corps Wind Tunnel at Wright Field, Dayton, Ohio, Variable-Speed Drive for. Dickey, Laffoon, Kilgore.....126–30; disc. 456 1942

U. S. Forest Service, The Communication Facilities of the. Simson.....971–6 1941

United States, Principles and Practices of Relaying in the. Harder, Marter.....1005–22; disc. 1022 1948

United States, Standardization in the. Osborne.....782–3 1948

United States, Temperature Survey of the. Smith, Tenney.....769–75; disc. 1090 1940

United States, The Development of Radio-Frequency Cables in the. Neher.....911–12 1945

United States, Variations of Atmospheric Temperature With Altitude in the. Tenney..230–2; disc. 727 1941

Units for Emergency Loading of Transformers in Open Delta, Mobile Capacitor. Wolf, Mattison.....83–6; disc. 373 1943

Units on the 2,000,000-Horsepower Saguenay System, Improvements in Performance of Hydroelectric Generating. Lawton.....900–10; disc. 1187 1946

Units, Some Oscillographic Methods of Investigating Mechanical and Hydraulic Conditions During Operation of Hydrcelectric. Engvall.....993–6 1949

Units, Technique of Electrical and Hydraulic Testing of Hydroelectric. Floyd, Traill.....163–9; disc. 493 1946

Units, The Maintenance of Hydroelectric Generating. Robertson, Standing.....776–82 1947

Universal Curves for D-C Controllable Reactors. Johnson, Merrell, Alley.....31–7; disc. 37 1949

Universal Telemetering System, A. Harris.....1151–4; disc. 1154 1948

Unsolved Problems of Electrical Engineering in the Field of Transportation. Noertker.....992–6; disc. 1173 1940

Unstable Nonlinear Circuit, An. Summers.....273–6 1940

Unsymmetrical Machines, Analysis of. Burian.....643–6 1948

Upper-Air Weather Soundings by Radio. Diamond, Hinman, Dunmore, Lapham.....321–8 1940

Urban Transit Equipment, Electric Braking for Railroad and. Craton, Turner.....489–94; disc. 1170 1940

Usage, Power Line Carrier for Relaying ing and Joint. Part I. Hampe, Storer.....864–7; disc. 871 1949

Use of Air-Core Reactors as Fault Limiting Means on High Interrupting Capacity Controllers, The. Leitch.....469–74; disc. 474 1949

Use of Auxiliary Impedances in the Single-Phase Operation of Polyphase Induction Motors, The. Ager.....494–9; disc. 660 1941

Use of Bismuth-Bridge Magnetic Fluxmeter for A-C Fields. Smith.....52–5 1939

Use of Business Machines in Determining the Distribution of Load and Reactive Components in Power Line Networks, The. Jennings, Quinan.....1045–6 1946

Use of Dielectric-Absorption Tests in Drying Out Large Generators. Marcroft.....56–60; disc. 415 1945

Use of Equivalent Annual Ambient Temperature in Overloading Transformers and Voltage Regulators. Oldacre.....477–80; disc. 916 1943

Use of Propulsion Generators on Naval Vessels to Supply Shore Power. Anderson, Fifer.....1182–7; disc. 1287 1948

Use of Thyrite in Power Transformers. Meador.....959–64; disc. 964 1949

Utility Industry During World War II, The German Electrical. Noest.....1037–47; disc. 1047 1947

Utility Power Service Versus Local Plant Generation in Industry, Central. Frampton.....880–3; disc. 884 1948

Utility's Point of View, The Heat Pump From the. Andrews.....562–4 1948

Utilization of Electric Power in Open-Pit Copper Mining. French, Speight..956–66; disc. 966 1948

Utilisation of Mexico's Hydraulic Resources Through Multiple Purposes, Full. Alba.....989–92 1948

Utilization of Power and Facilities, The Automatic Welding-Machine Starter and Its Relation to Maximum. Porter.....728–30; disc. 996 1943

Utilisation of Stored Energy, Factors Contributing to Improving Electric Service by Means of High-Speed Switching and. Logan, Miles.....1012–16; disc. 1408 1941

Utilisation Voltages. Seelye.....147–51; disc. 430 1942

V

Vacuum Leak Testing With the Mass Spectrometer, High. Worcester, Doughty.....946–55; disc. 1170 1946

Vacuum Switch, Fundamental Properties of the. Koller.....597–604; disc. 1141 1946

Vacuum-Tube Oscillators to Inductive and Dielectric Heating in Industry, Application of. Jordan.....831–4 1942

Vacuum-Tube Radio-Frequency Generator—Characteristics and Application to Induction-Heating Problems. Kinn. 1290–1303; disc. 1500 1944

Vacuum Tube, The Measurement of Acceleration With a. Ramberg.....735–40 1947

Value of Different Types of Overcurrent Protection for Distribution Circuits, Relative. Lincks.....19–26; disc. 426 1942

Values for D-C Machines, Temperature Rise. (Committee Report):
Part I.....206–12; disc. 212 1949
Part II.....1118–23; disc. 1123 1949

Values for Temperature, Pressure, and Humidity, Reference. Bellaschi, McAuley.....669–75; disc. 1227 1940

Values of the Bessel Functions ber x and bei x and Their Derivatives. Dwight.....787–90 1939

Valves for Aircraft Applications, Solenoid-Operated Hydraulic. Goepfrich.....866–8 1944

Valves, Solenoid-Operated Control. Eckel, Wisegarver.....911–14 1944

Vapor on Brush Wear, Effects of Silicone. Marsden, Savage.....1186–90 1948

Variable Electric-Circuit Element, Ferroinductance as a. Ryder.....671–8; disc. 962 1945

Variable-Ratio Frequency Changer, Suddenly Applied Loads on a. Carter, Maginniss, Rothe..1489–95 1947

Variable-Ratio Frequency Changer, Tensorial Analysis and Equivalent Circuit of a. Kron.....1503–06 1947

Variable-Ratio Synchronous-Induction Frequency Changer, Suddenly Applied Loads Carried by a. Darling, Kaufman.....91–4 1948

Variable-Ratio Transmission Used in Developmental 400-Cycle Electric System for Large Aircraft, Governor for. Desch, Garr, Hutton.....194–8 1946

Variable-Register-Ratio Watt-Hour Meter, A. Shuck.....76–8 1939

Variable-Speed Constant-Frequency Generator, A. Roys, Nader, Spctts.....1414–17; disc. 1417 1947

Variable-Speed Drive, A Study of the Modified Kramer or Asynchronous-Synchronous Cascade. Liwschits, Kilgore.....255–60 1942

Variable-Speed Drive for United States Army Air Corps Wind Tunnell at Wright Field, Dayton, Ohio. Dickey, Laffoon, Kilgore.....126–30; disc. 456 1942

Variable-Unbalanced-Voltage Control. Wickerham.....98–102; disc. 449 1945

Variable-Voltage Equipment for Rotary Drilling Rigs. Lamberger.....248–55; disc. 255 1940

Variac Transformers, Design of. Karplus.....508–13 1944

Variations and Apparatus Flashover, Atmospheric. McAuley.....798–803; disc. 1319 1941

Variations and Tie-Line Power Swings, Effect of Prime-Mover Speed Governor Characteristics on Power-System Frequency. Concordia, Crary Parker...559–67; disc. 733 1941

Variations of Atmospheric Temperature With Altitude in the United States. Tenney.....230–2; disc. 727 1941

Variations of Pressure and Temperature, Dielectric Strength of Oil with. Hoover, Hixson....1047–50 1949

Vario-Losser Circuits. Bennett, Doba.....17–22 1941

Varioplex—A New Development in Telegraphy, The. Shute....181–4 1941

Varioplex Telegraph, Basic Principles of the. Holcomb.....1102–08 1941

Varnish, Motor Tests Evaluate Thermal Endurance of Class-H Insulation and Silicone. Grant, Kauppi, Moses, Gibson.....1133–8 1949

Varnishes, Control of Electrical-Insulating. Gibson, Braithwaite...520–4 1945

Vars, An Amplifier-Wattmeter Combination for the Accurate Measurement of Watts and. Brown, Cahoon.....593–7; disc. 597 1939

Varying Currents, The Measurement of Large. Johnson...8–11; disc. 513 1946

Vaults: Design and Ventilation, Transformer Manholes and. Porter.....534–9 1949

Vector Indicator, Polar. Walker, Waynick, Sulser.....154–9 1949

Vector Locus, Current-Transformer Performance Based on Admittance-. Schwager.....26–30; disc. 465 1942

Vector Power Factor of Unbalanced Sinusoidal 3-Phase Circuits, The. Lamb, Brandt.....507–09 1949

Vector-Response Indicator. Loughlin.....355–7 1940

Vehicle Drive, The "Electrogear"—A New Electrochemical. Weber.....770–7; disc. 1308 1941

Vehicle, Modernization of a Transit System—Factors That Determine the Choice of. Hoard.....292–303; disc. 303 1940

Vehicle Power System, Selenium Rectifiers in Motor. Ramsey.....149–53; disc. 153 1949

Vehicles, Generation of Electric Charges by Moving Rubber-Tired. Mackeown, Wouk.....207–10; disc. 428 1943

Vehicles, Grounding of Circuits on Self-Propelled. Ewing.....48–50; disc. 417 1945

Ventilation and Rating of Aircraft Electric Machines, Effect of Altitude on. Veinott.....84–90; disc. 488 1946

Ventilation of Rotating Electrical Equipment on Shipboard. Harrison.....1263–9; disc. 1269 1948

Ventilation, Transformer Manholes and Vaults: Design and. Porter. 534–9 1949

Versatile Power-Line-Carrier System, A. Lensner, Singel.....129–33; disc. 437 1944

Vertical-Flow Compressed-Air Circuit Breaker and Its Application on a 132-Kv Power System, A. Langstaff, Baker.....188–92; disc. 436 1943

Vertical-Flow Interrupter and Its Application to "Oil Poor" Circuit Breakers, The. Baker.....440–5; disc. 635 1941

Vertical-Flow Outdoor Compressed-Air Breaker, A. Ludwig, Baker.....217–22; disc. 672 1941

Vertical Generator Thrust Bearings at the Bonneville Plant of the Corps of Engineers, War Department, The Design and Performance of the. Lewis, Gordon.....1231–7; disc. 1237 1947

Vertical Water Wheel Generators, Modern Bearing Practice for. Laffoon, Baudry..363–9; disc. 369 1947

Very High-Frequency Radio-Noise Elimination. Owen.....949–54 1944

Vessels, Electric Propulsion in Naval Surface. Jucarone.....1329–39; disc. 1340 1948

Vessels to Supply Shore Power, Use of Propulsion Generators on Naval. Anderson, Fifer. 1282–7; disc. 1287 1948

Vi Energy-Flow Postulate, Energy Flow in Electric Systems—the. Slepian.....835–41; disc. 1054 1942

Vibrating Reed Selective Signaling System for Mobile Telephone Use. Pruden, Hoth.....387–91 1949

Vibrating Reed Selectors for Mobile Radio Systems. Keller, Bostwick.....383–6 1949

Vibration, Aircraft-Engine-Accessory. Tyler.....1334–49; disc. 1487 1944

Vibration and Noise of Two-Pole Turbine Generators, Suppression of Magnetic. Penniman, Taylor.....283–8; disc. 745 1941

Vibration in Electric Machinery, The Nature of. Graybeal.....712–18; disc. 1458 1944

Vibration Insulation and Structural Rubber. Connon.....324–9 1945

Vibration Investigations, Aircraft-Electric-Accessory-. Miller.....1283–90; disc. 1486 1944

Vibration, Measurement and Control of Conductor. Tebo.....1188–93; disc. 1380 1941

Vibration of Electric Contacts, The. Russell, Keilien...153–5; disc. 478 1944

Vibration Problems, Summary of Transformations Useful in Constructing Analogs of Linear. Corbett..661–4 1949

Vibration Protection for Rotating Machinery. Webb, Murray.....534–7; disc. 1355 1944

Vibration—Theory of Torsional Dampers, Conductor. Speight.....907–11; disc. 1376 1941

Vibrations Produced in Drive Shafts by Large Propellers, Damping Effect of D-C Marine Propulsion Motors on. Litman.....31–7 1945

Vibrator Inverter, New Type of D-C to A-C. Kiltie..245–7; disc. 247 1940

Vibrometer for Instrument-Gyroscope Testing, A Tachometer—Accelerometer—. Laurenson, Long.....593–6; disc. 960 1945

Victory Ships, Modern Cargo-Winch Control for Use on. Holt.....623–8; disc. 1411 1944

Viscosity in Silicone, Hystero. Malti, Chatterjee.....369–73 1948

Viscosity Oil, High-Pressure Gas-Filled Cable Impregnated with Extra-High-. Sticher, Doan, Atkinson, Meyerhoff.....336–45; disc. 345 1949

Voice-Frequency Carrier Telegraph System, High-Speed. Bramhall.....873–9; disc. 1132 1940

Voids in Insulating Materials, Characteristics of Restricted Ionisation and Its Relation to. Dawes, Humphries.....701–08; disc. 1071 1940

Volt-Ampere Demand Meter, A New Thermal. Douglass, Morong.....79–83; disc. 83 1949

Volt-Ampere Method of Designing Capacitor Motors, The Equal-. Trickey.....990–2; disc. 1399 1941

Volt-Time Areas of Impulse Spark-Over. Hagenguth.....803–10; disc. 1312 1941

Volt-Time Characteristics, Expulsion-Type Lightning Arresters' Impulse Spark-Over. (Committee Report).....520 1948

Voltage A-C Circuits, Arcing Fault Currents in Low. Wagner, Fountain.....166–72; disc. 172 1948

Voltage Analyzer for Determination of Circuit Recovery Characteristics, The Recovery-. Dunlap.....958–62; disc. 1391 1941

Voltage and Current Relations for Controlled Rectification With Inductive and Generative Loads. Puchlowski.....255–60; disc. 442 1945

Voltage and Current Wave Forms of Controlled Rectifier Circuits, A Graphical Analysis of the. Chin, Mcyer....501–08 1944
Voltage Breakdown Characteristics for Electrical Caps in Oil, Surge. Sorensen....78–81; disc. 81 1940
Voltage Changes Caused by Resistance Welding Loads. Johnson, Peterson, Rhoades....664–73; disc. 674 1947
Voltage Characteristics of Electric-Power Systems, Transient Recovery-. St. Clair, Adams....666–9; disc. 1016 1942
Voltage Compensator for Resistance Welding Control, Automatic. Callender, Phair....701–05; disc. 921 1943
Voltage Conditions in Three-Phase Systems Produced by Single-Phase Switching, Abnormal. Clarke, Peterson, Light....329–39; disc. 618 1941
Voltage Control of Mercury-Arc Rectifiers. McDonald..563–6; disc. 566 1939
Voltage Control, Variable-Unbalanced-. Wickerham....98–102; disc. 449 1945
Voltage Control Without Feeder Voltage Regulators, Power System. Smeloff....1462–4; disc. 1465 1948
Voltage Copper-Oxide Rectifiers, Higher. Smith....220–2 1947
Voltage Cutout, An Aircraft Differential-. Walley...632–4; disc. 1365 1944
Voltage Dip—with Suddenly Applied Loads on A-C Generators, A Semi-empirical Approach to. Rosenberg....160–6; disc. 166 1949
Voltage D-C Aircraft Electric Systems, Higher-. Berry, Dallas....843–9; disc. 1497 1944
Voltage D-C Measurements on Electrical Insulating Oils, Low. Oncley, Hollibaugh.625–8; disc. 1227 1940
Voltage D-C Testing of Rubber-Insulated Wire, High. Eddy, Fenn....576–8; disc. 1126 1946
Voltage Drop and Impedance at Short-Circuit Currents in Low-Voltage Circuits. Fault, Schurig....479–87; disc. 654 1941
Voltage Drop in the Welder Throat Loaded With Ferromagnetic Materials, The. Stein....356–62 1947
Voltage Drops in Distribution Circuits With Particular Reference to Multigrounded Neutrals, Calculation of Unbalanced. Bullard, Lowe, Wahlquist....145–8 1944
Voltage, Effect of Restriking on Recovery. Concordia, Skeats....371–5; disc. 375 1939
Voltage Equipment for Rotary Drilling Rigs, Variable-. Lamberger....248–55; disc. 255 1940
Voltage Fault-Arc Paths, Deionization Time of High-. Harrington, Starr....997–1003; disc. 1003 1949
Voltage Generation, Commutation of D-C Machines and Its Effects on Radio Influence. Motter....491–5; disc. 495 1949
Voltage Gradients of Grouped Conductors, Relative Surface. Temoshok....1583–9; disc. 1589 1948
Voltage Ignition Cable Design for Aircraft, High-. Wermine....716–19; disc. 993 1943
Voltage Lines and Design Features of Tidd 500-Kv Test Lines, Corona Considerations on High-. Wagner, Wagner, Peterson, Gross....1583–90; disc. 1590 1947
Voltage Lines, Minimum Insulation Level for Lightning Protection of Medium-. Ekvall....128–32; disc. 719 1941
Voltage Method, Field Determination of Current-Transformer Errors by the Secondary-. Goodale, Holbeck....879–82; disc. 1468 1944
Voltage of Paper Dielectric Capacitors, The Probable Breakdown. Brooks....1137–44; disc. 1144 1947
Voltage Oilless Circuit Breakers, A Manually-Operated Spring Mechanism for Medium. Wyman, Casey....357–61; disc. 361 1949
Voltage on Distribution Circuits, Capacitors and Automatic Boosters for Economical Correction of. Olmsted....491–6; disc. 496 1939
Voltage on 66-Kv Line Supplying Large Electric Furnace Load, A 10,000-Kva Series Capacitor Improves. Jones, Arthur, Stearns, Johnson....345–51; disc. 351 1948
Voltage Power-Transformer Design, High-. Mallett.526–31; disc. 966 1943
Voltage Recovery Characteristics of Distribution Systems. Witzke....172–80; disc. 180 1949
Voltage-Recovery Characteristics, Power System. Peterson....405–11; disc. 411 1939
Voltage-Regulating Relay Plus Line-Drop Compensator, A New. Carlin....63–6; disc. 481 1942
Voltage Regulating System as Determined by Electrical Analogy, The Transient Behavior of the Two-Stage Rototrol Main Exciter. Carleton....59–63 1949
Voltage Regulation, Recent Developments in Generator. Hanna, Oplinger, Valentine.838–44; disc. 844 1939
Voltage Regulation, The Use of Multiwinding Transformers With Synchronous Condensers for System. St. Clair....212–17; disc. 217 1940
Voltage Regulator Accuracy Standards, Feeder. Birchard....747–51; disc. 751 1948
Voltage Regulator and Cutout, Aircraft. Jones, Exner, Wright..334–9 1942
Voltage Regulator Application on Power Systems, Feeder. Gosinski, Oberholtzer...1458–61; disc. 1461 1948
Voltage - Regulator Characteristics, Steady-State Stability of Synchronous Machines As Affected by. Concordia....215–20; disc. 489 1944
Voltage Regulator for Aircraft Generators, Analysis and Redesign of a Carbon Pile. Kouwenhoven, Thaler....1197–1202; disc. 1202 1948
Voltage Regulator for Rototrol Exciter, Static. Harder, Valentine..601–06 1945
Voltage Regulator Insensitive to Load Power Factor, A Static. Summers, Short....67–70 1942
Voltage Regulator Problem by Electrical Analogy, Solution of the General. Harder....815–25; disc. 825 1947
Voltage Regulator, The Direct-Acting Generator. Boice, Crary, Kron, Thompson....149–56; disc. 156 1940
Voltage Regulator Without Moving Parts Employing Ferroresonance, An Automatic. Craig....830–6; disc. 836 1939
Voltage Regulators for Aircraft, Carbon-Pile. Neild....839–43; disc. 1460 1944
Voltage Regulators, Fundamentals, and Design Improvements, Aircraft Carbon-Pile. Austin, Richards....983–7 1949
Voltage Regulators, Interim Report on Guides for Overloading Transformers and. (Committee Report)....692–4; disc. 1063 1942
Voltage Regulators to Aircraft Generators, The Application of. Thompson, Crever....363–5 1942
Voltage Regulators, Use of Equivalent Annual Ambient Temperature in Overloading Transformers and. Oldacre....477–80; disc. 916 1943
Voltage Rise in Transformers Due to Interruption of Exciting Current, Transient. Srinivasan, Vogel....1632–6 1947
Voltage Service, Multiple-Grid Breakers for High-. MacNeill, Hill....427–31; disc. 431 1939
Voltage Side, Metering Power on the Low-. Petzinger, Lenehan....159–63; disc. 406 1943
Voltage Stresses in Distribution Transformers Due to Lightning Currents in Low-Voltage Circuits. Beardsley, McMorris, Stewart....1632–5; disc. 1635 1948
Voltage Surges in Relay Control Circuits. Halman, Harris....1693–9; disc. 1699 1948
Voltage Testing, Some Recent Developments in Impulse-. Foust, Rohats....257–62; disc. 262 1940
Voltage Transients in Arc-Furnace Circuits. (Committee Report)....563–8; disc. 1435 1944
Voltage Transients in Arc-Furnace Circuits, A Study of. Hodtum, Rice....556–62; disc. 921 1943
Voltage Transmission Lines, A Transient Fault Locator for High-. Spaulding, Diemond....1005–10; disc. 1010 1949
Voltage Transmission Lines, Switching High-. Johnson, Wilson....1552–60; disc. 1560 1947
Voltage Wave Shapes and Power Factor, The Effect of Overexciting Transformers on System. Butler, Pope....49–53; disc. 656 1941
Voltage-Welding Power Distribution, The Design of Low-. Adams, Fetcher, Johnson....1180–90; disc. 1382 1944
Voltages, A Simple and Inexpensive Method for Accurately Measuring Steady-State and Transient High. Levinton....1304–10; disc. 1310 1947
Voltages, An Oscillograph for Recording Transient Recovery. Hoover....1086–91; disc. 1174 1946
Voltages and Circuit-Breaker Performance, Transient Recovery. Van Sickle....804–13; disc. 1014 1942
Voltages and Fault Currents Determined Easily on D-C Board, System. Asbury....184–8; disc. 439 1944
Voltages, Control of Slip-Ring Motors by Means of Unbalanced Primary. Schmitz....1103–1112; disc. 1112 1947
Voltages, Electronic Measurement of Surge-Crest. Bryant, Newman....807–11; disc. 1093 1940
Voltages for Nonuniform Fields in Air, Determination of Corona Starting. Hutton....1674–9; disc. 1680 1947
Voltages in Air, Calculation of Initial Breakdown. Ver Planck....99–104 1941
Voltages in Ground-Fault Neutralizer Systems, An Analysis of Transient and Sustained. Farnham, Hunter, Peterson....1257–66; disc. 1394 1941
Voltages in Networks, Analysis of Transient. Bellaschi, Palermo....973–81 1940
Voltages Induced by Accelerated Flux Reversal in Reactor Cores Operating Above Saturation Density, Peak. Specht, Wentz....254–63 1946
Voltages—Methods of Calculation and Control by Capacitors, System Lower-Harmonic. Feaster, Harder....1060–6; disc. 1310 1942
Voltages on Rural Distribution Systems, Short-Circuit Currents and Recovery. Eason, Johnson, Kalb, Peterson....930–7; disc. 937 1949
Voltages on Transmission Lines, Induced. Wagner, McCann....916–30; disc. 1007 1942

Voltages, Practical Calculation of Circuit Transient Recovery. Adams, Skeats, Van Sickle, Sillers.....771–9; disc. 1017 1942

Voltages Produced by the Current-Limiting Power Fuse, Control of the Switching Surge. Williams, Schuck.....214–17; disc. 678 1941

Voltages, Rural Distribution. Edmunds, Roloson.....1324–6; disc. 1326 1948

Voltages Through 138 Kv, A New High-Interrupting-Capacity Fuse for. Fahnoe.....630–5; disc. 937 1943

Voltages, Transmission of Electric Power at Extra High. Sporn, Monteith.....1571–7; disc. 1577 1947

Voltages, Utilization. Seelye.....147–51; disc. 430 1942

Voltages With D-C Arc Interruption for Aircraft, Peak. Phillips, Mitchel.....944–9 1944

Voltmeter, A Corona. Widmer..940–1 1945

Voltmeter, A New Expanded Scale A-C. Millar.....641–3 1949

Voltmeter for Measurements Between 20 and 20,000 Cycles, A Precision Electrothermic. Hermach..1224–7 1948

Voltmeters, Frequency Compensated A-C Ammeters and. Whittenton, Wilkinson.....761–4 1946

Voltmeters, The Calibration of Ignition Crest. Davis, Warren.....99–104; disc. 104 1947

Volts and Below, Design Fundamentals of Potheads 69,000. Nicholas.....1263–7; disc. 1267 1949

Volts, Magnetic "De-ion" Air Breaker for 2,500–5,000. Ludwig, Nau.....518–22; disc. 1125 1940

W

Wallenpaupack-Siegfried 220-Kv Line of Pennsylvania Power and Light Company, Lightning Investigation on. Bell, Packer.....196–20 1942

War Emergency Pipe-Line Projects, Electric Equipment for the. Thomas, Taylor, Wolfe...396–405 1944

War Emergency, The Rating of Power Transformers as Determined by the. Salsbury, Phillips.....255–60; disc. 452 1943

War Plant, Modern Electric-Power-Distribution Ideas, as Applied in a Large. Kaufmann, Kieb.....279–87; disc. 488 1945

War Service, Design Considerations in Aircraft Instruments to Meet. Savage, Whittenton.....992–8; disc. 1419 1944

War II, The German Electrical Utility Industry During World. Noest.....1037–47; disc. 1047 1947

Ward-Leonard Control for Shovels and Draglines, Evolution of. Stevens..1491–7 1948

Wartime, Application of Lightning Protective Devices in. Gross.....173–5; disc. 441 1943

Wartime Conductor Temperatures for Power Cables in Service, Guide for. (Committee Report).....606–10; disc. 942 1943

Wartime, Electric-Power Distribution Systems in. Sporn.....105–07; disc. 432 1942

Wartime Necessities, Distribution Substations and. Poage, Reid.....117–22; disc. 432 1942

Wartime, Overhead Distribution Systems in. Cole...123–6; disc. 432 1942

Wartime Plant Expansion, A Distribution System for. McKeever.....862–5; disc. 1385 1941

Wartime, Power Supply to Distribution Substations in. St. Clair.....112–17; disc. 432 1942

Wartime Projects, Estimating Electric Loads for Military-Training Bases, Federal Housing and Other. Potts.....246–54; disc. 463 1943

Wartime, Report on Application of Lightning Protective Devices in. (Committee Report).....586–8; disc. 952 1943

Wartime, Transmission-Line and System Problems in Supplying Large Electric-Arc Furnaces During. Jones.....197–202; disc. 392 1943

Wartime, Underground Distribution Systems in. Gaty.....107–12; disc. 432 1942

Washing, Tests and Developments in Connection With Hot-Line Insulator. Hill.....1203–16 1947

Washington Area, Design and Experience With 4-Kv Primary Network Systems in the. Lank.....712–16; disc. 716 1949

Water, A High-Power Oilless Circuit Interrupter Using. Leeds.....85–8; disc. 675 1941

Water, An Instrument for Recording Continuously the Salinity, Temperature, and Depth of Sea. Jacobson.....714–22 1948

Water-Cooled Power Transformers, Temperature Rise of. Meador.....18–21 1946

Water-Cooled Steel-Tank Rectifier Corrosion Problem, The. Remscheid.....173–8; disc. 753 1941

Water in Relation to Use in Circuit Interrupters, Dielectric Strength of. Slepian, Denault, Strom.....389–95; disc. 631 1941

Water Solution in High-Voltage Dielectric Liquids. Clark.....433–41; disc. 1192 1940

Water Tanks Using Aluminum Anodes, Cathodic Protection of Steel. Sudrabin, Mears.....197–200 1947

Water Wheel Generators, Modern Bearing Practice for Vertical. Laffoon, Baudry.....363–9; disc. 369 1947

Waters, Galvanic Corrosiveness of Soil. Phelps, Kahn.....156–9; disc. 482 1945

Watt-Demand Meter, Theoretical Possibilities in an Internally Heated Bimetal Type of Thermal. Lynch.....764–70; disc. 986 1942

Watt-Hour Meter, A Variable-Register-Ratio. Shuck.....76–8 1939

Watt-Hour-Meter Bearings, Effect of Sapphire-Crystal Orientation on the Wear of. Goss.....811–14; disc. 1336 1941

Watt-Hour-Meter Performance With Power Rectifiers. Weller, Trekell, Stebbins.....449–57; disc. 1184 1940

Watt-Hour Meter Rotor, Magnetic Suspension of the. Trekell, Mendelsohn, Wright...1180–5; disc. 1185 1948

Watt-Hour Meter, Surge Protection in a Modern. Busch, Williams.....74–7; disc. 77 1949

Watt-Hour Meters, Aluminum-Nickel-Cobalt Brake Magnets for. Green.....791–6; disc. 796 1939

Watt-Hour Meters at No Load, The Anomalous Behavior of the Moving Systems of Single-Phase A-C. Holtz.....116–21; disc. 121 1940

Watt-Hour Meters, Braking Magnets for. Kinnard, Goss.....431–9; disc. 653 1941

Watt-Hour Meters, Magnetic Fields in. Keener, Faucett, Helm.....202–05; disc. 758 1941

Watt-Hour Meters on Intermittent Loads, The Accuracy of. Faucett, Keener, Helm...460–4; disc. 1184 1940

Wattmeter, A New High-Speed Thermal. Miller.....37–40; disc. 633 1941

Wattmeter Combination for the Accurate Measurement of Watts and Vars, An Amplifier-. Brown, Cahoon.....593–7; disc. 597 1939

Wattmeter of the Shunted Type, An Improved Type of D-C. MacGahan.....4–7; disc. 633 1941

Wave Analysis, A Cathode-Ray Method of. Johnson...1032–6; disc. 1398 1941

Wave and to the Harmonics, Differential Leakage With Respect to the Fundamental. Liwschitz.....1139–50 1944

Wave Form, Its Determination and Standardisatior, History of A-C. Bedell.....864–8; disc. 1071 1942

Wave Form on Let-Go Currents, Effect of. Dalziel.....739–44; disc. 998 1943

Wave Forms of Controlled Rectifier Circuits, A Graphical Analysis of the Voltage and Current. Chin, Moyer.....501–08 1944

Wave Indicator, An Automatic Standing-. Allen.....1299–1302 1948

Wave Propagation, The Role of the Ionosphere in Radio. Dellinger.....803–22 1939

Wave Shape of 30- and 60-Phase Rectifier Groups. Marti, Taylor.....218–24; disc. 224 1940

Wave Shapes and Power Factor, The Effect of Overexciting Transformers on System Voltage. Butler, Pope.....49–53; disc. 656 1941

Wave Shapes for Radio-Noise-Meter Calibrations, A Study of. Frick.....890–901; disc. 969 1945

Wave Windings, Balanced Fractional-Slot. Liwschitz.....676–8 1948

Wave Windings, Doubly Chorded or Doubly Shifted Fractional-Slot Lap and. Liwschitz.....684–6 1948

Waves and Chopped Waves on Transformers, A Study of the Relative Severity of Steep Front. Vogel.....64–6; disc. 66 1947

Waves in Coils and Windings, Performance of Traveling. Rudenberg.....1031–40; disc. 1257 1940

Waves Initiated by Switching, Traveling. Bewley.....18–26; disc. 26 1939

Wear, Effects of Silicone Vapor on Brush. Marsden, Savage.1186–90 1948

Weather on the System Load, The Effect of. Dryar.....1006–13; disc. 1364 1944

Weather Soundings by Radio, Upper-Air. Diamond, Hinman, Dunmore, Lapham.....321–8 1940

Weld, Resistance of the Spot. Ciganek.....997–1002 1940

Welder Control, Simplified Precision Resistance. Roby.....528–32; disc. 532 1939

Welder Throat Loaded With Ferromagnetic Materials, The Voltage Drop in the. Stein.....356–62 1947

Welders, An Electronic Control Circuit for Resistance. Gray, Breyer.....361–4; disc. 364 1939

Welders, Line Drop Produced by Resistance. Longini.....619–23; disc. 963 1945

Welders, Power Supply for Single-Phase Resistance. Wright.....705–07; disc. 707 1939

Welders, The Application of Series Capacitors to Flash. Deffenbaugh.....686–7 1946

Welders With Reference to Electrode Freezing, Investigation of Arc Starting Characteristics of D-C. Tyrner.....97–9; disc. 511 1946

Welding, An Improved Electronic Control for Capacitor-Discharge Resistance. Bichsel, Hughes.....1150–7; disc. 1384 1944

Welding, Application of Quality Control to Resistance. Hobson, Inglis, McCants.....573–5; disc. 951 1945

Welding Arc, Instrumentation for the Evaluation of the Stability of the. Winsor, Schetky, Wyant...525–33 1949
Welding Characteristics of Resistance Welding Machines, Influence of Magnetic Materials on the. Riley, Smith.....852–60; disc. 1160 1946
Welding Control, Automatic Voltage Compensator for Resistance. Callender, Phair....701–05; disc. 921 1943
Welding Control, Functionalized Resistance. Stadum, Large, Hartwig. 414–18 1947
Welding Control, The Application of Ignitrons to Resistance-. Bivens.. .....471–8; disc. 655 1941
Welding Current, The Measurement of Spot-. Hess, Wyant, Muller..... .....349–53; disc. 353 1940
Welding Generators and Transformers, The Service Factor Rating of Arc-. Freeman, Welch.137–41; disc. 726 1941
Welding Load Outgrows the Distribution Power Supply, When the. Clark, Stearns....645–8; disc. 964 1945
Welding Loads, Voltage Changes Caused by Resistance. Johnson, Peterson, Rhoades..... .....664–73; disc. 674 1947
Welding Machine and Power Supply, Resistance. Smith..... .....995–1003; disc. 1003 1948
Welding-Machine Starter and Its Relation to Maximum Utilisation of Power and Facilities, The Automatic. Porter..728–30; disc. 996 1943
Welding Machines by Series Capacitors, Power-Factor Correction of Resistance-. Levoy..... .....1002–09; disc. 1102 1940
Welding Machines, Power Supply for Resistance-. (Committee Report): Parts I and II.....306–20 1940
Part III.....185–92 1941
Welding, Measurement and Effect of Contact Resistance in Spot. Wyant.....26–33; disc. 513 1946
Welding Power Distribution, The Design of Low-Voltage-. Adams, Fetcher, Johnson..... .....1180–90; disc. 1382 1944
Welding, Power Supply for A-C Arc. Welch, Wyer...116–20; disc. 435 1945
Welding Reactors, Analysis of Arc-. Wheeler.....87–90; disc. 434 1945
(Welding) The A-C Arc Progresses. Holslag.....364–7; disc. 367 1939
Welding, The Power-Distribution Problem in Arc. Pierce, Smith..... .....178–84; disc. 435 1945
Welding Tools, Electrical Characteristics of Resistance. Callender..... .....393–404 1947
Welding Transformers, Capacitor Stabilisation of Arc-. Blankenbuehler, Lester.....54–5 1946
Welding Transformers, Characteristics of Resistance. Murray, Jones..... .....726–8; disc. 1152 1946
Welding Transformers, Design and Measurements of Capacitor Discharge. Diets, Stein..... .....154–9; disc. 512 1946
Welding Transients, Resistance. Kimberly.....94–5 1942
Welds, Predetermination of Temperatures in Resistance. Johnson.... .....845–53; disc. 853 1939
Well Drilling, Performance of Diesel Electric Rig for Deep. Clark, Moore.....497–506 1949
West Penn Power Company, Lightning Investigation on the 25-Kv System of the. Bowen, Beck..... .....831–6; disc. 836 1947
Western Union Multiplex to Navy Radio, The Application of. Hoover. 1478–82 1947
Western Union Teletape Facsimile. Pollard.....511–15 1948
What Wood May Add to Primary Insulation for Withstanding Lightning. Lusignan, Miller..... .....534–40; disc. 1177 1940
Wheatstone Bridge to High-Speed Train Braking, A Unique Application of the. Hines.....360–2 1948
Wide-Band D-C Amplifier Stabilized for Gain and for Zero. Williams, Amey, McAdam.811–15; disc. 815 1949
Wide-Band Frequency-Modulated Television Relays, The Application of Heterodyne Modulation to. Boothroyd.....1126–30 1947
Wide-Band Square-Wave Generator, A. Bartelink.....371–6 1941
Wide-Band Telephone and Pulse Transformers, Applications of Thin Permalloy Tape in. Gans.177–83 1946
Wide-Range Adjustable-Speed Drive, A. Conrad, Tribken.....789–90 1949
Wide Speed Ranges, Electrical Drives for. Caldwell, Formhals.....54–6 1942
Wilson Dam, Generator Damper Windings at. George, Bessesen..... .....166–71; disc. 171 1939
Winch Control for Use on Victory Ships, Modern Cargo-. Holt..... .....623–8; disc. 1411 1944
Wind Tunnel at Wright Field, Dayton, Ohio, Variable-Speed Drive for United States Army Air Corps. Dickey, Laffoon, Kilgore..... .....126–30; disc. 456 1942
Wind-Tunnel Drive, Large Adjustable-Speed. Clymer..156–8; disc. 456 1942
Wind Tunnel Drives, A Control System for. Heidenreich..... .....1637–43; disc. 1643 1947
Wind Tunnel, Electric Equipment for Cornell Variable Density. Clymer, deFerranti.....554–63 1946
Wind-Tunnel Model Suspension System, Electric Equipment Required in a Modern 6-Compcnent. Cox.. .....1258–66 1947
Winding Capacitor Motors, Performance Calculations on Tapped-. Trickey.....1–3 1943
Winding Deformation on Turbogenerators, Prevention of Rotor-. Noest. .....514–19; disc. 1353 1944
Winding, Differential Leakage of a Fractional-Slot. Liwschitz..314–20 1946
Winding, Differential Leakage of the Different Patterns of a Fractional Slot. Liwschitz..... .....1129–31; disc. 1131 1949
Winding, Distribution Factors and Pitch Factors of the Harmonics of a Fractional-Slot. Liwschitz..... .....664–6; disc. 926 1943
Winding-Fault Detection and Location by Surge-Comparison Testing. Moses, Harter..499–503; disc. 945 1945
Winding, Oscillations of a High-Voltage Secondary. Boyajian.....1010–20 1946
Winding Temperatures Continuously With the Transformer Carrying Load, Measuring Transformer. Lockie, Stein..1608–16; disc. 1616 1948
Winding Temperatures in Self-Cooled Oil-Insulated Transformers, Hot-Spot. Vogel, Narbutovskih..... .....133–6; disc. 418 1942
Winding Transformer, A Useful Equivalent Circuit for a Five-. Aicher.... .....66–70; disc. 385 1943
Winding Transformer Ring-Bus Characteristics, Three-. Bills, MacArthur.....848–9; disc. 1066 1942
Windings and Associated Circuits, Overvoltage Protection of Current-Transformer Secondary, Kaufmann, Camilli.....467–72; disc. 919 1943
Windings and Cores, Wound and Dummy-Rotor Methods of Quality Control and Trouble Shooting of Induction-Motor. Trickey..... .....842–4; disc. 998 1945
Windings at Wilson Dam, Generator Damper. George, Bessesen..... .....166–71; disc. 171 1939
Windings, Balanced Fractional-Slot Wave. Liwschitz.....676–8 1948
Windings, Doubly Chorded or Doubly Shifted Fractional-Slot Lap and Wave. Liwschitz.....684–6 1948
Windings, Effective Resistance to Alternating Currents of Multilayer. Bennett, Larson..... .....1010–17; disc. 1262 1940
Windings for Single-Phase Induction Motors, Starting. Veinott..... .....288–94; disc. 499 1944
Windings for Split-Phase Motors, Design of Starting. Lloyd, Karr..9–13 1944
Windings, Fractional-Slot and Dead-Coil. Malti, Herzog..... .....782–94; disc. 1079 1940
Windings, Hot-Spot Temperatures in Dry-Type Transformer. Stewart, Whitman.....763–8; disc. 1445 1944
Windings, Insulation Resistance and Dielectric-Absorption Characteristics of Large A-C Stator. Askey, Johnson.....347–51; disc. 458 1945
Windings, Insulation Testing of Electric. Foust, Rohats..... .....203–06; disc. 454 1943
Windings, Methods of Determining Natural Frequencies in Coils and. Bewley, Hagenguth, Jackson..... .....1145–50; disc. 1361 1941
Windings of Rotating Machines, The Magnetomotive Force of 2-Layer. Stein.....756–8 1947
Windings, Performance of Traveling Waves in Coils and. Rudenberg.. .....1031–40; disc. 1257 1940
Windings, The Application of Surge Comparison Testing Equipment to Fractional Horsepower A-C Stator. Buchanan.....1356–8 1947
Window Deicing, Control and Power Systems for Aircraft. Mershon.... .....1400–05 1947
Windshields, Electrical Anti-icing of Aircraft. McCrumm.....786–91 1946
Windup Reels, An Electronic Drive for. Puchlowski....585–91; disc. 1155 1946
Wire, A B-H Curve Tracer for Magnetic Recording. Long, McMullen. .....146–50; disc. 494 1946
Wire and Cable, Short-Time Current Ratings for Aircraft. Jones, Scott. .....644–8; disc. 1135 1946
Wire and Cable, Statistical Methods as Applied to the Manufacture and Testing of. Woolfson..... .....752–4; disc. 754 1948
Wire Applications, Frequency Shift Telegraphy—Radio and. Davey, Matte.....479–93; disc. 493 1947
Wire Circuits for Protective Relaying—Experience and Practice, Pilot-. (Committee Report)..... .....210–14; disc. 380 1943
Wire, High Voltage D-C Testing of Rubber-Insulated. Eddy, Fenn... .....576–8; disc. 1126 1946
Wire Insulation, Asbestos and Glass-Fiber Magnet-. Mathes, Stewart. 290–4 1939
Wire Lines, Television Transmission Over. Strieby, Wents..... .....1090–6; disc. 1311 1941
Wire Recorder Head Design, A New. Long.....216–20; disc. 495 1946
Wire Relaying on a Metropolitan System, Pilot-. LeClair, Michelson... .....511–15; disc. 974 1943
Wire Spans Using Catenary Formulas, Sag and Tension Calculations for Cable and. Nash, Nash..... .....685–92; disc. 984 1945
Wire, Surge Characteristics of a Buried Bare. Sunde..987–91; disc. 1180 1940
Wire, Thermal Rating of Overhead Line. Zucker...501–07; disc. 918 1943

Wires and Phase Conductors, The Effect of Corona on Coupling Factors Between Ground. McCann... .....818–26; disc. 940 1943
Wires Carrying a Potential, Causes of Corrosion of Fine Copper. Stephens, Gehrenbeck..... .....357–60; disc. 360 1940
Wires From Induced Potentials, Protection of Pilot. Killen, Law. 267–70 1946
Wires in High-Resistance Soil on Consumers Power Company 140-Kv System, Study of Driven Rods and Counterpoise. Hemstreet, Lewis, Foust.....628–34; disc. 1000 1942
Wiring Installations in British Aircraft, Electric-. Horn.....896–900 1944
Wood and Laminated Hydrolyzed-Wood and Paper-Base Plastics, The Electrical Resistivity of Resin-Treated. Weatherwax, Stamm... .....833–8 1945
Wood May Add to Primary Insulation for Withstanding Lightning, What. Lusignan, Miller. 534–40; disc. 1177 1940
Wood-Pole Line Insulation, Lightning and 60-Cycle Power Tests on. Bellaschi.....838–47; disc. 847 1947
Wood-Pole Lines, Lightning Investigations on 33-Kv. Andrews, McCann.....768–77; disc. 954 1945
Wood-Pole Lines, Lightning Protection of. Sels, Gothberg. 328–31; disc. 331 1940
Wood-Pole Transmission Lines, Ten Years' Performance of Lightning-Resistant. Schahfer, Knuts..... .....934–40; disc. 940 1948
Wood-Pole 230-Kv Transmission Lines. Clark.....94–7 1943
Wood Structures by Leakage Currents, Burning of. Ross..... .....279–84; disc. 285 1947
Wood Transmission Lines, Comparative Performance Records—Steel and. Booker.....686–9; disc. 689 1949
World War II, Military Teletypewriter Systems of. Singer....1398–1408 1948
World War II, The German Electrical Utility Industry During. Noest. .....1037–47; disc. 1047 1947
World's Fair, Lighting the New York. Engelken.....1288–1305 1940
World's Largest Induction Motor, Precision Speed Control for. Longwell, Reagan....634–8; disc. 1050 1942
Wound and Dummy-Rotor Methods of Quality Control and Trouble Shooting of Induction-Motor Windings and Cores. Trickey..... .....842–4; disc. 998 1945
Wound Rotor Induction Motors, The Liquid Rheostat for Speed Control of. McFarland, Alvares..... .....603–09; disc. 609 1948
Wright Field, Dayton, Ohio, Variable-Speed Drive for United States Army Air Corps Wind Tunnel at. Dickey, Laffoon, Kilgore..... .....126–30; disc. 456 1942
Wye-Grounded-Primary Broken-Delta-Secondary Transformer Circuits, Criteria for Neutral Stability of. Shott, Peterson..... .....997–1002; disc. 1394 1941

X

X-Ray Thickness Gauge for Cold-Rolled Strip Steel. Lundahl.....83–90 1948
X-Ray Thickness Gauge for Hot-Strip Rolling Mills, An. Clapp, Pohl... .....620–6 1948
XY Dial Telephone System, The Stromberg-Carlson. Reed.....432–8 1947

Y

York and Middletown, Pa., Linear Couplers—Field Tests and Experience at. Harder, Klemmer, Neidig.....107–13 1946

Z

Zero and Gain, D-C Amplifier Stabilized for. Williams, Tarpley, Clark.... .....47–57 1948
Zero by Means of Mathematical Models, A Study of A-C Arc Behavior Near Current. Browne.... .....141–50; disc. 150 1948
Zero, Wide-Band D-C Amplifier Stabilized for Gain and for. Williams, Amey, McAdam. 811–15; disc. 815 1949
